STAT 6202	Mathematical Statistics II	
STAT 6223	Bayesian Statistics: Theory and Applications	
STAT 8257	Probability	
STAT 8258	Distribution Theory	
STAT 8263	Advanced Statistical Theory I	
STAT 8264	Advanced Statistical Theory II	
At least two of the following:		
STAT 6218	Linear Models	
STAT 8226	Advanced Biostatistical Methods	
STAT 8259	Advanced Probability	
STAT 8262	Nonparametric Inference	
STAT 8265	Multivariate Analysis	
STAT 8273	Stochastic Processes I	
STAT 8274	Stochastic Processes II	

STAT 8281	Advanced Time Series Analysis
A minimum of 21 additional credits as determined by consultation with the departmental doctoral committee	
The General Examination, consisting of two parts:	
A. A written qualifying examination that must be taken within 24 months from the date of enrollment in the program and is based on:	
STAT 6201	Mathematical Statistics I
STAT 6202	Mathematical Statistics II
STAT 8257	Probability
STAT 8263	Advanced Statistical Theory I
B. An examination to determine the student’s readiness to carry out the proposed dissertation research	
A dissertation demonstrating the candidate’s ability to do original research in one area of probability or statistics.	

DUAL MASTER OF SCIENCE IN THE FIELD OF STATISTICS AND GRADUATE CERTIFICATE IN THE FIELD OF DATA SCIENCE

The Department of Statistics works in conjunction with the Department of Data Science to offer a dual master of science in the field of statistics and graduate certificate in data science (p. 211) degree program. The combined program allows students to take 6 graduate credits as part of master’s degree, thereby decreasing the number of credits normally required for the master's. All requirements for both programs must be fulfilled.

Visit the Department of Statistics website (<https://statistics.columbian.gwu.edu/>) for additional information.

MASTER OF SCIENCE IN THE FIELD OF STATISTICS

The Master of Science in Statistics program is ideal for students who are preparing for professional positions or doctoral programs in statistics and other quantitative fields.

Thesis and non-thesis options (<https://statistics.columbian.gwu.edu/ms-statistics/#thesis>) are available, and students may enroll full time or part time. Use of statistical software packages, available in all university computer labs, is required for most courses.

The MS is a STEM-designated degree program.

REQUIREMENTS

General prerequisite: coursework in multivariate calculus, matrix theory, and at least two undergraduate statistics courses.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 77).

30 credits. For non-thesis option—6 credits in required courses and 24 credits in elective courses. For thesis option—12 credits in required courses, including 6 credits in thesis, and 18 credits in elective courses.

Code	Title	Credits
Required		
STAT 6201	Mathematical Statistics I	
STAT 6202	Mathematical Statistics II	
Required for students pursuing the thesis option		
STAT 6998	Thesis Research	
STAT 6999	Thesis Research	

Electives

For non-thesis option: 24 credits in electives, at least 18 of which must be in STAT courses. For thesis option: 18 credits in electives, at least 12 of which must be in STAT courses.

Elective courses outside statistics may be taken in related fields, such as economics, mathematics, finance, management, computer science, engineering, public health, and data science.

*Students must have departmental approval in order to pursue the thesis option.

MINOR IN STATISTICS REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 9 credits in required courses and 9 credits in elective courses.

Code	Title	Credits
Required:		
One of the following introductory courses:		
STAT 1051	Introduction to Business and Economic Statistics	
STAT 1053	Introduction to Statistics in Social Science	

STAT 1111	Business and Economic Statistics I
STAT 1127	Statistics for the Biological Sciences
Both of the following courses:	
STAT 2118	Regression Analysis
or STAT 2123	Introduction to Econometrics
STAT 2183	Intermediate Statistics Lab/Packages
or STAT 4197	Fundamentals of SAS Programming for Data Management

Electives

Three courses (9 credits) of approved Statistics (STAT) courses.

THEATRE AND DANCE

The Theatre and Dance Program, an interdisciplinary liberal arts program, offers instruction in how to acquire the tools and knowledge to fully appreciate the value of these performance art forms. Students strengthen their ability to apply critical thinking and discussion to the creation and understanding of theatre and dance, as well as the understanding of other peoples and cultures. The curriculum is supplemented as students create live performances and original productions that stimulate and involve the university community, as well as the community beyond the campus. Through creative endeavor and scholarly research, the program also develops the interests and talents of students seeking careers or advanced study in theatre and dance.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in theatre (p. 501)
- Bachelor of Arts with a major in dance (p. 499)

Minors

- Minor in theatre (p. 504)
- Minor in dance (p. 503)

GRADUATE

Master's programs

- Master of Fine Arts in the field of dance (p. 502)
- Master of Fine Arts in the field of production design (p. 503)

FACULTY

Professors D.T.S. Burgess, C.F. Gudenius, M.R. Withers

Associate Professors M.A. Buckley, S. Johannesdottir, J.I. Kanter, M.R. Wilson

Assistant Professors J. Traub, T.W. Wetenhall

Adjunct Professors T. Beckman, A.C. Stokes

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: Courses in the 1000s series are primarily for nonmajors.

Departmental prerequisite: Prerequisite to all graduate TRDA courses: M.F.A. candidacy and permission of instructor.

TRDA 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the Schedule of Classes for more details.

TRDA 1015. Understanding the Dance. 3 Credits.

The art of dance—a lecture and experiential approach to its cultural importance, history, and creative processes. The contributions of the choreographer and dancer to society. Attendance at performances and presentations, and viewing video. Laboratory fee.

TRDA 1020. Women and the Creative Process. 3 Credits.

Consideration of questions of aesthetics and creativity through the study of art produced by women since the mid-twentieth century. The creation, meaning, and impact of work across the fields of visual art, dance, theatre, and music.

TRDA 1021W. The Artist-Activist. 3 Credits.

The modern and contemporary history of work by seminal artists who challenge political and societal structures and advocate for social change. Restricted to students enrolled in the women's leadership program. Prerequisites: TRDA 1020 or CTAD 1020. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

TRDA 1025. Understanding the Theatre. 3 Credits.

The art of the theatre; its literature, history, aesthetics, and mechanics. Contributions of the playwright, actor, director, and designer. Attendance at assigned theatrical performances.

TRDA 1035. Theatre Production. 3 Credits.

Understanding of the basic elements of theatrical production and the collaborative artist/artisan process through discussion, observation, and practical application. Same As: CTAD 1035.

TRDA 1099. Variable Topics. 1-36 Credits.

TRDA 1151. Beginning/Intermediate Ballet. 1 Credit.

Introduction to modern dance technique inclusive of basic concepts of dynamic alignment, stretch, strength, improvisation and musicality. Laboratory fee.

TRDA 1152. Beginning Modern/Postmodern Dance. 1 Credit.

Introduction to modern dance technique inclusive of basic concepts of dynamic alignment, stretch, strength, improvisation and musicality. Laboratory fee.

TRDA 1153. Beginning/Intermediate Modern/Postmodern Dance. 1 Credit.

Introduction to modern dance technique inclusive of basic concepts of dynamic alignment, stretch, strength, improvisation and musicality. Laboratory fee.

TRDA 1170. Intermediate Modern/Postmodern Dance I. 2-3 Credits.

Recommended for students with previous dance experience in jazz, ballet, hip hop, modern, or other styles. May be repeated for credit. Laboratory fee.

TRDA 1171. Intermediate Modern/Postmodern Dance II. 2-3 Credits.

Continuation of TRDA 1170. Recommended for students with previous dance experience in jazz, ballet, hip hop, modern, or other styles. May be repeated for credit. Laboratory fee. Prerequisites: TRDA 1170 or permission of the instructor.

TRDA 1214. Beginning Acting. 3 Credits.

An introduction to the process of acting. Students learn to make choices using various acting techniques to create characters and learn about the process.

TRDA 1240. Performance Theory. 3 Credits.

Examination of the ways in which the practices and heuristics of performance have been used to understand a wide range of cultural activities; expansion of the notion of aesthetic performance proper to include sources, subjects, and forms historically considered non-dramatic; and underlying questions concerning what performance is, what it does, and what value it holds.

TRDA 1330. Basics of Production Design. 3 Credits.

Basic elements of production design and execution explored through discussion, observation, and practical application. Same As: CTAD 1330.

TRDA 2160. Intermediate Ballet. 2-3 Credits.

Training in movements and steps within the intermediate level ballet lexicon, emphasizing technical skills, stamina, mastery of longer dance sequences, presentation, musicality, and artistry. Permission of the instructor required prior to enrollment.

May be repeated for credit. Laboratory fee. Recommended background: mastery of low intermediate level ballet steps and vocabulary, ability to perform short combinations of dance steps, and competence in basic elements of ballet technique.

TRDA 2172. Intermediate/Advanced Modern/Postmodern Dance I. 2-3 Credits.

May be repeated for credit. Laboratory fee. Prerequisites: TRDA 1171 or permission of the instructor.

TRDA 2173. Intermediate/Advanced Modern/Postmodern Dance II. 2-3 Credits.

Continuation of TRDA 2172. May be repeated for credit. Laboratory fee. Prerequisites: TRDA 2172 or permission of the instructor.

TRDA 2179. Contact Improvisation. 2 Credits.

A movement form that arises from the point of contact between partners who explore gravity, space, and timing in the spontaneous moment-to-moment exchange of the dance. Exploring the improvisational state of body/mind through the use of imagery, tuning the senses, mindfulness practices, and play. Laboratory fee.

TRDA 2180. Movement Improvisation/Performance. 3 Credits.

Exploring the body and its surroundings in movement, use of language, narrative, environments and contexts for creative expression, developing event and performance structures from improvisation. May be repeated for credit. Laboratory fee.

TRDA 2185. Trends in Performance. 3 Credits.

Study of the theory and practice of contemporary performance art movements and artists; political and artistic activism; scripting and scoring to create performance works based on a single art discipline or interdisciplinary arts. Laboratory fee. Credit cannot be earned for this course and MUS 3175.

TRDA 2188. African Dance. 1 Credit.

African/Caribbean dance styles and techniques, with warm-ups and center floor work of long and short movement phrases. Basic/modern/jazz terminology and definitions appropriate to intermediate/advanced/African dance are used. Emphasis on alignment, execution, musical phrasing, and the importance of rhythmic timing and nuance.

TRDA 2189. World Dance. 3 Credits.**TRDA 2190. Gender/Indian Classical Dance. 3 Credits.****TRDA 2191. Dance History. 3 Credits.**

The history of Western theatrical dance from the late eighteenth century to the present. The major choreographers and their dance works through readings, lectures, video, and discussion.

TRDA 2191W. Dance History. 3 Credits.

The history of Western theatrical dance from the late eighteenth century to the present. The major choreographers and their dance works through readings, lectures, video, and discussion. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

TRDA 2192. Repertory/Performance. 1,2 Credit.

Participation in the processes of learning and performing dance repertory or new dance works. Audition required. Laboratory required. May be repeated for credit. Laboratory fee.

TRDA 2193. Dance Styles I. 1-12 Credits.

Forms of theatrical dance other than ballet or modern, including African dance, Angola Capoeira, music theatre, Spanish dance, world dance, Middle Eastern dance, and others. May be repeated for credit provided the topic differs. Laboratory fee.

TRDA 2194. Dance Styles II. 1-12 Credits.

Continuation of TRDA 2193. Forms of theatrical dance other than ballet or modern, including African dance, Angola Capoeira, music theatre, Spanish dance, world dance, Middle Eastern dance, and others. May be repeated for credit provided the topic differs. Laboratory fee.

TRDA 2195. Global Dance History. 3 Credits.

The role of dance globally in relation to socio-cultural and artistic histories. Importance of certain artists and dance forms contextualized by major world events as seen through the geography of immigration. Perspectives from the Americas, Africa, the Middle East, and Asia.

TRDA 2215. Intermediate Acting. 3 Credits.

Students continue to develop acting techniques introduced in TRDA 1214 through scripted scene work. Students learn to make choices through text exploration, use various acting techniques to create characters and develop clear character relationships, and stage completed scenes. Prerequisite: TRDA 1214.

TRDA 2240. Play Analysis. 3 Credits.

Traditional and nontraditional (Aristotelian and non-Aristotelian) approaches to the analysis of dramatic literature; literary and theatrical techniques used by playwrights. Same as ENGL 2240.

TRDA 2250. Dramatic Writing. 3 Credits.

A workshop in playwriting and screenwriting, with emphasis on dramatic structure. Same as ENGL 2250. Recommended preparation: ENGL 1210 and two semesters of literature courses.

TRDA 2339. Theatre Practicum. 1 Credit.

Participation in department mainstage productions in a production or management capacity under the supervision of a member of the faculty. Prerequisite: TRDA 1330. After two practicums have been completed, participation may also include performance positions, for which TRDA 1214 is prerequisite. May be repeated for a total of 6 credits. Laboratory fee.

TRDA 3099. Variable Topics. 1-12 Credits.

TRDA 3131W. Theatre of Social Change. 3 Credits.

Focuses on theatre of social change as practiced in the second half of the twentieth century and in the early twenty-first century; exploring additional case studies from South Africa, Europe, and the United States. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

TRDA 3157. Career Strategies for the Dance Artist. 3 Credits.

Introduction to career opportunities in the performing arts, from performance to arts management. Students undertake a short-term, unpaid internship with a dance artist or dance organization in the greater Washington metropolitan area and design a project that supports advancement of their career goals.

TRDA 3174. Advanced Modern/Postmodern Dance I. 2-3 Credits.

May be repeated for credit. Laboratory fee. Prerequisites: TRDA 2173 or permission of the instructor.

TRDA 3175. Advanced Modern/Postmodern Dance II. 2-3 Credits.

Continuation of TRDA 3174. May be repeated for credit. Laboratory fee. Prerequisites: TRDA 3174 or permission of the instructor.

TRDA 3182. Dance Composition I. 3 Credits.

Problems in structural and conceptual aspects of constructing dances and shaping and forming movement materials. Laboratory fee. Prerequisite: TRDA 2180. Recommended background: TRDA 2185.

TRDA 3183. Dance Composition II. 3 Credits.

Continuation of TRDA 3182. Emphasis on intention and content in making dances. Prerequisite: TRDA 2180; recommended: TRDA 2185. Laboratory fee.

TRDA 3186. Embodied Kinesis for Dance. 3 Credits.

Exploration of bodies in movement through theoretical, experimental, and personal research; techniques for embodiment in the somatic arts. Laboratory fee.

TRDA 3222. Topics in Advanced Acting. 3 Credits.

The actor's approach to various styles and genres and to non-literary theatrical forms. Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Studio fee. Prerequisite: TRDA 2215.

TRDA 3240. Introduction to Dramaturgy. 3 Credits.

Fundamentals of classical and contemporary dramaturgical practice, including analyzing plays, doing research, supporting directors and actors in rehearsal, writing program notes, and leading post-show discussions. Same as ENGL 3240.

TRDA 3245. History of the Theatre I. 3 Credits.

A dramaturg's approach to case studies of theatre in historical context. Ancient Greece through the seventeenth century.

TRDA 3245W. History of the Theatre I. 3 Credits.

A dramaturg's approach to case studies of theatre in historical context. Ancient Greece through the seventeenth century. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

TRDA 3246. History of the Theatre II. 3 Credits.

Continuation of TRDA 3245. A dramaturg's approach to case studies of theatre in historical context. The eighteenth century through the present.

TRDA 3246W. History of the Theatre II. 3 Credits.

Continuation of TRDA 3245. A dramaturg's approach to case studies of theatre in historical context. The eighteenth century through the present. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

TRDA 3250. Intermediate Dramatic Writing. 3 Credits.

A workshop developing scripts for both theatre and film. Same as ENGL 3250. Prerequisite: ENGL 2250 or equivalent. May be repeated for credit with departmental approval.

TRDA 3331. Introduction to Lighting. 3 Credits.

Theories and practical application of lighting for theatre and dance. Laboratory fee. Prerequisite: TRDA 1330.

TRDA 3332. Theatrical Makeup Design. 3 Credits.

Theory and practice in the art of stage makeup design, including latex and crepe hair. Materials fee. Prerequisite: TRDA 1330.

TRDA 3333. Stage Management. 3 Credits.

The role and function of the stage manager in theatrical production. The basic skills needed to begin work in stage management. Emphasis on organization, documentation, and dissemination of information. Prerequisite: TRDA 1330. Laboratory fee.

TRDA 3334. Introduction to Audio Design. 3 Credits.

The basic elements of audio design and production through discussion, observation, and practical application. Laboratory required. Laboratory fee. Prerequisites: TRDA 1330.

TRDA 3335. Introduction to Scene Design. 3 Credits.

Fundamental study of scenic design, including historic overview, basic drawing, and rendering techniques, through the use of various mediums and script analysis. Laboratory fee. Prerequisite: TRDA 1330.

TRDA 3336. Introduction to Costuming. 3 Credits.

History of fashion in Western civilization from ancient Greece to the twentieth century. Fundamental study of costume construction through specific projects. Costume construction. Laboratory fee. Prerequisite: TRDA 1330.

TRDA 3710W. Contemporary Drama. 3 Credits.

Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

TRDA 4184. Choreography and Performance. 1-3 Credits.

Create a dance or a performance work of individual design, including casting, rehearsal procedures, staging aspects, and public presentation. Prerequisite: TRDA 3182; recommended: TRDA 1330, TRDA 2185. May be repeated for credit. Laboratory fee.

TRDA 4204. Personal Aesthetics II: The Environment. 3 Credits.

This course fosters individual investigation of movement research and studio practice in order to develop an individual dance aesthetic. TRDA 6204 Personal Aesthetics – Environment (2-3) engages the artist/student in creative activities general related to alternative spaces and events related to “live” art, performance art, dance and related arts with less formal production/presentation elements. Prerequisites: M.F.A. candidacy or permission of instructor. (Same as TRDA 6204).

TRDA 4275. Directing for the Theatre. 3 Credits.

Fundamentals of script analysis, staging, casting, and rehearsal techniques. Laboratory fee. Prerequisites: TRDA 1214 and TRDA 1330; and TRDA 2240/ ENGL 2240 or TRDA 3240/ ENGL 3240.

TRDA 4338. Scene Painting. 3 Credits.

The techniques and materials used in creating character in the various elements of set design. Methods include set preparation, coating, mixing, palette preparation, spraying, transfer, texturing, finishing, and wallpapering. Prerequisite: TRDA 1330. Laboratory fee.

TRDA 4595. Selected Topics. 1-3 Credits.

Topics of current interest in theatre or dance. Topics (and course fee, when charged) announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

TRDA 4595W. Selected Topics. 1-3 Credits.

Topics of current interest in theatre or dance. Topics (and course fee, when charged) announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Laboratory fee.

TRDA 4596. Independent Study. 1-6 Credits.

Independent research and special projects. Open to qualified juniors or seniors majoring or minoring in theatre or dance. Before students are permitted to register for TRDA 4596, they must submit a written proposal of the plan of study and obtain approval of the faculty member who is directing the study and the department chair.

TRDA 4597. Senior Project. 3 Credits.

A capstone project related to the student's particular concentration. The project may be in the form of a performance, theoretical or realized design for the theatre, directorial project, playscript, stage management experience, dramaturgical project, choreographic project, or other approved area. Restricted to TRDA majors with senior standing.

TRDA 4598. Internship. 3-6 Credits.

Open to qualified seniors majoring or minoring in theatre or dance. Work placements with not-for-profit and commercial theatre and dance organizations for an approved number of hours per week. May be taken for a maximum of 6 credits. Restricted to permission from the department.

TRDA 4599. Honors Thesis. 3 Credits.

Directed research and/or creative project. Open to qualified seniors by permission. Arrangements must be made with a sponsoring faculty member in the department and applications must be completed early in the second semester of the junior year.

TRDA 5099. Variable Topics. 1-99 Credits.**TRDA 6200. Portfolio I: Performance. 1-5 Credits.**

Portfolio I: Performance Prerequisites: M.F.A. candidacy and permission of instructor.

TRDA 6201. Personal Aesthetics I: The Body. 5 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6202. Contemporary Dance History and Criticism. 4 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6203. Portfolio II: Choreography/Creativity. 1-5 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6204. Personal Aesthetics II: The Environment. 2 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6205. Choreography. 4 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6206. Dance Pedagogy. 4 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6207. Portfolio III: Artistic Initiative. 1-5 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6208. New Media and Dance. 5 Credits.

. Prerequisites: M.F.A. candidacy and permission of instructor.

TRDA 6209. Cultural Communities of Dance. 4 Credits.

Cultural Communities of Dance Prerequisites: M.F.A. candidacy and permission of instructor.

TRDA 6210. Personal Aesthetics III: Integration. 4 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6211. Career Networks in Dance. 4 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6212. Portfolio Review I: Performance. 1-5 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6213. Portfolio Review II: Choreography/Creativity. 1-5 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6214. Portfolio Review III: Artistic Initiatives. 1-5 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6296. Research Project I. 4 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6299. Research Project II. 5 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6330. Materials and Methods. 3 Credits.

Fundamentals of building materials, tools, fabrication techniques, and methodology used in modern stagecraft. Restricted to students in the MFA in production design program or with the permission of the instructor. Recommended background: basic knowledge of theatre production; TRDA1330.

TRDA 6331. Intermediate Lighting Design. 3 Credits.

Theory and execution of lighting design for theatre and dance. May be repeated for credit. Laboratory fee. Restricted to MFA candidates; permission of the instructor may be substituted.

TRDA 6335. Intermediate Scene Design. 3 Credits.

Development of advanced skills of scenic design, including script analysis, needs assessment, research techniques, conceptual design development, drawing and rendering techniques, preparation of construction documentation and fabrication management. Laboratory fee. Restricted to MFA candidates except by permission of the instructor.

TRDA 6336. Intermediate Costume. 3 Credits.

Basic techniques of costume design through specific projects. Various rendering techniques consistent with the historical period concerned. Laboratory fee. Restricted to MFA candidates; permission of the instructor may be substituted.

TRDA 6338. Scene Painting. 3 Credits.

Development the painting skills needed for the reproductive craft of theatrical painting. Restricted to MFA candidacy or permission of instructor.

TRDA 6340. Period Styles. 3 Credits.

A broad perspective of major European and American cultures through analysis of the interiors, furniture, textiles, fashion, and architecture of major civilizations and historical periods from Egypt to the present. Laboratory fee. Restricted to MFA candidates except by permission of the instructor.

TRDA 6342. Pattern Making. 3 Credits.

Pattern drafting and draping methods based on contemporary and historical clothing. Laboratory fee. Restricted to MFA candidacy or permission of instructor.

TRDA 6344. Production Drafting. 3 Credits.

Development of drafting skills for production. Ground plans and shop documents. Traditional hand drafting and computer assisted design. Laboratory fee. Restricted to MFA candidacy or permission of instructor.

TRDA 6346. Advanced Studies in Design: Collaborative Studies. 3 Credits.

Development of the skills needed to design and work within a collaborative or team-based environment through visual and verbal communication, script analysis, concept development, and research techniques. Laboratory fee. Restricted to MFA candidates or instructor's permission.

TRDA 6348. Techniques in Design Presentation. 3 Credits.

The various techniques used in costume and scenic design presentations, such as rendering with paint, pencil, ink, and electronic media. Restricted to MFA candidates; permission of instructor may be substituted.

TRDA 6595. Selected Topics. 1-3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details. Restricted to MFA candidates; permission of instructor may be substituted.

TRDA 6596. Independent Research in TRDA. 1-12 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor. May be repeated for credit.

TRDA 6598. Internship. 1-12 Credits.

Internships with theatre companies or arts organizations, including conference and/or seminar. May be taken for a total of 9 credits. Prerequisites: M.F.A. candidacy and permission of the instructor.

TRDA 6997. Production Design Practicum. 1 Credit.

Guided advanced individual laboratory training and experience; planning and executing complex production assignments with an emphasis on the management of subordinate crew. MFA production design candidates enroll in this course each semester of their program. Restricted to MFA production design students or permission of the instructor.

TRDA 6998. Thesis Research. 3 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6999. Thesis Research. 3 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

BACHELOR OF ARTS WITH A MAJOR IN DANCE

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 77).

Program-specific curriculum:

Code	Title	Credits
Required		
Production design		
3 credits from the following:		
TRDA 1330	Basics of Production Design	
Dance technique		
15 credits from the following:		
TRDA 1152	Beginning Modern/Postmodern Dance	

TRDA 1153	Beginning/Intermediate Modern/Postmodern Dance
TRDA 1170	Intermediate Modern/Postmodern Dance I
TRDA 1171	Intermediate Modern/Postmodern Dance II
TRDA 2172	Intermediate/Advanced Modern/Postmodern Dance I
TRDA 2173	Intermediate/Advanced Modern/Postmodern Dance II
TRDA 3174	Advanced Modern/Postmodern Dance I
TRDA 3175	Advanced Modern/Postmodern Dance II

Creative process, performance, and theory

17 credits from the following:

TRDA 2180	Movement Improvisation/Performance
TRDA 2185	Trends in Performance - Action into Art
TRDA 2192	Repertory/Performance
TRDA 3157	Career Strategies for the Dance Artist
TRDA 3182	Dance Composition I
TRDA 3183	Dance Composition II
TRDA 4184	Choreography and Performance

Electives

4 credits from the following:

TRDA 1000	Dean's Seminar
TRDA 1015	Understanding the Dance
TRDA 1151	Beginning/Intermediate Ballet
TRDA 2160	Intermediate Ballet
TRDA 2188	African Dance
TRDA 2189	World Dance
TRDA 2191	Dance History
or TRDA 2191\	Dance History
TRDA 2193	Dance Styles I
TRDA 2194	Dance Styles II
TRDA 2195	Global Dance History

TRDA 2339	Theatre Practicum
TRDA 3186	Embodied Kinesis for Dance
TRDA 3331	Introduction to Lighting
TRDA 4204	Personal Aesthetics II: The Environment
TRDA 4595	Selected Topics
or TRDA 4595\	Selected Topics
TRDA 4596	Independent Study
TRDA 4598	Internship
TRDA 4599	

GENERAL EDUCATION

In addition to the University General Education Requirement (p. 42), undergraduate students in Columbian College must complete a further, College-specific general education curriculum—Perspective, Analysis, Communication, or G-PAC. Together with the University General Education Requirement, G-PAC engages students in active intellectual inquiry across the liberal arts. Students achieve a set of learning outcomes that enhance their analytical skills, develop their communication competencies, and invite them to participate as responsible citizens who are attentive to issues of culture, diversity, and privilege.

G-PAC approved courses, Dean's Seminars, and Sophomore Colloquia that may be available for registration are listed on the CCAS Advising website (<https://advising.columbian.gwu.edu/general-education-courses/>).

Coursework for the University General Education Requirement is distributed as follows:

- Writing—one approved course in university writing and two approved writing in the disciplines (WID) courses.
- Humanities—one approved course in the humanities that involves critical or creative thinking skills.
- Mathematics or Statistics—one approved course in either mathematics or statistics.
- Natural or Physical Science—one approved laboratory course that employs the process of scientific inquiry.
- Social Sciences—two approved courses in the social sciences.

Coursework for the Columbian College general education curriculum is distributed as follows:

- Arts—one approved course in the arts that involves the study or creation of artwork based on an understanding or interpretation of artistic traditions or knowledge of art in a contemporary context.

- Global or Cross-Cultural Perspective—one approved course that analyzes the ways in which institutions, practices, and problems transcend national and regional boundaries.
- Humanities—one approved course in the humanities that involves critical thinking skills (in addition to the one course in this category required by the University General Education Requirement).
- Local or Civic Engagement—one approved course that develops the values, ethics, disciplines, and commitment to pursue responsible public action.
- Natural or Physical Science—one approved laboratory course that employs the process of scientific inquiry (in addition to the one course in this category required by the University General Education Requirement).
- Oral Communication—one course in oral communication.

Certain courses are approved to fulfill the requirement in more than one of these categories.

Courses taken in fulfillment of G-PAC also may be counted toward majors or minors. Transfer courses taken prior to, but not after, admission to George Washington University may count toward the University General Education Requirement and G-PAC, if those transfer courses are equivalent to GW courses that have been approved by the University and the College.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors in Theatre or Dance, students must have a grade-point average of 3.4 in the major and complete TRDA 4599 Honors Thesis with a grade of A. They must consult a faculty advisor at the beginning of the second semester of the junior year to determine eligibility, area of study, and the director of the research or creative project.

BACHELOR OF ARTS WITH A MAJOR IN THEATRE

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 77).

Program-specific curriculum (minimum of 39 credits):

Code	Title	Credits
Required		
TRDA 1214	Beginning Acting	
TRDA 1240	Performance Theory and Criticism	

TRDA 1330	Basics of Production Design
TRDA 2339	Theatre Practicum (taken six times for a total of 6 credits) *
TRDA 3131W	Performance, Identity, and Social Change
TRDA 3240	Introduction to Dramaturgy
TRDA 3245 or TRDA 3245W	History of the Theatre I History of the Theatre I
TRDA 3246 or TRDA 3246W	History of the Theatre II History of the Theatre II
TRDA 4275	Directing for the Theatre
3 credits in design/technical theatre courses selected from the following:	
TRDA 3331	Introduction to Lighting
TRDA 3332	Theatrical Makeup Design
TRDA 3333	Stage Management
TRDA 3334	Introduction to Audio Design
TRDA 3335	Introduction to Scene Design
TRDA 3336	Introduction to Costuming
TRDA 4338	Scene Painting
6 additional credits in the department selected from the following in consultation with the advisor:	
TRDA 2215	Intermediate Acting
TRDA 2240	Play Analysis
TRDA 2250 or ENGL 2250	Dramatic Writing Dramatic Writing
TRDA 3222	Topics in Advanced Acting
TRDA 4595	Selected Topics
TRDA 4596	Independent Study
TRDA 4598	Internship
TRDA 4597 or TRDA 4599	Senior Project

*The first three enrollments in TRDA 2339, totaling 3 credits, must be in production design.

GENERAL EDUCATION

In addition to the University General Education Requirement (p. 42), undergraduate students in Columbian College must complete a further, College-specific general education curriculum—Perspective, Analysis, Communication, or G-PAC. Together with the University General Education Requirement, G-PAC engages students in active intellectual inquiry across the liberal arts. Students achieve a set of learning outcomes that enhance their analytical skills, develop their communication competencies, and invite them to participate as responsible citizens who are attentive to issues of culture, diversity, and privilege.

G-PAC approved courses, Dean's Seminars, and Sophomore Colloquia that may be available for registration are listed on the CCAS Advising website (<https://advising.columbian.gwu.edu/general-education-courses/>).

Coursework for the University General Education Requirement is distributed as follows:

- Writing—one approved course in university writing and two approved writing in the disciplines (WID) courses.
- Humanities—one approved course in the humanities that involves critical or creative thinking skills.
- Mathematics or Statistics—one approved course in either mathematics or statistics.
- Natural or Physical Science—one approved laboratory course that employs the process of scientific inquiry.
- Social Sciences—two approved courses in the social sciences.

Coursework for the Columbian College general education curriculum is distributed as follows:

- Arts—one approved course in the arts that involves the study or creation of artwork based on an understanding or interpretation of artistic traditions or knowledge of art in a contemporary context.
- Global or Cross-Cultural Perspective—one approved course that analyzes the ways in which institutions, practices, and problems transcend national and regional boundaries.
- Humanities—one approved course in the humanities that involves critical thinking skills (in addition to the one course in this category required by the University General Education Requirement).
- Local or Civic Engagement—one approved course that develops the values, ethics, disciplines, and commitment to pursue responsible public action.
- Natural or Physical Science—one approved laboratory course that employs the process of scientific inquiry (in addition to the one course in this category required by the University General Education Requirement).
- Oral Communication—one course in oral communication.

Certain courses are approved to fulfill the requirement in more than one of these categories.

Courses taken in fulfillment of G-PAC also may be counted toward majors or minors. Transfer courses taken prior to, but not after, admission to George Washington University may count toward the University General Education Requirement and G-PAC, if those transfer courses are equivalent to GW courses that have been approved by the University and the College.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors in Theatre, candidates must have a grade-point average of 3.4 in the major and complete TRDA 4599 Honors Thesis with a grade of A. They must consult with a faculty advisor at the beginning of the second semester of the junior year to determine eligibility, area of study, and the director of the research or creative project.

MASTER OF FINE ARTS IN THE FIELD OF DANCE REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 77).

60 credits in required courses.

Code	Title	Credits
Required		
TRDA 6200	Portfolio I: Performance	
TRDA 6201	Personal Aesthetics I: The Body	
TRDA 6202	Contemporary Dance History and Criticism	
TRDA 6203	Portfolio II: Choreography/Creativity	
TRDA 6204	Personal Aesthetics II: The Environment	
TRDA 6205	Choreography	
TRDA 6206	Dance Pedagogy	
TRDA 6207	Portfolio III: Artistic Initiative	
TRDA 6208	New Media and Dance	
TRDA 6209	Cultural Communities of Dance	
TRDA 6210	Personal Aesthetics III: Integration	

TRDA 6211	Career Networks in Dance
TRDA 6296	Research Project I
TRDA 6299	Research Project II

Portfolio review

Up to 15 credits of accelerated placement for high-level work is possible through three portfolio review courses:

TRDA 6212	Portfolio Review I: Performance (for TRDA 6200)
TRDA 6213	Portfolio Review II: Choreography/Creativity (for TRDA 6203)
TRDA 6214	Portfolio Review III: Artistic Initiatives (for TRDA 6207)

A committee consisting of dance faculty and an outside professional administer the portfolio review, using a strict assessment rubric to assist students with tracking their growth and placement level. Students who qualify for the full 5 credits for any or all of the portfolio review courses (TRDA 6212 Portfolio Review I: Performance, TRDA 6213 Portfolio Review II: Choreography/Creativity, and TRDA 6214 Portfolio Review III: Artistic Initiatives) are not required to take the corresponding portfolio course (TRDA 6200 Portfolio I: Performance, TRDA 6203 Portfolio II: Choreography/Creativity, and TRDA 6207 Portfolio III: Artistic Initiative); students who receive fewer than 5 credits in any review courses must enroll for the remaining credits in the portfolio course(s). Visit the department website (<http://theatredance.gwu.edu>) for additional information.

MASTER OF FINE ARTS IN THE FIELD OF PRODUCTION DESIGN

The Theatre and Dance's production design program aims to unlock students' creativity and help them master the portfolio of practical skills essential for a career as a successful design professional. Part of the arts and humanities discipline in the Columbian College of Arts and Sciences, the program connects students directly to the vibrant arts community of Washington, D.C.

The MFA program offers courses that provide solid artistic training, experiential academic application and a direct opportunity to apply these skills in an intense professional environment. The faculty is composed of professionals with practical knowledge of how to develop a successful career in production design. Each MFA candidate works with the faculty to develop a customized three-year program that emphasizes production design for theater and dance as well as the related arts of film, television, exhibition design and special events. All programs include nine to 18 credits of full-time apprenticeship at a local professional theater, studies

in secondary design areas and cross-discipline training in the allied arts. Concentrations include costume, scenery and lighting design.

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 77).

60 credits planned in consultation with the advisor.

The program of study consists of 60 credits of graduate and upper-division undergraduate coursework in theatre and dance and in art, planned in consultation with the advisor, including a creative thesis (TRDA 6998 Thesis Research and TRDA 6999 Thesis Research). The program may emphasize scenery, lighting, costume, or other relevant production design concentrations. For listings of upper-division undergraduate courses, see the Undergraduate Programs Bulletin.

MINOR IN DANCE REQUIREMENTS

The following requirements must be fulfilled: 18 credits in elective courses.

Code	Title	Credits
Required		
Technique courses -- no more than 9 credits from the following:		
TRDA 1152	Beginning Modern/Postmodern Dance	
TRDA 1153	Beginning/Intermediate Modern/Postmodern Dance	
TRDA 1170	Intermediate Modern/Postmodern Dance I	
TRDA 1171	Intermediate Modern/Postmodern Dance II	
TRDA 2172	Intermediate/Advanced Modern/Postmodern Dance I	
TRDA 2173	Intermediate/Advanced Modern/Postmodern Dance II	
TRDA 3174	Advanced Modern/Postmodern Dance I	
TRDA 3175	Advanced Modern/Postmodern Dance II	
9 or more credits from the following:		
TRDA 1000	Dean's Seminar	

TRDA 1015	Understanding the Dance
TRDA 1330	Basics of Production Design
TRDA 1151	Beginning/Intermediate Ballet
TRDA 2160	Intermediate Ballet
TRDA 2180	Movement Improvisation/Performance
TRDA 2185	Trends in Performance - Action into Art
TRDA 2188	African Dance
TRDA 2189	World Dance
TRDA 2191	Dance History
	or TRDA 2191WDance History
TRDA 2193	Dance Styles I
TRDA 2194	Dance Styles II
TRDA 2192	Repertory/Performance
TRDA 2195	Global Dance History
TRDA 2339	Theatre Practicum
TRDA 3157	Career Strategies for the Dance Artist
TRDA 3182	Dance Composition I
TRDA 3183	Dance Composition II
TRDA 3186	Embodied Kinesis for Dance
TRDA 3331	Introduction to Lighting
TRDA 4184	Choreography and Performance
TRDA 4204	Personal Aesthetics II: The Environment
TRDA 4595	Selected Topics
TRDA 4596	Independent Study
TRDA 4598	Internship

MINOR IN THEATRE REQUIREMENTS

The following requirements must be fulfilled: 21 credits in required and elective courses.

Code	Title	Credits
Required		
TRDA 1330	Basics of Production Design	

TRDA 2339 Theatre Practicum (taken three times for a total of 3 credits)

TRDA 3245 History of the Theatre I
or TRDA 3245W History of the Theatre I

TRDA 3246 History of the Theatre II
or TRDA 3246W History of the Theatre II

Three additional courses (9 credits), at least one of which must be numbered 2000 or above, from the following (Other Corcoran School courses may be accepted through advance petition):

TRDA 1035 Theatre Production

TRDA 1214 Beginning Acting

TRDA 1240 Performance Theory and Criticism

TRDA 2215 Intermediate Acting

TRDA 2240 Play Analysis

TRDA 2250 Dramatic Writing

or ENGL 2250 Dramatic Writing

TRDA 3131W Performance, Identity, and Social Change

TRDA 3222 Topics in Advanced Acting

TRDA 3240 Introduction to Dramaturgy

or ENGL 3240 Introduction to Dramaturgy

TRDA 3331 Introduction to Lighting

TRDA 3332 Theatrical Makeup Design

TRDA 3333 Stage Management

TRDA 3334 Introduction to Audio Design

TRDA 3335 Introduction to Scene Design

TRDA 3336 Introduction to Costuming

TRDA 4275 Directing for the Theatre

TRDA 4338 Scene Painting

TRDA 4596 Independent Study

TRDA 4598 Internship

UNIVERSITY WRITING

The University Writing Program (<https://writingprogram.gwu.edu/>) (UWP) provides comprehensive

writing instruction to and administers the writing requirement for all bachelor's degree-seeking students in all schools and colleges of the University. The UWP is staffed by a multi-disciplinary faculty and is organized into three divisions: First-Year Writing, Writing in the Disciplines, and the University Writing Center.

FACULTY

Professor R. Riedner

Associate Professors L. Abrams, J. Donovan, C. Gamber, G. Mantler (*Executive Director*), D. Malone-France, M. Mullen, P. Ryder, C. Smith, A. Wilkerson

Assistant Professors J. Barlow, S. Friedman, C. Hayes, R. Kristensen, J. McCaughey, K. Quave, H. Schell, M. Svoboda, P. Troutman, Z. Wolfe, C. Zink

Specialized Faculty W. Fletcher, K. Larsen, R. Marcus, D. Myers, P. Presser

Adjunct Professors L. Jacoby, L. McReynolds, R. Pollack, B. Tomlison

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

UW 1010. College Academic English. 3 Credits.

UW 1015. Writing Seminar Summer Scholars. 3 Credits.

UW 1020. University Writing. 4 Credits.

University-level, independent research and writing. Learning to frame research questions, identify and analyze supportive and contradictory evidence, employ a variety of research methods, and use the ideas of other writers appropriately. Developing strategies to draft and revise clear, engaging prose for a variety of purposes and audiences. Thematically oriented seminars; texts and course topics vary among instructors. For topics see <https://writingprogram.gwu.edu/uw1020-courses>. Credit cannot be earned for this course and HONR 1015.

UW 1099. Variable Topics. 1-36 Credits.

UW 2020. Advanced Topics in Writing. 3 Credits.

For a variety of purposes and audiences, students frame scholarly research questions, identify and analyze supportive and contradictory evidence, employ a variety of research methods, and use the ideas of other writers appropriately. Focus on the norms of writing in particular fields, including rhetorical approaches and stylistic conventions.

UW 2020W. Advanced Topics in Writing. 3 Credits.

For a variety of purposes and audiences, students frame scholarly research questions, identify and analyze supportive and contradictory evidence, employ a variety of research methods, and use the ideas of other writers appropriately. Focus on the norms of writing in particular fields, including rhetorical approaches and stylistic conventions. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

UW 2031. Equality and the Law. 3 Credits.

Introduction to how lawyers and legal scholars research and write about specific disputes that arise in the context of complex social issues. The institutional assumptions about the content and style of legal writings. Briefs, legal memoranda, law review articles, resolutions, and many other specialized legal writing forms.

UW 2031W. Equality and the Law. 3 Credits.

Introduction to how lawyers and legal scholars research and write about specific disputes that arise in the context of complex social issues. The institutional assumptions about the content and style of legal writings. Briefs, legal memoranda, law review articles, resolutions, and many other specialized legal writing forms. Include a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

UW 2111. Preparation for Peer Tutors in Writing. 3 Credits.

For undergraduates accepted as tutors in the Writing Center: study and practice of techniques for prewriting, writing, and revision; readings on collaborative learning, the composing process, composition theory, cognitive psychology, critical thinking, and the teaching of writing; observation and exercises in writing, peer review, and tutoring. Limited to 15 students.

UW 2111W. Preparation for Peer Tutors in Writing. 3 Credits.

For undergraduate students accepted as tutors in the Writing Center. Study and practice of techniques for prewriting, writing, and revision; readings on collaborative learning, the composing process, composition theory, cognitive psychology, critical thinking, and the teaching of writing; observation and exercises in writing, peer review, and tutoring. Corequisite: UW 2112. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

UW 2112. Preparation for Peer Tutors in Writing Lab. 1 Credit.

Through required hours scheduled at the Writing Center, students observe and interview peer tutors and conduct peer tutoring sessions to gain experience working with a range of student texts from multiple disciplines across the University, assist peer writers working on a variety of genres, and develop writing consulting techniques from best practices in the field. Concurrent enrollment in UW 2111W is required. Restricted to undergraduate students accepted as tutors in the Writing Center.

UW 6213. Theory and Practice of Teaching Writing. 3 Credits.

WOMEN'S, GENDER, AND SEXUALITY STUDIES

Part of the Columbian College of Arts and Sciences's arts and humanities programs, the Women's, Gender, and Sexuality Studies program examines women's lives, literature, histories, and cultures through the lens of feminist theory and practice, establishing gender and sexuality as fundamental categories of analysis. Gender and sexuality are examined as they intersect with race, class, nationality, and ethnicity. The program strengthens a student's ability to gain knowledge of contemporary feminist theories and research methods, and provides interdisciplinary perspectives from which to study the diversity of the human experience. Classroom study is supplemented by the diverse resources of the nation's capital.

Visit the Women's, Gender, and Sexuality Studies Program website (<https://wgss.columbian.gwu.edu/>) for additional information.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in women's, gender, and sexuality studies (p. 510)

Combined programs

Dual bachelor's and master's programs in Women's, Gender, and Sexuality Studies (p. 513)

- Dual Bachelor of Arts with a major in women's, gender, and sexuality studies and Master of Arts in the field of women's, gender, and sexuality studies
- Dual Bachelor of Arts with a major in women's, gender, and sexuality studies and Master of Arts in the field of public policy with a concentration in women's, gender, and sexuality studies degree programs. (p. 513)

Minors

- Minor in LGBT and sexuality studies (p. 515)
- Minor in women's, gender, and sexuality studies (p. 516)

GRADUATE

Master's programs

- Master of Arts in the field of public policy with a concentration in women's, gender, and sexuality studies (p. 514)
- Master of Arts in the field of women's, gender, and sexuality studies (p. 515)

CERTIFICATE

Certificate program

- Graduate certificate in women's, gender, and sexuality studies (p. 513)

FACULTY

Professor R. Riedner

Associate Professors: K. Daiya (*Director*), C. Deitch, D. Moshenberg, K. Pemberton

Assistant Professors: S. Matthiesen, E. Strader

Executive Committee: A. Ahmad, N. Blyden, E. Chapman, K. Daiya, C. Deitch, I. Ken, S. Matthiesen, M. McAlister, K. Morgan, R. McRuer, D. Moshenberg, K. Pemberton, R. Riedner, E. Strader, G. Weiss.

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: Excluding students enrolled in the Women's, Gender, and Sexuality Studies Program, completion of WGSS 2120 and WGSS 2125 or equivalent, or permission of instructor, is prerequisite to all graduate-level women's studies courses.

WGSS 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the Schedule of Classes for more details.

WGSS 1020. Approaches to Women's History. 3 Credits.

Introduction to major methodological and conceptual debates in women's and gender history, focusing on the United States. (Same as HIST 1020).

WGSS 1099. Variable Topics. 1-36 Credits.**WGSS 2120. Introduction to Women's, Gender, and Sexuality Studies. 3 Credits.**

Key concepts, theories, and perspectives in women's studies, placing women's experiences at the center of interpretation; historical and contemporary perspectives on women's lives, experiences, and thoughts and how gender interacts with race, class, religion, sexual orientation, culture, and politics. Same As: WGSS 2120W.

WGSS 2120W. Introduction to Women's, Gender, and Sexuality Studies. 3 Credits.

A multidisciplinary examination of historical conditions, cultural norms, and social institutions that define women, gender and sexuality in different cultures. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: WGSS 2120.

WGSS 2121. The Anthropology of Gender: Cross-Cultural Perspectives. 3 Credits.

Anthropological representations of gender relations in "other" cultures have provided important case material for feminist theorizing of sex differences and gender roles and statuses. How a cross-cultural approach can inform our understanding of gender. (Same as ANTH 2501).

WGSS 2125. Varieties of Feminist Theory. 3 Credits.

Classical and contemporary texts on feminist explanations of women's status. Relationships within the sex/gender system and arrangements based on class and race. Evaluation, through the lens of feminist theory, of several academic disciplines in the sciences, social sciences, and humanities. Prerequisites: WGSS 1020 or WGSS 2120. Same As: AMST 2125.

WGSS 2135. A Study of Women and Media. 3 Credits.

The role media plays in women's lives; limits and effects of a "dominant" media; representations of women in print media and television, especially advertising, and in books and film; how women have attempted to articulate a culture that serves their personal, political, and social interests.

WGSS 2145. Space, Place, and Gender Identity. 3 Credits.

Space and place as socially-constructed structures; politics of space and bodies from the perspective of gender and sexual minorities; analysis of gender relations through spatial practices; identity-based inequality in the use of space and place.

WGSS 2225. Philosophy of Race And Gender. 3 Credits.

Differing theoretical perspectives on how race, sexuality, gender, class, and ethnicity inform (and re-form) individual as well as group identities; consequences of being marginalized because one is associated with an allegedly inferior race, sex, and/or gender. (Same as PHIL 2125).

WGSS 2380. Sexuality in U.S. History. 3 Credits.

Examination of the changing social organization and meaning of sexual practices and desires in American culture, with particular attention to the relationship between sexuality and gendered racial and class identities and politics. (Same as AMST 2380, HIST 2380).

WGSS 2385. Sex and Citizenship. 3 Credits.

How gender and sexuality have shaped Americans' understanding of citizenship; the state regulation of marriage, reproduction, military service, immigration, and access to other government resources and benefits; the cultural representation of women, LGBTQ individuals, and other sexual and gender minorities as second-class citizens; and the efforts of women, LGBTQ groups, and others to claim full equality in American culture and politics. Same As: AMST 2385.

WGSS 2385W. Sex and Citizenship. 3 Credits.

How gender and sexuality have shaped Americans' understanding of citizenship; the state regulation of marriage, reproduction, military service, immigration, and access to other government resources and benefits; the cultural representation of women, LGBTQ individuals, and other sexual and gender minorities as second-class citizens; and the efforts of women, LGBTQ groups, and others to claim full equality in American culture and politics. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same AMST 2385W. Same As: AMST 2385W.

WGSS 2710. Postcolonialism, Race, and Gender in Global Anglophone Literature and Film. 3 Credits.

How race and gender shaped empire and nationalism in international Anglophone literature and cinema from 1857 to 1960. Feminist, postcolonial, and critical race theory, engaged with modern literature, graphic narratives, and film. Same As: ENGL 2710.

WGSS 3099. Variable Topics. 1-12 Credits.**WGSS 3136. Chinese Women in Myth, Literature, and Film. 3 Credits.**

Women's position in Chinese cultural and political life from prehistoric myth to the present time. Conducted in English. (Same as CHIN 3136).

WGSS 3136W. Chinese Women in Myth, Literature, and Film. 3 Credits.

Women's position in Chinese cultural and political life from prehistoric myth to the present. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Taught in English. (Same as CHIN 3136W, WGSS 3136).

WGSS 3170. Special Topics in Women's, Gender, and Sexuality Studies. 1-3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details.

WGSS 3170W. Selected Topics. 1-3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. See department for more details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

WGSS 3195. Undergraduate Research. 1-3 Credits.

A written proposal approved by the faculty member who supervises the research is required prior to registration.

WGSS 3235. Women and the Law. 3 Credits.

Contemporary legal issues that affect women in the United States; theories and documents relevant to issues such as violence against women, marriage and divorce, employment, immigration, and reproductive rights.

WGSS 3352. U.S. Women's History to 1865. 3 Credits.

History of women in the Americas and in the United States from trans-Atlantic encounters through the Civil War. (Same as HIST 3352, WGSS 3352).

WGSS 3352W. U.S. Women's History to 1865. 3 Credits.

History of women in the Americas and in the United States from trans-Atlantic encounters through the Civil War. (Same as HIST 3352, WGSS 3352) Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

WGSS 3353. U.S. Women's History II. 3 Credits.

Continuation of WGSS 3352. History of women in the Americas and in the United States from trans-Atlantic encounters from 1877 to present. (Same as AMST 3353, HIST 3353).

WGSS 3362. African American Women's History. 3 Credits.

The history of African American women's labor, cultural expression, institution-building, activism, and strategies to combat oppression from the antebellum period through the late 20th century; the intersection of race, gender, and class as it has shaped U.S. society, racism, the black freedom movement, and African American women's experiences. (Same as AMST 3362, AMST 3362W, HIST 3362, HIST 3362W, WGSS 3362W).

WGSS 3362W. African American Women's History. 3 Credits.

The history of African American women's labor, cultural expression, institution-building, activism, and strategies to combat oppression from the antebellum period through the late 20th century; the intersection of race, gender, and class as it has shaped U.S. society, racism, the black freedom movement, and African American women's experiences. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Same as HIST 3362W, AMST 3362W).

WGSS 3410. Lesbian History and Culture. 3 Credits.

Examination of lesbian identity, community, and legal rights from a scholarly feminist perspective.

WGSS 3435. Queer Politics. 3 Credits.

The history of lesbian, gay, bisexual, transgender, and queer (LGBTQ) politics in the United States; influences and intersections of race and ethnicity, class, gender identity and expression, sexuality, sex, and age; contemporary policy debates relevant to queer politics.

WGSS 3470. Sexuality and the Law. 3 Credits.

Exploration of the ways in which the law has affected individuals' ability to express their sexuality, with a primary focus on sexual orientation and issues such as marriage, adoption, voting rights, sexual harassment, and military service.

WGSS 3481. Women in Islam. 3 Credits.

The ways in which Islam has articulated gender identity and male-female relationships, and conversely, how women have constructed, interpreted, and articulated Islam and their places within it. (Same as REL 3481).

WGSS 3530. Women in Africa. 3 Credits.

African women from prehistory to the present, focusing on culture, the role of gender, and outside influences and their impact on women's history. (Same as WGSS 3530W, HIST 3530, HIST 3530W).

WGSS 3530W. Women in Africa. 3 Credits.

African women from prehistory to the present, focusing on culture, the role of gender, and outside influences and their impact on women's history. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Same as WGSS 3530, HIST 3530, HIST 3530W).

WGSS 3730. Topics in Global Postcolonial Literature and Film. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Same As: ENGL 3730.

WGSS 3820. Global Domestic Labor. 3 Credits.

Consideration of women's paid and unpaid domestic labor, including care work, in the context of global and globalizing political and cultural economies.

WGSS 3845. Global Women's Prison. 3 Credits.

Examination of women's confinement and incarceration in the context of global and globalizing political and cultural economies.

WGSS 3881. Women, Gender, and Religion in China. 3 Credits.

Historical introduction to women and men as gendered subjects and the construction of gender and power in Chinese religions. May be taken for graduate credit with extra work assigned. (Same as EALL 3881, REL 3881).

WGSS 3890W. Black Women in the Twenty-First Century. 3 Credits.

An interdisciplinary approach to critical inquiry into the scholarship on, and status of, Black women in North America, the Caribbean, Latin America, and Africa in the twenty-first century; historical, national, and transnational linkages between Black women; responses to intersectionality; analyses, strategies, and actions being deployed by and about Black women in action and scholarship. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

WGSS 3981. Women in Western Religion. 3 Credits.

Historical, theological, and ethical investigation of the image and role of women in Judaism and Christianity. Special consideration of the Biblical experience, the sexual qualifications for religious office, use of male and female images and languages, and contemporary issues. (Same as REL 2981).

WGSS 4183. Practicum in Women's, Gender, and Sexuality Studies. 3 Credits.

Study of the changing status of women, gender, sexuality and social change through supervised placement in public and private agencies engaged in policymaking, education, political action, and research. Usually for seniors. Placement arrangements must be made the semester prior to registration; departmental permission is required.

WGSS 4199. Senior Seminar. 3 Credits.

Examination and analysis of the writings of contemporary scholars and writers whose work provides critical frameworks for feminist scholarship and research. Restricted to juniors and seniors.

WGSS 5099. Variable Topics. 1-99 Credits.

WGSS 6220. Fundamentals of Feminist Theory. 3 Credits.

Historical theories significant to feminist thought, such as liberalism, socialism, evolution, psychoanalysis, and gendered spheres of social action; how these theories were revived and revised by the second wave of feminism since the 1960s; brief examination of postmodernist and third-wave feminist theorizing.

WGSS 6221. Research Issues in Women's, Gender, and Sexuality Studies. 3 Credits.

The contribution of feminist or gender-relations perspectives from humanities and social science disciplines to the issues and methods of social research, policy, and practice; feminist frameworks; critique and re-evaluation of traditional academic disciplines; and analysis of current research on women, gender, and sexuality.

WGSS 6225. Contemporary Feminist Theory. 3 Credits.

Recent developments in feminist theory, with a primary focus on feminism in the United States and its relationship to queer theory and sexuality studies.

WGSS 6230. Global Feminisms. 3 Credits.

The individuals, groups, and policies that shape global agenda for women; local and international fora in which global feminisms are forged.

WGSS 6238. Feminist Ethics and Policy Implications. 3 Credits.

Feminist critiques of traditional ethical reasoning; alternative feminist ethical frameworks examined and applied to contemporary social problems (e.g., respecting cultural differences, dependency, disability). Prerequisites: PHIL 2125 or PHIL 2131. (Same as PHIL 6238).

WGSS 6240. Gender and Public Policy. 3 Credits.

Analysis of gender-related policy issues, primarily in the United States, such as domestic violence, military service, abortion rights, equal employment opportunity, child and dependent care, welfare, social security, and international development assistance.

WGSS 6241. Gender, Law, and Politics. 3 Credits.

The treatment of gender in U.S. law and its implications for public policy; factors that influence the ways in which individuals view and encounter the law; discrimination in the workplace and educational institutions, single-sex education, domestic violence, same-sex marriage, and reproductive rights and responsibilities; legal analysis, and public policy writing. Restricted to graduate students; open to upper-level undergraduates on a case-by-case basis.

WGSS 6251. Women and Writing. 3 Credits.

Selected topics in the traditions, theory, and texts of women's literary production and culture.

WGSS 6257. Gender and Sexuality. 3 Credits.

Study of new theoretical and methodological approaches developed in the anthropology of gender; postcolonialism, sexuality, and literary representations of gender. (Same as ANTH 6501).

WGSS 6265. Women, Welfare, and Poverty. 3 Credits.

How the causes and consequences of poverty differ for women and men; how race, class, and gender shape policy responses to poverty. The history of family assistance policy in the United States and the impact of various welfare reform efforts. (Same as SOC 6265).

WGSS 6266. Gender and Criminal Justice. 3 Credits.

How understandings, practices, and theories of gender shape the workings of criminal justice systems, including issues of criminality and responses to crime, victimization and violence, and definitions of illegal behaviors. (Same as SOC 6266).

WGSS 6268. Race, Gender, and Class. 3 Credits.

How social structures are constructed through race, gender, and class and how they shape experience; the intersections of race, gender, and class in education, science, politics, labor markets, and social welfare policies. (Same as SOC 6268).

WGSS 6270. Seminar: Selected Topics. 3 Credits.

Investigation of a current policy issue of particular concern to women, or consideration of women's status in a particular social system. Topics have included women and health; sexualities; women and Judaism; black women; gender, race, and class. May be repeated for credit. Credit cannot be earned for this course and AMST 6190, PSYC 8279.

WGSS 6271. Gender and Society. 3 Credits.

Current empirical and theoretical work on gender as an organizing principle of social relations; the relationship of gender to sex and sexuality. (Same as SOC 6271).

WGSS 6280. Independent Study. 3 Credits.

May be repeated for credit. Arrangements must be made with sponsoring faculty member prior to registration.

WGSS 6283. Practicum in Women's, Gender and Sexuality Studies. 3,6 Credits.

Study of the changing status of women, gender, sexuality, and social change through supervised placement in public and private agencies engaged in policymaking, education, political action, and research. Placement arrangements must be made the semester prior to registration; departmental permission is required. Graduate students may take the course for either 3 or 6 credits, with substantial additional research and writing of a case study required for 6 credits. (Same as WGSS 4183).

WGSS 6295. Independent Research in Women's Studies. 1-3 Credits.

Individual library or field research. Arrangements must be made with the sponsoring faculty member prior to registration; a written proposal is required.

WGSS 6299. Capstone Research Seminar. 3 Credits.

Designed primarily to ready students for their next pursuit, whether it is academic or non-academic. Assists students in making progress on theses and/or develops a case study related to practicum placement. Restricted to graduate students in the women's, gender, and sexuality studies program. Prerequisites: successful completion of all WGSS core courses and degree requirements.

WGSS 6430. Gender, Sexuality, and American Culture I. 3 Credits.

The changing social organization, cultural representation, and meaning of gender and sexuality in the United States, with emphasis on their relationship to race, class, region, nationality, empire, and globalization. Pre-colonial to 1877. (Same as HIST 6430, WGSS 6430).

WGSS 6431. Gender, Sexuality, and American Culture II. 3 Credits.

Continuation of WGSS 6430. The changing social organization, cultural representation, and meaning of gender and sexuality in the United States, with emphasis on their relationship to race, class, region, nationality, empire, and globalization. 1877 to present. Same as AMST 6431/ HIST 6431.

WGSS 6435. Readings on Women in American History. 3 Credits.

Important works in American women's history; evolution of the field in historiographical context. Same as AMST6435/HIST 6435.

WGSS 6560. Postcolonialism. 3 Credits.

Exploration of aesthetics and politics through global and postcolonial literature and cinema, primarily from the twentieth and twenty-first centuries. Includes legal, theoretical, literary, and film texts. Restricted to graduate students and junior and senior undergraduate students. Same As: ENGL 6560.

WGSS 6998. Thesis Research. 3 Credits.

.

WGSS 6999. Thesis Research. 3 Credits.

.

WGSS 8275. Women and Health. 3 Credits.

Theoretical and empirical analyses of women's health: how women's health is constructed by medical, psychological, and critical theorists; how sexism, racism, and classism contribute to women's health problems; and identification of conditions that lead to optimal health and well-being. (Same as PSYC 8275).

BACHELOR OF ARTS WITH A MAJOR IN WOMEN'S, GENDER, AND SEXUALITY STUDIES

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 77).

Program-specific curriculum:

Code	Title	Credits
Required		
WGSS 2120	Introduction to Women's, Gender, and Sexuality Studies	
or WGSS 2120W	Introduction to Women's, Gender, and Sexuality Studies	
WGSS 2125	Varieties of Feminist Theory	
or AMST 2125	Varieties of Feminist Theory	
WGSS 4199	Senior Seminar	
One course from each of the following five groups:		
Race, ethnicity, and class		
AMST 2410	Twentieth Century U.S. Immigration	
or HIST 2410	Twentieth Century U.S. Immigration	

AMST 3360	African American History to 1865
or HIST 3360	African American History to 1865
AMST 3361	African American History Since 1865
or HIST 3361	African American History Since 1865
ENGL 2610	Introduction to Black Literature of America I
or ENGL 2610W	Introduction to Black Literature of America I
ENGL 2611	Introduction to Black Literature of America II
or ENGL 2611W	Introduction to Black Literature of America II
ENGL 2710	Postcolonialism, Race, and Gender in Global Anglophone Literature and Film
or ENGL 2710W	Postcolonialism, Race, and Gender in Global Anglophone Literature and Film
ENGL 3570	Nineteenth-Century Black Literature

WGSS 4183 Practicum in Women's, Gender, and Sexuality Studies

Electives

Three additional courses (9 credits) from any of the above lists, any women's, gender, and sexuality studies (WGSS) course, or courses approved by an advisor.

No one course may count for more than one category.

At least 27 of the required 33 credits must be taken in courses at the 2000 level or above.

GENERAL EDUCATION

In addition to the University General Education Requirement (p. 42), undergraduate students in Columbian College must complete a further, College-specific general education curriculum—Perspective, Analysis, Communication, or G-PAC. Together with the University General Education Requirement,

G-PAC engages students in active intellectual inquiry across the liberal arts. Students achieve a set of learning outcomes that enhance their analytical skills, develop their communication competencies, and invite them to participate as responsible citizens who are attentive to issues of culture, diversity, and privilege.

G-PAC approved courses, Dean's Seminars, and Sophomore Colloquia that may be available for registration are listed on the CCAS Advising website (<https://advising.columbian.gwu.edu/general-education-courses/>).

Coursework for the University General Education Requirement is distributed as follows:

- Writing—one approved course in university writing and two approved writing in the disciplines (WID) courses.
- Humanities—one approved course in the humanities that involves critical or creative thinking skills.
- Mathematics or Statistics—one approved course in either mathematics or statistics.
- Natural or Physical Science—one approved laboratory course that employs the process of scientific inquiry.
- Social Sciences—two approved courses in the social sciences.

Coursework for the Columbian College general education curriculum is distributed as follows:

- Arts—one approved course in the arts that involves the study or creation of artwork based on an understanding or interpretation of artistic traditions or knowledge of art in a contemporary context.
- Global or Cross-Cultural Perspective—one approved course that analyzes the ways in which institutions, practices, and problems transcend national and regional boundaries.
- Humanities—one approved course in the humanities that involves critical thinking skills (in addition to the one course in this category required by the University General Education Requirement).
- Local or Civic Engagement—one approved course that develops the values, ethics, disciplines, and commitment to pursue responsible public action.
- Natural or Physical Science—one approved laboratory course that employs the process of scientific inquiry (in addition to the one course in this category required by the University General Education Requirement).
- Oral Communication—one course in oral communication.

Certain courses are approved to fulfill the requirement in more than one of these categories.

Courses taken in fulfillment of G-PAC also may be counted toward majors or minors. Transfer courses taken prior to, but not after, admission to George Washington University may count toward the University General Education Requirement and G-PAC, if those transfer courses are equivalent to GW

courses that have been approved by the University and the College.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must attain a minimum grade-point average of 3.7 in courses counted for the Women's, Gender, and Sexuality Studies major and 3.3 overall; receive a grade of A in WGSS 4199; and submit an honors paper to the Program. Upon faculty review of the honors paper, students may be recommended for graduation with Special Honors.

DUAL BACHELOR'S AND MASTER'S PROGRAMS IN WOMEN'S, GENDER, AND SEXUALITY STUDIES

The Department of Women's, Gender, and Sexuality Studies offers two options for a dual bachelor's/master's degree:

- Bachelor of Arts with a major in women's, gender, and sexuality studies (p. 510) and Master of Arts in the field of women's, gender, and sexuality studies (p. 515)
- Bachelor of Arts with a major in women's, gender, and sexuality studies (p. 510) and Master of Arts in the field of public policy with a concentration in women's, gender, and sexuality studies

In both cases, the program allows students to take up to 12 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year. Visit the program website (<https://wgss.columbian.gwu.edu/combined-degree-bama/>) for additional information.

GRADUATE CERTIFICATE IN WOMEN'S, GENDER, AND SEXUALITY STUDIES

OVERVIEW

The graduate certificate in women's, gender, and sexuality studies is offered to students currently enrolled in MA and PhD degree programs at GW other than women's studies and to qualified non-degree students who have at least a bachelor's degree. The program provides students with an opportunity to think and learn about gender in a systematic and integrated manner from a variety of methodological approaches. The certificate is designed to provide an interdisciplinary course of

study on women and gender to enrich a student's disciplinary or professional training.

Visit the program website (<https://womensstudies.columbian.gwu.edu/graduate-certificate-womens-gender-and-sexuality-studies/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 6 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
WGSS 6220	Fundamentals of Feminist Theory	
WGSS 6221	Research Issues in Women's, Gender, and Sexuality Studies	

Electives		
6 credits in elective courses selected from graduate-level Women's, Gender, and Sexuality Studies (WGSS) courses and/or courses from other departments in consultation with the advisor.		

MASTER OF ARTS IN THE FIELD OF PUBLIC POLICY WITH A CONCENTRATION IN WOMEN'S, GENDER, AND SEXUALITY STUDIES

OVERVIEW

Along with courses in feminist theory and empirical knowledge about women, gender, and sexuality in the United States and around the world, students take at least four policy courses in the GW Trachtenberg School of Public Policy and Public Administration. Through the program's interdisciplinary curriculum, students learn to analyze policies and structures of power, particularly as they are grounded in gender, race, sexuality, ethnicity and nationality.

Graduates of the program apply their knowledge and skills to careers in government and as teachers, researchers, lobbyists, public affairs specialists, and advocacy organizations staff members; approximately one-third of program graduates go on to earn doctoral or other professional degrees. Credits earned in this program may be applied toward the PhD in public policy, gender and social policy (<https://womensstudies.columbian.gwu.edu/phd-public-policy-gender-and-social-policy/>) degree program.

Visit the program website (<https://womensstudies.columbian.gwu.edu/masters-program/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (<http://bulletin.gwu.edu/arts-sciences/#degreeregulationtext>).

36 credits. Students must complete either a thesis or practicum and a master's comprehensive examination.

Code	Title	Credits
Required (36 credits of coursework with or without a thesis)		
WGSS 6220	Fundamentals of Feminist Theory	
WGSS 6240	Gender and Public Policy	
WGSS 6221	Research Issues in Women's, Gender, and Sexuality Studies	
Public Policy Core		
PPPA 6002	Research Methods and Applied Statistics	
PPPA 6003	Economics for Public Decision-Making	
PPPA 6006	Policy Analysis	

And one of the following: an additional PPPA course, PHIL 6230, PHIL 6242, WGSS 6265, or SOC 6265.

6 credits from one of the following options:		
WGSS 6283	Practicum in Women's, Gender and Sexuality Studies	
or		
WGSS 6283 & WGSS 6295	Practicum in Women's, Gender and Sexuality Studies and Independent Research in Women's, Gender, and Sexuality Studies	
or		
WGSS 6998 & WGSS 6999	Thesis Research and Thesis Research	

Electives (9 credits)		
All candidates are required to pass a Master's Comprehensive Examination		

This program is affiliated with the Trachtenberg School of Public Policy and Public Administration (<https://tspppa.gwu.edu/>).

MASTER OF ARTS IN THE FIELD OF WOMEN'S, GENDER, AND SEXUALITY STUDIES

OVERVIEW

The Master of Arts in the field of women's, gender, and sexuality studies program enables students to develop leadership and expertise in this growing field. The program's interdisciplinary curriculum focus on feminist theory, as well as social scientific and humanistic knowledge about women, gender, and sexuality in the United States and around the world. Students analyze discourses and structures of power, particularly as they are grounded in gender, race, sexuality, ethnicity, and nationality. The program may be tailored to meet a wide array of interests in either applied women's, gender, and sexuality studies or in advanced interdisciplinary or discipline-based scholarship.

Graduates of the program apply their knowledge and skills to careers in government and nonprofit organizations as teachers, researchers, public affairs specialists, and advocacy organization leaders. Some go on to earn doctoral or other advanced degrees.

Visit the program website (<https://womensstudies.columbian.gwu.edu/masters-program/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (<http://bulletin.gwu.edu/arts-sciences/#degreeregulationtext>).

The following requirements must be fulfilled: 36 credits, including 15 credits in required courses and 21 credits in elective courses. Successful completion of a comprehensive examination is also required.

Code	Title	Credits
Required		
WGSS 6220	Fundamentals of Feminist Theory	
WGSS 6221	Research Issues in Women's, Gender, and Sexuality Studies	
WGSS 6225	Contemporary Feminist Theory	
WGSS 6299	Capstone Research Seminar	

One of the following:	
WGSS 6283	Practicum in Women's, Gender and Sexuality Studies
or WGSS 6998	Thesis Research

Electives
With the advisor's approval, students develop a four-course (12 credit) concentration. In addition, they take three elective courses (9 credits) that may or may not be related to their chosen concentration.

MINOR IN LGBT AND SEXUALITY STUDIES

REQUIREMENTS

The following requirement must be fulfilled: 18 credits in elective courses.

Code	Title	Credits
Required		
At least two courses (6 credits) from the following:		
WGSS 2120	Introduction to Women's, Gender, and Sexuality Studies	
or WGSS 2120W	Introduction to Women's, Gender, and Sexuality Studies	
WGSS 2380	Sexuality in U.S. History	
or AMST 2380	Sexuality in U.S. History	
or HIST 2380	Sexuality in U.S. History	
ENGL 3830	Topics in Literary Theory and Cultural Studies	
or ENGL 3830W	Topics in Literary Theory and Cultural Studies	
ENGL 3980	Queer Studies	
or ENGL 3980W	Queer Studies	
Four additional courses (12 credits) chosen from the courses listed above or from the following:		
ENGL 3840	Gender and Literature	
or ENGL 3840W	Gender and Literature	
PHIL 2125	Philosophy of Race and Gender	
or PHIL 2125W	Philosophy of Race and Gender	
PSYC 2550	Psychology of Sex Differences	

SOC 2175	Sociology of Sex and Gender *
WSTU 2121	
or ANTH 2501	The Anthropology of Gender: Cross-Cultural Perspectives
WGSS 3410	Lesbian History and Culture
WGSS 3435	Queer Politics
WGSS 3470	Sexuality and the Law

PHIL 2125	Philosophy of Race and Gender
or PHIL 2125W	Philosophy of Race and Gender
PSC 2225	Women and Politics
PSYC 2550	Psychology of Sex Differences
SPAN 3570	Women Writers of Spain and Latin America
SOC 2175	Sociology of Sex and Gender

*Course requires prerequisites or permission of instructor.

Note: No more than two courses (6 credits) may count towards a student's major and the LGBT and sexuality studies minor.

MINOR IN WOMEN'S, GENDER, AND SEXUALITY STUDIES

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 6 credits in required courses and 12 credits in elective courses.

Code	Title	Credits
------	-------	---------

Required

WGSS 2120	Introduction to Women's, Gender, and Sexuality Studies

SCHOOL OF BUSINESS

Dean A. Mehrotra

Associate Deans G. Jabbour, S. Kanungo, V. Perry, L. Riddle

The School of Business was founded in 1928 on the premise that business and government might become partners in promoting national prosperity and international development. Initially known as the School of Government, with degree programs that integrated business and politics at national and international levels, the School of Business has a history of professional development of individuals assuming leadership roles in society. The School has eight departments—Accountancy, Decision Sciences, Finance, Information Systems and Technology Management, International Business, Management, Marketing, and Strategic Management and Public Policy. The use of a multidisciplinary approach in educational programming helps prepare both the generalist and specialist for professional careers in today's complex organizational society.

The School of Business's undergraduate and graduate programs in business administration and accounting are accredited by AACSB International.

Mission Statement

The mission of the School of Business is to have a lasting intellectual impact by offering quality education through innovative programs that provide theoretical frameworks and real-world learning experiences; engaging in rigorous scholarship that advances knowledge in the management of organizations in the global environment; and contributing as a local, national, and global citizen. The School accomplishes this within a community built upon respect, integrity, and active engagement.

Vision

The School of Business sets itself apart as a thought leader at the nexus of the private, public, and nonprofit sectors. Recognized for advancing knowledge on the role of organizations in the global arena, its graduates possess the multidisciplinary knowledge, critical-thinking skills, and ethical standards to make a positive impact on economies and societies.

Strategic Goals

The School of Business's strategic goals address three themes; enhancing global focus, leveraging location, and creating multidisciplinary opportunities:

- The School seeks to enhance its global focus, encouraging prosperity globally by leveraging existing strengths and building on the School's significant global reputation and reach.
- The School leverages its location by developing competitive advantage and differentiation, building on the distinctive

capabilities associated with the School's unique position in the heart of the nation's capital.

- The School creates multidisciplinary opportunities, advancing innovation and the School's impact on economies and societies by being a catalyst for cross-functional programs and research that create new prospects for students and cutting-edge research.

Educational Goals

The School of Business offers a distinctive educational experience to prepare global business leaders through a portfolio of niche programs that emphasize academic rigor, learning outcomes, and teaching excellence in both delivery and content.

- **Intellectual contribution goal:** The School of Business engages in scholarly research that contributes to the body of knowledge related to improving the management and performance of organizations.
- **Service and outreach goal:** The School of Business engages as citizen-leaders in the communities of which it is a part.

REGULATIONS

Undergraduate Programs

At the undergraduate level, the GW School of Business (GWSB) offers a Bachelor of Science (BS) degree. The BS degree includes foundational knowledge for business in accounting, economics, mathematics, and statistics. Program curricula are designed to provide perspectives on ethical and global issues, the influence of political, social, legal and regulatory, environmental, and technological issues, and the impact of demographic diversity on organizations. Students must select to pursue a major in Accountancy, Business, Business Analytics, Finance, or Information Systems. GWSB students only, have the opportunity to concentrate in at least one of the following: accountancy; business analytics; business economics and public policy; finance; information systems and technology management; innovation and entrepreneurship; international business; marketing; real estate; sport, event, and hospitality management; or an individualized field of study.

Advising

The Undergraduate Advising Center (<https://business.gwu.edu/current-students/undergraduate/advising-center/>) operates under a team advising model, where students can schedule appointments with a professional advisor of their choice. Advisors empower students to take ownership of and responsibility for their educational experience. Students partner with advisors to successfully navigate their academic careers through conversations that range from understanding University and School requirements, exploring degree and

major possibilities, overcoming academic challenges, setting goals, and finding appropriate campus resources.

Students should meet with a GWSB advisor at least once a semester. To help ensure academic success, students also are encouraged to build a support system that includes professors, faculty mentors, professional advisors, tutors, and/or counselors. In addition, assistance is available through the Division of Student Affairs (<http://students.gwu.edu/>), the GW Library (<https://academiccommons.gwu.edu/>), Mental Health Services (<http://counselingcenter.gwu.edu/>), Multicultural Student Services Center (<https://mssc.gwu.edu/>), International Services Office (<http://internationalservices.gwu.edu/>), and Writing Center (<http://writingprogram.gwu.edu/writing-center/>).

Graduation Requirements

A student must achieve the following in order to graduate:

1. A minimum of 120 credits and satisfactory completion of degree requirements.
2. A minimum overall grade-point average of 2.0.
3. A minimum major grade-point average of 2.0.
4. A minimum concentration grade-point average of 2.0.
5. A minimum grade of C- is required for all GWSB major and concentration courses.

Academic Standing

Rules governing academic probation and suspension, described under University Regulations (<http://bulletin.gwu.edu/university-regulations/>), are applicable to GWSB undergraduate students. Students who do not meet these requirements are placed on academic probation and may be suspended from the University. Students on academic probation must meet with a GWSB Academic Success Coach at least three times in their academic probationary semester, failure to do so will result in a hold on the student account.

Undergraduate Policies

Concurrent Enrollment

Approval for concurrent enrollment is contingent upon a student's home school. GWSB students may only enroll concurrently at GW and another institution of higher learning during their final semester (fall or spring) at GW and only if they are a full-time student at GW. GWSB students may enroll concurrently in summer, regardless of student class year, and must speak with a GWSB academic advisor about this option.

Leave of Absence

A student is allowed two semesters of Leave of Absence (LOA) during their undergraduate enrollment. The only exception to this is for a student participating in home country military requirements.

Pass/No Pass Option

To take a course as *P* (Pass) or *NP* (No Pass) the following must be true:

1. Student has junior or senior standing with a cumulative grade-point average of 2.5 or better
2. Student has approval from both the instructor and the GWSB academic advisor prior to the end of the eighth week for full-term fall and spring courses, prior to the end of the fourth week for half term fall and spring courses, or prior to the end of the fourth week for summer courses
3. Course is applying only as an elective requirement and does not share with any other degree requirements

Under no circumstances may a student change from *P/NP* status to graded status in a course, or vice versa, after the eighth week for full term courses or after the fourth week for half term and summer courses. A transfer student may not choose this option until their second semester at GW.

Incomplete Grades

Conditions under which the symbol *I* (Incomplete) may be assigned are described under University Regulations (<http://bulletin.gwu.edu/university-regulations/>) in this Bulletin. Incomplete coursework must be completed no later than one calendar year from the last day of the examination period of the semester or summer session in which the indication of *I* was assigned. When work for the course is complete, the *I* will be replaced by the grade earned. An indication of *I* that is not changed within this period automatically becomes an *F*. The *I* cannot be changed by re-registering for the course at GW or by taking its equivalent elsewhere. Students are encouraged to complete an Incomplete Contract form with their instructor, which can be found at the Undergraduate Advising Center (<https://business.gwu.edu/current-students/undergraduate/advising-center/>).

Independent Study

A student may be permitted to complete an independent study with the personal direction of a regular, full-time member of the GWSB faculty. An independent study packet outlining the student's specific study plan, approved by the faculty member and their department chair, must be submitted to the Undergraduate Advising Center (<https://business.gwu.edu/current-students/undergraduate/advising-center/>) prior to beginning any independent study.

Concentration Regulations

Concentrations are restricted to GWSB students. Students who enter GWSB in Fall 2020 may pursue up to three concentrations under the Bachelor of Science degree in GWSB. Each concentration must have at least 9 credits taken in residence.

Concentration courses may not be applied toward any other degree requirements, with the exception of satisfying a WID requirement. All classes in each concentration must be completed with a minimum grade of C-.

Major Regulations

A GWSB student must declare one GWSB major and may pursue a second GWSB or non-GWSB major. A student is limited to a maximum of two majors. Each major must have at least 18 credits taken in residence. A major must include 15 unique credits that do not apply to any other requirement,

except for a WID requirement. All courses in each major must be completed with a minimum grade of C-.

Students who wish to earn a major in accountancy must declare the BS in accountancy as their first major; i.e., accountancy may not be listed as a second major. Students should reference the regulations in this Bulletin and consult a GWSB academic advisor for assistance and additional information.

Students seeking to declare a second major in business, business analytics, finance, information systems, or marketing should meet with a GWSB advisor to discuss specific requirements for the second major.

Minor Regulations

GWSB students pursuing the BS in Finance are required to complete a minor outside of the School of Business or they may pursue a second minor or a second major in lieu of the minor. Other GWSB students may elect to complete a minor outside of the School of Business.

GWSB students may pursue a maximum of two minors. Courses vary by minor and typically require a minimum of 18 credits.

If a student is completing a GWSB minor, all courses in the minor must be completed with a minimum grade of C- and at least 12 credits must be taken in residence. GWSB minor courses may not apply to any other major or concentration requirement. Students should reference this Bulletin and consult an academic advisor for assistance and additional information.

Non-GWSB Field of Study Regulations

If a student is completing a non-GWSB minor or second major, they are subject to the rules and regulations of the program's home department (i.e., curricular, minimum grade, and residency requirements). A student is responsible for working with the department advisor on their non-GWSB minor or second major.

Graduate Programs

At the graduate level, GWSB offers programs leading to the degrees of master of accountancy (MAccy), master of business administration (MBA), master of science in the field of applied finance (MS-AF), master of science in the field of business analytics (MS-BA), master of science in finance (MSF), master of human resource management (MHRM), master of science in the field of information systems technology (MS-IST), master of interdisciplinary business studies (MIBS), master of science in the field of international business (MS-IB), master in management (MiM), master of science in the field of project management (MS-PM), master of science in the field of sport management (MS-SM), master of tourism administration (MTA), and doctor of philosophy (PhD).

Entrance Requirements

To be considered for admission, applicants must hold a bachelor's degree from a regionally accredited college or university. Admission to master's programs is highly

competitive. Previous academic history, performance on the applicable entrance examination, letters of recommendation, demonstrated motivation and aptitude to undertake graduate-level work, and professional experience are all taken into consideration.

Applicants for admission to programs leading to the MAccy, MBA, MS-BA, and MSF degrees must submit scores on the Graduate Management Admission Test or the Graduate Record Examination. Test scores that are more than five years old are not accepted for admissions review.

English Language Requirements for International Students

Applicants who are not citizens of countries where English is the official language or who do not hold a degree from a regionally accredited U.S. institution of higher learning are required to submit scores from the Test of English as a Foreign Language (TOEFL), the academic International English Language Testing System (IELTS), or the Pearson Test of English–Academic (PTE). Exemptions from this policy (<https://graduate.admissions.gwu.edu/international-student-application-requirements/>) may be possible.

Programs require a minimum score of 550 paper-based or 80 Internet-based on the TOEFL, or an overall band score of 6.0 on the IELTS with no individual band score below 5.5. In some instances, an interview is required of applicants.

Applicants for graduate teaching assistantships must have a minimum score of 600 paper-based or 100 Internet-based on the TOEFL, an overall band score of 7.0 on the IELTS with no individual band score below 6.0, or a score of 68 on the PTE.

Students with the following English language test scores are exempt from taking English for Academic Purposes (EAP) courses: TOEFL, 600 paper-based or 100 Internet-based; IELTS, overall band score of 7.0 with no individual band score below 6.0; or a score of 68 on the PTE. Students with test scores below these minimums must register for an EAP course during their first semester. Students assigned EAP courses should anticipate additional tuition expenses as well as a possible extended period of time required to complete their degree program. EAP courses do not count toward degree requirements.

Transfer Within the School

Currently enrolled students wishing to transfer from one graduate degree program to another within the School must complete a new application for admission through the appropriate degree program office. Applicants for transfer are subject to requirements in effect at the time of transfer. In addition, students must submit all required credentials by posted application deadlines for the program of application. Students must be in good academic standing (3.0 grade-point average) for transfer consideration.

Readmission

A student who withdraws, is suspended, or otherwise is absent without authorization from the University for one semester or more must make formal application for readmission to the director of the student's degree program and resubmit all supporting credentials including transcripts from previous schools attended, including George Washington University, and entrance examination scores. If readmitted, the student is subject to the rules and regulations in force at the time of return. If the student has attended one or more regionally accredited colleges or universities during absence from the University, complete official transcripts must accompany the application for readmission.

The application fee is waived (<https://graduate.admissions.gwu.edu/step-step-application-process/>) for a student applying for readmission who was registered as a degree candidate at the time of last registration at the University and has not since registered at another college or university.

General Requirements

All students must complete the prescribed minimum number of credits of graduate coursework. A maximum of 6 credits of graduate coursework may be approved for transfer to the School of Business from enrollment at GW in non-degree status or from another degree-granting school of this University or another regionally accredited college or university under the following conditions: the coursework must be approved as part of the student's program of studies; it must not have been applied to the completion of requirements for another degree; it must be at the graduate level; it must have been taken within the three years prior to acceptance into the program; and the student must have received a minimum grade of *B*.

A transcript and description of the coursework must be on file before the petition can be considered. Should transfer credit be granted, the credit for a course will count but not the grade.

Although work counted toward a bachelor's degree may not be counted toward a master's degree, a student who has completed the equivalent of a Master of Accountancy prerequisite course with a minimum grade of *B* as part of the bachelor's degree may request a waiver of that course. A minimum grade of *B* is required to waive remaining prerequisite courses on the basis of equivalent graduate-level courses completed at GW or another AACSB-accredited college or university prior to admission to the program. In addition, a student who has completed the equivalent of a required core course with a minimum grade of *B* as part of the bachelor's degree at GW may request a waiver of that course. If waived, the required core course must be substituted with a graduate-level course with the same course prefix. All courses presented for waiver consideration must have been taken within five years prior to the first semester of enrollment in the graduate program. Students should contact their degree

program director for specific waiver criteria and deadlines for requesting waivers.

MBA students may register for a maximum of 18 credits each semester. All work for a master's degree must be completed within five years.

Students who expect to continue studies for a doctoral degree after receiving the master's degree should consult with the advisor to plan their program of study.

No credit is granted for work done in absentia or without formal instruction, except for supervised field experience, independent study, and the thesis, which may be completed in absentia with the permission of the department, designated faculty advisor, or committee concerned.

Independent Study Plan

A graduate student of demonstrated capacity, with a special interest in the subject matter of a course, may be permitted to undertake study under the personal direction of an instructor, in accordance with the rules of the appropriate department or degree program. A petition outlining the student's specific study plan must be submitted to the student's degree program director prior to beginning any independent study. The student may petition to complete a maximum of two independent studies in two separate semesters.

Students from Other Schools Within the University

Degree candidates from other schools of the University cannot register for more than a total 12 credits in GWSB courses.

Academic Standing

A graduate student who is not on academic probation or suspension for poor scholarship is considered to be in good standing. The University's general scholarship requirements, including information on grades and computing the grade-point average, appear under University Regulations (p. 27) in this Bulletin. A minimum grade-point average of 3.0 must be maintained and is required for award of a graduate degree. All graduate courses and undergraduate courses taken for graduate credit after matriculation as a degree candidate (except those audited or taken for the grade of *CR*) will be used in the calculation of the grade-point average.

Academic Probation

Students whose GPA falls below 3.0 at any point after completing 9 credits are placed on academic probation.

While on academic probation, a student:

1. Must achieve at least a 3.0 (term) GPA in each subsequent semester.
2. Must be continuously enrolled or on an approved Leave of Absence or Continuous Enrollment.
3. Must not receive a grade of *F* (Failure) in any course.

4. Must not receive the designation Incomplete (*I*) in any course.

A student who fails to meet the above four conditions will be suspended from their program.

A student may request reinstatement from a suspension by completing and submitting the Request for Reinstatement form to their academic advisor. The request should offer a clear explanation of changed circumstances and how the student plans to raise their cumulative GPA to 3.0. The request must be submitted within one semester of the suspension. Thus, a student suspended in the fall semester must request reinstatement no later than the last day of the spring semester immediately following their suspension and a student suspended in the spring semester or during a summer session must request reinstatement no later than the last day of the fall semester immediately following their suspension.

In order to achieve the 3.0 minimum cumulative GPA, the student will be allowed to take up to 6 credits of graduate-level coursework beyond the program requirement.

A student who is below a 3.0 cumulative GPA and does not have enough credits remaining in their program to achieve the minimum GPA—including the additional 6 credits referenced above—will be dismissed. There is no appeal possible following a dismissal.

Grades of F

A master's degree candidate who receives a grade of *F* in a core, required, or elective course must repeat the course and earn a passing grade on the next attempt. Students should refer to the requirements of their degree program for additional minimum grade requirements. Once a grade of *F* is earned in a core, required, or elective course, it remains a part of the student's permanent record and is calculated into the grade-point average.

Incompletes

Conditions under which the symbol *I* (Incomplete) may be assigned and changed are described under University Regulations (p. 27). The symbol *I* must be changed by a date agreed on by the instructor and the student but usually no later than the last day of the examination period within one calendar year for the fall or spring semester or summer session in which the symbol *I* is assigned. An Incomplete that is not changed within this period automatically becomes an *F*. In cases of well-documented extenuating circumstances, an instructor and a student may jointly petition the director of the student's degree program for additional time in which to complete the work of the course. Such petitions should be submitted within the same period. The symbol of *I* cannot be changed by re-registering for the course here or by taking its equivalent elsewhere. Upon submission of the assigned grade, the *I* is removed from the transcript.

Withdrawing From a Course

The School of Business requires that students requesting to withdraw from a course after the eighth week of classes (or after the fourth week for modules) must present a petition to the Dean and receive written permission. If approved, the symbol *W* (Authorized Withdrawal) will appear on the transcript. Tuition will not be refunded.

Thesis

Students contemplating doctoral study are strongly encouraged to include the thesis as an elective in their master's program. The thesis subject should be selected as early as possible to permit effective integration with the coursework. The subject must be approved by the professor in charge of the student's field. The thesis in its final form must have the approval of the professor in charge. All theses must be submitted electronically and meet the formatting and other requirements set forth on line at GW's Electronic Theses and Dissertations Submission website (<http://library.gwu.edu/etds/>)

Payment of tuition for the thesis entitles the candidate, during the semesters in which registered for thesis seminar and/or thesis research, to the advice and direction of the member of the faculty under whom the thesis is to be written. In case a thesis is unfinished, additional time is granted. The student must, however, be enrolled continuously in the program. If the preparation of the thesis extends more than three semesters beyond the date of registration for thesis research, the student must register for the total required thesis credits again and pay additional tuition.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in accountancy (p. 551)
- Bachelor of Science with a major in business (p. 553)
 - concentration in accountancy (p. 554)
 - concentration in business analytics (p. 555)
 - concentration in business economics and public policy (p. 556)
 - concentration in finance (p. 556)
 - concentration in information systems and technology management (p. 557)
 - concentration in innovation and entrepreneurship (p. 558)
 - concentration in international business (p. 558)
 - concentration in marketing strategy and analytics (p. 559)
 - concentration in real estate (p. 560)
 - concentration in sport, event, and hospitality management (p. 560)
 - individualized concentration (p. 561)
- Bachelor of Science with a major in business analytics (STEM) (p. 561)

- Bachelor of Science with a major in finance (p. 563)
- Bachelor of Science with a major in information systems (STEM) (p. 564)
- Bachelor of Science with a major in marketing (p. 566)

Combined programs

- Dual Bachelor of science with a major in accountancy and Master of Accountancy (<http://bulletin.gwu.edu/business/accountancy/dual-ba-ma/>)
- Dual Bachelor of Science with a major in finance and Master of Science in Finance (p. 567)

Minors

- Minor in accountancy (p. 568)
- Minor in business (p. 568)
- Minor in business analytics (p. 569)
- Minor in creativity, innovation, and entrepreneurship (p. 569)
- Minor in management and leadership (p. 570)
- Minor in marketing (p. 571)
- Minor in real estate (p. 571)

MASTER'S

Master's programs

- Master in Management (p. 572)
- Master of Accountancy (p. 573)
- Master of Human Resource Management (p. 578)
- Master of Interdisciplinary Business Studies (p. 579)
- Master of Interdisciplinary Business Studies (STEM) (p. 579)
- Master of Science in Finance (p. 580)
- Master of Science in the field of applied finance (p. 580)
- Master of Science in the field of business analytics (p. 581)
- Master of Science in the field of information systems technology (p. 581)
- Master of Science in the field of international business (p. 582)
- Master of Science in the field of project management (p. 583)
- Master of Science in the field of sport management (p. 583)
- Master of Tourism Administration (p. 584)

Master of Business Administration program

MBA offered in the following formats:

- Global MBA (<http://bulletin.gwu.edu/business/global-business-administration-ma/#requirementstext>)
- Accelerated MBA (p. 574)
- Professional MBA (p. 574)

- Online MBA (p. 574)
- Healthcare MBA (p. 574)

STEM MBA offered in the following formats and concentration:

- Global MBA, STEM (p. 575)
- STEM MBA, Accelerated (p. 575)
- STEM MBA, Security Technology Transition Concentration (p. 577)

Combined programs

- Dual Master of Business Administration and Master of Arts in Education and Human Development in the field of Higher Education Administration (p. 585)
- Dual Master of Business Administration and Master of Human Resource Management (p. 586)
- Dual Master of Business Administration and Master of Science in the field of applied finance (p. 586)
- Dual Master of Business Administration and Master of Science in the field of business analytics (p. 586)
- Dual Master of Business Administration and Master of Science in Finance (p. 586)
- Dual Master of Business Administration and Master of Science in the field of information systems technology (p. 586)
- Dual Master of Business Administration and Master of Science in the field of project management (p. 586)
- Dual Master of Business Administration and Master of Science in the field of sport management (p. 586)
- Dual Master of Business Administration and Master of Tourism Administration (p. 586)
- Joint Master of Arts in the field of international affairs and Master of Business Administration (p. 587)
- Joint Master of Business Administration and Juris Doctor (p. 587)

DOCTORAL

Doctoral program

- Doctor of Philosophy in the field of business administration (p. 587)

CERTIFICATES

Graduate Certificate Programs

- Accountancy (p. 588)
- Analytics for managers (p. 589)
- Artificial intelligence (p. 589)
- Business analytics (p. 590)
- Capital markets (p. 590)
- Cloud, applications, and information technology (p. 591)
- Corporate responsibility (p. 591)
- Creativity, innovation, and entrepreneurship (p. 592)

- Digital marketing and analytics (p. 592)
- Financial management (p. 593)
- Global management (p. 593)
- Governmental and nonprofit accounting (p. 593)
- Hospitality management (p. 594)
- Human capital (p. 594)
- Investments and portfolio management (p. 595)
- Management leadership (p. 595)
- Management of technology and innovation (p. 595)
- Managing the digital organization (p. 596)
- Marketing and brand management (p. 596)
- Project management (p. 597)
- Quantitative business foundations (p. 597)
- Sports management (p. 597)
- Strategic management (p. 598)
- Tourism management (p. 598)
- Walkable urban real estate development (p. 599)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Accountancy (ACCY) (p. 1398)
- Business Administration (BADM) (p. 1443)
- Decision Sciences (DNSC) (p. 1532)
- Government Contracts (GCON) (p. 1613)
- Finance (FINA) (p. 1593)
- Information Systems and Technology Management (ISTM) (p. 1653)
- International Business (IBUS) (p. 1666)
- Management (MGT) (p. 1679)
- Marketing (MKTG) (p. 1682)
- Master of Business Administration (MBAD) (p. 1684)
- Strategic Management and Public Policy (SMPP) (p. 1847)
- Tourism Studies (TSTD) (p. 1850)

ACCOUNTANCY

The bachelor of science with a major in accountancy and master of accountancy degree programs prepare students to make significant contributions to both private and public organizations in the global economy. In addition to a rigorous

program of study, students gain practical experience through internships and the opportunity to study the stock market in a classroom outfitted like a Wall Street trading venue. The faculty coordinates access to executives in high-profile firms and agencies and government officials to help students further their exposure to, and training in, the discipline.

Visit the department website (<https://business.gwu.edu/academics/departments/department-of-accountancy/>) for more information.

ACCY 1099. Variable Topics. 1-36 Credits.

ACCY 2001. Introduction to Financial Accounting. 3 Credits.

Fundamental concepts underlying financial statements and the informed use of accounting information; analysis and recording of business transactions; preparation and understanding of financial statements; measurement of the profitability and financial position of a business.

ACCY 2002. Introductory Managerial Accounting. 3 Credits.

The use of accounting information to plan and control the activities of a business. Several widely used methods of determining the cost of business activities for use in making business decisions. Prerequisite: ACCY 2001.

ACCY 3101. Intermediate Accounting I. 3 Credits.

Financial accounting concepts underlying the preparation and interpretation of financial statements. Topics include revenue and expense recognition; accounting for receivables, inventories, fixed assets, intangible assets, and liabilities. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Prerequisite: ACCY 2001.

ACCY 3102. Intermediate Accounting II. 3 Credits.

Financial accounting concepts underlying the preparation and interpretation of financial statements; accounting for stockholders' equity, earnings per share, debt and equity investments, income taxes, pensions and other postretirement benefits, accounting changes, statements of cash flows, financial statement analysis, and disclosure. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Prerequisites: ACCY 3101 or permission of instructor.

ACCY 3106. Financial Statement Analysis. 3 Credits.

Introduction to the analysis and interpretation of corporate financial statements within the context of a company's industry and economic environment. Cash flow analysis, profitability and risk analysis, accounting policy analysis, forecasting and performance analysis, elements of equity valuation, and decision perspectives of creditors. Students cannot earn credit for both this course and ACCY 4801. Prerequisite: ACCY 2002. Credit cannot be earned for this course and ACCY 4801.

ACCY 3401. Federal Income Tax: Individuals. 3 Credits.

Taxation of individuals, including tax planning strategies as well as compliance requirements. Introduction to tax principals and to tax planning for compensation, investment and business income of individuals, and major life events. Credit cannot be earned for this course and ACCY 6401.

ACCY 3403. Advanced Tax. 3 Credits.

Taxation of all major types of businesses with an emphasis on strategic planning opportunities to improve business profits as well as compliance requirements; principals of business taxation and basic tax rules for businesses from sole proprietorships to multinational corporations. Prerequisites: ACCY 2001 and ACCY 3401.

ACCY 3601. Business Law: Contracts, Torts, and Property. 3 Credits.

Essential legal principles of contracts, torts, and property, including trusts and estates, leases, professional liability, and the Uniform Commercial Code.

ACCY 4107. Advanced Accounting. 3 Credits.

Accounting for corporate combinations, foreign currency financial statements, and derivative financial instruments. Governmental and not-for-profit accounting. Prerequisites: ACCY 3101 and ACCY 3102.

ACCY 4301. Auditing. 3 Credits.

A study of generally accepted auditing standards and accepted professional auditing practices and procedures, including reviewing and evaluating financial controls, auditing financial statements, and testing financial data of manual and automated accounting systems. Prerequisite: ACCY 3102.

ACCY 4501. Accounting Systems. 3 Credits.

Introduction to the design and operation of accounting systems and data management controls. Principles and applications of internal control applicable to manual and automated accounting systems. Prerequisite: ACCY 3102.

ACCY 4601. Business Law: Enterprise Organization. 3 Credits.

Legal aspects of organizing, financing, and operating an enterprise, including agency, partnerships, corporations, securities regulation, insurance, and secured credit financing. Credit cannot be earned for this course and ACCY 6602.

ACCY 4801. Financial Accounting Capstone. 3 Credits.

Synthesis and application of knowledge of financial accounting to specific contexts, using the perspectives of the preparer and user of financial statements. Students cannot earn credit for both this course and ACCY 3106. Restricted to seniors. Credit cannot be earned for this course and ACCY 3106.

ACCY 4900. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more information.

ACCY 4995. Independent Study. 3 Credits.

Assigned topics. Admission by permission of the department chair.

ACCY 5099. Variable Topics. 1-99 Credits.**ACCY 6101. Financial Accounting. 3 Credits.**

Basic concepts and methods used in financial reporting to understand content, context, and related processes. Income statement, balance sheet, and statement of cash flows. Detailed accounting procedures, calculations, and choices. Same As: IAFF 6191, MBAD 6211.

ACCY 6104. Intermediate Accounting I. 3 Credits.

Accounting principles and concepts for financial accounting and reporting. Emphasis on the preparation of general-purpose financial statements. Restricted to GWSB graduate degree students. Prerequisites: ACCY 6101 or MBAD 6211.

ACCY 6105. Intermediate Accounting II. 3 Credits.

Revenue recognition, employee compensation and pension plans, income tax expense, and earnings per share. Prerequisites: ACCY 6101 and ACCY 6104. Same As: ACCY 3102.

ACCY 6106. Financial Statement Analysis. 3 Credits.

Analysis and interpretation of financial statements for managers, stockholders, creditors, and financial analysts. Prerequisites: ACCY 6101 or MBAD 6211. Credit cannot be earned for this course and ACCY 3106.

ACCY 6110. International Reporting and Control. 1.5 Credit.

International comparisons of forces that shape financial management, such as corporate governance mechanisms, tax policies, economic development, and privatization. Same as IBUS 6308.

ACCY 6112. International Financial Reporting Standards. 1.5 Credit.

Financial reporting standards that are used throughout most of the world other than the United States. Comparisons of these standards with those of the United States. Prerequisites: ACCY 6101 and MBAD 6211. (Same as IBUS 6310).

ACCY 6113. Financial Decision Making by Consumers and Professionals. 3 Credits.

Tools and applications necessary to evaluate the wide range of financial decisions individuals, both consumers and professionals, make throughout their lifetime. Also intended for those interested in becoming financial advisors and/or CPAs.

ACCY 6201. Accounting for Internal Decision Making. 1.5 Credit.

Effective use of internal generation, communication and interpretation of information for both operational and strategic decision-making purposes. Restricted to students in the MBA program. Prerequisites: MBAD 6211. Same As: MBAD 6213.

ACCY 6202. Advanced Strategic Cost Management. 1.5 Credit.

Advanced topics in the application of concepts of control and decision analysis to optimize the financial management of organizations. Prerequisites: ACCY 6201 or MBAD 6213.

ACCY 6203. Controls, Alignment, and the Organization. 3 Credits.

The role accounting plays in planning and control issues within organizations. High-level view of planning and control, with a focus on the need for controls to deal with the agency problems. Prerequisites: ACCY 2002 or equivalent.

ACCY 6204. Managerial Accounting for Government and Nonprofits. 1.5 Credit.

Builds on basic understanding of managerial accounting concepts and examines issues in the government and nonprofit realm; leveraging core concepts to analyze and report on real world scenarios. Prerequisite: None.

ACCY 6301. Contemporary Auditing Theory. 3 Credits.

Survey of contemporary auditing as practiced by internal and external auditors; generally accepted auditing standards and government auditing standards; planning, directing, and reporting on various audits. Corequisite: ACCY 6104. Prerequisites: ACCY 6101 or MBAD 6211. Credit cannot be earned for this course and ACCY 4301.

ACCY 6302. Fraud Examination and Forensic Accounting. 3 Credits.

Financial statement fraud, misappropriation of assets, and methods of deterrence, prevention, detection, and investigation. Prerequisites: ACCY 6101 and MBAD 6211. Recommended background: One auditing course.

ACCY 6401. Federal Income Taxation. 3 Credits.

Taxation of individuals, including tax planning strategies as well as compliance requirements; tax principals and to tax planning for compensation, investment and business income of individuals, and major life events. Credit cannot be earned for this course and ACCY 3401.

ACCY 6402. Federal Income Taxation of Partnerships. 3 Credits.

Tax planning for business income from partnerships, including formation and operation, distribution to partners, liquidation, transfer of partnership interests, and financial accounting for partnership transactions. S corporations also considered. Prerequisite: ACCY 6401.

ACCY 6403. Federal Income Taxation of Corporations. 3 Credits.

Federal income taxation of C corporations, covering formation, capital structure, nonliquidating distributions, complete liquidations, corporate accumulations, and the alternative minimum tax. Credit cannot be earned for this course and ACCY 3403.

ACCY 6404. Taxation of Financial Instruments. 3 Credits.

Overview of the economics and taxation of financial instruments; transactions in stock, debt instruments, commodities, options, short sales, wash sales, straddles, futures, foreign currency transactions, swaps, hedging, mark to market tax accounting, and time value of money. An equivalent course may be substituted for prerequisite ACCY 6101. Prerequisites: ACCY 6101 and ACCY 6401.

ACCY 6500. Technology and Analytics Applications. 1 Credit.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to business administration students.

ACCY 6501. Accounting Information Systems and Electronic Data Processing. 3 Credits.

Development and application of accounting system theory, including analysis, design, control concepts, and implementation; integration of electronic data processing, accounting systems, and management information systems. Prerequisites: ACCY 6101 or MBAD 6211. Credit cannot be earned for this course and ACCY 4501.

ACCY 6601. Business Law: Contracts, Torts, and Property. 3 Credits.

Essential legal principles of contracts, torts, and property, including trusts and estates, leases, professional liability, and the Uniform Commercial Code. Credit cannot be earned for this course and ACCY 3601.

ACCY 6602. Business Law: Enterprise Organization. 3 Credits.

Legal aspects of organizing, financing, and operating an enterprise, including agency, partnerships, corporations, securities regulation, insurance, and secured credit financing. Credit cannot be earned for this course and ACCY 4601.

ACCY 6701. Government Accounting. 3 Credits.

Budgeting, accounting, financial reporting, and auditing required of local, state, and federal governments; financial practices and requirements applicable to organizations receiving government financial assistance and those subject to government audits. Prerequisites: ACCY 6101 or MBAD 6211.

ACCY 6705. Nonprofit Accounting. 1.5 Credit.

Development and use of financial information as it relates to not-for-profit entities. Identifying and applying appropriate accounting and reporting standards, preparing financial statements, use of non-financial performance measures, auditing. Prerequisites: ACCY 3101.

ACCY 6801. Corporate Governance and Ethics. 3 Credits.

The theory, practice, and public policy environment of corporate governance. Purpose, functioning, and responsibilities of boards of directors. Power, control, and compensation of corporate management. Shareholders and stakeholders. Corporate governance in comparative national settings. Same as SMPP 6215.

ACCY 6900. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. May be repeated once for credit. Same As: SMPP 6290.

ACCY 6998. Directed Readings and Research. 1-3 Credits.

ACCY 8001. Doctoral Seminar. 1-12 Credits.

Reasoning and research in technical areas of accounting; theoretical issues and their application to practice; conceptual themes in professional literature; comparative accounting research analyses.

ACCY 8009. Dissertation Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

ACCY 8999. Advanced Reading and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

DECISION SCIENCES

UNDERGRADUATE

Bachelor's program

- Bachelor of Science with a major in business analytics (STEM) (p. 561)
- Bachelor of Science with a major in business, business analytics concentration (p. 555)

Minor Program

- Minor in business analytics (p. 569)

GRADUATE

Master's programs

- Master of Science in the field of business analytics (p. 581)
- Master of Science in the field of project management (p. 583)

Combined programs

- Dual Master of Business Administration and Master of Science in the field of business analytics (p. 586)
- Dual Master of Business Administration and Master of Science in the field of project management (p. 586)

CERTIFICATES

Certificate programs

- Graduate Certificate in analytics for managers (p. 589)
- Graduate Certificate in business analytics (p. 590)
- Graduate Certificate in project management (p. 597)

FACULTY

Professors E.H. Forman, M.A. Lejeune, T.A. Mazzuchi, R. Soyer, M.M. Tarimcilar (Chair), J.R. van Dorp, P.W. Wirtz

Associate Professors P. Delquie (*Teaching*), S. Jain (*Teaching*), A. Jarrah, S. Kanungo, J. S. Kettunen, H. Khamooshi (*Teaching*), Y.H. Kwak, S.Y. Prasad

Assistant Professors M.E. Matta (*Teaching*), J. Qi

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

DNSC 1001. Business Analytics I: Statistics for Descriptive and Predictive Analytics. 3 Credits.

Foundations of probability and statistical methodologies used in business analytics; probability laws, probability models, univariate and bivariate models and their applications, sampling, hypothesis testing, contingency table analysis, simple and multiple linear regression models. Credit cannot be earned for this course and STAT 1051, STAT 1053, STAT 1111.

DNSC 1051. Introduction to Business Analytics. 3 Credits.

Business analytics fundamentals; the information it provides, how and when it is used, and how it affects decision making. Uncertainty; using data of all sizes; making decisions with incomplete data. Simulation of real-life scenarios to support optimal decision making. Students must have achieved a minimum score of 61 on the ALEKS placement examination in order to enroll.

DNSC 1099. Variable Topics. 1-36 Credits.

DNSC 2001. Business Analytics II: Predictive and Prescriptive Analytics. 3 Credits.

Builds on the foundations of probability and statistical methodologies covered in DNSC 1001. Categorical data analysis; design of experiments and analysis of variants (ANOVA); multiple regression; parameter estimation and testing; residual analysis; indicator variables; model selection procedures; logistic regression; and applications of optimization models. Prerequisites: DNSC 1001 or STAT 1051 or STAT 1053 or STAT 1111. Credit cannot be earned for this course and STAT 2112.

DNSC 3288. Big Data, Predictive Analytics, and Ethics. 3 Credits.

How data is collected, stored, analyzed, and acted upon. Safeguards in place (or not in place) to protect individual freedoms. Ethical quandaries posed by the advent of recent technological advances. Same As: DNSC 3288W.

DNSC 3288W. Big Data, Predictive Analytics, and Ethics. 3 Credits.

How data is collected, stored, analyzed, and acted upon. Safeguards in place (or not in place) to protect individual freedoms. Ethical quandaries posed by the advent of recent technological advances. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: DNSC 3288.

DNSC 3401. Introduction to Business Analytics. 3 Credits.

Fundamentals of business analytics: what information it provides, how and when that information is used, and how it affects decision making. Working with uncertainty; understanding the dynamic nature of decision making; using data, regardless of its size; and making decisions with incomplete data. The simulation of real-life scenarios to support optimal decision making. Prerequisites: APSC 3115 or STAT 1051 or STAT 1053 or STAT 1111.

DNSC 3402. Data Mining. 3 Credits.

The practice of exploring and discovering actionable business intelligence from large amounts of data; concepts, methods, and tools; supervised and unsupervised data mining techniques for discovering relationships in large data sets and building predictive models; regression models, decision trees, neural networks, clustering, and association analysis. Prerequisites: APSC 3115 or STAT 1051 or STAT 1053 or STAT 1111; Math 1231 or Math 1252.

DNSC 3403. Decision Models. 3 Credits.

Designing and developing decision models using Microsoft Excel and specialized decision support add-ins; interpreting the models' outputs. Equivalent courses may be substituted for the prerequisites. Prerequisites: DNSC 2001 or STAT 2112 or STAT 2118 or ECON 2123 or STAT 2123.

DNSC 4211. Programming for Analytics. 3 Credits.

Handling and preparing data for business analytics; descriptive, predictive and prescriptive analytics; creating data stories in collaboration with and for end users and information consumers; scripting, publishing, and collaborating for data products. Prerequisites: DNSC 1001 and DNSC 2001. Recommended background: Some prior knowledge of a programming. Credit cannot be earned for this course and DNSC 6211.

DNSC 4219. Forecasting Analytics. 3 Credits.

Predictive analysis and use of black-box models for time-series forecasting. Emphasis on identifying hidden patterns and structures in univariate and multivariate time-series data and using these for forecasting. Prerequisites: DNSC 4211; and DNSC 2001 or ECON 2123 or STAT 2112 or STAT 2118 or STAT 2123; and MATH 1221 or MATH 1231 or MATH 1252.

DNSC 4233. Social Network Analytics. 3 Credits.

Introduction to the theories, methods, and procedures of network analysis with emphasis on applications to organizations and management.

DNSC 4279. Data Mining. 3 Credits.

The practice of exploring and discovering actionable business intelligence from large amounts of data. Prerequisites: DNSC 2001 or ECON 2123 or STAT 2112 or STAT 2118 or STAT 2123; and DNSC 4211; and MATH 1221 or MATH 1231 or MATH 1252. Credit cannot be earned for this course and DNSC 6279.

DNSC 4280. Machine Learning. 3 Credits.

Machine learning techniques. Topics include supervised learning (classification, regression), unsupervised learning (clustering, dimensionality reduction) and techniques associated with both types of learning. Restricted to students in the BS in business analytics program. Prerequisites: DNSC 4279.

DNSC 4281. Revenue Management Analytics. 3 Credits.

Methodologies used in pricing and revenue management. Tactical optimization of pricing and capacity allocation decisions to ensure the right prices are in place for all products, to all customers, through all channels, at all times. Prerequisites: DNSC 3403. Recommended background: A basic understanding of probability, probability distributions, expected value calculations, and basic optimization, and some knowledge of spreadsheet modeling.

DNSC 4282. Supply Chain Analytics. 3 Credits.

Mathematical modeling techniques used to design, analyze, execute, and integrate supply chains.

DNSC 4289. Capstone in Business Analytics. 3 Credits.

Designed to apply the knowledge gained in the classroom to real world problems by working in teams on an industry project. Students develop significant expertise in a set of analytical tools. Prior completion of all courses in the major is required. Restricted to students in the BS in business analytics program.

DNSC 4403. Decision Models. 3 Credits.

Design and development of decision models using spreadsheet software with decision support add-ins; interpreting decision model outputs; commonly used classes of models; decision analysis spanning business disciplines. Restricted to juniors and seniors.

DNSC 4404. Essentials of Project Management. 3 Credits.

Theoretical foundations of and practical insights into project management; the role of project management in contemporary business and government organizations; the link between projects and strategy. Project design and development.

DNSC 4900. Special Topics. 3 Credits.**DNSC 4995. Independent Study. 6 Credits.**

Students undertake research in an area of particular interest under the direction of a School of Business faculty member.

DNSC 5099. Variable Topics. 1-99 Credits.**DNSC 6201. Introduction to Business Analytics. 1.5 Credit.**

An introduction to business analytic concepts, methods, and tools with concrete examples from industry applications; Big Data and the opportunities it has created for businesses to store, organize, and analyze vast amounts of information. Completion of a basic course in statistics prior to enrollment is recommended.

DNSC 6202. Statistics for Managers. 3 Credits.

Mathematical and statistical concepts employed in the solution of managerial problems. Applications of functions, elements of calculus, and linear algebra. Introduction to probability, frequency distributions, statistical inference, and regression and correlation. Credit cannot be earned for this course and MBAD 6221, MBAD 6222, MBAD 6224.

DNSC 6203. Statistics for Analytics I. 1.5 Credit.

Foundations of statistical methodologies in business analytics; statistical inference and probability models; estimation, hypothesis testing, contingency table analysis, analysis of regression models; logit and probit analysis. Restricted to students in the MS in business analytics and graduate certificate in business analytics programs or with departmental permission. Corequisites: DNSC 6206.

DNSC 6206. Stochastic Foundation: Probability Models. 1.5 Credit.

Introduces the foundations of probability, along with the commonly used probability models (binomial, normal, and poisson) in predictive analytics. Restricted to students in the MS in business analytics and graduate certificate in business analytics programs or with departmental permission.

DNSC 6207. Applied Probability Models. 1.5 Credit.**DNSC 6208. Computational Optimization. 3 Credits.****DNSC 6209. Forecasting for Analytics. 1.5 Credit.**

Predictive analysis and use of blackbox models for time-series forecasting. Identifying hidden patterns and structures in the data and exploiting these for forecasting. Prerequisites: DNSC 6202 or MBAD 6224.

DNSC 6210. Decision and Risk Analytics. 1.5 Credit.

Concepts, methods, and practical tools to analyze managerial decisions involving risk and uncertainty. Restricted to students in the master of science in business analytics degree program or with program approval. Prerequisites: DNSC 6206 and DNSC 6203.

DNSC 6211. Programming for Analytics. 3 Credits.

Accessing, preparation, handling, and processing data that differ in variety, volume, and velocity. Development of a theoretical grounding in emerging paradigms like schema-less data. Python and R typically used. Restricted to students in the MS in business analytics and graduate certificate in business analytics programs or with departmental permission. Credit cannot be earned for this course and DNSC 4211.

DNSC 6212. Optimization Methods and Applications. 3 Credits.

Linear, network, integer, and nonlinear models and their fundamental underlying analytic concepts and solution methods; model development, formulation, solution and interpretation of results using powerful commercial software; intuitive understanding of solution methods and their underpinning theoretical paradigms for effective use of optimization models. Restricted to students in the master of science in business analytics degree program or with the permission of the instructor.

DNSC 6213. Statistics for Analytics II. 1.5 Credit.

Statistical methodologies for business analytics in real world scenarios; introduction of high-level analytical techniques such as hierarchical linear modeling and mixed-effects modeling. Restricted to students in the MS in business analytics and graduate certificate in business analytics programs or with permission of the department. Prerequisite: DNSC 6203.

DNSC 6214. Pricing and Revenue Management. 1.5 Credit.

Methodologies for addressing pricing issues; tactical optimization of pricing and capacity allocation decisions; quantitative models of consumer behavior and constrained optimization. For the prerequisites, DNSC 6206 must be taken before DNSC 6203. Prerequisites: DNSC 6206 and DNSC 6203; and DNSC 6202 or MBAD 6224.

DNSC 6215. Social Network Analytics. 1.5 Credit.

Concepts, methods, and applications of network science; analyzing real networks and related phenomena such as organizational analysis, social power, fraud detection, and disease propagation. Prerequisites: DNSC 6206 and DNSC 6203; or DNSC 6202; or MBAD 6224 (note that DNSC 6206 must be taken before DNSC 6203). Recommended background: Prior exposure to Python and R scripts.

DNSC 6216. Business Analytics Skills Workshops. 1.5 Credit.

Practical workshop designed to develop the student's application-related skills for the analytics realm. Programming skills, computing environments (e.g. cloud or enterprise computing), and data ethics and security. Restricted to students in the master of science in business analytics degree program.

DNSC 6217. Business Analytics Practicum. 1.5 Credit.

Working in small teams, students apply their analytics skills to projects sponsored by public or private institutions. Each team is advised by a faculty member, and the practicum sponsor designates a mentor to provide guidance to the team for the duration of the project. Prerequisite: MSBA degree candidacy.

DNSC 6219. Time Series Forecasting for Analytics. 3 Credits.

Predictive analysis and blackbox models for time series and econometric forecasting. If chosen for the prerequisite, DNSC 6206 must be taken before DNSC 6203. Restricted to students in the master of science in business analytics degree program or with the permission of the department. Prerequisites: DNSC 6206 and DNSC 6203; or DNSC 6202; or MBAD 6224.

DNSC 6225. Business Process Simulation. 1.5 Credit.

Approaches and issues involved in business process design; basic tools used to analyze and improve processes; process modelings using a powerful discrete-event simulation tool. If DNSC 6206 and DNSC 6203 are taken as prerequisites, they must be completed in that order. Prerequisites: DNSC 6206 and DNSC 6203; or DNSC 6202 or MBAD 6224.

DNSC 6231. Consulting for Analytics. 1.5 Credit.

Practical tools used by analysts and managing analysts, within an organization or for an external consulting-focused organization, for integrating analytical skills into problem solving. Prerequisites: DNSC 6203, DNSC 6206, and DNSC 6211 or permission of the instructor.

DNSC 6233. Social Network Analysis for Managers. 3 Credits.

Concepts, theories, and applications associated with network data; concepts at micro, meso, and macro levels, including connectedness, homophily, transitivity, and clustering. Power, roles, social position, and social capital.

DNSC 6234. Procurement and Contracting. 3 Credits.

Principles and concepts essential to effecting large procurement programs. Planning, sourcing, and contractual design for diverse acquisitions. Emphasis on federal government policy with comparison of buying at other governmental levels and the private sector.

DNSC 6235. Communication Strategies in Project Management. 3 Credits.

Communication leadership and management practices that facilitate successful project management; strategies and practices related to communication, change management, and performance reporting.

DNSC 6236. Project Quality Management. 3 Credits.

Current theories and practices regarding quality management as applied to manufacturing and the service industry, the application to project systems, and the application to individual projects. Prerequisite: None.

DNSC 6237. International Project Management. 1.5 Credit.

Augments the basics of project management with theory, practice, and methodology related to global project environment; practical investigation of the cultural environment in the context of managing global projects.

DNSC 6238. Project Management and Organizational Context. 1.5 Credit.

Organizational influences on project management practices; definition and classification of organizations; organizational culture; organizational strategy; project management practices that take place during initiation, planning, execution, monitoring and controlling, and closing processes.

DNSC 6239. Project Governance. 1.5 Credit.

An overview of project governance; models, practices and case studies.

DNSC 6247. Organization, Management, and Leadership. 3 Credits.

Fundamentals of human resource management for project managers. Tools and techniques for success in managing and leading people in a project environment. Prerequisites: None.

DNSC 6250. Project Management Finance. 3 Credits.

DNSC 6251. Optimization Models for Decision Making. 1.5 Credit.

Optimization modeling techniques, including linear programming, sensitivity analysis, networks, integer programming, multiple objective optimization, and nonlinear and evolutionary programming. Prerequisites: DNSC 6202 or MBAD 6224.

DNSC 6252. Risk Analysis for Decision Making. 1.5 Credit.

Probabilistic modeling techniques with spreadsheet implementation. The concept of risk and methods for its analysis; risk attitudes, risk measures, decision trees, simulation models, game theory, real options approach, and risk communication. Recommended background: Working knowledge of basic statistics.

DNSC 6254. Risk Management. 1.5 Credit.

Basic principles of risk management practices. Developing a risk management plan, including identifying, analyzing, mitigating, and monitoring projects risks. Prerequisites: DNSC 6202 or MBAD 6224; or MBAD 6221 and MBAD 6222.

DNSC 6257. Cost Estimation and Control. 1.5 Credit.

Methods of developing project estimates during the planning stages and updating the estimates throughout the life of the project; monitoring, reporting, controlling, and managing project cost; relationships between project cost and other parameters, including scope, time, quality, reliability and procurement risk. Prerequisites: DNSC 6202 and DNSC 6261.

DNSC 6258. Executive Decision Making. 1.5 Credit.

Concepts and methods for making complex decisions in business and government. Identifying objectives and alternatives, setting priorities, and making collaborative decisions.

DNSC 6259. Project Portfolio Management. 1.5 Credit.

Management of an organization's portfolio of projects for the overall success of the enterprise; alignment of projects with an organization's strategy and goals and consistency with values and culture. Prerequisites: DNSC 6202 or MBAD 6221, MBAD 6222 or MBAD 6224.

DNSC 6261. Introduction to Project and Program Management. 3 Credits.

Comprehensive overview of project and program management. Culture, principles, and basic techniques of project management.

DNSC 6262. Directed Computational Project Management. 3 Credits.

Practical examination of project management concepts by quantitative application using various software tools. Research in real cost data to support project calculations. Prerequisite: DNSC 6254, DNSC 6257, DNSC 6261, DNSC 6267.

DNSC 6263. Managing External Projects. 3 Credits.

Fundamentals of contract management from a project manager's perspective. The outsourcing process, associated project strategies, and legal elements. Acquisition planning, vendor selection, contract formulation, and performance control.

DNSC 6267. Planning and Scheduling. 3 Credits.

Integrated planning, scheduling, and control systems for planning the scope of a project; optimizing time, cost, and resources; and monitoring and controlling schedules, including those for delayed projects. Prerequisites: DNSC 6261; and DNSC 6202 or MBAD 6221; and MBAD 6222 or MBAD 6224.

DNSC 6269. Project Management Application. 3 Credits.

Students are expected to demonstrate integration of the knowledge accumulated in their study plan and apply integrated knowledge and experience to best practices, a project case history, and a handbook. Prerequisites: MSPM candidacy or permission of instructor/advisor.

DNSC 6274. Statistical Modeling and Analysis. 3 Credits.

The process of specifying, analyzing, and testing models of human and systemic behavior. Formalization of models; statistical test comparison and selection; computer implementation of univariate, bivariate, and multivariate tests. General linear model: linear regression, analysis of variance, and analysis of covariance. Prerequisite: MBAD 6221 and MBAD 6222 .

DNSC 6275. Advanced Statistical Modeling and Analysis. 3 Credits.

Advanced topics associated with the general linear model. Testing for and remediation of assumption violations. Detection of outliers, influential observations, and multicollinearity. Alternative design strategies in the analysis of variance; latent growth analysis; hierarchical linear modeling; testing for interactions and parallelism. Prerequisite: DNSC 6274 or permission of instructor.

DNSC 6276. Exploratory and Multivariate Data Analysis. 3 Credits.

Methods for exploratory and multivariate data analysis. Application and comparison of advanced multivariate analytical procedures. Multivariate and discriminant analysis, LISREL analysis, and canonical correlation. Prerequisite: DNSC 6274 or permission of instructor.

DNSC 6277. Applied Forecasting and Time-Series Analysis for Managers. 3 Credits.

Introduction to various forecasting techniques, including time-series regression models, cyclical trends, exponential smoothing methods, seasonal and nonseasonal ARIMA processes, and the Box-Jenkins approach. Application of forecasting methods in economics, finance, and marketing. Prerequisite: MBAD 6222 or permission of instructor.

DNSC 6278. Big Data Analytics. 3 Credits.

Practical workshop-style course using cloud computing resources to analyze and manipulate data too large to fit on a single machine and/or analyze with traditional tools. Spark, MapReduce, the Hadoop Ecosystem, and other tools. Prerequisites: DNSC 6211 and ISTM 6212. Recommended background: Understanding of and experience with Linux/OSX; programming concepts; R, Python, SQL, or other programming language; remote computing via SSH; shell executables; version control tools such as Git/GitHub.

DNSC 6279. Data Mining. 3 Credits.

How organizations make better use of increasing amounts of collected data and convert that data into information to support managerial decision making; data mining and data analysis methods and tools for exploring and analyzing data sets; state-of-the-art software tools for developing novel applications. Note that the prerequisite courses must be taken in the order listed. Restricted to students in the master of science in business analytics and graduate certificate in business analytics programs. Prerequisites: DNSC 6203 and DNSC 6206. Credit cannot be earned for this course and DNSC 4279.

DNSC 6280. Supply Chain Analytics. 3 Credits.

Analytical framework for how supply chains function for decision making. Decision models studied include inventory management, integrated transportation, risk pooling, network coordination, and supplier management. Prerequisites: DNSC 6202; or DNSC 6203 and DNSC 6206; or MBAD 6224.

DNSC 6290. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. May be repeated once for credit.

DNSC 6298. Directed Readings and Research. 3 Credits.**DNSC 6300. Thesis Seminar. 3 Credits.****DNSC 6401. Sustainable Supply Chains. 1.5 Credit.**

Introduction to integrating environmental management and sustainability concepts into the operations and supply chain management fields.

DNSC 6403. Visualization for Analytics. 1.5 Credit.

Use of data visualization software technology in the context of exploratory and reporting capabilities. SAS Visual Analytics/Statistics and other methodologies. Various graphical approaches to preparing and visualizing data. Prerequisites: DNSC 6206 and DNSC 6203; or DNSC 6202; or MBAD 6224 (if chosen for the prerequisite, DNSC 6206 must be completed before taking DNSC 6203).

DNSC 6404. Sports Analytics. 1.5 Credit.

Analyzing and leveraging information throughout a sports organization. Strategies for gaining competitive advantage on the field of play; player analysis; and business operations. Prerequisites: DNSC 6206 and DNSC 6203; or DNSC 6202; or MBAD 6224 (note that DNSC 6206 must be completed before taking DNSC 6203).

DNSC 6500. Analytic Skills for Managers. 1 Credit.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to students in the MBA program.

DNSC 8328. Special Topics in Decision Making. 3 Credits.

Special topics and advanced applications, such as catastrophe theory, Markovian decision processes, and Bayesian statistics. May be repeated once for credit.

DNSC 8385. Special Topics in Research Methods. 3 Credits.

Research problems and issues related to student dissertations form topics for readings, group discussions, and assigned papers.

DNSC 8392. Computational Optimization. 3 Credits.

The description, design, and programming of efficient computational methods for large-scale optimization problems; introduction to software, optimization solvers, and programming languages used by professionals to code and model industry-size optimization problems.

DNSC 8393. Applied Stochastic Models for Business. 3 Credits.

In-depth coverage of stochastic models and their applications in business and industry; applications to marketing, call center modeling, finance, queuing systems, and operations.

DNSC 8394. Stochastic Programming. 3 Credits.

The intersection of probability theory and statistics with mathematical programming for modeling optimization problems that involve uncertainty. Basic knowledge of linear programming, elementary analysis and probability. Emphasis on algorithmic methods to solve stochastic programming instances.

DNSC 8397. Advanced Special Topics. 1-3 Credits.

Current research and scholarly issues in management science.

DNSC 8998. Advanced Readings and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

DNSC 8999. Dissertation Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

FINANCE

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in business, finance concentration (p. 556)

- Bachelor of Science with a major in business, real estate concentration (p. 560)
- Bachelor of Science with a major in finance (p. 563)

Combined Program

- Dual Bachelor of Science with a major in finance and Master of Science in Finance (p. 567)

Minor

- Minor in real estate (p. 571)

GRADUATE

Master's programs

- Master of Science in Finance (p. 580)
- Master of Science in the field of applied finance (p. 580)

Combined programs

- Dual Master of Business Administration and Master of Science in the field of applied finance (p. 586)
- Joint Master of Business Administration and Master of Science in Finance (p. 586)

CERTIFICATES

Graduate certificates

- Graduate Certificate in financial management (p. 593)
- Graduate Certificate in investments and portfolio management (p. 595)
- Graduate Certificate in walkable urban real estate development (p. 599)

FACULTY

Professors W. Handorf, G.M. Jabbour, G. Jostova, M.S. Klock, R. Van Order (*Chair*)

Associate Professors S. Agca, A. Baptista, N.G. Cohen, T. Geurts (*Teaching*), B.J. Henderson, M. Hwang, R. Savickas, A.J. Wilson

Assistant Professors V. Bhagwat, Rodney Lake (*Teaching*), J. Lee, M. Medlej (*Teaching*), B.K. Renganatharaja

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: MBAD 6234 Financial Management is prerequisite to FINA 6221 Financial Decision Making through FINA 6248 Real Estate Development Cases.

FINA 1099. Variable Topics. 1-36 Credits.

FINA 3001. Intermediate Finance. 3 Credits.

Theory and practice of acquiring and using funds. Simulations of business decisions by cases and/or models to assess the risk/return interaction of investment, financing, and dividend decisions. Prerequisite: BADM 3501.

FINA 3101. Investment and Portfolio Management. 3 Credits.

Theory and principles of security analysis and portfolio management, including analysis of the national economy, industry, company, and security markets. Risk-reward and computer-aided analysis. Prerequisite: BADM 3501.

FINA 3201. Exploring Finance with Simulation. 3 Credits.

Corporate financial analysis as explored through the FINGAME financial simulation software. Focus on intertemporal decision making for capital budgeting and financing of a simulated firm. Prerequisite: BADM 3501.

FINA 3201W. Exploring Finance with Simulation. 3 Credits.

Corporate financial analysis as explored through the FINGAME financial simulation software. Focus on intertemporal decision making for capital budgeting and financing of a simulated firm. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: BADM 3501.

FINA 3301. Money and Capital Markets. 3 Credits.

The process of capital formation in a free enterprise economy, with special emphasis on factors affecting the level and structure of interest rates. Money market, capital market, and derivative contracts (futures and swaps) are evaluated from both investment and financing perspectives. Prerequisite: BADM 3501.

FINA 3401. A Brief History of Finance. 3 Credits.

History of financial events and practices and how finance has changed over time; how these events have shaped current practices and the impact of ethical issues. Same As: FINA 3401W.

FINA 3401W. A Brief History of Finance. 3 Credits.

History of financial events and practices and how finance has changed over time; how these events have shaped current practices and the impact of ethical issues. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: FINA 3401.

FINA 4001. Advanced Financial Management. 3 Credits.

Analysis and readings covering applications of theory to financial management. Case studies for decision making involving working capital, capital budgeting, financing, dividend policy, and valuation. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Prerequisite courses may be taken concurrently. Prerequisites: BADM 3501; and FINA 3301 or FINA 3001. Same As: FINA 4001W.

FINA 4001W. Advanced Financial Management. 3 Credits.

Analysis and readings covering applications of theory to financial management. Case studies for decision making involving working capital, capital budgeting, financing, dividend policy, and valuation. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite courses may be taken concurrently. Prerequisites: BADM 3501; and FINA 3301 or FINA 3001.

FINA 4101. Applied Financial Securities Analysis. 3 Credits.

Practical security analysis techniques and investing approaches employed by professional investment managers. Prerequisite: BADM 3501.

FINA 4121W. Exploring Finance with Simulation. 3 Credits.

Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

FINA 4201. Real Estate Investment. 3 Credits.

Principles of real estate investment, including valuation, appraisal, financing, and development, in addition to a discussion of the mortgage market and its institutions. Prerequisite: BADM 3501.

FINA 4301. Financial Derivatives. 3 Credits.

The defining properties of and uses for financial derivatives. Institutional features; forward and futures contracts, option contracts, and swap agreements; and valuation methodologies. The proper use of financial derivatives and the potential for unintended consequences. Prerequisites: BADM 3501. Recommended background: undergraduate students in finance with exposure to another discipline such as mathematics, physics, computer science, economics, or statistics.

FINA 4900. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. Prerequisite: BADM 3501.

FINA 4900W. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

FINA 4995. Independent Study. 1-15 Credits.

Assigned topics. Admission by prior permission of advisor. May be repeated once for credit. Prerequisite: BADM 3501.

FINA 5099. Variable Topics. 1-99 Credits.**FINA 6220. Business Financial Management. 3 Credits.****FINA 6221. Financial Decision Making. 3 Credits.**

Theory and practice of business finance, emphasizing the impacts of long- and short-term uses and sources of funds on the firm's market value. Prerequisite: MBAD 6234 or MBAD 6235.

FINA 6222. Capital Formation. 3 Credits.

Determinants of saving and investment and resultant funds flow are evaluated. Special emphasis on the level and risk structure and term structure of interest rates. The role and management of financial institutions is stressed. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6223. Investment Analysis and Portfolio Management. 3 Credits.

Risk-reward analysis of security investments, including analysis of national economy, industry, company, and market; introduction to portfolio management; emphasis on theory and computer methods. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6224. Financial Management. 3 Credits.

Advanced case studies in domestic and international financial management; working capital policy, capital budgeting, financing with debt and equity, dividend policy, valuation, project finance, venture capital, and mergers and acquisitions. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6230. Urban Development Economics. 3 Credits.**FINA 6231. Seminar: Investment and Portfolio Management. 3 Credits.****FINA 6234. New Venture Financing: Due Diligence and Valuation Issues. 3 Credits.**

Fundamentals and practice of due diligence and screening of early-stage investment opportunities. Prerequisites: MBAD 6234 or MBAD 6235. (Same as MGT 6293).

FINA 6235. Futures Markets: Trading and Hedging. 3 Credits.

Organization and regulation of futures markets. Alternative strategies for trading of futures contracts for possible hedging uses. High risk-high return investment alternatives. The use of futures markets to manage risks. Recommended: FINA 6221. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6236. Options. 3 Credits.

Pricing of options on financial instruments. Role of options in risk management, trading strategies, hedging implications for national and international investors, financial engineering, and structure and regulation of option markets. Recommended: FINA 6221. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6237. Private Wealth Management and Personal Financial Advising. 3 Credits.

Income and estate taxation, retirement plans and pensions, life and disability insurance, investment portfolio management, and personal finances. Prerequisites: MBAD 6234 or MBAD 6235. Recommended background: ACCY 6401 and knowledge of Excel.

FINA 6238. Financial Engineering. 3 Credits.

Valuation and risk management theory for bonds, forward contracts, swaps, options, exotic options, and interest rate options. Development of financial software, including Monte Carlo simulation modeling. Case studies of innovative solutions to investment, corporate finance, and financial institution management problems. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6239. Applied Portfolio Management. 3 Credits.

Synthesis of the theoretical concepts of securities analysis and portfolio management with the application of analyzing securities and building an actual portfolio. Prerequisites: (MBAD 6234 or MBAD 6235) and permission of instructor.

FINA 6240. Real Estate Development. 3 Credits.

Examination of the forces that shape real estate development; market analysis methods and techniques to evaluate project feasibility; the institutional and legal framework within which real estate development occurs and that influences controls, land value, and development potential. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6241. Financing Real Estate. 3 Credits.

Principles of real estate finance; evaluating different methods of financing real estate; sources of real estate funding with emphasis on securitization. Incentives provided by governments. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6242. Real Estate Valuation and Investment. 3 Credits.

Understanding the valuation of different types of real estate from different viewpoints. Analysis of the risks and opportunities of investing. Solid theoretical framework is augmented with practical examples and applications. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6243. Strategic Planning for Walkable Urban Real Estate Companies. 3 Credits.

Introduction to the various facets of the real estate industry. Students gain practical training in strategic planning by conducting a consulting assignment for a DC-based real estate company.

FINA 6245. Land Development Law. 3 Credits.

FINA 6247. Urban Development Economics. 3 Credits.

FINA 6248. Real Estate Development Cases. 3 Credits.

Case study analysis of large-scale commercial real estate developments to gain comprehension of financial, political, legal, and technical complexities and constraints inherent in the real estate development process. Prerequisite: FINA 6221 or permission of instructor.

FINA 6250. Securities Regulation and Financial Scandals. 3 Credits.

Philosophy and framework of laws governing the sale of securities, including stocks, bonds, and investment contracts; financial scandals and the role that changes in securities law and housing policy has played in such events.

FINA 6271. Financial Modeling and Econometrics. 4 Credits.

Applied statistical and econometric analysis and modeling in finance. Methodologies include descriptive and inferential statistics, multivariate regression, and time series analysis. Empirical studies are reviewed, and a series of research projects are undertaken. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6272. Global Financial Markets. 4 Credits.

Theories explaining domestic and international interest rate and exchange rate structures. Roles of financial institutions and markets are investigated and forecasting methodologies are applied. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6273. Cases in Financial Management and Investment Banking. 4 Credits.

Computer modeling for analysis and forecasting of a firm's financial statements to reflect possible future performance. Application and integration of financial accounting and financial analysis, using a different case study each week. Financial issues faced by companies and their commercial and investment bankers as tactical and strategic decisions are made about organic growth, growth through merger and acquisition, and corporate reorganization. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6274. Corporate Financial Management and Modeling. 4 Credits.

Causal connections between decisions made by business firms, their expected performance, and the resulting current valuation of the firm's common stock. Factors affecting the level and structure of interest rates, which are incorporated by many financial models, theories, and decisions. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6275. Investment Analysis and Global Portfolio Management. 4 Credits.

Financial markets and instruments viewed from the investor's perspective. Analysis of the value of equity and fixed-income securities and the construction of efficient portfolios in a global financial market. Issues of market efficiency, tax structures, and investment funds; computer-based models. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6276. Financial Engineering and Derivative Securities. 4 Credits.

Mathematical and theoretical foundations to value-derivative securities, including options, futures, and swaps; hedging and trading applications of these contracts. Arbitrage trading across cash and derivative markets and its role in maintaining equilibrium prices. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6277. Comparative Financial Market Regulation and Development. 4 Credits.

Theory and current status of comparative regulation of domestic and international financial institutions and markets. Effects on country economic development and international trade. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6278. Financial Theory and Research. 4 Credits.

Theoretical constructs of business investment and financing decisions and of financial asset pricing structures in domestic and international environments. Analytical and numerical models are developed, and empirical studies are evaluated. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6279. Real Estate Finance and Fixed-Income Security Valuation. 4 Credits.

Application of financial theory to real estate investment: the housing market, mortgage valuation and securitization, commercial properties, CMBS, and REITs. Fixed-income security valuation with focus on theory and data applications on interest rate movements, fixed-income security and derivative pricing, and credit risk. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6280. Financial Institution Management and Modeling. 4 Credits.

Analysis of the financial performance and condition of a bank, toward understanding of the financial environment in which banks operate and regulation of the banking system. Application of asset/liability management principles and statistical and mathematical models employed in bank risk management. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6281. Cases in Financial Modeling and Engineering. 4 Credits.

Through the use of real-world examples from various aspects of finance, students are exposed to the modeling of complex financial instruments and techniques used in market and credit risk management. Underlying mathematics and theoretical constructs are explored and solidified through modeling exercises that make use of analytical solutions and numerical methods. As a practical course, students are asked to implement models. Examples may be motivated by corporate finance, corporate and investment banking, asset management, or other activities. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6282. Advanced Financial Econometrics and Modeling. 4 Credits.

Testing of several types of applied financial econometric models typically used in practice. Advanced quantitative techniques applied to aspects of financial markets, the behavior of agents, and market and credit risk management. Various software packages used to implement and program models. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6290. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. May be repeated once for credit.

FINA 6297. International Management Experience. 3 Credits.

Same as IBUS 6297/ MGT 6297/ MKTG 6297/ SMPP 6297. May be repeated for credit.

FINA 6298. Directed Readings and Research. 2-4 Credits.

FINA 6299. Thesis Seminar. 3 Credits.

FINA 6999. Thesis Research. 3 Credits.

FINA 8311. Seminar: Public and Private Sector Institutions and Relationships. 3 Credits.

An analysis and critique of alternative theoretical frameworks for describing, understanding, and predicting the nature, values, and actions of American public and private institutions. Problems, potentials, and alternatives for structuring public and private institutional arrangements to meet the needs of society. Same as SMPP 8311.

FINA 8321. Seminar: Financial Markets Research. 3 Credits.

Market efficiency, utility testing, the capital asset pricing model, the arbitrage pricing theory, the option pricing model, and aggregate market volatility.

FINA 8322. Seminar: Corporate Finance Research. 3 Credits.

Capital budgeting, capital structure issues, dividend policy, microeconomic foundations, mergers, and agency theory.

FINA 8323. Seminar: Continuous-Time Finance. 3 Credits.

Review of the stochastic calculus methods needed for continuous-time pricing models. The most important continuous-time models, including pricing of derivative securities, consumption-portfolio selection models, continuous-time capital asset pricing models, consumption-based capital asset pricing models, continuous-time arbitrage pricing theory, and different yield curve models.

FINA 8324. Seminar: Financial Markets and Institutions. 3 Credits.

Multi-period asset pricing, term structure of interest rates, market imperfections and institutional factors, auctions, manipulation, derivative markets, market microstructure, and financial institutions.

FINA 8397. Doctoral Seminar. 1-3 Credits.

FINA 8998. Advanced Reading and Research. 1-12 Credits.
Doctoral candidates preparing for general examination.

FINA 8999. Dissertation Research. 1-12 Credits.

Doctoral candidates performing research. Restricted to doctoral candidates.

INFORMATION SYSTEMS AND TECHNOLOGY MANAGEMENT

UNDERGRADUATE

Bachelor's program

- Bachelor of Science with a major in Information Systems (p. 564)
- Bachelor of Science with a major in business, information systems technology management concentration (p. 557)

GRADUATE

Master's program

- Master of Science in the field of information systems technology (p. 581)

Combined program

- Dual Master of Business Administration and Master of Science in the field of information systems technology (p. 586)

CERTIFICATES

Certificate programs

- Graduate Certificate in artificial intelligence (p. 589)
- Graduate Certificate in cloud, applications, and information systems (p. 591)
- Graduate Certificate in m (p. 595)anagement of technology and innovation
- Graduate Certificate in managing the digital organization (p. 596)

FACULTY

Professors E.G. Carayannis, V. Choudhury, M.J. Granger

Associate Professors J. Artz, S. Dasgupta, R.G. Donnelly (Chair), W. Duan, R.A. Lumley

Assistant Professors Y.C. Ho, Y. Lu, Y. Park, Z. Sun

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: MSIST candidacy or departmental approval is prerequisite to ISTM 6201 Information Systems Development and Applications-ISTM 6225 Cloud Foundations.

ISTM 3119. Introduction to Programming. 3 Credits.

Introductory course in writing simple computer programs using Python; data-analytic thinking and business applications through hands-on practices. No prior knowledge or experience in programming is required.

ISTM 4120. Business Systems Development. 3 Credits.

Analysis, design, and implementation of management information systems (MIS). Structured methodologies and techniques for various stages of the MIS development process. Computer-aided software engineering tools. May be taken for graduate credit with permission of the program director and instructor and extra assigned work.

ISTM 4121. Database Principles and Applications. 3 Credits.

Theory, architecture, and implementation of database management systems in corporate and organization information systems; fundamental concepts of database management and processing; hands-on experience with database management packages.

ISTM 4123. Business Data Communications. 3 Credits.

A technical overview of data communication concepts that are useful in the design and management of local and wide area networks. Internet technologies and their business applications are emphasized. Prerequisite: BADM 2301.

ISTM 4123W. Business Data Communications. 3 Credits.

A technical overview of data communication concepts that are useful in the design and management of local and wide area networks. Internet technologies and their business applications are emphasized. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: BADM 2301.

ISTM 4130W. Writing On The Ethics of Technology. 3 Credits.

Complex ethical dilemmas inherent in the introduction of new technologies and the influence human behavior asserts on these problems. Students write stories to explore and evaluate specific ethical problems relative to technology from various perspectives. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ISTM 4205. Web Applications Development. 3 Credits.

Concepts and practice necessary for creating Internet content. Technical overview of the Internet environment and the structure of the World Wide Web. Recommended background: Prior completion of ISTM 3119.

ISTM 4206. Foundations of Information Systems Security and Ethics. 3 Credits.

Computer security issues from the design, management, and business information system ownership perspectives. System security concepts, methods, and policies from design and planning to implementation. Risk assessment strategies. Recommended background: ISTM 4120.

ISTM 4209. Foundations of Web Analytics. 3 Credits.

Concepts, techniques and tools of reporting and analyzing web data to derive actionable customer intelligence, develop digital strategies and evaluate their impacts.

ISTM 4210. Information Systems Capstone. 3 Credits.

Application of conceptual and technical knowledge to analyzing, planning, and designing an online information system. Culminates with a system proposal and design presentations. Restricted to eligible students in their final semester. Prerequisites: ISTM 3119, ISTM 4120, ISTM 4121, ISTM 4205, ISTM 4206, and ISTM 4209.

ISTM 4212. Data Management for Analytics. 3 Credits.

Traditional and contemporary tools for data wrangling, databases, data warehousing. Focus on schema design and dimensional modeling; hands-on experience using these tools and other contemporary methods for managing and analyzing data at scale.

ISTM 4213. Foundations of Cloud Applications. 3 Credits.

Enterprise applications concepts, architecture, and technologies for emerging technologies and IT frameworks. The Internet as a major resource for globally distributed applications using grid and utility computing. Prerequisites: ISTM 3119.

ISTM 4214. Foundations of Artificial Intelligence. 3 Credits.

A comprehensive introduction to the recent developments in AI through the coverage of fundamental AI concepts, practical business applications and the hands-on experiences with modern deep learning frameworks such as Keras. Prerequisites: ISTM 3119.

ISTM 4215. Human-Computer Interaction. 3 Credits.

An introduction to and overview of the field of human-computer interaction (HCI), an interdisciplinary field that integrates theories and methodologies from computer science, cognitive psychology, design, and other areas. Readings cover current theory and practice in interface specification, design, and evaluation, and include current and classic research papers in the field.

ISTM 4216. Mobile Application Development. 3 Credits.

The creation of mobile solutions for various modern platforms, including major mobile operating systems, and how to program using Java and apply this knowledge to Android Platform in smart phones. Recommended background: prior completion of one of the following: ISTM 3119, ISTM 6200, or ISTM 6205.

ISTM 4217. Internet of Things Management. 3 Credits.

Apache Spark technology skills to analyze huge data sets. Taught in Python, continuing on to learning to use Spark DataFrames with the latest Spark 2.0 syntax; the MLlib Machine Library with the DataFrame syntax and Spark.

ISTM 4223. Innovation Ventures. 3 Credits.

Process of innovation entrepreneurship used to launch and build new ventures; technology ventures; organizing for innovation, raising venture capital, wealth creation, managing the growing innovation venture, marketing technology products and services. Students enrolled at the graduate level are expected to do additional work. (Same as ISTM 6223).

ISTM 4233. Emerging Technologies. 3 Credits.

New developments in scientific and technological innovation, including automation, energy, medicine, bioengineering, social science, information technology, and space; forecasting technological advances and assessing their economic and social effects. Students enrolled at the graduate level are expected to do additional work. (Same as ISTM 6233).

ISTM 4900. Special Topics. 3 Credits.

Topics vary by semester. May be repeated once for credit provided the topic differs. Consult the Schedule of Classes for additional information.

ISTM 4900W. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. May be repeated once for credit. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ISTM 4995. Independent Study. 3 Credits.

Assigned topics. Admission by prior permission of advisor. May be repeated once for credit.

ISTM 5099. Variable Topics. 1-99 Credits.

ISTM 6200. Python Program Database Applications. 3 Credits.

Introduction to Python programming language, Structured Query Language (SQL), relational database design, data wrangling, and rudimentary data analysis.

ISTM 6201. Information Systems Development and Applications. 3 Credits.

The information systems life cycle evaluated in terms of technologies, impact, and management. Structured and object-oriented analysis, prototyping, software reuse, testing, life-cycle costs, software development environments, and organizational and behavioral aspects of development projects. Restricted to students in the MS in information systems technology program or with permission of the department.

ISTM 6202. Relational Databases. 3 Credits.

Introduction to the theory of relational databases and commences an in-depth discussion of Relational database theory and design at the conceptual, logical, and physical levels. Structured query language (SQL) is covered in depth. Restricted to Students in the MS in Information Systems Technology program or with permission of the department.

ISTM 6203. Managing Cloud Security. 3 Credits.

Enterprise data and telecommunications networks with emphasis on operations and security on the cloud; functional characteristics of network technologies, gateways, and configurations; operational best practices to enhance the security of data and systems.

ISTM 6204. Information Technology Project Management. 3 Credits.

Project and program management practices with an emphasis on information technology projects. The basic tools of project management: work breakdown structure, cost, schedule and performance goal setting, and risk analysis. Restricted to students in the MS in information systems technology program or with permission of the department.

ISTM 6205. Web Application Development. 3 Credits.

Concepts and practice for creating Internet content. Technical overview of the Internet environment and the structure of the World Wide Web. Design and implementation of an effective web site with HTML, CSS, and JavaScript. Restricted to students in the MS in information systems technology program or with permission of the department. Prerequisites: ISTM 3119 or ISTM 6200.

ISTM 6206. Information Systems Security. 3 Credits.

Comprehensive examination of computer security issues from the design, management, and business information system ownership perspectives. System security concepts, methods, and policies from the design and planning stages to multi-level system implementation. Design of risk assessment strategies to achieve security goals. Restricted to students in the MS in information systems technology program or with permission of the department.

ISTM 6207. Information Resources Management. 3 Credits.

Information resources management strategically assesses and exploits information technology assets for competitive advantage. The CIO role in information resources management, planning, security, information integration, enterprise model development, and data administration.

ISTM 6209. Web and Social Analytics. 3 Credits.

Concepts, techniques, and tools of collecting, analyzing, and reporting digital data concerning how users interact with organizations through the Internet and social media; business intelligence; key performance indicators; new business models. Restricted to students in the MS in information systems technology program or with permission of the department.

ISTM 6210. Integrated Information Systems Capstone. 3 Credits.

Students apply conceptual and technical knowledge in analyzing, planning, and designing an online information system. Culminates with system proposal/design presentations. Restricted to students in their final semester in the MS in information systems technology program or with permission of the department. Prerequisites: ISTM 6201, ISTM 6202, ISTM 6204, ISTM 6205, ISTM 6206 and ISTM 6209.

ISTM 6211. Data Warehousing and Online Analytical Processing. 3 Credits.

Introduction to the theory of data warehousing, dimensional data modeling, and online analytical processing (OLAP) through case studies, technology, and a design project. Restricted to students in the MS in information systems technology program or with permission of the department. Prerequisite: ISTM 6202.

ISTM 6212. Data Management for Analytics. 3 Credits.

Relational databases, data warehousing, and dimensional modeling. Practical experience with these and other traditional and contemporary methods for managing and analyzing data at scale, including Unix command line and Apache Spark. Restricted to students in the MS in business analytics program.

ISTM 6213. Cloud Applications. 3 Credits.

Enterprise applications concepts, architecture, and technologies for emerging technologies and IT frameworks. The internet as a major resource for globally distributed applications. Prerequisites: ISTM 3119 OR ISTM 6200.

ISTM 6214. Foundations of Artificial Intelligence. 3 Credits.

Foundations of artificial intelligence. Introduction to advanced programming design and development of solutions to automate business processes. Prerequisites: ISTM 3119 OR ISTM 6200.

ISTM 6215. Human-Computer Interaction. 3 Credits.

Human-computer interaction as an interdisciplinary endeavor integrating theories and methodologies from computer science, cognitive psychology, design, and many other areas. Theory and practice in interface specification design and evaluation, and research.

ISTM 6216. Mobile Application Development. 3 Credits.

Creation of mobile solutions for various modern platforms, including major mobile operating systems. Programming using Java and applying this knowledge to Android platform in smart phones. Recommended background: Prior completion of one of the following: ISTM 3119, ISTM 6200, or ISTM 6205.

ISTM 6217. Internet of Things Management. 3 Credits.

Technology skills to analyze huge data sets using Apache Spark. Taught in Python, continuing on to learning to use Spark DataFrames. Using the MLlib machine learning library with the DataFrame syntax and Spark. Prerequisites: ISTM 3119. Recommended background: Prior completion of ISTM 6214.

ISTM 6218. Business Applications of Artificial Intelligence. 3 Credits.

Comprehensive introduction to recent developments in artificial intelligence (AI) through the coverage of fundamental AI concepts, practical business applications, and hands-on experiences with modern deep learning frameworks. Prerequisites: ISTM 3119 and ISTM 6214.

ISTM 6222. IS/IT Strategy and Implementation. 3 Credits.

The development and implementation of information systems and technology strategies designed to align with and maximize business strategy applications and approaches in a challenging and increasingly global business environment.

ISTM 6223. Technology Entrepreneurship. 3 Credits.

Case studies on the innovation-entrepreneurship processes used to launch and build new ventures based on information technology and on technology more broadly. Organizing for innovation, raising venture capital, managing the small technology-based venture, marketing technology products and services, intellectual property considerations, and new venture proposal development.

ISTM 6224. Management of Technology and Innovation. 3 Credits.

Business, technological, economic, and political factors that influence the development and deployment of new technology products, processes, and services. Managing technology, corporate innovation, alternatives, new approaches, sources of competitive advantages.

ISTM 6225. Cloud Foundations. 3 Credits.

Concepts of cloud managed enterprise architecture as a management tool to align information technology assets, people, operations, and projects with operational characteristics.

ISTM 6233. Emerging Technologies. 3 Credits.

Developments in scientific and technological innovation, including automation, energy, medicine, bioengineering, social science, information technology, and space. Forecasting technological advances and assessing their economic and social effects.

ISTM 6234. New Venture Financing. 3 Credits.

Fundamentals and practice of due diligence and screening of early-stage investment opportunities. Same as FINA 6234.

ISTM 6239. Seminar: Competitiveness/Technology. 3 Credits.

Capstone course integrating the field of management of science, technology, and innovation. Commercialization of technology in the private sector and the impact on competitiveness. Implementation of technology in the public sector. Technology development, from new product concept to utilization. Prerequisites: ISTM 6224 or MBAD 6253; and ISTM 6232 or ISTM 6233; or permission of the instructor.

ISTM 6243. Human Factors in Information Systems. 3 Credits.

The user-computer interaction, human factors of online dialogues, interfacing, and various approaches to user-system interaction; development and evaluation of user-computer interfaces.

ISTM 6290. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

ISTM 6298. Directed Readings and Research. 1-3 Credits.**ISTM 6500. Technology Skills for Managers. 1 Credit.**

Introduction to information technologies in multiple business domains for oversight by managers. The topics may vary. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more information. Restricted to MBA students.

ISTM 6502. Working with Databases Using SQL. 1 Credit.

Training in core SQL, especially data query language (DQL) and data manipulation language (DML). Concepts of SQL, including writing SQL statements and understanding of database operations.

ISTM 6514. Introduction to Artificial Intelligence. 1 Credit.

Decision making using artificial intelligence. Real-world examples from finance, health care, marketing, and operations illustrate applications of machine learning methods. Includes hands-on exercises with programming software (R and RStudio).

ISTM 6519. Health Care Analytics and Applications. 1 Credit.

Introduction to the basic analytics techniques and applications in health care and overview of the state of practice of the health care analytics ecosystem.

ISTM 6522. Digital Transformation. 1 Credit.

Use of information and digital technologies to restructure organizations and business processes and survive and thrive in an intensively digitized business world.

ISTM 8300. Thesis Seminar. 3 Credits.**ISTM 8333. Seminar: Management of Science, Technology, and Innovation. 3 Credits.****ISTM 8340. Philosophical Issues in Information Systems. 3 Credits.**

Seminar for doctoral students interested in information systems. Various philosophical traditions and insights from those traditions applied to problems in information systems.

ISTM 8341. Advanced Topics in MIS Research. 3 Credits.

For information systems doctoral students. Seminal papers and leading methods and instruments as applied to MIS research.

ISTM 8385. Special Topics in Research Methods. 3 Credits.

Research problems and issues related to student dissertations form topics for readings, group discussions, and assigned papers.

ISTM 8390. Philosophical Foundations of Administrative Research. 3 Credits.

Philosophy of science as applied to research in administration. Topics include the nature and current problems of epistemology, the development and role of theories, and the relationship between theory, methodology, and empirical data.

ISTM 8391. Advanced Problems in Research Methodology. 3 Credits.

Use of models and theoretical frameworks in research; formulation of research questions, hypotheses, operational definitions, research designs, sampling and data analysis approaches. For doctoral candidates who have completed the general examination and all courses and are preparing for their dissertation.

ISTM 8397. Doctoral Seminar. 1-3 Credits.

Current research and scholarly issues in management science.

ISTM 8398. Advanced Readings and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

ISTM 8399. Dissertation Research. 1-12 Credits.

Limited to doctoral candidates. May be repeated for credit.

INTERNATIONAL BUSINESS

UNDERGRADUATE

Bachelor's program

- Bachelor of Science with a major in business, international business concentration (p. 558)

Combined program

- Dual Bachelor of Science in Business, international business concentration and Master of Science in the field of international business

GRADUATE

Master's program

- Master of Science in the field of international business (p. 582)

CERTIFICATES

Certificate programs

- Graduate Certificate in capital markets (p. 590)
- Graduate Certificate in global management (p. 593)

FACULTY

Professors M. Ayyagari, H. Berry, D. Leipziger, A. Phene, P.A. Rau, S. Rehman, J.W. Spencer, R. J. Weiner, J. Yang (*Chair*)

Associate Professors R. Click, A. Helm, N. Maurer

Assistant Professors L. Ballesteros, J.H. Kim, L. D'Antonio, A. Weinberger

Visiting Lecturer B. Pierce

Emeritus Professors H. Askari, F. Robles, Y.S. Park

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

IBUS 1099. Variable Topics. 1-36 Credits.

IBUS 3001. Introduction to International Business. 3 Credits.

The international business environment, including social, cultural, political, technological, and institutional domains; multinational corporation strategic imperatives and organizational challenges, including financial, marketing, human resources, and other aspects of management. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 or HONR 2044. Same As: IBUS 3001W.

IBUS 3001W. Introduction to International Business. 3 Credits.

The international business environment, including social, cultural, political, technological, and institutional domains; multinational corporation strategic imperatives and organizational challenges, including financial, marketing, human resources, and other aspects of management. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 or HONR 2044. Same As: IBUS 3001.

IBUS 3101. Global Financial Environment. 3 Credits.

The international economic, trade, and financial environment in which global business operates and how developments in these areas affect business activity. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 or HONR 2044.

IBUS 3201. International Marketing Management. 3 Credits.

Introduction to international marketing analysis and strategy, and the dynamic nature of international markets. Analysis of different types of international markets and formulation of strategies at the entry and global stages. Prerequisites: IBUS 3001.

IBUS 3301. International Business Finance. 3 Credits.

Analysis of the international economic environment and its influence on corporate financial management of international operations. Prerequisites: IBUS 3101 and BADM 3501.

IBUS 4202. Regional Strategy for Multinationals. 3 Credits.

The business, economic, investment, and market environments in different regions of the world; regional strategy framework for responding to business opportunities in regional markets. Prerequisites: IBUS 3001.

IBUS 4203. Foreign Market Analysis. 3 Credits.

Project course involving market research for target market selection, market entry strategy, in-country marketing plan, and recommendations for strategy implementation in the target country. Focus on consulting process as ancillary component. Prerequisite: IBUS 3001, except by permission of instructor, and IBUS 3201.

IBUS 4302. International Banking. 3 Credits.

Theory and practice of international banking; analysis of international commercial and investment banking from a management perspective; subjects include current international monetary and financial environment, money and capital markets, and topical problems of international banking from a management perspective. Prerequisite: IBUS 3001, except by permission of instructor, and IBUS 3301.

IBUS 4303. International Monetary and Financial Issues. 3 Credits.

Risks facing the global financial and the international monetary systems and their macro-economic framework; role of financial oversight institutions, the dollar and of central banks; old and new economic players in the global system. Prerequisites: ECON 1012 or permission of the instructor.

IBUS 4401. Managing the Multinational Enterprise. 3 Credits.

The changing nature of the international environment and the resulting effects on strategy of U.S. and foreign multinational corporations. Prerequisite: IBUS 3001, except by permission of instructor.

IBUS 4402. Managing in Developing Countries. 3 Credits.

Challenges of operating in developing countries; cross-country experience and case studies exploring issues of institutions, corruption, infrastructure, private-public partnerships, competition, regulation, and global standards. Prerequisites: IBUS 3001 or IBUS 3101. Credit cannot be earned for this course and IBUS 6402.

IBUS 4402W. Managing in Developing Countries. 3 Credits.

Challenges of operating in developing countries. Cross-country experience and case studies exploring issues of institutions, corruption, infrastructure, private-public partnerships, competition, regulation, and global standards. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: IBUS 3001 or IBUS 3002; or permission of the instructor.

IBUS 4403. Oil: Industry, Economy, and Society. 3 Credits.

Multidisciplinary approach, related primarily to political economy and management, to oil and its effects on business, nation-states, and the world economy. Restricted to juniors and seniors who are familiar with economics measures and concepts at the level of ECON 1011 and ECON 1012.

IBUS 4404. Global Energy. 3 Credits.

Fundamental economics and politics of the energy business; effects on business decisions and strategies; conventional energy generation technologies and alternative technologies. Course equivalent or permission of the instructor may be substituted for the prerequisite. Restricted to juniors and seniors. Prerequisite: ECON 1012.

IBUS 4900. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. Prerequisite: IBUS 3001, except by permission of instructor. Credit cannot be earned for this course and IAFF 6378.

IBUS 4900W. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: IBUS 3001, except by permission of instructor.

IBUS 4995. Independent Study. 1-12 Credits.

Assigned topics. Admission by prior permission of advisor. May be repeated once for credit. Prerequisite: IBUS 3001, except by permission of instructor.

IBUS 5099. Variable Topics. 1-99 Credits.**IBUS 6201. International Marketing. 3 Credits.**

Methods and tools for analyzing world markets and their respective consumers and environments to develop marketing strategies for a global market. Selecting new international markets for entry and establishing a brand and strong regional presence. Prerequisites: MBAD 6245. Credit cannot be earned for this course and IBUS 3201.

IBUS 6202. Regional Strategy for Multinationals. 3 Credits.

Development of a framework to understand dynamic business, cultural, and economic environments in Asia and Latin America. Regional business strategies of multinational companies from outside and within Asia and Latin America that respond to business opportunities and challenges in these regions.

IBUS 6290. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Same As: ACCY 6900. Credit cannot be earned for this course and IAFF 6378.

IBUS 6297. International Management Experience. 1-6 Credits.

May be repeated for credit. Same As: FINA 6297, MGT 6297, MKTG 6297, SMPP 6297.

IBUS 6301. International Business Finance. 3 Credits.

Analysis of major issues and developments in the international financial environment and their impact on multinational corporations and financial institutions. Credit cannot be earned for this course and IBUS 3301.

IBUS 6302. Seminar: International Banking. 3 Credits.

Evolution in international banking and other international financial institutions. Functioning of international banking operations, public policy issues and regulatory issues in international banking, and the effect of international banks on national monetary policies.

IBUS 6303. External Development Financing. 3 Credits.

Institutions, instruments, and theory of external development financing; financial flows to developing countries; development finance and the role of international and regional development banks; policies, methods, and practices of the World Bank, the IMF, and others; technical assistance, training, capacity building, and role of institutions in sustained development. Prerequisites: MBAD 6242 and MBAD 6243; or ECON 6283 or ECON 6284.

IBUS 6304. Financial Crises and the Global Economy. 3 Credits.

The causes of a financial crisis and how various countries have responded to their specific crises; the relationship between financial crises and other economic developments, particularly in emerging market and developing economies; how global financial arrangements have evolved to help manage the risks of contagion. Recommended background: graduate-level study in macroeconomics.

IBUS 6305. Global Investment Banking. 3 Credits.

Examination of investment banking as practiced in a global context from a strategic perspective using case studies and readings. Topics covered include securities underwriting and derivatives instruments, risk management, and business development strategies. Prerequisites: MBAD 6242 and MBAD 6243; or ECON 6283 or ECON 6284.

IBUS 6307. International Portfolio Management. 3 Credits.

Theory and practice of international investment. Portfolio construction and optimization. Effects of exchange rate changes on portfolio risk and return. International asset pricing models and trading institutions. Prerequisites: MBAD 6234; and MBAD 6243 or ECON 6284.

IBUS 6308. International Reporting and Control. 1.5 Credit.

. Credit cannot be earned for this course and ACCY 6110.

IBUS 6309. International Accounting. 1.5 Credit.**IBUS 6310. International Financial Reporting Standards. 1.5 Credit.**

. Same As: ACCY 6112.

IBUS 6400. Oil: Industry, Economy, and Society. 3 Credits.

Multidisciplinary approach to the study of oil and its effects on business, nation-states, and the world economy, based primarily on political economy and management perspectives. Topics include the oil industry, the global oil environment, and the potential effects of oil on a society. (Same as IAFF 6378).

IBUS 6401. International Business Strategy. 3 Credits.

The changing nature of the international environment and the resulting impact on strategy of both U.S. and foreign multinational corporations. Marketing, production, and financial strategy. Focus of discussion is at the company level. Prerequisites: MBAD 6245. Credit cannot be earned for this course and IBUS 4401.

IBUS 6402. Managing in Developing Countries. 3 Credits.

Challenges of operating in developing countries. Cross-country experience and case studies exploring issues of institutions, corruption, infrastructure, private-public partnerships, competition, regulation, and global standards. Credit cannot be earned for this course and IBUS 4402.

IBUS 6403. International Business Negotiations. 3 Credits.

Theories and application in International Business Negotiations (IBN). Formulation of concepts and frameworks; development of systematic approaches to planning for and conducting IBN. Integration of functional, environmental, and institutional contexts facing negotiators internationally. Prerequisites: MBAD 6242 and MBAD 6243; or ECON 6283 or ECON 6284.

IBUS 6404. New Global Competitive Framework. 3 Credits.

How industries develop sustained competitive advantages within the global framework. The European Union's "single market" and the Economic-Monetary Union; the transformation of formerly centrally planned economies; the changing Japanese economy and emerging Pacific Basin, with implications for the U.S. economy, industries, and firms. Prerequisites: MBAD 6242 and MBAD 6243; or ECON 6283 or ECON 6284.

IBUS 6405. Legal Aspects of International and Multinational Business. 3 Credits.

Legal environment of international and multinational business including legal systems, antitrust laws, regulation of direct investment, international arbitration and expropriation; topics of current interest. Prerequisites: MBAD 6242 and MBAD 6243; or ECON 6283 or ECON 6284.

IBUS 6500. Global Currency and Stock Trading. 1.5-3 Credits.

Linkages of global events and risks and their impact on financial markets; foreign exchange market trading philosophies, techniques, strategies, and rules. Real-time practical training in trading major currencies, stocks, and managing an emerging markets portfolio in the GWSB Capital Markets Trading Room.

IBUS 6995. Directed Readings and Research. 3 Credits.

Supervised readings or research in selected fields within business administration. Permission of the instructor required prior to enrollment. May be repeated once for credit.

IBUS 6999. Thesis Seminar. 3 Credits.

No fixed content.

IBUS 8311. Seminar: Public-Private Sector Institutions and Relationships. 3 Credits.

An analysis and critique of alternative theoretical frameworks for describing, understanding, and predicting the nature, values, and actions of American public and private institutions. Problems, potentials, and alternatives for structuring public and private institutional arrangements to meet the needs of society. Same as SMPP 8311.

IBUS 8361. Colloquium on International Business. 3 Credits.

Examination of selected topics in international business, with emphasis on major new theoretical and empirical developments. Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details.

IBUS 8397. Doctoral Seminar. 1-3 Credits.

No fixed content.

IBUS 8900. Thesis Research. 3 Credits.

No fixed content.

IBUS 8998. Advanced Readings and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

IBUS 8999. Dissertation Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

MANAGEMENT

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with major in business, innovation and entrepreneurship concentration (p. 558)
- Bachelor of Science with a major in business, sport, event, and hospitality management concentration (p. 560)

Minor

- Minor in management and leadership (p. 570)

GRADUATE

Masters program

- Master of Human Resource Management (p. 578)
- Masters in Management (p. 572)
- Master of Science in the field of sport management (p. 583)

CERTIFICATES

Graduate Certificate

- Graduate Certificate in creativity, innovation, and entrepreneurship (p. 592)
- Graduate Certificate in hospitality management (p. 594)

- Graduate Certificate in human capital (p. 594)
- Graduate Certificate in management leadership (p. 595)
- Graduate Certificate in sports management (p. 597)
- Graduate Certificate in tourism management (p. 598)

FACULTY

Professors H. Aquinis (*Chair*), J. Bailey, D.C. Kayes, G.T. Solomon, C. Tosun, L. Yu

Associate Professors L. Delpy Neirotti, N.S. Hill, S. Levy (*Teaching*), P. McHugh, A. El Tarabishy (*Teaching, Deputy Chair*), M. Ormiston

Assistant Professors K. Sawyer, N.A. Cohen (*Visiting*), J. Suh (*Visiting*)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

MGT 1099. Variable Topics. 1-36 Credits.**MGT 3201. Leadership in Action. 3 Credits.**

Leadership in organizations and society. Consideration of whether leadership is a personal trait or a structured behavior and whether it is universal across domains or situation-specific. Modern and historical examples; issues of leadership in popular contexts.

MGT 3202. Managerial Negotiations. 3 Credits.

Negotiation concepts, strategies, and tactics as applied to managerial situations. The nature of interdependencies; competitive and collaborative negotiations; negotiations involving third-party dynamics, such as mediation and arbitration. Employee relations, including employee rights; the impact of unions and collective bargaining on management practices.

MGT 3203. Advanced Human Resource Management. 3 Credits.

The labor force and labor markets. The legal environment of human resource management. Human resource planning; employee recruiting, selection, training, development, compensation, motivation, discipline, health and safety. Prerequisite: BADM 3101.

MGT 3204. Contemporary Topics in Management. 3 Credits.

Contemporary practice in human resource planning, recruitment and selection, training and development, performance management, compensation and benefits, employee relations, and international human resource management. Interaction with practitioners through actual situations, case analyses, and presentations. Prerequisite: BADM 3101.

MGT 3300. Entrepreneurship. 3 Credits.

Students develop the knowledge and ability to launch their own venture. The entrepreneur and the process of entrepreneurship; key aspects of entrepreneurial success, from idea generation and development to launching a firm. Practical skills applicable to real-world scenarios.

MGT 3300W. Entrepreneurship. 3 Credits.

Students develop the knowledge and ability to launch their own venture. The entrepreneur and the process of entrepreneurship; key aspects of entrepreneurial success, from idea generation and development to launching a firm. Practical skills applicable to real-world scenarios. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: MGT 3300.

MGT 3301. Small Business Management. 3 Credits.

Theory and practice of entrepreneurship. How to start or acquire a new business; effective management, including the essentials of planning, organizing, financing, marketing, and controlling the smaller enterprise. Students consult with a small DC-area company as part of a team research project. Prerequisites: MGT 3300W or permission of the instructor.

MGT 3302. e-Entrepreneurship. 3 Credits.

The process of turning a web, mobile, or wearable business idea into a validated, repeatable, and scalable business model using lean startup methodologies; testing and user feedback, technology basics, promotions, and tracking core metrics. Permission of the instructor may be substituted for the prerequisite. Prerequisites: MGT 3300 or MGT 3300W.

MGT 3303. Women's Entrepreneurial Leadership. 3 Credits.

Students create and execute a business plan while developing essential skills, mentoring relationships, and self-confidence and self-insight.

MGT 3305. Human Capital Sustainability. 3 Credits.

Managerial challenges associated with creating sustainable employment relationships using concepts from human resource management, labor relations, organizational behavior, and entrepreneurship; how markets, management practices, collective bargaining, and public policy affect human capital sustainability.

MGT 4003. Management of the Growing Entrepreneurial Venture. 3 Credits.

Examination of the data, dilemmas, and decisions that can confront leaders of post-startup entrepreneurial ventures.

MGT 4900. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. May be repeated once for credit.

MGT 4900W. Special Topics. 3 Credits.

Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

MGT 4995. Independent Research. 1-6 Credits.

Assigned topics. Permission of the advisor required prior to enrollment. May be repeated once for credit.

MGT 5099. Variable Topics. 1-99 Credits.

MGT 6210. Leading Teams. 3 Credits.

Knowledge and skills for effectively leading teams. Setting up teams for success, promoting effective team dynamics, and other leadership issues for contemporary teams that operate in a global, digital environment.

MGT 6213. Change Management. 3 Credits.

Behavioral and organizational components of individual, team, and firm-wide change. The dynamics that often accompany the change process.

MGT 6215. Conflict Management and Negotiations. 3 Credits.

The nature and sources of conflict and interdependence in social and organizational dynamics. Various means of resolving conflict, including the use of competitive and collaborative negotiations and mediation. Case discussion, exercises, role-playing, and simulation. Managers as mediators and negotiators.

MGT 6216. Cross-Cultural Management. 3 Credits.

The cultural foundations of organizations and institutions, with an emphasis on managerial behavior. Cross-cultural differences as they affect work-related behaviors, such as communication, attitude, teamwork, negotiation, and decision making.

MGT 6252. Strategic Human Resource Management. 3 Credits.

Strategic International and domestic applications of human resource management functions. Selection, preparation, compensation of managers and executives to think critically about HR in a global environment.

MGT 6253. Leadership and Executive Development. 3 Credits.

The required skills, knowledge, and abilities for effective executive leadership in organizations. Contemporary and classical leadership theories and research approaches.

MGT 6254. Negotiations and Labor Relations. 3 Credits.

Negotiation theory and practice in the context of labor-management relations in both union and nonunion settings. Emphasis on negotiation and conflict resolution skills, arbitration and grievance procedures, public-sector labor relations, labor laws and public policy, and global labor relations issues.

MGT 6257. Performance Management and Development. 3 Credits.

The design and implementation of effective and successful performance management systems; measuring and developing the performance of individuals and groups and aligning performance with an organization's strategic objectives.

MGT 6258. Applied Organization Leadership. 3 Credits.

In-depth studies of theories of leadership. Legal and ethical obligations of leadership. The leader in the process of assuming responsibility. Experiential exercises designed to develop the students' interpersonal abilities and leadership capacities.

MGT 6259. Employment Law and Ethics. 3 Credits.

An examination of the interaction of legal requirements and personal ethics and their influence on managerial decisions affecting the employment exchange. Special emphasis on equal employment opportunity and civil rights, workers' compensation, occupational health and safety, collective bargaining, and wrongful discharge.

MGT 6270. Consulting Processes. 3 Credits.

Theories and methods of planning, introducing, and coping with change in management through the helping process. Intended both for managers seeking an understanding of the consultative approach to planned change and for persons in staff or consultative roles seeking understanding of the consultative process.

MGT 6271. Consulting Practicum. 3 Credits.

Instruction in and application of integrative problem solving, team work, client relationship, and communications skills required to be a successful management consultant. Students gain practical experience through a team-based assignment consulting for a client. Prerequisite: MGT 6270.

MGT 6277. Critical Thinking Skills for Executive Leadership. 3 Credits.

Theory and practice of critical thinking; how it differs from other types of thinking and other executive leadership competencies; approaches known to improve thinking skills.

MGT 6280. Entrepreneurship. 3 Credits.

The entrepreneur as a phenomenon. Theory and experiences associated with entrepreneurs, entrepreneurial acts, and entrepreneurship in all organizational settings—large, small, public, and private.

MGT 6281. Small Business Management. 3 Credits.

The start-up process and management of small firms. Field projects involve student teams as consultants to local businesses. Case studies. Emphasis on total customer service, international opportunities, and minority and women's issues.

MGT 6282. New Venture Initiation. 3 Credits.

Essentials of planning a new business venture. Sources of financing, evaluation of alternative new business ventures, and analysis of business functions. Creating and analyzing the business plan.

MGT 6283. Strategic Entrepreneurship. 3 Credits.

Capstone course for the small business/entrepreneurship concentration. Student teams assist companies in upgrading strategies. Prerequisites: MBAD 6265, MGT 6281, MGT 6282 and/or permission of instructor.

MGT 6284. Family Business Management. 3 Credits.

Challenges of managing a family business: risk strategies; successor development and succession planning; stages of family business growth; family motivations and goals. Field projects provide hands-on experience.

MGT 6285. Social Entrepreneurship. 3 Credits.

Theory and practice of social entrepreneurship. The power and limits of social entrepreneurship as a tool for creating sustainable and scalable social impact.

MGT 6286. Creativity and Innovation. 3 Credits.

How organizational culture encourages or discourages creativity in individuals and teams and how organizational policies support or undercut innovation. Methods for developing and strengthening creative ideas and innovative action. Factors such as breakthrough design that encourage creativity and support innovation. Students examine and assess, on both personal and organizational levels, the bases of and propensity for creativity and innovation.

MGT 6287. Women's Entrepreneurial Leadership. 3 Credits.

Students create and execute a business plan while developing essential skills, tools and mentoring relationships.

MGT 6290. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. May be repeated once for credit.

MGT 6297. International Management Experience. 3 Credits.

Same as FINA 6297/ IBUS 6297/ MKTG 6297/ SMPP 6297. May be repeated for credit.

MGT 6298. Directed Readings and Research. 1-6 Credits.

.

MGT 6299. Thesis Seminar. 3 Credits.

MGT 6301. Negotiations. 1.5 Credit.

Major concepts and theories of negotiation; the dynamics of interpersonal and intergroup conflict and its resolution; skill development relevant to a broad range of applied contexts; reflective posture about negotiations specifically and social influence broadly. Restricted to students in the World Executive MBA program.

MGT 6999. Thesis Research. 3 Credits.

MGT 8382. Foundations of Organizational Behavior and Development. 3 Credits.

The individuals and institutions central to the field of organizational behavior and development. Students read about, meet with, and discuss the work of persons central to the development of the field. Restricted to candidates in the PhD in organizational behavior and development program or with permission of the instructor.

MGT 8383. Field Research in Organizational Settings. 3 Credits.

Applications of field research techniques in formal organizational settings. Examination of the logic of inquiry and techniques of qualitative data collection. Intensive interviewing and participant observation in field settings are emphasized. Credit cannot be earned for this course and SOC 6240.

MGT 8385. Special Topics in Research Methods. 3 Credits.

Research problems and issues related to student dissertations form topics for readings, group discussions, and assigned papers.

MGT 8386. Management Ideas in Progress. 3 Credits.

Doctoral students work with a variety of faculty members as they develop new ideas, research projects, and engage in seminal inquiry. The content and structure of the course depends based on the instructor. Restricted to students in the PhD in organizational behavior and development program or with permission of the instructor.

MGT 8390. Philosophical Foundations in Administration Research. 3 Credits.

Philosophy of science as applied to research in administration. Topics include the nature and current problems of epistemology, the development and role of theories, and the relationship between theory, methodology, and empirical data.

MGT 8391. Adv Prob-Research Methodology. 3 Credits.

Use of models and theoretical frameworks in research; formulation of research questions, hypotheses, operational definitions, research designs, sampling and data analysis approaches. Restricted to doctoral candidates who have completed the general examination and all courses, and are preparing for their dissertation.

MGT 8397. Advanced Special Topics. 1-3 Credits.

Current research and scholarly issues in management science.

MGT 8998. Advanced Reading and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

MGT 8999. Dissertation Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

MARKETING

UNDERGRADUATE

Bachelor's program

- Bachelor of Science with a major in marketing (p. 566)
- Bachelor of Science with a major in business, marketing strategy and analytics concentration (p. 559)

Minor program

- Minor in marketing (p. 571)

CERTIFICATES

Certificate programs

- Graduate Certificate in digital marketing and analytics (p. 592)
- Graduate Certificate in marketing and brand management (p. 596)

FACULTY

Professors R.S. Achrol, S.S. Hassan, D. Hoffman, L.M. Maddox, T. Novak, V.G. Perry (Chair), P.A. Rau

Associate Professors S. Elliott (*Teaching*), M.L. Liebrezn-Himes

Assistant Professor S. Ham, L. Jiang

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Departmental prerequisite: BADM 3401 Contemporary Marketing Management is prerequisite to all courses in the Marketing Department; additional prerequisites are listed with the courses.

MKTG 1099. Variable Topics. 16 Credits.

MKTG 3142. Consumer Behavior. 3 Credits.

Social, cultural, and psychological factors influencing the behavior of consumers. Models of buyer behavior, consumption patterns, market segmentation, attitude formation and change, brand loyalty, adoption of innovations, and store choice decisions. Marketing management and public policy implications of consumer research. Same As: MKTG 3142W.

MKTG 3142W. Consumer Behavior. 3 Credits.

Social, cultural, and psychological factors influencing the behavior of consumers. Models of buyer behavior, consumption patterns, market segmentation, attitude formation and change, brand loyalty, adoption of innovations, and store choice decisions. Marketing management and public policy implications of consumer research. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: MKTG 3142.

MKTG 3143. Marketing Research. 3 Credits.

Basic methods and techniques of market research; designing a marketing research project, including research questions, secondary and syndicated data, primary data collection approaches, data analysis, and report presentation; focus group interviews, questionnaire construction, and statistical software packages. Prerequisites: DNSC 1001 or equivalent approved by the instructor or department chair. Corequisites: MKTG 3142.

MKTG 4148. Advertising and Marketing Communications. 3 Credits.

Executing and measuring the effectiveness of advertising and integrated marketing communications campaigns. Methods for gathering research for a customer-based campaign, defining key target personas, developing a singular message strategy, and reaching consumers through media typically used in marketing communications.

MKTG 4149. Advanced Advertising Campaigns. 3 Credits.

Students conceptualize, support, and execute a marketing communications campaign for entry in the American Advertising Federation's National Student Advertising Competition. Interview and permission of the instructor required prior to enrollment. Prerequisites: MKTG 4148 or permission of the instructor.

MKTG 4150. Salesmanship and Sales Management. 3 Credits.

Development of personal selling and presentation skills; examination of types of selling situations. Organization of sales department, sales planning and forecasting, quotas, territories, performance standards, and analysis and control of distribution costs.

MKTG 4151W. Marketing Communications Planning. 3 Credits.

Components of a marketing communications plan; writing, development, and presentation, including executive summary, situation analysis (company, consumer, competitor), target market segmentation, consumer behavior analysis, positioning strategy, and tactics for implementation. Permission of the instructor is required prior to enrollment. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: BADM 3401, MKTG 3142 and 3143.

MKTG 4152. Retailing Management. 3 Credits.

A study of retailing management and strategy covering the current environment of retailing, retail market and financial analysis, store location and design, inventory management, and non-store and service retailing. Industry executive and student presentations; case analyses. Prerequisites: BADM 3401, MKTG 3142 and MKTG 3143.

MKTG 4154. Digital Marketing. 3 Credits.

Using the social Web to leverage a firm's marketing strategy; developing and improving a company's electronic marketing strategy for the next evolution in Web commerce. Prerequisites: BADM 3401, MKTG 3142 and MKTG 3143.

MKTG 4156. Integrated Marketing Communications. 3 Credits.

The ubiquity of advertising and promotion; fundamental shifts in how consumers get information and from whom, and how much trust they place in different sources; strategies to address a rapidly changing media environment; concepts, analyses, and activities that comprise advertising; assessing and solving advertising challenges. Prerequisites: BADM 3401, MKTG 3142 and MKTG 3143.

MKTG 4159. Marketing Strategy. 3 Credits.

The capstone course for marketing majors. Analytical integration of material covered in previous marketing courses. Marketing strategy literature, financial dimensions of marketing decisions, and comprehensive cases. Prerequisites: BADM 3401 or BADM 3401W; and MKTG 3142 and MKTG 3143.

MKTG 4161. Pricing Strategy: Competitive and Dynamic Pricing. 3 Credits.

Pricing decisions confronting marketers. Equips students with a comprehensive approach to managing pricing decisions. Prerequisites: BADM 3401; MKTG 3142 or MKTG 3142W; and MKTG 3143. Credit cannot be earned for this course and MKTG 6261.

MKTG 4162. Digital Marketing Analytics. 3 Credits.

Measuring, analyzing, and interpreting key behavioral and performance indices for digital marketing. Hands on experience working with data sets, and applying a range of techniques to extract insights from data used primarily in digital marketing. Credit cannot be earned for this course and MKTG 6262.

MKTG 4163. Applied Marketing Decision Analytics. 3 Credits.

Merging marketing and analytics using various tools, including statistical software, to analyze primary and secondary qualitative and quantitative data to support marketing decisions. Credit cannot be earned for this course and MKTG 6263.

MKTG 4164. Artificial Intelligence and Automated Marketing. 3 Credits.

Applying data collection, management, and analysis to address marketing problems from an artificial intelligence/machine learning (AI/ML) perspective and to automate models. Prerequisites: BADM 2301, BADM 3401, MKTG 3143, and MKTG 3142 or MKTG 3142W. Credit cannot be earned for this course and MKTG 6264.

MKTG 4165. Customer Relationship Management and Relational Databases. 3 Credits.

The development and implementation of methods and strategies for doing business on a more personalized, one-to-one basis. Devising targeted communications and promotions to individual customers based on their purchasing behaviors. Credit cannot be earned for this course and MKTG 6265.

MKTG 4900. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. Prerequisites: BADM 3401, MKTG 3142 and MKTG 3143.

MKTG 4900W. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: BADM 3401, MKTG 3142 and MKTG 3143.

MKTG 4995. Independent Study. 1-12 Credits.

Assigned topics. Permission of the advisor required prior to enrollment. May be repeated once for credit. Prerequisite: BADM 3401.

MKTG 5099. Variable Topics. 1-99 Credits.**MKTG 6241. Advanced Marketing Management. 3 Credits.****MKTG 6242. Buyer Behavior. 3 Credits.**

The buyer decision process model and how and why products and services are purchased; synthesis of behavioral sciences applied to understanding individual, family, and organizational decision processes; the impact of consumer decisions on the marketing strategies of business and public organizations; consumer marketing applications in high-tech and services industries and on a global scale.

MKTG 6243. Marketing Research. 3 Credits.

The marketing research process: designing, conducting, and using market research studies. Managing the market research project; qualitative research; survey and experimental designs; data analysis with statistical software packages. Prerequisite: MBAD 6221.

MKTG 6246. Marketing of Services. 3 Credits.

Services in a marketing context from the viewpoint of the customer; service quality, marketing analysis, consumer behavior, product analysis, channel distribution, pricing, and promotional decision making; business strategies examined in service trends, benefits of relationships for firms and for customers, service failure and recovery.

MKTG 6248. Advertising and Marketing Communications Strategy. 3 Credits.

Practical instruction in executing an advertising and integrated marketing communications campaign; strategic planning, communication theory, planning from a consumer attitudes and behavioral perspective, and campaign execution. Prerequisite: MBAD 6274. Recommended background: MKTG 6242.

MKTG 6250. Selling/Sales Management. 3 Credits.**MKTG 6251. Product Management. 3 Credits.****MKTG 6252. Digital Marketing. 3 Credits.**

The impact of technology on sales and marketing strategy; e-branding, customer relationship management, permission e-mail, sales force technology enhancement, mobile commerce, online marketing research, and electronic channels of distributions. Prerequisite: MBAD 6274.

MKTG 6255. Strategic Brand Management. 3 Credits.

Theoretical foundation for branding and brand management and practical application of these concepts in marketing management. Prerequisite: MBAD 6274.

MKTG 6256. Integrated Marketing Communication. 3 Credits.

The ubiquitous nature of advertising and promotion; how and from whom consumers get information and their level of trust in different information sources; concepts, analyses, and activities related to advertising; assessing and solving challenges. Prerequisite: MBAD 6274.

MKTG 6259. Marketing Strategy. 3 Credits.

Required capstone course for marketing students. Analysis of complex marketing problems involving policy and operational decisions; emphasis on creative marketing strategy.

MKTG 6261. Dynamic Pricing Strategy. 3 Credits.

Fundamental theories and concepts that constitute the principles of pricing in marketing. Examples of topics covered include pricing and price promotions in distribution channels, product line pricing, and online pricing. Recommended background: Prior completion of a course in basic microeconomics. Credit cannot be earned for this course and MKTG 4161.

MKTG 6262. Digital Marketing Analytics. 3 Credits.

Applied data and analytics in the digital marketing space with hands on experience working with data sets, and applying a range of techniques to extract insights from data primarily used in digital marketing. Credit cannot be earned for this course and MKTG 4162.

MKTG 6263. Marketing Decision Analytics. 3 Credits.

Transforming data into actionable information, using various statistics tools and software to analyze primary and secondary data; identifying data nuances; and weaving qualitative and quantitative data into a story. Prerequisites: MKTG 6243. Credit cannot be earned for this course and MKTG 4163.

MKTG 6264. Artificial Intelligence and Machine Learning for Marketing Automation. 3 Credits.

Application of machine learning and artificial intelligence models to marketing-related data. Focus on automating procedures and communicating findings in a business environment. Recommended background: Basic statistics and some knowledge of R and Python. Credit cannot be earned for this course and MKTG 4164.

MKTG 6265. Marketing Relational Databases and Customer Relationship Management. 3 Credits.

Customer-centric concepts, metrics; and strategies; basic customer database organization and analytics; and predictive modelling of customer responses. Credit cannot be earned for this course and MKTG 4165.

MKTG 6290. Special Topics. 3 Credits.

Same As: FINA 6290, MBAD 6290.

MKTG 6297. International Management Experience. 3 Credits.

Same as FINA 6297/ IBUS 6297/ MGT 6297/ SMPP 6297. May be repeated for credit.

MKTG 6298. Directed Readings and Research. 1-3 Credits.

MKTG 6299. Thesis Seminar. 3 Credits.

MKTG 6999. Thesis Research. 3 Credits.

MKTG 8341. Seminar: Marketing. 3 Credits.

MKTG 8397. Doctoral Seminar. 3 Credits.

MKTG 8998. Advanced Readings and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

MKTG 8999. Dissertation Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

STRATEGIC MANAGEMENT AND PUBLIC POLICY

UNDERGRADUATE

Bachelor's program

- Bachelor of Science with a major in business, business economics and public policy concentration (p. 556)
- Bachelor of Science with a major in business, information systems and technology management concentration (p. 557)

CERTIFICATES

Graduate certificates

- Graduate Certificate in corporate responsibility (p. 591)
- Graduate Certificate in strategic management (p. 598)

FACULTY

Professors J.H. Beales III, H.J. Davis, J. Rivera, J.B. Wade, J. Walter

Associate Professors E.J. Englander, J. Forrer (*Research*), K. Martin (*Chair*)

Assistant Professors S. Patnaik, T. Radin (*Teaching*), G. de los Reyes, D. Halliday (*Teaching*), V. Pamphile

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work

- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

SMPP 1099. Variable Topics. 1-36 Credits.

SMPP 4900. Special Topics. 1-3 Credits.

Experimental offering; new course topics and teaching methods.

SMPP 4900W. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided topics differ. Consult the Schedule of Classes for more details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

SMPP 4995. Independent Study. 1-12 Credits.

Assigned topics. Permission of the advisor required prior to enrollment. May be repeated once for credit.

SMPP 5099. Variable Topics. 1-99 Credits.

SMPP 6201. Business and Public Policy. 3 Credits.

SMPP 6202. Business-Government Relations. 3 Credits.

Historical and philosophical foundations of the business-government relationship. Regulation, international trade, and corporate political activities. Public policy issues facing business and the business community's political response.

SMPP 6203. Federal Government Regulation in Society. 3 Credits.

.

SMPP 6205. Business Representation and Lobbying. 3 Credits.

Strategies, tactics, and techniques used by business in representing itself to the legislative and executive branches and regulatory agencies of the federal government. Legal and practical constraints. Ethical considerations.

SMPP 6206. Applied Microeconomics. 3 Credits.

Applications of economic theory to public and private decisions with emphasis on public policy analysis. Focus on market structure and its implications. Imperfect information, common property, public goods and externalities. Economic analysis of government behavior and legal institutions. Prerequisites: ECON 6217 or ECON 6219; and MBAD 6222.

SMPP 6207. Environment, Energy, Technology, and Society. 3 Credits.

The identification, examination, and evaluation of how environment, energy, and technology are interrelated and how these interactions influence policy formulation and implementation at the international, national, regional, industrial, and organizational levels. Same as PPPA 6067.

SMPP 6208. Macroeconomic Policy and Business. 3 Credits.

Determination of national income, employment, inflation, and interest rates. The role of expectations in the economy. Impact of government purchases, tax policy, and deficits. Monetary policy institutions. The global economy and exchange rates. Prerequisites: ECON 6218 or ECON 6219; and MBAD 6222.

SMPP 6209. Seminar: Business Economics and Public Policy. 3 Credits.

Analysis and discussion of selected issues by students and representatives of government and business. Prerequisite: SMPP 6202 or MBAD 6284.

SMPP 6210. Strategic Environmental Management. 3 Credits.

Examination and analysis of the orientation and actions of private, public, and nonprofit sectors in relation to their natural environments. Emphasis on organizational interaction and effectiveness, particularly regarding business firms and industry, on issues of environmental quality and sustainability.

SMPP 6211. Corporate Environmental Management in Developing Nations. 3 Credits.**SMPP 6212. Business Law: Enterprise Org. 3 Credits.****SMPP 6213. Management of Strategic Issues. 3 Credits.**

The body of management theory and practice that has evolved to identify, analyze, and resolve strategic organizational issues. Methodology of the field; applications to critical issues in labor relations, energy and pollution, marketing and consumerism, business-government relations, and the global economy.

SMPP 6214. Consultative Processes. 3 Credits.

Theories and methods of planning, introducing, and coping with change in management through the helping process. Intended both for managers seeking an understanding of the consultative approach to planned change and for persons in staff or consultative roles seeking understanding of the consultative process. Same as TSTD 6214.

SMPP 6215. Corporate Governance and Ethics. 3 Credits.

The theory, practice, and public policy environment of corporate governance. Purpose, functioning, and responsibilities of boards of directors. Power, control, and compensation of corporate management. Shareholders and stakeholders. Corporate governance in comparative national settings. Same as ACCY 6801.

SMPP 6216. Public Policy, Governance, and the Global Market. 3 Credits.

The socioeconomic foundations of government regulation and public policy cooperation for the governance of firms, markets and globalization. The evolution of national, transatlantic and multilateral frameworks for market and civil society governance, international competition policy cooperation, regulatory harmonization and industry standards. (Same as PPPA 6018).

SMPP 6218. Topics in Business and Society. 3 Credits.

Business engagement in policy making bodies through business organizations. Topics vary by semester. See department for more details.

SMPP 6241. Global Corporate Responsibility. 3 Credits.**SMPP 6271. Corporate Environmental Management and Policy. 1.5 Credit.****SMPP 6290. Special Topics. 3 Credits.**

Experimental offering; new course topics and teaching methods. May be repeated once for credit. Same As: ACCY 6900.

SMPP 6291. Ethics and Business. 3 Credits.

An in-depth, comprehensive exploration, analysis, and evaluation of specific for profit and nonprofit organization values, approaches, and outcomes related to multiple ethical ideals, systems, and practices.

SMPP 6292. Co-Curricular Activities in Responsible Management. 0 Credits.

Required for students in the graduate certificate in responsible management program. Students complete a project or case study on a relevant topic with an organization or faculty member; attend and submit written reports on a series of seminars, panel discussions, or other pre-approved events related to responsible management; and complete designated community service hours. Restricted to students in the graduate certificate in responsible management program.

SMPP 6293. American Business History. 3 Credits.

The history of American business institutions in manufacturing, distribution, transportation, and finance. Particular attention is given to the period since industrialization, with consideration of business institutions in their economic, legal, governmental, and social contexts. (Same as HIST 6322).

SMPP 6295. Intern Qual&Quant Analysis. 3 Credits.**SMPP 6297. International Management Experience. 1.5-4.5 Credits.**

Same as FINA/IBUS/Mgt/Mktg 6297. May be repeated for credit.

SMPP 6298. Directed Readings and Research. 1-6 Credits.

Supervised readings or research. Admission by prior permission of instructor. May be repeated once for credit.

SMPP 6299. Thesis Seminar. 3 Credits.

SMPP 6999. Thesis Research. 3 Credits.

SMPP 8311. Seminar: Public-Private Sector Institutions and Relationships. 3 Credits.

An analysis and critique of alternative theoretical frameworks for describing, understanding, and predicting the nature, values, and actions of American public and private institutions. Problems, potentials, and alternatives for structuring public and private institutional arrangements to meet the needs of society. Restricted to doctoral candidates. Credit cannot be earned for this course and PPPA 8111.

SMPP 8321. Seminar in Strategic Management. 3 Credits.

Develops understanding of the major research streams in strategic management; exposure to theoretical research frameworks and methodological issues and approaches.

SMPP 8331. Doctoral Seminar. 3 Credits.

Designing sound theory-based, empirical research projects for the study of questions relevant to the field of strategic management.

SMPP 8391. Seminar: Business Management. 3 Credits.

Examination of major current issues, both theoretical and empirical, affecting the development of the business enterprise. Topics to be announced. Emphasis on policy and strategic issues affecting the total enterprise. (Offered as the demand warrants).

SMPP 8998. Advanced Readings and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

SMPP 8999. Dissertation Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

UNDERGRADUATE PROGRAMS

Bachelor's programs

- Bachelor of Science with a major in accountancy (p. 551)
- Bachelor of Science with a major in business (p. 553)
 - concentration in accountancy (p. 554)
 - concentration in business analytics (p. 555)
 - concentration in business economics and public policy (p. 556)
 - concentration in finance (p. 556)
 - concentration in information systems and technology management (p. 557)
 - concentration in innovation and entrepreneurship (p. 558)
 - concentration in international business (p. 558)
 - concentration in marketing strategy and analytics (p. 559)
 - concentration in real estate (p. 560)

- concentration in sport, event, and hospitality management (p. 560)
- individualized concentration (p. 561)
- Bachelor of Science with a major in business analytics (STEM) (p. 561)
- Bachelor of Science with a major in finance (p. 563)
- Bachelor of Science with a major in information systems (STEM) (p. 564)
- Bachelor of Science with a major in marketing (p. 566)

Combined programs

- Dual Bachelor of science with a major in accountancy and Master of Accountancy (<http://bulletin.gwu.edu/business/accountancy/dual-ba-ma/>)
- Dual Bachelor of Science with a major in finance and Master of Science in Finance (p. 567)

Minors

- Minor in accountancy (p. 568)
- Minor in business (p. 568)
- Minor in business analytics (p. 569)
- Minor in creativity, innovation, and entrepreneurship (p. 569)
- Minor in management and leadership (p. 570)
- Minor in marketing (p. 571)
- Minor in real estate (p. 571)

BACHELOR OF SCIENCE WITH A MAJOR IN ACCOUNTANCY

The bachelor science with a major in accountancy degree program offers both specialized knowledge in accounting and a general education leading to a broad understanding of the business world. The program is designed to prepare students for a professional career in accounting in the public or private sector as well as for graduate study in business, finance, information systems, or law. Students are provided with multiple opportunities to gain practical experience, such as the ability to study the stock market in a classroom resembling a Wall Street trading venue.

Visit the program website (<http://business.gwu.edu/undergraduate/baccy/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 120 credits, including general education, pre-business, and business core courses.

Code	Title	Credits
Required		
General Education courses		

UW 1020	University Writing
One critical analysis course in the humanities. ¹	
One scientific reasoning with lab course. ¹	
Pre-business courses	
BADM 1001 & BADM 1002	First-Year Development Course I and First-Year Development Course II ²
or BADM 1003	Transfer Student Development Course
BADM 3001	Career Management Strategy ³
BADM 4001	Leadership and Career Launch ⁴
DNSC 1001	Business Analytics I: Statistics for Descriptive and Predictive Analytics
or STAT 1051	Introduction to Business and Economic Statistics
or STAT 1053	Introduction to Statistics in Social Science
or STAT 1111	Business and Economic Statistics I
or APSC 3115	Engineering Analysis III
DNSC 2001	Business Analytics II: Predictive and Prescriptive Analytics
or STAT 2112	Business and Economic Statistics II
or STAT 2118	Regression Analysis
or STAT 2123	Introduction to Econometrics
ECON 1011	Principles of Economics I
ECON 1012	Principles of Economics II
A sequence of mathematics courses from the following: ⁵	
MATH 1051 & MATH 1252	Finite Mathematics for the Social and Management Sciences and Calculus for the Social and Management Sciences
or MATH 1231 & MATH 1232	Single-Variable Calculus I and Single-Variable Calculus II
Business core courses	
ACCY 2001	Introduction to Financial Accounting
ACCY 2002	Introductory Managerial Accounting
BADM 2001	Markets and Politics
or BADM 2001W	Markets and Politics

BADM 2301	Management Information Systems Technology
BADM 3103	Human Capital in Organizations
BADM 3401 or BADM 3401W	Contemporary Marketing Management Contemporary Marketing Management
BADM 3501	Financial Management and Markets
BADM 4801	Strategy Formulation and Implementation
IBUS 3001	Introduction to International Business
Accountancy major courses	
ACCY 3101	Intermediate Accounting I
ACCY 3102	Intermediate Accounting II
ACCY 3401	Federal Income Tax: Individuals
ACCY 3403	Advanced Tax
ACCY 3601	Business Law: Contracts, Torts, and Property
ACCY 4107	Advanced Accounting
ACCY 4301	Auditing
ACCY 4501	Accounting Systems
ACCY 4601	Business Law: Enterprise Organization
ACCY 4801	Financial Accounting Capstone

Electives

Students take sufficient credits in elective courses to reach the 120 credits required for the degree. Elective courses may be numbered from 1000 to 4999. Electives may not include LSPA (Lifestyle, Sport, and Physical Activity) courses. They may include one HLWL (Health and Wellness) course.

Elective courses may be applied to a minor, a GWSB concentration, or a GWSB or non-GWSB second major.

¹See University General Education Requirement (p. 42) for a list of approved courses.

²Freshmen are required to take BADM 1001 and BADM 1002, transfer students are required to take BADM 1003.

³BADM 3001 is offered with accounting-specific sections and should be completed during the sophomore year, following successful completion of BADM 1001 and BADM 1002, or BADM 1003.

⁴BADM 4001 is offered with experiential-specific sections and should be completed in the senior year.

⁵Students should meet with a GWSB academic advisor to discuss other options for fulfilling the mathematics requirement.

Note: Students who intend to take the CPA examination should be aware that the coursework required for admission to the examination varies from state to state. Students are advised to consult the Board of Accountancy (<https://nasba.org/stateboards/>) for the state in which they plan to take the examination and choose courses that meet that state's requirements.

Double majors

Students in the BS in accountancy program who wish to pursue a double major must declare accountancy as their first major. Each major must include 15 unique credits that do not apply to any other degree requirement, with the exception of a WID requirement. All courses in both majors must be completed with a minimum grade of C-. Students should reference the regulations in this Bulletin and consult their academic advisor for assistance and additional information.

BACHELOR OF SCIENCE WITH A MAJOR IN BUSINESS REQUIREMENTS

The following requirements must be fulfilled: 120 credits, including general education and pre-business courses, and business core courses and, and all courses in one concentration.

Code	Title	Credits
General education		
UW 1020	University Writing	
One critical analysis in the humanities course. ¹		
One scientific reasoning with lab course. ¹		
One of the following two-course sequences in mathematics: ²		
MATH 1051 & MATH 1252	Finite Mathematics for the Social and Management Sciences and Calculus for the Social and Management Sciences	
or MATH 1231 & MATH 1232	Single-Variable Calculus I and Single-Variable Calculus II	
Pre-business courses		

BADM 1001 & BADM 1002	First-Year Development Course I and First-Year Development Course II ³
or BADM 1003	Transfer Student Development Course
BADM 3001	Career Management Strategy ⁴
BADM 4001	Leadership and Career Launch ⁵
ECON 1011	Principles of Economics I
ECON 1012	Principles of Economics II
DNSC 1001	Business Analytics I: Statistics for Descriptive and Predictive Analytics

Electives

In general, students complete 37 credits in electives courses, or the minimum necessary to reach 120 credits for the degree. 18 of those credits must be taken outside of GWSB. Elective courses may be numbered 1000 to 4999. Electives may not include LSPA (Lifestyle, Sport, and Physical Activity) courses and may include a maximum of one HLWL (Health and Wellness) course. Students may use electives for an additional concentration, a second GWSB or non-GWSB major, or a minor.

¹See University General Education Requirement (p. 42) for a list of approved courses.

²Students should meet with a GWSB academic advisor to discuss other options for fulfilling the mathematics requirement.

³Freshmen are required to take BADM 1001 and BADM 1002; transfer students are required to take BADM 1003.

⁴BADM 3001 is offered with subject-specific sections and should be completed during the sophomore year, following successful completion of BADM 1001 and BADM 1002, or BADM 1003.

⁵BADM 4001 is offered with experiential-specific sections and should be completed in the senior year.

⁶Students should meet with a GWSB academic advisor to discuss which advanced statistics requirement is appropriate for your concentration.

Concentration requirement

A business concentration is required for all BS in business students. Students select a field of concentration from among accountancy; business analytics; business economics and public policy; finance; information systems and technology management; innovation and entrepreneurship; international business; marketing strategy and analytics; real estate; sport, event, and hospitality management; or, with faculty approval, may structure an individualized field of concentration reflecting a specific interest in business. The concentration consists of five field courses designated by the department. The concentration must be selected no later than the second semester of the sophomore year. Students should contact the GWSB Undergraduate Advising Center to declare a concentration.

Concentrations are restricted to GWSB students. Students may pursue up to three concentrations under the BS in business degree. Each concentration must have at least 9 credits taken in residence. Courses taken for the concentration

may not apply to any other requirement. All courses in each concentration must be completed with a minimum grade of C-. Information concerning concentration requirements is available on the School of Business website (<https://business.gwu.edu/academics/programs/undergraduate/bba/>) or at the GWSB Undergraduate Advising Center (<https://business.gwu.edu/current-students/undergraduate/advising-center/>).

CONCENTRATION OPTIONS:

- Accountancy (p. 554)
- Business analytics (p. 555)
- Business economics and public policy (p. 556)
- Finance (p. 556)
- Information systems and technology management (p. 557)
- Innovation and entrepreneurship (p. 558)
- International business (p. 558)
- Marketing strategy and analytics (p. 559)
- Real estate (p. 560)
- Sport, event, and hospitality management (p. 560)
- Individualized concentration (p. 561)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BACHELOR OF SCIENCE WITH A MAJOR IN BUSINESS, ACCOUNTANCY CONCENTRATION

The bachelor of science with a major in business (BS) with a concentration in accountancy degree program provides undergraduate students with the analytical tools and conceptual framework needed to understand and record financial transactions.

The School of Business offers two degree options for students to study accountancy: the BS in business with a concentration in accountancy and the bachelor of science with a major in accountancy (<http://business.gwu.edu/undergraduate/baccy/>) (BS). The BS degree with an accountancy concentration is intended to be paired with a second, complementary field of concentration. For students who plan to work as an accountant,

often with a CPA designation, the BS in accountancy degree program is more appropriate as it offers substantially more preparation in accounting.

Accountancy is an ideal second concentration for BS in business students who plan to pursue careers in finance as it provides a strong background in information that underlies many financial decisions. Likewise, a second concentration in accountancy is an excellent choice for BS in business students with a concentration in information systems as such students often pursue jobs related to accounting information systems.

Visit the program website (<https://business.gwu.edu/academics/programs/undergraduate/bba/accountancy/>) for more information.

REQUIREMENTS

In addition to the requirements for the bachelor of science with a major in business (p. 553), the concentration in accountancy requires five field courses:

Code	Title	Credits
Required field courses		
ACCY 3101	Intermediate Accounting I	
ACCY 3102	Intermediate Accounting II	
ACCY 3106	Financial Statement Analysis ¹	
or ACCY 4501	Accounting Systems	
Additional field courses		
Two courses from the following:		
ACCY 3106	Financial Statement Analysis ¹	
ACCY 3401	Federal Income Tax: Individuals	
ACCY 3403	Advanced Tax	
ACCY 4107	Advanced Accounting	
ACCY 4301	Auditing	
ACCY 4501	Accounting Systems ¹	

¹ACCY 3106 and ACCY 4501 are options for both the required and additional field course categories. If only one is taken, it will apply to the required field course category. If both are taken, one will apply to the required field courses, and the other will apply to the additional field course category.

Students should consult with an advisor for specific bachelor of science in business general education courses (<https://business.gwu.edu/current-students/undergraduate/advising-center/degree-requirements/>) that apply to this concentration

BACHELOR OF SCIENCE WITH A MAJOR IN BUSINESS, BUSINESS ANALYTICS CONCENTRATION

The bachelor of science in business with a concentration in business analytics degree program provides students with the analytical tools and conceptual framework needed to understand and apply data and decision modeling in real life settings. Analytics is defined as the extensive use of data, statistical and quantitative models, and fact-based management to drive decisions and actions. More than just modeling and data manipulation, it is a process of transforming data into actions through analysis and insights in the context of organizational decision making and problem solving. Combining the business analytics concentration with any other area in business, such as finance or marketing, or in other fields, such as engineering, public policy, and international affairs, may give graduates expanded career opportunities.

REQUIREMENTS

In addition to the requirements for the bachelor of science with a major in business (p. 553), the concentration in business analytics requires five field courses:

Code	Title	Credits
Required		
Required field courses		
DNSC 3403	Decision Models	
DNSC 4211	Programming for Analytics	
DNSC 4279	Data Mining	
Two additional field courses, selected from the following:		
DNSC 4404	Essentials of Project Management	
DNSC 4900	Special Topics (Forecasting; Marketing Analytics; or Supply Chain Analytics)	
ISTM 4121	Database Principles and Applications	

Students should consult with an advisor for specific bachelor of science in business general education courses (<https://business.gwu.edu/current-students/undergraduate/advising-center/degree-requirements/>) that apply to this concentration.

BACHELOR OF SCIENCE WITH A MAJOR IN BUSINESS, BUSINESS ECONOMICS AND PUBLIC POLICY CONCENTRATION

The bachelor of science in business with a concentration in business economics and public policy degree program is concerned with the continuing business-government dialogue that leads to effective decision making and equitable relations between the public and private sectors. The program is designed to help students develop the knowledge and skills useful for a wide variety of positions in public, private, for-profit, and nonprofit organizations. Students deepen their understanding of the social and legal environments that influence business and its relationships with government at all levels. Students also receive in-depth training in micro- and macroeconomic analysis. This key element of the field prepares students to perform rigorous and sophisticated analyses of the economic impacts of policy decisions on various types of institutions and organizations.

Study in this concentration also serves to ensure that students understand the workings of political systems and institutions, particularly those of the U.S. federal government. This understanding includes recognizing not only what government can do and achieve, but also the limits of its power and the role of private interests in driving political decision making in Congress and government agencies.

Visit the program website (<https://business.gwu.edu/academics/programs/undergraduate/bba/business-economics-and-public-policy/>) for more information.

REQUIREMENTS

In addition to the requirements for the bachelor of science with a major in business, (p. 553) the concentration in business economics and public policy requires five field courses:

Code	Title	Credits
Required		
Required field course		
ECON 2101	Intermediate Microeconomic Theory	
Economics field course		
One of the following:		
ECON 2102	Intermediate Macroeconomic Theory	
ECON 2158	Industrial Organization	
Political science field course		
One of the following:		

PSC 2211	State and Urban Politics
PSC 2214	U.S. Constitutional Law and Politics I
PSC 2215	U.S. Constitutional Law and Politics II
PSC 2219	Political Parties and Interest Groups
PSC 2220	Public Opinion
PSC 2228	Media, Politics, and Government
or SMPA 3428	Media, Politics, and Government
PSC 2229	Media and Politics
Political institutions field course	
One of the following:	
PSC 2213	Judicial Politics
PSC 2216	The American Presidency
PSC 2218	Legislative Politics
Policy focus field course	
One of the following:	
ECON 2136	Environmental and Natural Resource Economics
ECON 2148	Survey of Health Economics
ECON 3190	Law and Economics
GEOG 2120	World Regional Geography
IAFF 3190	Special Topics in International Affairs (Human Rights and Ethics)
MGT 3305	Human Capital Sustainability
PSC 2222	Science, Technology, and Politics
TSTD 4900	Special Topics (Advocacy & Lobbying)

Students should consult with an advisor for specific bachelor of science in business general education courses (<https://business.gwu.edu/current-students/undergraduate/advising-center/degree-requirements/>) that apply to this concentration.

BACHELOR OF SCIENCE WITH A MAJOR IN BUSINESS, FINANCE CONCENTRATION

The bachelor of science in business with a concentration in finance degree program provides students with the analytical tools and conceptual framework needed to evaluate financial transactions and make financial decisions within firms. The

academic program allows students to understand finance from three interrelated perspectives:

- Financial management related to capital budgeting, financial structure, financial analysis, working capital management, and dividend policy.
- Investment and portfolio management related to the valuation of stocks, bonds, and derivative contracts and the construction of efficient portfolios.
- The money and capital market related to the issuance and investment in financial instruments by banking organizations with emphasis on the consequence of interest rates and interest rate structure on valuation and risk.

Upon successful completion of the program, students might apply for professional positions such as credit analyst, equity analyst, or financial analyst with governmental agencies, for-profit corporations, and investment banks. Finance also provides an excellent foundation for graduate study in business, economics, public policy, and law.

Visit the program website (<https://business.gwu.edu/academics/programs/undergraduate/bba/business-economics-and-public-policy/>) for more information.

REQUIREMENTS

In addition to the requirements for the bachelor of science with a major in business, (p. 553) the concentration in finance requires five field courses:

Code	Title	Credits
Required		
Field Courses		
FINA 3001	Intermediate Finance	
FINA 3101	Investment and Portfolio Management	
FINA 4001	Advanced Financial Management	
or FINA 4001W	Advanced Financial Management	
Additional field courses		
Two of the following:		
FINA 3201	Exploring Finance with Simulation	
or FINA 3201W	Exploring Finance with Simulation	
FINA 3301	Money and Capital Markets	
FINA 4101	Applied Financial Securities Analysis	
FINA 4201	Real Estate Investment	
FINA 4301	Financial Derivatives	

FINA 4900	Special Topics (Applied Financial Security Analysis: Fixed Income)
FINA 4900	Special Topics (Applied Financial Security Analysis: Real Estate)
FINA 4900	Special Topics (Investment Analysis Venture Capital)

Students should consult with an advisor for specific bachelor of science in business general education courses (<https://business.gwu.edu/current-students/undergraduate/advising-center/degree-requirements/>) that apply to this concentration

BACHELOR OF SCIENCE WITH A MAJOR IN BUSINESS, INFORMATION SYSTEMS TECHNOLOGY MANAGEMENT CONCENTRATION

The bachelor of science in business with a concentration in information systems and technology management (BS-ISTM) enables undergraduate students to acquire an in-depth understanding of information technology (IT) and the skills and analytical methods needed to design and develop the information systems (IS) that businesses find indispensable. The IT overview covers areas ranging from data communications, to data management. Students also learn about and have opportunities for practical experience in the structured development of information systems, programming, database design, and other techniques needed for successful IS design and develop. These IS/IT-specific skills and knowledge, coupled with an understanding of the other aspects of business acquired in the program, give students a competitive start in their chosen careers.

Visit the program website (<https://business.gwu.edu/academics/programs/undergraduate/bba/information-systems-and-technology-management/>) for more information.

REQUIREMENTS

In addition to the requirements for the bachelor of science with a major in business (p. 553), the concentration in information systems and technology management requires five field courses:

Code	Title	Credits
Required field courses		
ISTM 3119	Introduction to Programming	
ISTM 4120	Business Systems Development	
ISTM 4121	Database Principles and Applications	

Additional field courses

Two courses from the following:

ISTM 4123	Business Data Communications
ISTM 4130W	Writing On The Ethics of Technology
ISTM 4215	Human-Computer Interaction
ISTM 4223	Innovation Ventures
ISTM 4233	Emerging Technologies
ISTM 4900	Special Topics ¹

¹ Enrollment in ISTM 4900 on topics announced in the Schedule of Classes requires ISTM program director approval.

Students should consult with an advisor for specific bachelor of science in business general education courses (<https://business.gwu.edu/current-students/undergraduate/advising-center/degree-requirements/>) that apply to this concentration.

BACHELOR OF SCIENCE WITH A MAJOR IN BUSINESS, INNOVATION AND ENTREPRENEURSHIP CONCENTRATION

The bachelor of science in business with a concentration in innovation and entrepreneurship (INEN) provides students with a broad spectrum of skills that enable them to start, manage, and grow new and/or existing businesses. Graduates are equipped to work in major organizations that develop new products, procedures, and services. The program provides students with opportunities to explore new organizational types, both for-profit and nonprofit, and to develop the skills needed to become effective consultants. The INEN concentration emphasizes practical learning and encourages students to excel in the classroom while participating in field-related activities. Through exposure to scenarios designed to sharpen their ability to use fast-paced decision making, INEN students are challenged to operate with success in turbulent environments.

Visit the program website (<https://business.gwu.edu/academics/programs/undergraduate/bba/innovation-and-entrepreneurship/>) for more information.

REQUIREMENTS

In addition to the requirements for the bachelor of science with a major in business (p. 553), the concentration in innovation and entrepreneurship requires five field courses:

Code	Title	Credits
------	-------	---------

Field courses

MGT 3300	Entrepreneurship
or MGT 3300W	Entrepreneurship
MGT 4003	Management of the Growing Entrepreneurial Venture

Three courses selected from the following:

MGT 3301	Small Business Management
MGT 3302	e-Entrepreneurship
MGT 3303	Women's Entrepreneurial Leadership
MGT 3305	Human Capital Sustainability
MGT 4900	Special Topics (Innovation and Creativity)
DNSC 4404	Essentials of Project Management

Students should consult with the advisor for specific bachelor of science in business general education courses (<https://business.gwu.edu/current-students/undergraduate/advising-center/degree-requirements/>) that apply to this concentration.

BACHELOR OF SCIENCE WITH A MAJOR IN BUSINESS, INTERNATIONAL BUSINESS CONCENTRATION

The bachelor of science in business with a major in business with a concentration in international business provides students with the analytical tools and conceptual framework needed to understand the international financial, political, and economic environment; how that environment influences a firm's strategy and performance; how culture plays a role in guiding a firm's strategic activities; and how a firm can leverage home and host country resources to overcome challenges inherent in managing a multinational enterprise. The academic program allows students to understand international business from three interrelated perspectives: international economics and finance, international marketing, and international corporate strategy.

This field provides the basic academic foundations for entry-level positions in international business, particularly in multinational corporations, international banks, and governmental agencies. Such organizations include the Export-Import Bank, Overseas Private Investment Corporation, and the Departments of Commerce, State, and Treasury, in addition to international institutions such as the World Bank and the International Finance Corporation.

Visit the program website (<https://business.gwu.edu/academics/programs/undergraduate/bba/international-business/>) for more information.

REQUIREMENTS

In addition to the requirements for the bachelor of science with a major in business (p. 553), the concentration in international business requires five field courses.

Code	Title	Credits
Required field course		
IBUS 3101	Global Financial Environment	
Additional field courses		
Four courses from the following:		
IBUS 3201	International Marketing Management	
IBUS 3301	International Business Finance	
IBUS 4202	Regional Strategy for Multinationals	
IBUS 4203	Foreign Market Analysis	
IBUS 4302	International Banking	
IBUS 4303	International Monetary and Financial Issues	
IBUS 4401	Managing the Multinational Enterprise	
IBUS 4402	Managing in Developing Countries	
IBUS 4403	Oil: Industry, Economy, and Society	
IBUS 4404	Global Energy	
IBUS 4900	Special Topics	
IBUS 4995	Independent Study	

Students should consult with an advisor for specific bachelor of science in business general education courses (<https://business.gwu.edu/current-students/undergraduate/advising-center/degree-requirements/>) that apply to this concentration.

BACHELOR OF SCIENCE WITH A MAJOR IN BUSINESS, MARKETING STRATEGY AND ANALYTICS CONCENTRATION

The bachelor of science in business with a concentration in marketing strategy and analytics degree program provides students with the analytical and conceptual foundations for strategic marketing processes. These processes include market research, segmentation, targeting, positioning, integrated

marketing communications, and relationship building. Students develop competencies and skills in identifying customer needs and wants; making decisions about which markets organizations should serve; designing product, service, and program offerings for these markets; planning and implementing strategies to communicate with and sell to these markets; and creating value through profitable relationships with customers as well as channel partners, suppliers, and other stakeholders.

Visit the program website (<https://business.gwu.edu/academics/programs/undergraduate/bba/marketing/>) for more information.

REQUIREMENTS

In addition to the requirements for the bachelor of science with a major in business, (p. 553) the concentration in marketing strategy and analytics requires five field courses:

Code	Title	Credits
Required field courses		
MKTG 3142	Consumer Behavior	
or MKTG 3142W	Consumer Behavior	
MKTG 3143	Marketing Research	
Additional field courses		
Three courses selected from one or both of the following two tracks. The courses are organized in two tracks only to suggest courses that build on one another in a related field of knowledge.		
Marketing Strategy		
MKTG 4148	Advertising and Marketing Communications	
or MKTG 4156	Integrated Marketing Communications	
MKTG 4150	Salesmanship and Sales Management	
MKTG 4152	Retailing Management	
MKTG 4159	Marketing Strategy	
MKTG 4161	Pricing Strategy: Competitive and Dynamic Pricing	
Digital Marketing and Analytics		
MKTG 4154	Digital Marketing	
MKTG 4162	Digital Marketing Analytics	
MKTG 4163	Applied Marketing Decision Analytics	

MKTG 4164	Artificial Intelligence and Automated Marketing
MKTG 4165	Customer Relationship Management and Relational Databases
MKTG 4900	Special Topics

Students should consult with an advisor for specific bachelor of science in business general education courses (<https://business.gwu.edu/current-students/undergraduate/advising-center/degree-requirements/>) that apply to this concentration.

BACHELOR OF SCIENCE WITH A MAJOR IN BUSINESS, REAL ESTATE CONCENTRATION

The bachelor of science in business with a major in business, real estate concentration program provides students with the knowledge base in finance, real estate investment, development, valuation, and strategic planning to help prepare them for an entry-level position in the real estate industry. Most of the field courses in this concentration are at the graduate level, which may give students who complete the program a competitive advantage vis-a-vis students from other universities. For GW students interested in real estate who already are taking such courses, this concentration provides a vehicle to help quantify their commitment to real estate to potential employers.

Visit the program website (<https://business.gwu.edu/academics/programs/undergraduate/bba/real-estate/>) for more information.

REQUIREMENTS

In addition to the requirements for the bachelor of science with a major in business (p. 553), (<http://bulletin.gwu.edu/business/undergraduate-programs/business-administration/#requirements>) the concentration in real estate requires five field courses:

Code	Title	Credits
Required field courses		
FINA 4201	Real Estate Investment	
FINA 6240	Real Estate Development	
FINA 6242	Real Estate Valuation and Investment	
Additional field courses		
Two courses from the following:		
AH 2154	American Architecture I	
or AMST 2520	American Architecture I	

ECON 2157	Urban and Regional Economics
FINA 4900	Special Topics (Applied Financial Securities Analysis: Real Estate)
FINA 6243	Strategic Planning for Walkable Urban Real Estate Companies
FINA 6290	Special Topics (Walkable Urban Place Development and Management)
GEOG 2140	Cities and Societies
SUST 2002	The Sustainable City

Students should consult with an advisor for specific bachelor of science in business general education courses (<https://business.gwu.edu/current-students/undergraduate/advising-center/degree-requirements/>) that apply to this concentration.

BACHELOR OF SCIENCE WITH A MAJOR IN BUSINESS, SPORT, EVENT, AND HOSPITALITY MANAGEMENT CONCENTRATION

The bachelor of science in business with a concentration in sport, event, and hospitality management degree program provides students with a theoretical and practical understanding of these industries through three different tracks:

- Sport management track focuses on the management and marketing of sport events, organizations, products, and athletes, as well as in special events, conferences, meetings, expositions, festivals, and other entertainment properties including sport and event facilities.
- Event management track focuses on the marketing and management of businesses related to conventions, meetings, special events, conferences, expositions, and festivals.
- Hospitality management track focuses on the marketing, management, and financing of both hotels and those businesses related to tourism, including cities, attractions, restaurants, and airlines.

Typical entry-level positions include those in collegiate and professional sport organizations, sport marketing agencies, sport manufacturers, sport and event facilities, hotels and resorts, restaurants and food service operations, visitor and convention bureaus, theme parks and recreation centers, museums, tour operators, travel management firms, destination management companies, event producers, associations, corporate sponsors, and consulting firms.

Visit the program website (<https://business.gwu.edu/academics/programs/undergraduate/bba/sport-event-hospitality-management/>) for more information.

REQUIREMENTS

In addition to the requirements for the bachelor of science with a major in business (p. 553), the concentration in sport, event, and hospitality management requires five field courses:

Code	Title	Credits
Required field		
TSTD 3001	Introduction to Tourism and Hospitality Management	
TSTD 4102	Practicum	
or MGT 3305	Human Capital Sustainability	
Required track		
All courses in one of the following tracks:		
Sport management track		
TSTD 3101	Sport and Event Business Management	
TSTD 3102W	Sport and Event Marketing	
TSTD 4101	Issues in Sport and Event Management	
Event management track		
TSTD 3301	Hospitality Industry Management	
or TSTD 3101	Sport and Event Business Management	
TSTD 4301	Travel Marketing Communication	
or TSTD 3102v	Sport and Event Marketing	
TSTD 4900	Special Topics (Convention and Meeting Management)	
Hospitality management track		
TSTD 3301	Hospitality Industry Management	
TSTD 3302	Financial Management in Tourism and Hospitality	
TSTD 4301	Travel Marketing Communication	

Students should consult with an advisor for specific bachelor of science in business general education courses (<https://business.gwu.edu/current-students/undergraduate/advising-center/degree-requirements/>) that apply to this concentration.

BACHELOR OF SCIENCE WITH A MAJOR IN BUSINESS, INDIVIDUALIZED CONCENTRATION

The purpose of the individualized concentration is to assist bachelor of science in business students who have a clear career objective that falls outside of the standard bachelor of science with a major in business concentrations (p. 553). The career objectives of most BS in business students easily can be met by one of these concentrations, in which case pursuing an individualized field of concentration is not recommended.

REQUIREMENTS

Program of study

The program of study for the bachelor of science in business individualized field of concentration varies greatly depending on the individual student's objectives. Past individualized concentrations pursued include small business management, health administration, human resource management, strategic management, and supply chain management.

Proposal and application process

As part of the application process, students must create a proposal that includes five field courses.

Students develop their full proposal based on extensive research and with the assistance of faculty members who focus in related fields. Complete criteria and application directions can be found in the Individualized Field of Concentration Application Packet (<https://business.gwu.edu/academics/programs/undergraduate/bba/individualized-field-of-study/>). GWSB students must have a minimum cumulative GPA of 3.2 in order to submit an individualized concentration proposal. Proposals must be submitted before the start of junior year.

The individualized field of concentration application process typically takes 10 to 12 weeks from initial research to receiving the faculty committee's final decision. Students are advised not to take proposed courses prior to approval of the individualized field of concentration.

BACHELOR OF SCIENCE WITH A MAJOR IN BUSINESS ANALYTICS (STEM)

REQUIREMENTS

The following requirements must be fulfilled: 120 credits, including 77 credits in required courses and 43 credits in elective courses.

Code	Title	Credits
Required		
General education courses		
UW 1020	University Writing	
One critical analysis in the humanities course. ¹		
One scientific reasoning with lab course. ¹		
Pre-business courses		
BADM 1001 & BADM 1002	First-Year Development Course I and First-Year Development Course II ³	
or BADM 1003	Transfer Student Development Course	
BADM 3001	Career Management Strategy ³	
BADM 4001	Leadership and Career Launch ⁴	
ECON 1011	Principles of Economics I	
ECON 1012	Principles of Economics II	
One of the following two-course sequences in mathematics: ²		
MATH 1051 & MATH 1252	Finite Mathematics for the Social and Management Sciences and Calculus for the Social and Management Sciences	
or MATH 1231 & MATH 1232	Single-Variable Calculus I and Single-Variable Calculus II	
DNSC 1001	Business Analytics I: Statistics for Descriptive and Predictive Analytics	
or APSC 3115	Engineering Analysis III	
or STAT 1051	Introduction to Business and Economic Statistics	
or STAT 1053	Introduction to Statistics in Social Science	
or STAT 1111	Business and Economic Statistics I	
DNSC 2001	Business Analytics II: Predictive and Prescriptive Analytics ⁵	
or ECON 2123	Introduction to Econometrics	
or STAT 2112	Business and Economic Statistics II	
or STAT 2118	Regression Analysis	
or STAT 2123	Introduction to Econometrics

BADM 4101	Business Ethics and the Legal Environment	
or BADM 4101W	Business Ethics and the Legal Environment	
BADM 4801	Strategy Formulation and Implementation	
IBUS 3001	Introduction to International Business	
Business analytics requirements		
DNSC 3288	Big Data, Predictive Analytics, and Ethics	
DNSC 3403	Decision Models	
DNSC 4211	Programming for Analytics	
DNSC 4219	Forecasting Analytics	
DNSC 4279	Data Mining	
DNSC 4280	Machine Learning	
DNSC 4289	Capstone in Business Analytics	
ISTM 4212	Data Management for Analytics	
Two courses selected from the following:		
DNSC 4233	Social Network Analytics	
DNSC 4281	Revenue Management Analytics	
DNSC 4282	Supply Chain Analytics	

Electives

In general, students complete 43 credits in elective courses, or the minimum necessary to reach 120 credits for the degree. 18 of those credits must be taken outside of GWSB. Elective courses may be numbered 1000 to 4999. Electives may not include LSPA (Lifestyle, Sport, and Physical Activity) courses and may include a maximum of one HLWL (Health and Wellness) course. Students may use electives for an additional concentration, a second GWSB or non-GWSB major, or a minor.

¹See University General Education Requirement (<http://bulletin.gwu.edu/university-regulations/general-education/>) for a list of approved courses.

²Students should meet with a GWSB academic advisor to discuss other options for fulfilling the mathematics requirement.

³Freshmen are required to take BADM 1001 and BADM 1002, transfer students are required to take BADM 1003.

⁴BADM 3001 is offered with industry-specific sections and should be completed during the sophomore year, following BADM 1001 and BADM 1002.

⁵BADM 4001 is offered with experiential-specific sections and should be completed in the senior year.

⁵BS in business analytics students should complete DNSC 2001 as their advanced statistics requirement.

BACHELOR OF SCIENCE WITH A MAJOR IN FINANCE

Emphasizing a finance-focused education, the bachelor of science with a major in finance degree program directly targets the financial industry including commercial banks, investment banks, investment companies, and insurance companies.

The degree is offered by the School of Business both to its own students and to those enrolled in other GW schools. School of Business students enrolled in the program are required to take a minor in another GW school, while those from other GW schools take the program as a second major.

Visit the program website (<https://business.gwu.edu/academics/programs/undergraduate/bs-finance/>) for additional information.

REQUIREMENTS

FINA 4900	Special Topics (Applied Financial Security Analysis: Fixed Income)
FINA 4900	Special Topics (Applied Financial Security Analysis: Real Estate)
FINA 4900	Special Topics (Investment Analysis Venture Capital)
One international field course selected from the following:	
ECON 2180	Survey of International Economics
ECON 2181	International Trade Theory and Policy
ECON 2182	International Macroeconomic Theory and Policy
IBUS 3001	Introduction to International Business
IBUS 3101	Global Financial Environment
IBUS 3301	International Business Finance
IBUS 4302	International Banking
IBUS 4303	International Monetary and Financial Issues
SMPP 4900W	Special Topics (Strategy and International Political Economy)
TSTD 3302	Financial Management in Tourism and Hospitality

Electives

In general, students complete 34 credits of electives or the minimum necessary to reach the 120 credits required for the degree. Elective courses may be numbered from 1000 to 4999. Electives may not include LSPA (Lifestyle, Sport, and Physical Activity) courses. They may include one HLWL (Health and Wellness) course.

Elective courses may be applied toward a GWSB concentration or a GWSB or non-GWSB second major.^{6,7}

Minor requirement

A minor outside of the School of Business is required for the degree. Courses vary by minor and typically require a minimum of 18 credits. Students may pursue a second minor or a second major in lieu of the minor.⁷

¹A list of approved courses can be found in this Bulletin under General Education Requirements (p. 42).

²Freshmen take BADM 1001 and BADM 1002. Transfer students take BADM 1003.

³BADM 3001 is offered with finance-specific sections and should be completed during the sophomore year, after completing BADM 1001 and BADM 1002 or BADM 1003. Students should take one of the following sections, in accordance with their career interests: Finance and Accounting or Finance and Investment Banking.

⁴BADM 4001 is offered with experiential-specific sections and should be completed in the senior year.

⁵FINA 4001 must be taken at GW.

⁶Students pursuing a double major who wish to earn a major in accountancy must declare the BS in accountancy as their first major; i.e., accountancy may not be listed as a second major. Major courses in both majors must be completed with a grade of C- or above.

⁷Students should consult the regulations in this Bulletin and their academic advisor for assistance and additional information concerning elective courses and the minor requirement.

BACHELOR OF SCIENCE WITH A MAJOR IN INFORMATION SYSTEMS

REQUIREMENTS

⁵BADM 4001 is offered with experiential-specific sections and should be completed in the senior year.

DUAL BS WITH A MAJOR IN BUSINESS AND MASTER OF HUMAN RESOURCE MANAGEMENT

The School of Business offers a dual bachelor of business administration and master of human resources degree program. The combined program allows students to take 9 graduate credits as part of their undergraduate degree, thereby decreasing the number of credits normally required for the master's. All requirements for both degrees must be fulfilled. Students interested in the dual degree program should confer with the graduate advisor.

Visit the program website for additional information.

DUAL BACHELOR OF BUSINESS ADMINISTRATION AND MASTER'S IN MANAGEMENT

The School of Business offers a dual bachelor of business administration (<http://bulletin.gwu.edu/business/undergraduate-programs/business-administration/>) and master's in management (<http://bulletin.gwu.edu/business/graduate-programs/management/>) degree program. The combined program allows students to take 9 graduate credits as part of their undergraduate degree, thereby decreasing the number of credits normally required for the master's. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the graduate advisor.

DUAL BACHELOR OF SCIENCE WITH A MAJOR IN FINANCE AND MASTER OF SCIENCE IN THE FIELD OF FINANCE

The School of Business offers a dual bachelor of science with a major in finance (p. 563) and master of science in the field of finance (p. 580) degree program. The combined program allows students to take up to 12 graduate credits as part of their undergraduate degree, thereby decreasing the number of

credits normally required for the master's. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the graduate advisor. Visit the program website (<https://business.gwu.edu/four-plus-one/>) for additional information.

MINOR IN ACCOUNTANCY REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 9 credits in required course and 9 credits in elective credits.

Code	Title	Credits
Required field courses		
ACCY 2001	Introduction to Financial Accounting	
ACCY 2002	Introductory Managerial Accounting	
ACCY 3101	Intermediate Accounting I *	
or ACCY 3106	Financial Statement Analysis	
Additional field courses		
3 courses selected from the following:		
ACCY 3101	Intermediate Accounting I *	
ACCY 3102	Intermediate Accounting II	
ACCY 3106	Financial Statement Analysis *	
ACCY 3401	Federal Income Tax: Individuals	
ACCY 3403	Advanced Tax	
ACCY 4107	Advanced Accounting	
ACCY 4301	Auditing	
ACCY 4501	Accounting Systems	

* ACCY 3101 and ACCY 3106 may be applied to either the required field course requirement or the additional field course requirement. If only one course is taken, it will apply to the required field course requirement. If both are taken, one will apply to the required field course requirement and one to the additional field course requirement.

MINOR IN BUSINESS REQUIREMENTS

Note: Only students outside the School of Business may pursue the minor in business.

The following requirements must be fulfilled: 18 credits, including one 3-credit required course and 15 credits in preapproved elective courses.

Code	Title	Credits
Required prerequisite courses		
DNSC 1001	Business Analytics I: Statistics for Descriptive and Predictive Analytics	
or STAT 1051	Introduction to Business and Economic Statistics	
or STAT 1053	Introduction to Statistics in Social Science	
or STAT 1111	Business and Economic Statistics I	
or APSC 3115	Engineering Analysis III

ECON 1012	Principles of Economics II	
MATH 1221	Calculus with Precalculus II	
or MATH 1231	Single-Variable Calculus I	
or MATH 1252	Calculus for the Social and Management Sciences	
Minor course requirements		
ACCY 2001	Introduction to Financial Accounting	
Any five courses selected from the following:		
BADM 2301	Management Information Systems Technology	
BADM 3103	Human Capital in Organizations	
BADM 3401	Contemporary Marketing Management	
or BADM 3401W	Contemporary Marketing Management	
BADM 3501	Financial Management and Markets	
BADM 3601	Operations Management	
BADM 4101	Business Ethics and the Legal Environment	
or BADM 4101W	Business Ethics and the Legal Environment	
BADM 4801	Strategy Formulation and Implementation	
IBUS 3001	Introduction to International Business	

MINOR IN BUSINESS ANALYTICS

The following requirements must be fulfilled: 18 credits, including 12 credits in required courses and 6 credits in elective courses. All classes must be completed with a minimum grade of C-.

Code	Title	Credits
Prerequisite courses		
DNSC 1001	Business Analytics I: Statistics for Descriptive and Predictive Analytics	
or STAT 1051	Introduction to Business and Economic Statistics	
or STAT 1053	Introduction to Statistics in Social Science	
or STAT 1111	Business and Economic Statistics I	
And one of the following options:		
Option A		
MATH 1051 & MATH 1231	Finite Mathematics for the Social and Management Sciences and Single-Variable Calculus I	
or MATH 1252	Calculus for the Social and Management Sciences	
Option B		
MATH 1231 & MATH 1232	Single-Variable Calculus I and Single-Variable Calculus II	
Option C		
MATH 1051 & MATH 1220 & MATH 1221	Finite Mathematics for the Social and Management Sciences and Calculus with Precalculus I and Calculus with Precalculus II	
Option D		
DNSC 4900 & MATH 1231	Special Topics and Single-Variable Calculus I	
or MATH 1252	Calculus for the Social and Management Sciences	
NOTE: To fulfill this requirement, DNSC 4900 must be taken with the topic Foundations of Business Analytics		
Required field courses		
DNSC 2001	Business Analytics II: Predictive and Prescriptive Analytics	
DNSC 3403	Decision Models	

DNSC 4211	Programming for Analytics
DNSC 4279	Data Mining
Elective field courses	
Two courses from the following:	
DNSC 4404	Essentials of Project Management
DNSC 4900	Special Topics (Forecasting)
DNSC 4900	Special Topics (Marketing Analytics)
DNSC 4900	Special Topics (Text Analytics)
DNSC 4900	Special Topics (Social Network Analytics)
DNSC 4900	Special Topics (Supply Chain Management)
ECON 2123	Introduction to Econometrics
ISTM 4121	Database Principles and Applications
STAT 2118	Regression Analysis

MINOR IN CREATIVITY, INNOVATION, AND ENTREPRENEURSHIP

The following requirements must be fulfilled: 18 credits, including 6 credits in required courses and 12 credits in elective courses.

Students outside of the School of Business may pursue this interdisciplinary minor. School of Business students may pursue this minor only if they are not pursuing the Innovation and Entrepreneurship concentration.

Code	Title	Credits
Required field courses		
MGT 3300	Entrepreneurship	
MGT 4900	Special Topics (New Venture Initiation)	
Field electives		
Four courses from the following, at least one of which must be at the 2000 level or above.:		
ACCY 2001	Introduction to Financial Accounting ¹

MASTER'S PROGRAMS

Master's programs

- Master in Management (p. 572)
- Master of Accountancy (p. 573)
- Master of Human Resource Management (p. 578)
- Master of Interdisciplinary Business Studies (p. 579)
- Master of Interdisciplinary Business Studies (STEM) (p. 579)
- Master of Science in Finance (p. 580)
- Master of Science in the field of applied finance (p. 580)
- Master of Science in the field of business analytics (p. 581)
- Master of Science in the field of information systems technology (p. 581)
- Master of Science in the field of international business (p. 582)
- Master of Science in the field of project management (p. 583)

- Master of Science in the field of sport management (p. 583)
- Master of Tourism Administration (p. 584)

Master of Business Administration program

MBA offered in the following formats:

- Global MBA (<http://bulletin.gwu.edu/business/global-business-administration-ma/#requirementstext>)
- Accelerated MBA (p. 574)
- Professional MBA (p. 574)
- Online MBA (p. 574)
- Healthcare MBA (p. 574)

STEM MBA offered in the following formats and concentration:

- Global MBA, STEM (p. 575)
- STEM MBA, Accelerated (p. 575)
- STEM MBA, Security Technology Transition Concentration (p. 577)

Combined programs

- Dual Master of Business Administration and Master of Arts in Education and Human Development in the field of Higher Education Administration (p. 585)
- Dual Master of Business Administration and Master of Human Resource Management (p. 586)
- Dual Master of Business Administration and Master of Science in the field of applied finance (p. 586)
- Dual Master of Business Administration and Master of Science in the field of business analytics (p. 586)
- Dual Master of Business Administration and Master of Science in Finance (p. 586)
- Dual Master of Business Administration and Master of Science in the field of information systems technology (p. 586)
- Dual Master of Business Administration and Master of Science in the field of project management (p. 586)
- Dual Master of Business Administration and Master of Science in the field of sport management (p. 586)
- Dual Master of Business Administration and Master of Tourism Administration (p. 586)
- Joint Master of Arts in the field of international affairs and Master of Business Administration (p. 587)
- Joint Master of Business Administration and Juris Doctor (p. 587)

MASTER IN MANAGEMENT

The master in management (MiM) program emphasizes the quantitative and qualitative aspects of business practice and allows students to explore these issues in depth in a given functional area. The curriculum includes a set of business

fundamentals courses, including financial accounting, finance, organizations and human capital, marketing, decision making and data analysis, business ethics and public policy, and strategic management, that incorporate the application of concepts and analytical tools to solve current management problems. Teamwork and communication skills are taught through team projects with an emphasis on private and public sector issues. By including completion of one of the School of Business's numerous graduate certificates as part of the master's curriculum requirements, the program provides students with key knowledge, skills, and abilities in a specific discipline or functional area of business.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
------	-------	---------

Required Core courses (21 credits)

MBAD 6211	Financial Accounting
MBAD 6224	Decision Making and Data Analysis
MBAD 6235	Finance
MBAD 6263	Organizations and Human Capital
MBAD 6274	Marketing
MBAD 6289	Business Ethics and Public Policy
SMPP 6290	Special Topics (Strategy Fundamentals)

Certificate courses (12 credits)

In addition to completing the core courses listed above, students complete the curriculum requirements of one of the GW School of Business graduate certificate programs listed below:

- Graduate certificate in accountancy (p. 588)
- Graduate certificate in analytics for managers (p. 589)
- Graduate certificate in artificial intelligence (p. 589)
- Graduate certificate in business analytics (p. 590)
- Graduate certificate in cloud, applications, and information technology (p. 591)
- Graduate certificate in corporate responsibility (p. 591)
- Graduate certificate in creativity, innovation, and entrepreneurship (p. 592)
- Graduate certificate in digital marketing and analytics (p. 592)
- Graduate certificate in financial management (p. 593)
- Graduate certificate in global management (p. 593)
- Graduate certificate in governmental and nonprofit accounting (p. 593)
- Graduate certificate in hospitality management (p. 594)

- Graduate certificate in human capital (p. 594)
- Graduate certificate in investments and portfolio management (p. 595)
- Graduate certificate in management leadership (p. 595)
- Graduate certificate in management of technology and innovation (p. 595)
- Graduate certificate in managing the digital organization (p. 596)
- Graduate certificate in marketing and brand management (p. 596)
- Graduate certificate in project management (p. 597)
- Graduate certificate in sports management (p. 597)
- Graduate certificate in strategic management (p. 598)
- Graduate certificate in walkable urban real estate development (p. 599)

MASTER OF ACCOUNTANCY

A flexible program tailored to individual interests and career objectives in accounting, financial management and tax practice. The Master of Accountancy program offers a path for students at all skill levels. An undergraduate degree in Accountancy or Business is not required. We also offer a five-year combined degree program for undergraduate students enrolled in the Bachelor of Accountancy and Bachelor of Business Administration program at the School of Business.

Each path of study requires a minimum 30 credits, with 21 credits of coursework in accounting. Required courses can be waived with substitution depending on previous academic study and performance.

In addition to the required courses, students also select from a wide range of electives in specialized accounting subjects, as well as other business topics that help them prepare for their professional certification and career goals. Students may choose from electives offered by the School of Business as well as the GW Law School.

Day and evening classes are available to accommodate working professionals.

Total Credits: 30

Duration:

-Part Time: 21-60 months

-Full Time: A minimum of nine months

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
Preparatory courses		
ACCY 6101	Financial Accounting	

or ACCY 2001	Introduction to Financial Accounting
ACCY 2002	Introductory Managerial Accounting
MBAD 6242	Microeconomics for the World Economy
STAT 1051	Introduction to Business and Economic Statistics

Students that have not completed these courses prior to matriculation may be able to take them concurrent with the program requirements.

Required

ACCY 6104	Intermediate Accounting I
ACCY 6105	Intermediate Accounting II
ACCY 6201	Accounting for Internal Decision Making
ACCY 6202	Advanced Strategic Cost Management
ACCY 6301	Contemporary Auditing Theory
MBAD 6235	Finance

Electives

15 credits in elective courses, including 9 credits in accountancy (ACCY) courses.

Students who intend to take the C.P.A. examination should be aware that the coursework required for admission to the examination varies from state to state. Students are advised to consult the Board of Accountancy for the state in which they plan to take the examination and choose electives that meet that state's requirements.

In addition, students must fulfill preparatory courses in financial accounting, managerial accounting, micro- or macroeconomics, and statistics.

Preparatory courses may be waived *without* substitution for other coursework. Required classes, except for ACCY 6201 and ACCY 6202, may be waived *with* substitution for other coursework for students who:

- Have already completed these courses with a minimum grade of B-
- Have taken these courses at an AACSB - accredited institution
- Have taken these courses within five years prior to the first semester of enrollment into the program

Students should consult with the advisor concerning course substitution.

MASTER OF BUSINESS ADMINISTRATION

GW's MBA program offers a high quality education in a number of full- and part-time formats designed to accommodate students' career and scheduling needs. The MBA program helps students to achieve proficiency in the fundamentals of business, while mastering the tools of business administration and understanding of how business is situated in the broader global and ethical environment. The program puts an emphasis on technology, analytics, and experiential opportunities to achieve these outcomes.

The MBA is offered in the following formats and with an optional, online concentration in healthcare:

Accelerated MBA

The Accelerated MBA (AMBA) format is designed to allow students to complete the degree in two years. The program is structured specifically for students who are employed. During the first year, the program is offered in a cohort format that covers the majority of the core MBA curriculum. Those cohort courses are offered at a full-time credit load over the first year, allowing students to complete more credits in that first year than would normally be the case for a part-time student. This is accomplished by running those cohort courses in a condensed, five-week format. The courses run back-to-back, on Wednesday evenings (usually after 7:00 p.m.) and Saturdays (usually from 9:30 a.m. to 3:30 p.m.).

Professional MBA

The part-time Professional MBA (PMBA) format gives students the flexibility to complete the MBA in two to five years, on campus or online, with a cohort of fellow students or independently. Students can dive deeper with intensive weekend formats or explore experiential courses that leverage GW Business School's unique location. Students also may choose to participate in a short-term study abroad program to earn up to 6 credits in one to three weeks.

Starting their second year, students shift their focus to selective and elective requirements while completing the core curriculum. Because electives are offered in the full-semester format, we shift the recommended course load down to a part-time course load; however, the second year can be completed at a full-time pace for students requiring or able to handle that credit load.

Online MBA

While coursework for this part-time program format can be completed fully online, students may pursue in-person global and experiential opportunities as well. Cutting-edge, digital courses are organized into learning episodes and comprise videos, video cases, podcasts, animations, and other pre-recorded content in addition to traditional reading assignments. Students progress within each learning unit at their own pace but must complete the learning unit by assigned target dates.

In addition to this asynchronous material, students will meet weekly with their course leaders within our online environment to provide live interaction and engagement with the course material along with the self-paced to allow our online education to maintain the academic benefits of live interactions with your faculty and fellow students.

Online MBA, Healthcare concentration

The online Healthcare MBA, offered on a part-time basis, is designed specifically for those who are interested in the business and leadership aspect of healthcare organizations. It has the same high-quality, STEM-enhanced core curriculum; however, students tailor the program to their needs by selecting from healthcare-focused elective courses from the Health Sciences department of GW's School of Medicine and Health Sciences.

Visit the MBA program website (<https://business.gwu.edu/academics/programs/mba/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 46.5 credits, including 34.5 credits in required courses and 12 credits in elective courses.

Code	Title	Credits
Required:		
MBAD 6205	Business Essentials for Dynamic Markets	
MBAD 6211	Financial Accounting	
MBAD 6213	Accounting for Internal Decision Making	
MBAD 6223	Operations Management	
MBAD 6224	Decision Making and Data Analysis	
MBAD 6235	Finance	
MBAD 6240	Competition in the Global Economy	
MBAD 6242	Microeconomics for the World Economy	
MBAD 6250	Technology for Business in DC	
MBAD 6263	Organizations and Human Capital	
MBAD 6274	Marketing	
MBAD 6288	Strategic Management	
MBAD 6289	Business Ethics and Public Policy	
Three courses selected from the following:		
DNSS 6500	Analytic Skills for Managers	

ISTM 6500	Technology Skills for Managers
ISTM 6502	Working with Databases Using SQL
ISTM 6514	Introduction to Artificial Intelligence
ISTM 6519	Health Care Analytics and Applications
ISTM 6522	Digital Transformation

Electives

12 credits in graduate-level elective courses, numbered 6000 and above. Up to 6 of these credits may be taken in departments outside the GW School of Business. Students focusing their studies in the healthcare field must take all elective credits in the School of Medicine and Health Sciences.

NOTE: MBAD 6298 may not be applied toward MBA degree requirements.

MASTER OF BUSINESS ADMINISTRATION (STEM)

While the MBA programs offers all students a STEM-enhanced core education, students may choose to pursue a STEM-designated track by choosing elective courses in management sciences. Students in STEM programs develop advanced knowledge of business management through analytics, technology, and their application to the business environment. The STEM-designated MBA is available in many of the formats in which the MBA is offered. The program normally is completed in 21 to 27 months, depending on format.

Visit the program website (<https://business.gwu.edu/academics/programs/mba/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: Global STEM MBA—53 credits, including 35 credits in required courses and 18 credits in selective courses; STEM MBA, Accelerated/ Professional format (p. 576): 46.5 credits, including 34.5 credits in required courses and 12 credits in selective courses.

Global STEM MBA

Code	Title	Credits
Required		
MBAD 6206	Business Improv	
MBAD 6207	Leadership Lab	
MBAD 6211	Financial Accounting	
MBAD 6213	Accounting for Internal Decision Making	

MBAD 6223	Operations Management
MBAD 6224	Decision Making and Data Analysis
MBAD 6235	Finance
MBAD 6240	Competition in the Global Economy
MBAD 6242	Microeconomics for the World Economy
MBAD 6250	Technology for Business in DC
MBAD 6263	Organizations and Human Capital
MBAD 6274	Marketing
MBAD 6281	Business Ethics
MBAD 6284	Business and Public Policy
MBAD 6286	Strategic Management I
MBAD 6287	Strategic Management II

MBAD 6294 Consulting Abroad Project

Students must complete two enrollments in MBAD 6294 for a total of 3 credits, one on-campus and the other as the study abroad component of the Consulting Abroad Project.

Selective courses

A total of 18 credits in selective courses taken as follows:

3 credits from the following analytics/technology selectives:

DNSC 6500	Analytic Skills for Managers
ISTM 6502	Working with Databases Using SQL
ISTM 6500	Technology Skills for Managers
ISTM 6514	Introduction to Artificial Intelligence
ISTM 6519	Health Care Analytics and Applications
ISTM 6522	Digital Transformation

15 credits in elective courses selected from the following:

ACCY 6106	Financial Statement Analysis
ACCY 6202	Advanced Strategic Cost Management
DNSC 6203	Statistics for Analytics I
DNSC 6206	Stochastic Foundation: Probability Models
DNSC 6209	Forecasting for Analytics *
DNSC 6211	Programming for Analytics *

DNSC 6214	Pricing and Revenue Management *
DNSC 6215	Social Network Analytics *
DNSC 6225	Business Process Simulation *
DNSC 6251	Optimization Models for Decision Making
DNSC 6252	Risk Analysis for Decision Making
DNSC 6254	Risk Management
DNSC 6257	Cost Estimation and Control
DNSC 6262	Directed Computational Project Management
DNSC 6278	Big Data Analytics *
DNSC 6279	Data Mining *
DNSC 6280	Supply Chain Analytics *
DNSC 6403	Visualization for Analytics *
DNSC 6404	Sports Analytics *
FINA 6221	Financial Decision Making
FINA 6223	Investment Analysis and Portfolio Management
FINA 6224	Financial Management
FINA 6234	New Venture Financing: Due Diligence and Valuation Issues
FINA 6239	Applied Portfolio Management
IBUS 6301	International Business Finance
ISTM 6200	Programming in Python & R
ISTM 6201	Information Systems Development and Applications
ISTM 6202	Relational Databases
ISTM 6203	Managing Cloud Security
ISTM 6206	Information Systems Security
ISTM 6209	Web and Social Analytics
ISTM 6214	Foundations of Artificial Intelligence
ISTM 6215	Human-Computer Interaction
ISTM 6222	IS/IT Strategy and Implementation
ISTM 6223	Technology Entrepreneurship

ISTM 6224	Management of Technology and Innovation
ISTM 6225	Cloud Foundations
ISTM 6234	New Venture Financing
ISTM 6290	Special Topics (Business Applications of AI)
MGT 6290	Special Topics (HR Analytics)
MKTG 6243	Marketing Research
TSTD 6221	Hospitality Market Analysis

STEM MBA, Accelerated format

* Students must be admitted to the graduate certificate in business analytics program in order to take this course.

MASTER OF BUSINESS ADMINISTRATION, SECURITY TECHNOLOGY TRANSITION CONCENTRATION

In July, 2020, the Department of Homeland Security Science and Technology Directorate selected the George Washington University School of Business to lead a new Center of Excellence to deliver an MBA program focused on security technology transition. The master of business administration, security technology transition (MBA-STT) program focuses on management of transition of technology from development to commercial and government applications. The program is designed for professionals with backgrounds in cybersecurity, engineering, science, technology, and related fields with an interest in the transition and commercialization of security technology for application in the public and private sectors.

Participants are mentored by security, technology, and innovation experts in a community of practice. During the program, participants develop a professional network throughout student engagement events with GW alumni, government agencies, and industry partners. Students experience the innovation impact through interactions with other professionals interested in the transition of security technology across organizations.

REQUIREMENTS

The following requirements must be fulfilled: 49.5 credits, including 30 credits in core courses, 15 credits in concentration courses, and 4.5 credits in capstone courses.

Code	Title	Credits
Required		
Core courses		
MBAD 6205	Business Essentials for Dynamic Markets	
MBAD 6211	Financial Accounting	
MBAD 6213	Accounting for Internal Decision Making	
MBAD 6223	Operations Management	
MBAD 6224	Decision Making and Data Analysis	
MBAD 6235	Finance	
MBAD 6240	Competition in the Global Economy	
MBAD 6242	Microeconomics for the World Economy	
MBAD 6263	Organizations and Human Capital	
MBAD 6274	Marketing	
MBAD 6288	Strategic Management	
MBAD 6289	Business Ethics and Public Policy	
Concentration courses		
ISTM 6204	Information Technology Project Management	
ISTM 6223	Technology Entrepreneurship	
ISTM 6233	Emerging Technologies	
ISTM 6234	New Venture Financing	
ISTM 6290	Special Topics (Technology Commercialization)	

ISTM 6290 Special Topics (Government Procurement of Intellectual Property)

ISTM 6290 Special Topics (Procurement Reform Seminar)

Capstone courses

ISTM 6224 Management of Technology and Innovation

ISTM 6290 Special Topics (Business and Technology in DC Capstone)

MASTER OF HUMAN RESOURCE MANAGEMENT

Offered online or on campus

The GW School of Business Master of Human Resource Management (MHRM) provides graduates with the knowledge and skills they need to excel in a field that is vitally important to the operation and success of organizations of all types. Students learn the latest human capital theories and proven, cutting-edge practices. Special topics include diversity and inclusion, change, leadership, and employee development.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
Required		
MGT 6252	Strategic Human Resource Management	
MGT 6210	Leading Teams	
MGT 6257	Performance Management and Development	
MGT 6290	Special Topics (People Analytics, taken for 3 credits)	
MBAD 6263	Organizations and Human Capital	
One of the following:		
MGT 6253	Leadership and Executive Development	
MGT 6277	Critical Thinking Skills for Executive Leadership	
MGT 6290	Special Topics (Perspectives on Leadership, 3 credits)	

Electives

12 credits in elective courses, selected from the following:

MGT 6215 Conflict Management and Negotiations

MGT 6259 Employment Law and Ethics

MGT 6270 Consulting Processes

MGT 6280 Entrepreneurship

MGT 6286 Creativity and Innovation

MGT 6290 Special Topics (Human Capital Sustainability, 3 credits)

MASTER OF INTERDISCIPLINARY BUSINESS STUDIES

The master of interdisciplinary business studies (MIBS) is a 30-credit degree program designed to facilitate upskilling and re-skilling and increase employment competitiveness and effectiveness for students with interdisciplinary interests. The program of study combines two 12-credit graduate certificates and 6 additional credits in elective courses taken within or outside of the School of Business, allowing students to custom-tailor their degree to meet their professional and employment goals.

REQUIREMENTS

The master of interdisciplinary business studies allows students with specific interdisciplinary interests to take the curricula of two School of Business graduate certificate programs for 24 credits and an additional 6 credits in elective courses to complete the total of 30 credits required for the degree.

Required

Students complete two 12-credit certificate programs selected from the list below. All requirements for both programs must be fulfilled.

The master of interdisciplinary business studies allows students with specific interdisciplinary interests to take the curricula of two School of Business graduate certificate programs for 24 credits and an additional 6 credits in elective courses to complete the total of 30 credits required for the degree.

Required

Students complete two 12-credit certificate programs selected from the list below. All requirements for both programs must be fulfilled.

- Graduate certificate in accountancy (p. 588)
- Graduate certificate in analytics for managers (p. 589)
- Graduate certificate in artificial intelligence (p. 589)
- Graduate certificate in business analytics (p. 590)

- Graduate certificate in cloud, applications, and information technology (p. 591)
- Graduate certificate in corporate responsibility (p. 591)
- Graduate certificate in creativity, innovation, and entrepreneurship (p. 592)
- Graduate certificate in digital marketing and analytics (p. 592)
- Graduate certificate in financial management (p. 593)
- Graduate certificate in global management (p. 593)
- Graduate certificate in governmental and nonprofit accounting (p. 593)
- Graduate certificate in hospitality management (p. 594)
- Graduate certificate in human capital (p. 594)
- Graduate certificate in investments and portfolio management (p. 595)
- Graduate certificate in management leadership (p. 595)
- Graduate certificate in management of technology and innovation (p. 595)
- Graduate certificate in managing the digital organization (p. 596)
- Graduate certificate in marketing and brand management (p. 596)
- Graduate certificate in project management (p. 597)
- Graduate certificate in quantitative business foundations (p. 597)
- Graduate certificate in sport management (p. 597)
- Graduate certificate in strategic management (p. 598)
- Graduate certificate in tourism management (p. 598)
- Graduate certificate in walkable urban real estate development (p. 599)

Electives

Students take an additional 6 credits in elective courses. Students may elect to use these credits to focus in one specific area or to choose courses from different business areas in consultation with the advisor. Electives should focus on integrating the curricula of the two certificate programs.

MASTER OF INTERDISCIPLINARY BUSINESS STUDIES (STEM)

The master of interdisciplinary business studies (STEM) program allows students with specific interdisciplinary interests to take the curricula of two School of Business graduate certificate programs for 24 credits and an additional 6 credits in elective courses to complete total of 30 credits required for the degree.

Required

Students complete two 12-credit certificate programs selected from the list below. All requirements for both programs must be fulfilled.

- Graduate certificate in artificial intelligence (p. 589)
- Graduate certificate in business analytics (p. 590)
- Graduate certificate in cloud, applications, and information technology (p. 591)
- Graduate certificate in management of technology and innovation (p. 595)
- Graduate certificate in managing the digital organization (p. 596)

Electives

Students take an additional 6 credits in STEM-focused elective courses selected from those listed for the above five certificate programs. Other STEM-focused electives may be approved by the academic advisor. Electives should focus on integrating the curricula of the two certificate programs.

MASTER OF SCIENCE IN FINANCE

The M.S.F. program builds upon a Bachelor or Master of Business Administration or a degree in another quantitative discipline. It emphasizes both financial theory and quantitative methods in financial management.

Students engage in applied research and modeling, using large professional databases and computer software packages. They explore the international and regulatory dimensions of finance while focusing on risk management, financial engineering, banking, corporate finance and portfolio analysis and management.

Students pursuing an M.S.F. degree may choose between the intensive program and the regular program. Under the intensive program, students take four classes per semester to complete the degree in 12 months, including a summer session. The regular program, which we highly recommend, paces classes over a period of 24 months, including two summer sessions.

There are no majors in this degree program. However, students with strong backgrounds in particular subject areas may petition to waive a required course and replace it with an elective approved by the program director.

Visit the program website (<http://business.gwu.edu/programs/specialized-masters/m-s-in-finance/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits in required courses

Code	Title	Credits
Required:		
FINA 6271	Financial Modeling and Econometrics	

FINA 6272	Global Financial Markets
FINA 6273	Cases in Financial Management and Investment Banking
FINA 6274	Corporate Financial Management and Modeling
FINA 6275	Investment Analysis and Global Portfolio Management
FINA 6276	Financial Engineering and Derivative Securities
FINA 6277	Comparative Financial Market Regulation and Development
FINA 6278	Financial Theory and Research
FINA 6279	Real Estate Finance and Fixed-Income Security Valuation
FINA 6280	Financial Institution Management and Modeling
FINA 6281	Cases in Financial Modeling and Engineering
FINA 6282	Advanced Financial Econometrics and Modeling

MASTER OF SCIENCE IN THE FIELD OF APPLIED FINANCE

The master of science in the field of applied finance program at the GW School of Business (GWSB) produces leaders in the field of finance. The program focuses on risk management, financial engineering, banking, corporate finance, and portfolio analysis and management. It has been designed to combine quantitative and computer skills with financial theory and applications. The MSAF program qualifies as a STEM program.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits in required courses.

Code	Title	Credits
Required		
FINA 6271	Financial Modeling and Econometrics	
FINA 6272	Global Financial Markets	
FINA 6273	Cases in Financial Management and Investment Banking	
FINA 6275	Investment Analysis and Global Portfolio Management	

FINA 6276	Financial Engineering and Derivative Securities
FINA 6279	Real Estate Finance and Fixed-Income Security Valuation
FINA 6280	Financial Institution Management and Modeling
FINA 6281	Cases in Financial Modeling and Engineering
FINA 6282	Advanced Financial Econometrics and Modeling (taken for 4 credits)

MASTER OF SCIENCE IN THE FIELD OF BUSINESS ANALYTICS

The GW School of Business's M.S. in Business Analytics offers a rigorous curriculum that prepares students for successful careers in helping organizations make better decisions through Analytics. Students are provided a deep foundation in the various methodologies and technologies of analytics along with the necessary team and project skills to apply them in the real world.

Our faculty members are committed to our mission of advancing the scientific principles and best practices of management decision-making in both the private and public sectors. Courses are offered in either a 12 months (accelerated program), 16 months (full-time program), or 24 months (part-time program). Students will participate in an industry related practicum during their final semester where they will work closely with faculty on real world problems and present their findings to the client firm at the end of the project.

Visit the program website (<http://business.gwu.edu/current-students-2/specialized-masters-programs/msba-degree-requirements/>) (<http://business.gwu.edu/programs/specialized-masters/m-s-in-business-analytics/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 25.5 credits in required courses and 7.5 credits in elective courses.

Code	Title	Credits
Required		
DNSC 6203	Statistics for Analytics I	
DNSC 6206	Stochastic Foundation: Probability Models	
DNSC 6210	Decision and Risk Analytics	

DNSC 6211	Programming for Analytics
DNSC 6212	Optimization Methods and Applications
DNSC 6213	Statistics for Analytics II
DNSC 6216	Business Analytics Skills Workshops
DNSC 6217	Business Analytics Practicum
DNSC 6219	Time Series Forecasting for Analytics
DNSC 6231	Consulting for Analytics
DNSC 6279	Data Mining
ISTM 6212	Data Management for Analytics

Electives

7.5 credits in elective courses selected from the following:

DNSC 6214	Pricing and Revenue Management
DNSC 6215	Social Network Analytics
DNSC 6225	Business Process Simulation
DNSC 6278	Big Data Analytics
DNSC 6280	Supply Chain Analytics
DNSC 6290	Special Topics (Machine Learning)
DNSC 6290	Special Topics (Natural Language Processes)
DNSC 6401	Sustainable Supply Chains
DNSC 6403	Visualization for Analytics

MASTER OF SCIENCE IN INFORMATION SYSTEMS AND TECHNOLOGY

The master of science in information systems and technology (MSIST) degree program is designed for working professionals in information systems technology who are looking to make a career shift. Through dynamic, hands-on laboratory and classroom-based courses, students learn how to integrate information systems technology expertise and management skills to effectively implement business solutions. Students may complete the degree through full-time or part-time study.

There are daytime, evening, and weekend class options offered online and at GW's Foggy Bottom Campus. A hybrid format is available, combining on-campus and online study options. A typical full-time student will complete degree

requirements in 18 to 24 months. Part-time students typically complete the program in 24 to 36 months.

Visit the program website (<http://business.gwu.edu/current-students-2/specialized-masters-programs/msist-degree-requirements/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 21 credits in core courses and 12 credits in elective courses.

In addition, students must complete up to 6 credits in prescribed foundation requirements in the areas of computer programming language and database design and applications. If a foundation courses was not completed with a minimum grade of *B* at an accredited institution within five years of matriculation, it must be completed before beginning the program, or within the first year of study in the program.

Code	Title	Credits
Required		
Foundation courses		
ISTM 3119	Introduction to Programming	
ISTM 4121	Database Principles and Applications	
or ISTM 6200	Programming in Python & R	
Core courses		
ISTM 6201	Information Systems Development and Applications	
ISTM 6202	Relational Databases	
ISTM 6204	Information Technology Project Management	
ISTM 6205	Web Application Development	
ISTM 6206	Information Systems Security	
ISTM 6209	Web and Social Analytics	
ISTM 6210	Integrated Information Systems Capstone	
6 credits selected from the following:		
ISTM 6213	Cloud Applications	
ISTM 6214	Foundations of Artificial Intelligence	
ISTM 6218	Business Applications of Artificial Intelligence	
ISTM 6222	IS/IT Strategy and Implementation	

ISTM 6224	Management of Technology and Innovation
ISTM 6225	Cloud Foundations

Electives
6 credits in ISTM courses at the 6000 level or above, excluding ISTM 6200.

MASTER OF SCIENCE IN THE FIELD OF INTERNATIONAL BUSINESS

The master of science in the field of international business program is designed to provide students with knowledge, skills and abilities to collect, organize and analyze a variety of data in a changing and uncertain global context – and make informed decisions for their organizations. The program provides students with a strong foundation of business and technical knowledge and skills, enhances their global mindset, and gives them the opportunity to apply what they've learned in two application challenges: an international business "desk study" capstone and a "field study" study-abroad capstone course.

The program opens with a hybrid (part online, part in-person) non-credit bearing orientation program called "Managing in a Changing World," where students are assigned a collection of multi-media materials based on current business events, discuss them with fellow students, alumni, and faculty in online discussions, and conduct site visits and attend lectures at the World Bank, USAID, and other D.C.-based government, private-sector, and NGO organizations during a two-day orientation.

The program concludes with a one-credit hour professional development seminar, where students attend weekly workshops, featuring guest speakers from government, private-sector organizations, and NGOs, to discuss how these organizations are responding to the changing and uncertain global environment – and provide students with tips for how they can best leverage the knowledge, skills and abilities gleaned in this program to add value to international business organizations.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 27 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
Core courses		

MBAD 6211	Financial Accounting
MBAD 6235	Finance
IBUS 6301	International Business Finance
MBAD 6288	Strategic Management

Statistics course

Any one quantitative methods course at the 6000 level or above that requires completion of an introductory statistics course as a prerequisite. Prior approval of the Program Director is required.

International business focused courses

MBAD 6245	Global Perspectives
IBUS 6290	Special Topics (Economics for Global Business)
IBUS 6290	Special Topics (International Business Consulting Capstone I)
IBUS 6290	Special Topics (International Business Consulting Capstone II)
IBUS 6290	Special Topics (International Business Professional Seminar)

Electives

6 credits in any 6000 level or above IBUS courses.

MASTER OF SCIENCE IN THE FIELD OF PROJECT MANAGEMENT

The program brings real workplace examples to the classroom, integrating them into the overall curriculum. The program is not discipline-specific and focuses on no single technical domain. Our M.S. in project management was among the world's first specialized degree programs of its kind. GW's innovative program guides students in advanced project-management techniques and in balancing practice and theory so that they may become effective project managers. The program is ideal for managers seeking to more effectively integrate complex projects, motivate people, and achieve cost efficiency. To accommodate the needs of working professionals, courses are offered in the evenings on our Foggy Bottom Campus as well as via state-of-the-art distance learning.

Through cutting-edge technology, lectures are made available to distance students as quickly as 60 minutes after each on-campus class concludes. The recorded lectures are fully integrated into the University's mainframe. Students log on to watch the classes at their convenience. Class handouts, assignments, and other materials are mediated through Web-

based course management software, both for distance and on-site learners. The graduate certificate will prepare students with the knowledge, diverse proficiencies, and skill sets required to succeed in a project environment.

Visit the program website (<http://business.gwu.edu/current-students-2/specialized-masters-programs/mspm-degree-requirements/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 27 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
DNSC 6202	Statistics for Managers	
DNSC 6247	Organization, Management, and Leadership	
DNSC 6250	Project Management Finance	
DNSC 6254	Risk Management	
DNSC 6257	Cost Estimation and Control	
DNSC 6258	Executive Decision Making	
DNSC 6259	Project Portfolio Management	
DNSC 6261	Introduction to Project and Program Management	
DNSC 6262	Directed Computational Project Management	
DNSC 6267	Planning and Scheduling	
DNSC 6269	Project Management Application	

Electives

6 credits in elective courses, including one 3-credit, graduate-level Decision Sciences (DNSC) course and one 3-credit, graduate-level course approved by the advisor.

MASTER OF SCIENCE IN THE FIELD OF SPORT MANAGEMENT

The GWSB master of science in the field of sport management program prepares students for executive careers in events and facility management, sports marketing, athlete representation, sports analytics, sports media and the sporting goods industry, working with professional teams and leagues and in collegiate athletics.

Students will learn to recognize issues facing sports industry leaders and make sound, ethical business decisions; identify revenue streams and expenses for sports organizations; understand legal terms, operational structure and contract clauses; and apply analytic and research skills to solve problems and increase performance for sports-related businesses.

Visit the GW School of Business website (<https://business.gwu.edu/ms-sport-management/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

MASTER OF TOURISM ADMINISTRATION

The master of tourism administration degree program is designed to prepare students for competitive professional management positions in public, commercial, or nonprofit organizations, providing visitor services at the local, national, or international level. In addition to coursework, students have opportunities to learn from culturally diverse colleagues and from a wide range of visitor-service organizations. Students may choose one of the three formal concentration areas: sustainable tourism, event and meeting management, or hospitality management. They also may develop an individualized studies program.

Visit the program website (<http://business.gwu.edu/current-students-2/specialized-masters-programs/mta-degree-requirements/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
Required		
TSTD 6249	Sustainable Destination Development	
TSTD 6251	Applied Quantitative Methods	
TSTD 6270	Research Methods and Applications	
MBAD 6263	Organizations and Human Capital	
or MGT 6282	New Venture Initiation	
Completion of one of the following areas of specialization:		
Sustainable tourism management specialization		
Required		
TSTD 6260	Tourism Economics	
TSTD 6261	Tourism Policy and Planning	
TSTD 6263	Destination Marketing	
Electives		
9 credits in concentration-specific elective courses chosen in coordination with the student's academic advisor or program director.		
Event and meeting management specialization		
Required		
TSTD 6276	Risk Management for Events and Meetings	
TSTD 6277	Event Management	
TSTD 6278	Conference and Exposition Management (Suggested Electives)	
Electives		
9 credits in concentration-specific elective courses chosen in coordination with the student's academic advisor or program director.		
Hospitality management specialization		
Required		
TSTD 6220	International Hospitality Management	
TSTD 6221	Hospitality Market Analysis	
TSTD 6296	Hospitality Digital Marketing Strategies	
Electives		

9 credits in concentration-specific elective courses chosen in coordination with the student's academic advisor or program director.

Individualized plan of study

Students may design a 30-credit plan of study, with a brief proposal specifying the courses to be taken submitted to the program director for review.

DUAL MBA AND MAED&HD IN THE FIELD OF HIGHER EDUCATION ADMINISTRATION

The GW School of Business and Graduate School of Education and Human Development offer a dual master of business administration (p. 574) (MBA) and master of arts in education and human development in the field of higher education administration (p. 645) (MAEd&HD) degree program. Up to 18 credits may be shared between degrees: 12 credits of MAEd&HD courses may be applied toward MBA degree requirements, and 6 credits of MBA electives, selected in consultation with the higher education administration advisor, may be applied toward the MAEd&HD degree. All requirements for both degrees must be fulfilled.

The field of higher education administration demands further training in business administration, and vice versa. It is well established that higher education institutions are under pressure to respond to rising challenges due to diminished funding, economic pressures, access for low income and under-resourced students, and demands for accountability at all levels. At the same time demands to optimize limited resources and provide stakeholders responsive digital and online services are increasing.

To respond to current challenges for higher education administrators, policy makers, and consultants, GW has established dual degrees between business administration and social sciences in which MBA students are able to hone analytical skills that examine the intersection between business, technology, social, political, economic, and institutional factors that shape higher education administration and policies and their underlying conditions.

Visit the School of Business (<http://business.gwu.edu/programs/masters-of-business-administration/joint-dual-degree-mba/>) and Graduate School of Education and Human Development (<https://gsehd.gwu.edu/programs/mbamasters-higher-education-administration/>) websites for additional information.

DUAL MASTER OF BUSINESS ADMINISTRATION AND MASTER OF HUMAN RESOURCE MANAGEMENT

The School of Business offers a dual master of business administration (p. 574) (MBA) and master of human resource management (p. 578) (MHRM) degree program. 21 credits are shared between the two degrees. All requirements for both degrees must be fulfilled.

Visit the School of Business website (<https://business.gwu.edu/academics/programs/>) for additional information.

DUAL MBA AND MS IN THE FIELD OF APPLIED FINANCE

The School of Business offers a dual master of business administration (MBA) (p. 574) and master of science in the field of applied finance (MS) (p. 580) degree program. Up to 15 credits of core courses from the MS degree program may count toward MBA degree requirements. Students must complete all MBA core coursework before beginning coursework for the MS. All requirements for both degrees must be fulfilled.

Visit the School of Business website (<https://business.gwu.edu/academics/programs/mba/joint-dual-degree-mba/>) for additional information.

DUAL MBA AND MS IN BUSINESS ANALYTICS

The School of Business offers a dual master of business administration (MBA) (p. 574) and master of science in the field of business analytics (MS) (p. 581) degree program. 21 credits are shared between the two degrees. All requirements for both degrees must be fulfilled.

Visit the School of Business website (<https://business.gwu.edu/academics/programs/mba/joint-dual-degree-mba/>) for additional information.

JOINT MBA AND MS IN FINANCE

The GW School of Business offers a joint master of business administration (MBA) (p. 574) and master of science (MS) in the field of finance (p. 580) degree program. Up to 15 credits of courses in the MS program may count toward MBA degree requirements. Students must complete MBA core coursework before beginning coursework for the MS. All requirements for both degrees must be fulfilled. As degrees in joint programs are awarded simultaneously, degree requirements for both programs must be met before either degree is awarded.

Visit the School of Business website (<https://business.gwu.edu/academics/programs/mba/joint-dual-degree-mba/>) for additional information.

DUAL MBA AND MS IN INFORMATION SYSTEMS TECHNOLOGY

The GW School of Business offers a dual master of business administration (p. 574) (MBA) and master of science in information systems technology (p. 581) (MS in ISTM) degree program. Up to 21 credits of coursework may be shared between programs: 12 credits of ISTM graduate courses may be applied toward the MBA, and 9 credits of ISTM-designated electives in the MBA may be applied toward the MS.

Visit the GW School of Business (<https://business.gwu.edu/academics/programs/mba/joint-dual-degree-mba/>) website for additional information.

DUAL MASTER OF BUSINESS ADMINISTRATION AND MASTER OF SCIENCE IN PROJECT MANAGEMENT

The GW School of Business offers a dual master of business administration (p. 574) (MBA) and master of science in the field of project management (p. 583) (MS) degree program. 21 credits of coursework may be shared between programs: 9 credits of MS coursework may be applied towards the MBA, and 9 credits of core courses and 3 credits in electives from the MBA may count towards the MS. All requirements for both degrees must be fulfilled.

Visit the program website (<https://business.gwu.edu/academics/programs/mba/joint-dual-degree-mba/>) for additional information.

DUAL MBA AND MS IN THE FIELD OF SPORT MANAGEMENT

The School of Business offers a dual master of business administration (p. 574) (MBA) and master of science in sport management (p. 583) (MS) degree program. Up to 21 credits may be shared between programs: 9 credits of MS coursework may be applied toward the MBA, and 12 credits of MBA coursework may be applied toward the MS.

Visit the program website (<https://business.gwu.edu/academics/programs/mba/joint-dual-degree-mba/>) for additional information.

DUAL MBA AND MTA

The School of Business offers a dual master of business administration (MBA) (p. 574) and master of tourism

administration (MTA) (p. 584) degree program. 21 credits are shared between the two degrees. All requirements for both degrees must be fulfilled.

Visit the School of Business website (<https://business.gwu.edu/academics/programs/mba/joint-dual-degree-mba/>) for additional information.

JOINT MA IN THE ELLIOTT SCHOOL AND MBA

The Elliott School of International Affairs and the GW School of Business offer a joint degree program leading to any of the master of arts degrees in the Elliott School (p. 833) and the master of business administration (p. 574) (MBA). Students must be admitted to both schools separately, and each school must approve the student's application to pursue the joint degree program.

The Elliott School counts up to 12 credits of business courses taken as part of the MBA toward the completion of the MA degree. The School of Business counts up to 12 credits of coursework completed in the MA program toward completion of the MBA. All requirements for both degrees must be fulfilled. As degrees in joint programs are awarded simultaneously, degree requirements for both programs must be met before either degree is awarded. Students should consult an advisor regarding detailed joint program requirements.

Visit the Elliott School (<https://elliott.gwu.edu/joint-and-dual-degrees/>) and School of Business (<https://business.gwu.edu/academics/programs/mba/joint-dual-degree-mba/>) websites for additional information.

JOINT MASTER OF BUSINESS ADMINISTRATION AND JURIS DOCTOR

The GW School of Business (GWSB) and the Law School offer a joint program leading to the master of business administration and juris doctor (JD) degree. Students must be admitted to both schools separately, and each school must approve the student's application to pursue the joint degree. GWSB counts 12 credits taken for the JD toward the MBA. The Law School counts 12 credits of courses taken for the MBA toward the JD.

The Law School stipulates that joint degree students must register exclusively in the Law School to complete the first-year JD curriculum. Students in the Global MBA also must complete their first year of MBA coursework as a unit.

All requirements for both degrees must be fulfilled. As degrees in joint programs are awarded simultaneously, requirements for both programs must be met before either degree is awarded. Students should confer with an adviser for specific requirements of the joint program.

Visit the School of Business (<https://business.gwu.edu/academics/programs/mba/joint-dual-degree-mba/>) and Law School (<https://www.law.gwu.edu/joint-degrees/>) websites for additional information.

DOCTORAL PROGRAMS

Doctoral program

- Doctor of Philosophy in the field of business administration (p. 587)

DOCTOR OF PHILOSOPHY IN BUSINESS ADMINISTRATION

The doctoral program in Business Administration prepares students for full-time careers as business academics. Working with a distinguished faculty, students develop expertise in research and scholarship and learn to contribute as vital members of a dynamic community of scholars. Graduates aspire to faculty appointments at internationally recognized business schools, and plan to balance teaching and active research.

The Ph.D. in Business Administration offers the following concentrations: Accountancy, Decision Sciences, Finance, International Business, Management, and Strategic Management and Public Policy.

Visit the program website (<https://business.gwu.edu/academics/programs/doctoral/>) for additional information.

REQUIREMENTS

The doctor of philosophy in business administration is designed to prepare students who wish to pursue academic careers in business. The program consists of two major stages: the pre-candidacy stage and the dissertation stage. During the pre-candidacy stage, students complete coursework and a comprehensive examination, under the guidance of a committee of three faculty members (faculty advisory group). Upon admission to candidacy, students prepare, submit, and defend a dissertation.

Curriculum requirements

The doctoral curriculum involves two years of formal courses established by each Department and approved by the Doctoral Committee. Students take a minimum of 45 credits during their program (including core courses and a summer paper). Students should consult their Faculty Advisory Group about the required courses and electives for which they should register. The following 30 credits constitute the core requirements for the degree:

- Four required courses in research methods and quantitative analysis (12 credits).

- Four required doctoral seminars that cover important studies in the student's area of interest (12 credits).
- An additional doctoral level seminar from outside the student's area of interest (3 credits).
- A summer research paper during the first or first and second summer, as required by the student's area of interest (3 credits).

The remaining 15 elective credits are chosen in consultation with the student's faculty advisory group. Students should complete at least 39 credits within the first two years from matriculation, and the remaining 6 credits should be completed during the third year.

Policies for core courses

In general, all core courses should be doctoral courses, i.e., those at the 8000 level. All courses must be taken for letter grades. Required courses cannot be waived without substitution except in unusual circumstances as determined on a case-by-case basis. Examples of unusual circumstances include students holding a specialized master's or doctoral degree where equivalent core courses were taken in a particular area (such as statistics or mathematics). Students may petition the Associate Dean of Research and Doctoral Programs to substitute up to 12 credits of required courses with alternative courses approved by the faculty advisory group.

Comprehensive examination

After the student completes the coursework and the summer paper requirements, the faculty advisory group and department faculty administer a comprehensive examination. The format of the comprehensive examination is at the discretion of the advisory committee, subject to approval by the doctoral committee when evaluating the study plan. The comprehensive examination establishes the student's mastery of the current and classic literature. The comprehensive exam can be written, in-class or take-home, and may include an oral component. Failure to pass the comprehensive examination in two attempts leads to termination from the program.

Dissertation

Following successful completion of the comprehensive examination, the student is considered a doctoral candidate, and may form a dissertation committee, and develop a dissertation proposal. During this stage, students prepare, submit, and defend a dissertation.

Other policies

All course work and required comprehensive examination must be completed within five years of matriculation. All program requirements must be completed within seven years of the date of matriculation.

The doctoral program is administered and supervised by the Associate Dean and the committee on doctoral studies. For more detailed information on the program, please see the

Doctoral Program Handbook, available in the GWSB Doctoral Program Office

GRADUATE CERTIFICATE IN ACCOUNTANCY

The graduate certificate in accountancy offers students a deeper understanding of accounting information. Although the certificate does not qualify students for a CPA, the program is designed to provide a solid understanding of the fundamentals of accounting. Program graduates will be informed users of accounting information, able to apply accounting knowledge in their current disciplines and make more informed decisions.

Visit the program website (<https://business.gwu.edu/academics/programs/certificate/graduate-certificate-accounting/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 6 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
ACCY 6101	Financial Accounting (or equivalent course/experience)	
or MBAD 6211	Financial Accounting	
ACCY 6104	Intermediate Accounting I	
or ACCY 6106	Financial Statement Analysis	
Electives		
6 credits in elective courses from the following:		
SMPP 6215	Corporate Governance and Ethics	
ACCY 6104	Intermediate Accounting I	
ACCY 6105	Intermediate Accounting II	
ACCY 6106	Financial Statement Analysis	
ACCY 6110	International Reporting and Control	
ACCY 6112	International Financial Reporting Standards	
ACCY 6201	Accounting for Internal Decision Making	
ACCY 6202	Advanced Strategic Cost Management	
ACCY 6203	Controls, Alignment, and the Organization	
ACCY 6204	Managerial Accounting for Government and Nonprofits	
ACCY 6302	Fraud Examination and Forensic Accounting	
ACCY 6401	Federal Income Taxation	
ACCY 6402	Federal Income Taxation of Partnerships	
ACCY 6404	Taxation of Financial Instruments	
ACCY 6501	Accounting Information Systems and Electronic Data Processing	
ACCY 6701	Government Accounting	
ACCY 6705	Nonprofit Accounting	

GRADUATE CERTIFICATE IN ANALYTICS FOR MANAGERS

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and 3 credits in elective courses.

Code	Title	Credits
Required		
MBAD 6224	Decision Making and Data Analysis	
DNSC 6210	Decision and Risk Analytics	
DNSC 6251	Optimization Models for Decision Making	
DNSC 6279	Data Mining	
Electives		
3 credits selected from the following courses:		
DNSC 6209	Forecasting for Analytics	
DNSC 6215	Social Network Analytics	
DNSC 6225	Business Process Simulation	
DNSC 6278	Big Data Analytics	
DNSC 6280	Supply Chain Analytics	
DNSC 6403	Visualization for Analytics	
DNSC 6404	Sports Analytics	
DNSC 6290	Special Topics (Digital Analytics)	
DNSC 6290	Special Topics (Machine Learning)	
DNSC 6290	Special Topics (Natural Language Processes)	

GRADUATE CERTIFICATE IN ARTIFICIAL INTELLIGENCE

The graduate certificate in artificial intelligence program prepares business leaders for new opportunities afforded by innovations in artificial intelligence (AI). AI is the next evolution of technology in business, driven by advancements in machine learning and expanding use cases. Image recognition, voice assistants, natural language processing, and chatbots are transforming industries such as transportation, agriculture, and health care, as well as how consumers live in connected homes. In this program, students learn foundational knowledge and hands-on skills in machine learning, deep learning,

and embedded systems, and apply them to AI's business applications including the internet of things (IoT).

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and one 3-credit elective course.

Code	Title	Credits
Required		
ISTM 6214	Foundations of Artificial Intelligence	
ISTM 6217	Internet of Things Management	
ISTM 6218	Business Applications of Artificial Intelligence	
Electives		
One course from the following:		
DNSC 6279	Data Mining	
ISTM 6203	Managing Cloud Security	
ISTM 6213	Cloud Applications	
ISTM 6225	Cloud Foundations	
ISTM 6216	Mobile Application Development	

GRADUATE CERTIFICATE IN BUSINESS ANALYTICS

The master of science in business analytics (MSBA) degree program offers a stand-alone graduate certificate in business analytics. The graduate certificate is available to current GW School of Business and GW graduate students as well as interested professionals who are not currently enrolled at the University. The credits earned for this certificate are directly transferable towards earning the MSBA degree for up three years after completion of the certificate.

Visit the program website (<https://business.gwu.edu/academics/programs/certificate/graduate-certificate-business-analytics/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits total, including 10.5 credits in required courses and 1.5 credits in an elective course.

Code	Title	Credits
Required		
DNSC 6203	Statistics for Analytics I *	
DNSC 6206	Stochastic Foundation: Probability Models *	
DNSC 6211	Programming for Analytics	
DNSC 6279	Data Mining	
Electives		
A minimum of 3 credits from the following courses*:		
DNSC 6209	Forecasting for Analytics	
DNSC 6214	Pricing and Revenue Management	
DNSC 6215	Social Network Analytics	
DNSC 6225	Business Process Simulation	
DNSC 6233	Social Network Analysis for Managers	
DNSC 6251	Optimization Models for Decision Making	
DNSC 6252	Risk Analysis for Decision Making	
DNSC 6278	Big Data Analytics	
DNSC 6280	Supply Chain Analytics	
DNSC 6403	Visualization for Analytics	
DNSC 6404	Sports Analytics	
DNSC 6290	Special Topics (Digital Analytics)	
DNSC 6290	Special Topics (Responsible Machine Learning)	

*DNSC 6203 and DNSC 6206 may be waived by examination. If a waiver is granted, the total number credits required for the degree is not reduced and the student must make up the credits from the waived course(s) by taking additional elective credits.

GRADUATE CERTIFICATE IN CAPITAL MARKETS

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
CAMA 6001	Capital Markets, Instruments and Institutions	
CAMA 6002	Corporate Finance and Risk Management	
CAMA 6003	Capital Markets, Financial Crises and the Global Economy	
CAMA 6004	Quantitative Thinking for Capital Market Decision Makers	

GRADUATE CERTIFICATE IN CLOUD, APPLICATIONS, AND INFORMATION TECHNOLOGY

The graduate certificate in cloud, applications and information technology program trains business leaders to learn, design, and implement cloud architecture and policies. Cloud-managed services such as Amazon Web Services (AWS), Microsoft Azure, and Google Cloud Platform (GCP) accelerate businesses' capacity for innovation and enable agile navigation through today's hypercompetitive business climate. Students acquire the skills to adeptly and securely deploy those services to help firms meet their needs.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and one 3-credit elective course.

Code	Title	Credits
Required		
ISTM 6213	Cloud Applications	
ISTM 6225	Cloud Foundations	
ISTM 6216	Mobile Application Development	
Elective		
One course selected from the following:		
ISTM 6203	Managing Cloud Security	
ISTM 6214	Foundations of Artificial Intelligence	
ISTM 6217	Internet of Things Management	
ISTM 6218	Business Applications of Artificial Intelligence	

GRADUATE CERTIFICATE IN CORPORATE RESPONSIBILITY

The graduate certificate in corporate responsibility prepares professionals to become responsible leaders in business and to understand a firm's impact on society. The program emphasizes responsible behavior by individuals in organizations as well as the organizations themselves. The focus of the program lies in identifying the significance of values in business and demonstrating how integrating values in decision-making and strategy can promote responsible business in society.

Courses completed as a non-degree student are not eligible for application towards the certificate requirements.

Visit the program website (<https://business.gwu.edu/academics/programs/certificate/graduate-certificate-in-responsible-management/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and one 3-credit elective course.

Code	Title	Credits
Required		
MBAD 6289	Business Ethics and Public Policy	
Two courses from the following:		
SMPP 6215	Corporate Governance and Ethics	
SMPP 6218	Topics in Business and Society <small>Students may enroll in course multiple times with different topics.</small>	
SMPP 6290	Special Topics (Strategic Negotiations & Ethics)	
Electives		
One additional course from the list above or one course from the following:		
DNSC 6401	Sustainable Supply Chains

SMPP 6290	Special Topics (Sustainable and Responsible Investing)
SMPP 6290	Special Topics (Strategic Management and Environmental Analysis Within a Development Context)
SMPP 6298	Directed Readings and Research *

*Enrollment must be approved by the faculty director.

GRADUATE CERTIFICATE IN CREATIVITY, INNOVATION, AND ENTREPRENEURSHIP

The graduate certificate in creativity, innovation, and entrepreneurship broadens the field of study from beyond the primary focus of starting a new venture to include exploring how one acts more entrepreneurial, takes risks, and creatively introduces new innovations and combinations in organizations both large and small. The foundation of the graduate certificate is the core introductory course, MGT 6280 (<http://bulletin.gwu.edu/search/?P=MGT%206280>) Entrepreneurship, which introduces students to the concentration and the importance and benefits of entrepreneurship

Visit the program website (<https://business.gwu.edu/academics/programs/certificate/graduate-certificate-innovation-creativity-entrepreneurship/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and one 3-credit elective course.

Code	Title	Credits
Required		
MGT 6280	Entrepreneurship	
MGT 6282	New Venture Initiation	
ISTM 6224	Management of Technology and Innovation	

Elective

One course from the following:

MBAD 6263	Organizations and Human Capital
MGT 6285	Social Entrepreneurship
MGT 6286	Creativity and Innovation

GRADUATE CERTIFICATE IN DIGITAL MARKETING AND ANALYTICS

This certificate provides an introduction to the expanding area of digital marketing and analytics. As this area is inherently multidisciplinary, the certificate draws from coursework within various sub-disciplines offered by the Marketing department (marketing management, digital marketing, and integrated marketing communication) as well as coursework in web analytics and information systems offered by the ISTM and Decision Sciences departments. The objective of the certificate is to provide students with an understanding of the practice of digital marketing, how it relates to marketing communication and marketing strategy, and the role of analytics.

Visit the program website (<https://business.gwu.edu/academics/programs/certificate/graduate-certificate-digital-marketing-communications/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 6 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Prerequisite		
MBAD 6274	Marketing	
Required		
MKTG 6252	Digital Marketing	
MKTG 6262	Digital Marketing Analytics	
Electives		
Two courses selected from the following:		
MKTG 6263	Marketing Decision Analytics	
MKTG 6264	Artificial Intelligence and Machine Learning for Marketing Automation	

GRADUATE CERTIFICATE IN FINANCIAL MANAGEMENT

The graduate certificate in financial management provides background and training in the financial aspects of three broad principal business functions: obtaining necessary capital, investing the capital into the firm's asset and operations, with the purpose of ethically maximizing the value to shareholders, and distributing the profits resulting from product/service sales to shareholders.

Visit the program website (<https://business.gwu.edu/academics/programs/certificate/graduate-certificate-financial-management/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and one 3-credit elective course.

Code	Title	Credits
Pre-Requisite		
MBAD 6211	Financial Accounting	
Required		
MBAD 6235	Finance

GRADUATE CERTIFICATE IN HUMAN CAPITAL

The graduate certificate in human capital provides depth of knowledge in the practices and research based disciplines of human capital and human resource management. Participants learn how human capital contributes to the core strategy of an organization. Courses cover key areas associated with human resource competencies as well as knowledge associated with the psychology of people, organizations, and careers. Human capital theory is presented in a practical way, targeted towards HR generalists or non-human resource managers interested in understanding the strategic function of HR in organizations. The program builds on the strengths of GWSB in the areas of human capital development.

Visit the program website (<https://business.gwu.edu/academics/programs/certificate/graduate-certificate-human-capital/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and one 3-credit elective course.

or FINA 6290	Special Topics	
FINA 6242	Real Estate Valuation and Investment	

*If FINA 6290 is taken, it must be on the topic of Investment Analysis Venture Capital.

GRADUATE CERTIFICATE IN MANAGEMENT LEADERSHIP

Leadership is the ability to move others in a unified manner toward a common goal. It is not related to typical notions of authority. Rather, it is a skill that requires self-awareness, self-monitoring, social-awareness, and relationship building. Leadership is employed across all organization functions, and thus is the central source of progress and innovation in all

organizations. This graduate certificate educates students in the principles of effective leadership.

REQUIREMENTS

Visit the program website (<https://business.gwu.edu/academics/programs/certificate/graduate-certificate-management-leadership/>) for additional program information.

The following requirements must be fulfilled: 12 credits, including 9 credits in required course and 3 credits in elective courses.

Code	Title	Credits
Required		
MBAD 6263	Organizations and Human Capital	
MGT 6210	Leading Teams	
MGT 6253	Leadership and Executive Development	
Electives		
3 credits from the following:		
MGT 6215	Conflict Management and Negotiations

MGT 6287	Women's Entrepreneurial Leadership	
MGT 6290	Special Topics (Advanced People Analytics)	
MGT 6290	Special Topics (Diversity and Globalization)	

GRADUATE CERTIFICATE IN MANAGEMENT OF TECHNOLOGY AND INNOVATION

This graduate certificate program provides a broad treatment of the management of science and technology as well as innovation. The curriculum focuses on the management of organizations and the professional workforce involved in conceiving, developing, and delivering products and services involving technology of all kinds.

Visit the program website (<https://business.gwu.edu/academics/programs/certificate/graduate-certificate-management-technology-innovation/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 6 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
ISTM 6222	IS/IT Strategy and Implementation	
ISTM 6224	Management of Technology and Innovation	
ISTM 6223	Technology Entrepreneurship	
or ISTM 6233	Emerging Technologies	
Electives		
One course from the following: *		
ISTM 6204	Information Technology Project Management	
ISTM 6223	Technology Entrepreneurship	
ISTM 6234	New Venture Financing	
ISTM 6239	Seminar: Competitiveness/Technology	
ISTM 6290	Special Topics (Technology Management in European Business Environment)	

*Students may take other elective courses from the MSIST curriculum or from other departments with the advisor's approval.

GRADUATE CERTIFICATE IN MANAGING THE DIGITAL ORGANIZATION

The graduate certificate in managing the digital organization program focuses on the ways in which organizations use systems to collect, process, and distribute data. Information systems are not only the technology an organization uses, but also the way people support business processes through interaction with technology. Students in this program gain an understanding of the components that comprise information systems and how those systems support all aspects of an organization's operations, management, and decision making.

Visit the program website (<https://business.gwu.edu/graduate-certificate-managing-digital-organization/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and one 3-credit elective course.

Code	Title	Credits
Required		
ISTM 6201	Information Systems Development and Applications	
ISTM 6202	Relational Databases	
ISTM 6209	Web and Social Analytics	
Elective		
3 credits in any ISTM course at the 6000 level or above.		

GRADUATE CERTIFICATE IN MARKETING AND BRAND MANAGEMENT

This graduate certificate provides students with an in-depth understanding of the interface between Marketing and Brand Management. The exciting area of Brand Management is considered by top executives as a high-demand specialty area of marketing. Students will learn how to strategically manage brands to help their organizations in creating customer value, building loyalty and name recognition strong enough to overcome intense competition in local and global markets. The certificate has a special focus on how organizations design brand identity, manage customer experience, measure/ analyze brand performance, and differentiate brand communication strategies.

Visit the program website (<https://business.gwu.edu/academics/programs/certificate/graduate-certificate-marketing-brand-management/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and one 3-credit elective course.

Code	Title	Credits
Prerequisite		
MBAD 6274	Marketing	

Required

MKTG 6248	Advertising and Marketing Communications Strategy
or MKTG 6256	Integrated Marketing Communication
MKTG 6255	Strategic Brand Management

Elective

Two courses selected from the following:

MKTG 6242	Buyer Behavior
MKTG 6243	Marketing Research
MKTG 6246	Marketing of Services
MKTG 6251	Product Management
MKTG 6259	Marketing Strategy

GRADUATE CERTIFICATE IN PROJECT MANAGEMENT

The master of science in project management program (MSPM) is enhanced by its related graduate certificate in project management. The certificate is available to current GWSB students as well as those not enrolled in a graduate degree program. The certificate program is designed to provide students with detailed coverage of basic concepts and theories of project management and related skills, preparing students to succeed in a project environment. Up to the total 12 credits earned for the certificate may count toward requirements for the MSPM degree.

Visit the program website (<https://business.gwu.edu/graduate-certificate-project-management/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled 12 credits, including 9 credits in required courses and 3 credits in elective courses.

Code	Title	Credits
Required		
DNSC 6202	Statistics for Managers	
or MBAD 6224	Decision Making and Data Analysis	
DNSC 6247	Organization, Management, and Leadership	
or MBAD 6263	Organizations and Human Capital	

DNSC 6261	Introduction to Project and Program Management
-----------	--

Electives

3 credits in elective courses selected from the following:

DNSC 6254	Risk Management
DNSC 6257	Cost Estimation and Control
DNSC 6258	Executive Decision Making
DNSC 6267	Planning and Scheduling

GRADUATE CERTIFICATE IN QUANTITATIVE BUSINESS FOUNDATIONS

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and one 3-credit elective course.

Code	Title	Credits
Required		
MBAD 6211	Financial Accounting	
MBAD 6224	Decision Making and Data Analysis	
MBAD 6235	Finance	
Elective		
One 3-credit graduate elective selected in consultation with the academic advisor.		

GRADUATE CERTIFICATE IN SPORTS MANAGEMENT

The sport and recreation industry is estimated to be almost \$500 billion with more than \$60 billion derived from professional sports alone. The industry includes the management and marketing of youth to professional sport organizations and athletes as well as sport media, sporting goods, health/sport clubs, and venues. The graduate certificate in sport management helps prepare student to enter all areas of the field with a strong understanding of sport marketing, sport media, sport law, and sport facilities.

Visit the program website (<https://business.gwu.edu/academics/programs/certificate/graduate-certificate-in-responsible-management/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
TSTD 6264	Sport Marketing	
TSTD 6265	Sport Law: Contracts and Negotiations	
TSTD 6266	Sport and Event Facility Management	
TSTD 6267	Sport Media and Communications	

GRADUATE CERTIFICATE IN STRATEGIC MANAGEMENT

The graduate certificate in strategic management program prepares future business leaders with strategic management principles by emphasizing the executive manager’s perspective and evaluating the strategy of various types of organizations in the global economy. The curriculum covers key areas associated with strategic management, including corporate strategy, competitive strategy, corporate political and nonmarket strategy, business and government relations, strategic decision making, strategic networks, and strategic leadership. The program is recommended for individuals interested in the fields of consulting, business development, corporate strategy, corporate political strategy, sustainability, strategic compliance, and business and government relations.

Visit the program website (<https://business.gwu.edu/graduate-certificate-strategic-management/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in selected courses.

Code	Title	Credits
Required		
MBAD 6288	Strategic Management	
or SMPP 6290	Special Topics	
(SMPP 6290 in the topic Strategy Fundamentals)		
Two courses selected from the following:		
SMPP 6202	Business-Government Relations

FINA 6242	Real Estate Valuation and Investment	

GRADUATE SCHOOL OF EDUCATION AND HUMAN DEVELOPMENT

Dean M.J. Feuer

Academic Dean C. Green

Associate Dean for Research and External Relations M.B. Freund

Associate Dean for Doctoral Studies S.A. Dannels

Associate Dean for Master's Studies and Student Life R.C. Jakeman

The Graduate School of Education and Human Development (<http://gsehd.gwu.edu/>) is the administrative unit for the Departments of Counseling and Human Development, Curriculum and Pedagogy, Educational Leadership, Human and Organizational Learning, and Special Education and Disability Studies. The School offers master of arts in education and human development, master of arts in teaching, master of education, education specialist, doctor of philosophy, and doctor of education degree programs. Academic programs are offered in numerous fields of study.

In addition to its degree programs, the School offers graduate and post-graduate certificate programs; credit and noncredit workshops designed to meet the unique needs of metropolitan area school systems and other clientele in industry and government; and a wide range of courses for teachers who wish to pursue advanced studies and/or additional endorsements, as well as for degree students who want to pursue initial teacher licensure. Clinical facilities are provided by the Community Counseling Service Center (<http://gsehd.gwu.edu/ccsc/>), which supports counseling internships as well as outreach services to the community.

All programs are designed to meet the broad needs of individuals who seek the knowledge and skills necessary to provide effective learning and teaching, research, services, and leadership in a variety of settings that cover the entire life span. Special curricula are individually tailored for liberal arts graduates and graduates of other professional schools who are interested in teaching or in other human services areas. Some programs and courses are also offered at off-campus locations or via distance education.

The Office of Professional Preparation and Accreditation (<https://blogs.gwu.edu/gsehdoppa/>) serves as a liaison with schools for clinical experiences required for licensure in school counseling and in teaching. Field and internship experiences required in master's and doctoral programs are provided in cooperation with public and private schools, social and health agencies, museums, institutions in the business community, institutions of higher education, nonprofit and professional associations, and the federal government.

The educator preparation programs in the Graduate School of Education and Human Development are accredited by the

Council for the Accreditation of Educator Preparation/National Council for Accreditation of Teacher Education (CAEP/NCATE), and are state-approved by the District of Columbia Office of the State Superintendent of Education (OSSE). Programs that prepare students to become eligible for licensure as a professional counselor are accredited by The Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Mission

The Graduate School of Education and Human Development, strategically based in the nation's capital and serving the global community, develops informed and skilled leaders through innovative teaching and learning. Students engage in scholarly inquiry that links policy, research, and practice across the lifespan and fosters continuous self-examination and critical analysis towards excellence.

Bridging Concepts

The following bridging concepts are central to the unified conceptual framework of the School and weave through the mission, goals, and initiatives of its strategic plan.

- Research and scholarship are prerequisite to the improvement of educational practice.
- Leadership is critical in the transformation of education and human development at all levels.
- Building reflective practitioners through the integration of theory and practice must be a focus of all programs.
- A community of diverse learners is prerequisite to success in the education and human development professions.

REGULATIONS

GSEHD provides an online Master's, Education Specialist, and Certificate Student Handbook (https://gsehd.gwu.edu/sites/default/files/documents/ma_eds_student_handbook_20-21.pdf) and a Doctoral Student Handbook (https://gsehd.gwu.edu/sites/default/files/documents/2020-2021_doctoral_handbook.pdf). These online handbooks contain additional updated information on policies, regulations, and other matters of concern to enrolled and admitted students. It is the responsibility of the student to be aware of the information contained in both this Bulletin and the appropriate Student Handbook. Students should also consult departmental/program handbooks and guidelines.

Admission Requirements

The Graduate School of Education and Human Development seeks applicants with strong academic potential, high motivation, and aptitude to do graduate-level work. Admission decisions are based on an evaluation of all material submitted in support of the application. The School requires a bachelor's degree from a regionally accredited institution, official transcripts of all previous undergraduate and graduate coursework, and acceptable test scores on either the Graduate

Record Examination or the Miller Analogies Test in some programs. These tests are waived in several master's programs. All doctoral applicants must have a master's degree from a regionally accredited institution. Additional requirements vary by program.

A minimum of two letters of recommendation and a statement of purpose are required. Most programs also require an interview with program faculty. For those living outside the Washington metropolitan area the interview may be conducted virtually with permission of lead faculty of the desired program. In addition to these basic requirements, individual programs may require relevant professional experience and other supporting documentation before a final decision on admission is made.

English Language Requirements for International Students

Applicants who are not citizens of countries where English is the official language or who do not hold a degree from a regionally accredited U.S. institution of higher learning are required to submit scores from the Test of English as a Foreign Language (TOEFL), the academic International English Language Testing System (IELTS), or the Pearson Test of English-Academic (PTE). English language scores are valid for two years. The most recent test scores are used for applicants who submit multiple scores. Specified possible exemptions from this policy can be found on the Graduate Admissions (<https://graduate.admissions.gwu.edu/international-student-application-requirements/>) website. The required minimum score for admission to a program is 80 on the Internet-based or 550 on the paper-based TOEFL, or an overall band score of 6.0 on the IELTS (with no individual band score below 5.0), or a score of 53 on the PTE. Some programs have higher minimum scores. Applicants who have a TOEFL score of at least 70 (but less than 80), or an IELTS overall band score of 5.0 (but less than 6.0) may be considered for admission on the condition that they successfully complete the Applied English Studies program prior to beginning their graduate studies.

Students with the following English language test scores are exempt from taking English for Academic Purposes (EAP) courses: TOEFL, 600 paper-based or 100 Internet-based; IELTS, overall band score of 7.0 with no individual band score below 6.0; PTE, 68. Students with test scores below these minimums must register for an EAP course during their first semester. Students assigned EAP courses should anticipate additional tuition expenses as well as a possible extended period of time required to complete their degree program. EAP courses do not count toward degree requirements.

Students required to take an EAP course must earn a minimum grade of B- in the course. Students who do not earn a B- or above in their first course must take an additional EAP course in the subsequent semester. Students who earn an F in an EAP course must repeat the course and are subject to the process described in the Scholarship section.

Academic Policies

Information on grades, the graduate student grading system, assignment of credits, Incompletes, the grade-point average, and eligibility for graduation is found under University Regulations (p. 27).

The symbol *I* (Incomplete) indicates that a satisfactory explanation of extenuating circumstances has been given to the instructor for the student's inability to complete the required work of the course during the semester of enrollment. The work must be completed within the designated time period agreed upon by the instructor, student, and School, but no more than one calendar year from the end of the semester in which the course was taken. All students who receive an Incomplete must maintain active student status during the subsequent semester(s) in which the work of the course is being completed. If not registered in other classes during this period, the student must register for Continuous Enrollment status.

When work for the course is completed, the instructor will complete a grade change form. The final grade will replace the symbol of *I*. If work for the course is not completed within the designated time, the grade will be converted automatically to a grade of *F*, Failure, 0 quality points, and the grade-point average and academic standing recalculated. See University Regulations for full details.

Scholarship

An overall grade-point average of 3.0 is required for graduation. Students who have a cumulative GPA below 3.0, or receive a grade of *C* or below in more than 6 credits, or receive a grade of *F* will have an academic hold placed on their account and may be subject to program removal. Students must meet with a representative of the Dean's Office before enrollment in further coursework is allowed. More detailed information can be found in the GSEHD student handbooks.

Comprehensive Examination

A comprehensive examination is required for some master's and all doctoral programs. Candidates who plan to take the examination must file an application in the Office of Student Life of the Graduate School of Education and Human Development by the published deadline.

Continuous Enrollment and Residency

Students must be continuously enrolled in GSEHD unless the Dean's Office grants a leave of absence. Failure to register each fall and spring semester will result in lapse of candidacy. Subsequent readmission is subject to whatever new conditions and regulations have been established by the School. See Continuous Enrollment Status under University Regulations.

When master's degree candidates are sitting for a comprehensive examination and are not otherwise enrolled in coursework, they may prepare for and sit for the exam in continuous enrollment status. If not enrolled in other coursework, doctoral and education specialist students are

required to enroll in the examination preparation course, which carries a fee equivalent to 1 credit of tuition. See Comprehensive Examination policy in the appropriate student handbook.

Leave of Absence

Students who, for personal reasons, are temporarily unable to continue their program of studies may request a leave of absence for a specific period of time not to exceed one calendar year during the total period of degree candidacy. If the request is approved, the student must register for leave of absence each semester. If a student fails to register, degree candidacy is terminated. Students who need additional semesters of leave of absence must seek approval from the appropriate appeals committee.

Class Attendance Policy

Attending class and scheduled make-up classes, discussions, and other course meetings is a fundamental student responsibility. Faculty may use class attendance and participation as factors in determining course grades.

MASTER'S

Master's Degree Programs

See list of programs, below (p. 603).

Admission Requirements

The Graduate School of Education and Human Development (<https://gsehd.gwu.edu/>) seeks applicants with strong academic potential, high motivation, and aptitude to do graduate-level work. Admission decisions are based on an evaluation of all material submitted in support of the application. The School requires a bachelor's degree from a regionally accredited institution, official transcripts of all previous undergraduate and graduate coursework, and acceptable test scores on either the Graduate Record Examination or the Miller Analogies Test in some programs. These tests are waived in several master's programs.

Two letters of recommendation and a statement of purpose are required. Most programs also require an interview with program faculty. The interview may be conducted virtually with permission of lead faculty of the desired program for those living outside the Washington metropolitan area. In addition to these basic requirements, individual programs may require relevant professional experience and other supporting documentation before a final decision on admission is made.

Plan of Study

The plan of study leading to a master's degree varies by program, but all require a minimum of 30 graduate credits including a program-approved 3-credit research methods course to satisfy the research requirements. At least 24 credits of this work must be taken in residence at the Graduate School

of Education and Human Development. Several programs have additional credit and/or capstone requirements.

All degree requirements must be completed within six years, whether study is full- or part-time. More detailed information can be found in the GSEHD Master's, Education Specialist, and Certificate Student Handbook (https://gsehd.gwu.edu/sites/default/files/documents/ma_ed_s_student_handbook_20-21.pdf).

Transfer Credit

Transfer credit is granted for approved courses taken at other regionally accredited institutions, but a minimum of 24 credits must be completed in the Graduate School of Education and Human Development as a master's candidate. One semester (and a maximum of 12 credits) taken in non-degree status may be credited toward the master's degree. Transfer credit is not granted for work completed five or more years before application for admission or readmission to master's candidacy. All work accepted for transfer must have been earned with a minimum grade of B and must be approved for acceptance by both the advisor and the dean. *Credit, Satisfactory, Audit*, or other non-letter grades are not acceptable.

Teacher Certification Preparation Programs

Programs are available to prepare students for teacher licensure in elementary, secondary, and special education through the master of arts in the field of education and human development, and master of education degree programs. Students who plan to prepare for licensure must apply to the appropriate degree program. These degree programs are also available to credentialed teachers seeking additional endorsements.

In accordance with the 2008 Higher Education Opportunity Act, Title II, Section 205, The George Washington University Graduate School of Education and Human Development provides required information in response to any request by potential applicants, guidance counselors, and prospective employers. Visit the GSEHD website (<http://gsehd.gwu.edu/>) for additional information.

PRAXIS® Teacher Licensure Assessments

All degree programs preparing students for initial teacher licensure require completion of the Educational Testing Service PRAXIS® teacher assessments as specified by the Office of the State Superintendent of Education (OSSE) of the District of Columbia.

The master's degree program preparing students for licensure in school counseling requires completion of the Educational Testing Service PRAXIS® assessment as specified by the Office of the State Superintendent of Education (OSSE) of the District of Columbia.

The master's degree program, the post-master's certificate, and the education specialist degree preparing students for licensure in educational administration follow the state-

approved program, PRAXIS® test requirements put forth by the Office of the State Superintendent of Education (OSSE) of the District of Columbia.

Master's Thesis Option

Students in select programs may elect a thesis option. The choice of the thesis subject must be approved in writing by the student's advisor. Students should consult program faculty for more information.

Second Master's Degree

Persons seeking a second master's degree in the Graduate School of Education and Human Development must complete all core and specialization requirements and a minimum residency requirement of 24 credits. Students seeking a second master's degree must follow the application procedures described on the GSEHD website (<https://gsehd.gwu.edu/>).

Master of Arts in Teaching

- Master of Arts in Teaching in the field of museum education (p. 656)

Master of Education

- Master of Education in the field of elementary education (p. 635)
- Master of Education in the field of secondary education (p. 636)

Master of Arts in Education and Human Development

- Master of Arts in Education and Human Development individualized program (p. 637)
- Master of Arts in Education and Human Development in the field of assessment, testing, and measurement in education (p. 637)
- Master of Arts in Education and Human Development in the field of clinical mental health counseling (p. 638)
- Master of Arts in Education and Human Development in the field of curriculum and instruction (p. 640)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in elementary education (p. 640)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in interdisciplinary studies of literacy and reading education (p. 641)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in Jewish education (p. 642)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in secondary education (p. 642)

- Master of Arts in Education and Human Development in the field of early childhood special education (p. 643)
- Master of Arts in Education and Human Development in the field of education policy studies (p. 643)
- Master of Arts in Education and Human Development in the field of educational leadership and administration (p. 644)
- Master of Arts in Education and Human Development in the field of educational technology leadership (p. 645)
- Master of Arts in Education and Human Development in the field of experiential Jewish education (p. 647)
- Master of Arts in Education and Human Development in the field of higher education administration (p. 645)
- Master of Arts in Education and Human Development in the field of interdisciplinary secondary transition services (p. 648)
- Master of Arts in Education and Human Development in the field of international education (p. 649)
- Master of Arts in Education and Human Development in the field of language education, teaching world languages K-12 licensure concentration (p. 650)
- Master of Arts in Education and Human Development in the field of language education, teaching world languages non-licensure concentration (p. 651)
- Master of Arts in Education and Human Development in the field of language education, TESOL K-12 licensure concentration (p. 651)
- Master of Arts in Education and Human Development in the field of language education, TESOL non-licensure concentration (p. 652)
- Master of Arts in Education and Human Development in the field of organizational leadership and learning (p. 652)
- Master of Arts in Education and Human Development in the field of rehabilitation counseling (p. 640)
- Master of Arts in Education and Human Development in the field of rehabilitation counseling with licensure eligibility (p. 653)
- Master of Arts in Education and Human Development in the field of school counseling (p. 653)
- Master of Arts in Education and Human Development in the field of secondary special education (p. 654)
- Master of Arts in Education and Human Development in the field of special education for children with emotional and behavioral disabilities (p. 654)
- Master of Arts in Education and Human Development in the field of special education for culturally and linguistically diverse learners (p. 655)

Combined programs

- Dual Bachelor of Arts with a major in English and a Master of Education in the field of secondary education with a concentration in English (p. 656)

- Dual Bachelor of Arts with a major in history and a Master of Education in the field of secondary education with a concentration in social studies (p. 656)
- Dual Bachelor of Arts with a major in Spanish and Latin American languages, literatures, and cultures, and Master of Education in secondary education with a concentration in foreign language education (p. 657)
- Dual Master of Arts in Education and Human Development in the field of curriculum and instruction with a concentration in elementary education and Graduate Certificate in incorporating international perspectives in education (IIPE) (p. 657)
- Dual Master of Arts in Education and Human Development in the field of curriculum and instruction with a concentration in secondary education and Graduate Certificate in incorporating international perspectives in education (IIPE) (p. 657)
- Dual Master of Arts in Education and Human Development in the field of curriculum and instruction with a concentration in elementary education and Graduate Certificate in TESOL (p. 657)
- Dual Master of Arts in Education and Human Development in the field of curriculum and instruction with a concentration in secondary education and Graduate Certificate in TESOL (p. 658)
- Dual Master of Arts in Education and Human Development in the field of International Education and Graduate Certificate in assessment, testing, and measurement (ATM) (p. 658)
- Dual Master of Arts in Education and Human Development in the field of international education and Graduate Certificate in incorporating international perspectives in education (IIPE) (p. 658)
- Dual Master of Arts in Education and Human Development in the field of international education and Graduate Certificate in TESOL (p. 658)
- Dual Master of Business Administration and Master of Arts in Education and Human Development in the field of higher education administration (p. 585)
- Joint Master of Arts in Education and Human Development in the field of education policy studies and Juris Doctor (p. 659)
- Joint Master of Arts in Education and Human Development in the field of higher education administration and Juris Doctor (p. 659)

EDUCATION SPECIALIST

Education Specialist Programs

The Graduate School of Education and Human Development (<https://gsehd.gwu.edu/>) program of advanced study leading to the degree of education specialist (EdS) is for students with a master's degree who seek further professional preparation. The program is primarily available in the field of educational leadership and administration, but is also available in the fields

of counseling, curriculum and instruction, higher education administration, human and organizational learning, and special education on an individualized basis.

Education Specialist Programs

- Education Specialist in the field of educational leadership and administration (p. 659)
- Education Specialist in the field of special education (p. 660)

Admission Requirements

The following are required for entrance to the education specialist program in educational leadership and administration: an undergraduate degree and a master's degree from a regionally accredited institution, and one year of teaching experience. Two letters of recommendation, one from a professional supervisor and one from the most recent graduate faculty advisor, are required, along with a statement of professional goals. Each applicant must be interviewed and recommended by a faculty advisor.

Programs of Study and Degree Requirements

A minimum of 30 credits beyond the requirements for a master's degree is required. At least 21 credits of this work must be taken in residence at GSEHD. A maximum of five calendar years is allowed for completion of the program. More detailed information can be found in the GSEHD Master's, Education Specialist, and Certificate Student Handbook (https://gsehd.gwu.edu/sites/default/files/documents/ma_ed_s_student_handbook_20-21.pdf).

Comprehensive Examination

A comprehensive examination may be required, depending on field of study.

(<http://bulletin.gwu.edu/education-human-development/education-specialist/educational-leadership-administration/>)

DOCTORAL

Doctoral Degree Programs

Doctoral Programs

- Doctor of Education in the field of curriculum and instruction (p. 660)
- Doctor of Education in the field of educational leadership and administration (p. 661)
- Doctor of Education in the field of higher education administration (p. 662)
- Doctor of Education in the field of human and organizational learning (p. 663)
- Doctor of Education in the field of special education (p. 665)
- Doctor of Philosophy in the field of counseling (p. 667)
- Doctor of Philosophy in the field of education (p. 666)

Plan of Study

All doctoral students must complete at least 36 credits of coursework and at least 12 credits of dissertation research at GSEHD while enrolled in their doctoral program. Individual doctoral programs usually have additional requirements.

For doctoral students, all degree requirements must be completed within eight (8) years from the time of admission to the doctoral program. Any leaves of absence do not count against this time limit. More detailed information can be found in the GSEHD Doctoral Student Handbook (https://gsehd.gwu.edu/sites/default/files/documents/2020-2021_doctoral_handbook.pdf).

Required graduate courses, with few exceptions, are offered in the late afternoon and evening. In some programs, courses are offered at off-campus locations and on weekends.

Doctor of Philosophy Degree

The Doctor of Philosophy (PhD) in the field of counseling is accredited by the Council for Accreditation of Counseling and Related Educational Programs.

The Doctor of Philosophy (PhD) in the field of education degree program is designed to create opportunities for cross-disciplinary research by concentrating on critical national and global problems in which education and human development play a significant role. To adequately address issues, scholars require both a strong foundation in education as well as theoretical and disciplinary grounding in multiple disciplines. The PhD program is distinguished by four characteristics: candidates apply to a cross-disciplinary research team that is focused on a critical problem related to education and human development; approaches to the research problems require a cross-disciplinary lens; students engage in individual and collaborative research throughout their program; and candidates aspire to careers in which the production of research is paramount.

Admission Requirements, PhD

A master's degree from a regionally accredited institution is required. Materials to be submitted include: official transcripts, GRE scores, TOEFL scores (for international applicants), three letters of recommendation, and a statement of purpose. Each program has more specific details about these materials and additional requirements. Selection is competitive and is based on the applicant's past achievements, perceived potential, and fit to the goals and mission of the program.

Doctor of Education Degree

The Graduate School of Education and Human Development offers programs of advanced study leading to the degree of Doctor of Education (EdD). These programs provide major fields of study in curriculum and instruction, educational leadership and administration, higher education administration, human and organizational learning, and special education. With the approval of a student's advisor, coursework

may be taken in or from other departments of the University and through the Consortium.

Admission Requirements, EdD

A master's degree from a regionally accredited institution is required. Materials to be submitted include: official transcripts; GRE, GMAT, or Miller Analogy Test scores (options vary by program); TOEFL scores (for international applicants); two letters of recommendation; and a statement of purpose. Each program has more specific details about these materials and additional requirements. Selection is competitive and is based on the applicant's past achievements, perceived potential, and fit to the goals and mission of the program.

Pre-Candidacy and Candidacy

The Doctor of Philosophy and Doctor of Education programs are divided into two stages: pre-candidacy and candidacy. In general, the degree program requires two or more years of full-time study beyond the master's degree or the equivalent in part-time study. Coursework and the comprehensive examination must be completed within five years, and the entire program must be completed within eight years. The minimum residency requirement in degree status for the doctorate is 36 credits of coursework in the pre-candidacy stage and 12 to 24 credits of dissertation research in the candidacy stage. In most cases, coursework beyond the minimum is required.

In the pre-candidacy stage, all coursework in the program must be completed and the comprehensive examination passed. Coursework toward the doctorate is established on the basis of a framework of seven domains: knowledge of foundations; critical literature review; research methods; clarity of thought, as expressed both in speech and in writing; professional development; technological skills; and depth of knowledge of the specialty area.

The comprehensive examination is taken upon completion of all pre-candidacy coursework. Students taking the examination must be registered for at least 1 credit in the semester it is to be taken, and must file an online application in the Office of Student Life of the Graduate School of Education and Human Development by the published deadline.

The candidacy stage of doctoral study begins after successful completion of the content coursework *and* the comprehensive examination. A doctoral research dissertation committee is established and the candidate develops a dissertation proposal (this may be while registered in Pre-Dissertation Seminar). Upon successful completion of coursework listed on the approved program plan of study, students must register for dissertation research at the rate of 3 or 6 credits each fall and spring semester. A minimum of 12 dissertation research credits are required for graduation. Students who have not defended their dissertation after 12 credits continue to register at the rate of 3 or 6 credits until they have reached 24 credits of dissertation research. Once they have reached their 24 credit maximum, they must register each subsequent fall and spring

semester for 1 credit of Continuing Research until completion of their degree program with the successful defense of the dissertation to the Dissertation Oral Examination Committee. The accepted dissertation is submitted electronically, with a processing fee paid directly to ProQuest.

Detailed information on the doctoral programs and their administration is available in the GSEHD Doctoral Student Handbook (https://gsehd.gwu.edu/sites/default/files/documents/2020-2021_doctoral_handbook.pdf). Students completing their degree program should refer to the section on Graduation Requirements, Participating in the Commencement Ceremony (<http://bulletin.gwu.edu/university-regulations/#Gradcommencement>), under University Regulations.

Doctoral Dissertation

All doctoral students must complete a doctoral dissertation.

This includes the successful completion of an oral defense of the proposal and then of the completed dissertation. Additional information is available in the GSEHD Doctoral Student Handbook.

Doctoral Programs

- Doctor of Education in the field of curriculum and instruction (p. 660)
- Doctor of Education in the field of educational leadership and administration (p. 661)
- Doctor of Education in the field of higher education administration (p. 662)
- Doctor of Education in the field of human and organizational learning (p. 663)
- Doctor of Education in the field of special education (p. 665)
- Doctor of Philosophy in the field of counseling (p. 667)
- Doctor of Philosophy in the field of education (p. 666)

CERTIFICATES

Certificate Programs

The Graduate School of Education and Human Development offers the following graduate certificate programs. Graduate certificates do not constitute eligibility for an initial license or assure admission to a subsequent degree program. Courses taken as part of a certificate program may be applied toward advanced credentials or endorsements added to an initial license.

Graduate Certificates

- Assessment, testing, and measurement in education (p. 668)
- Autism spectrum disorders (p. 669)
- Brain injury: educational and transition services (p. 669)
- Counseling and life transitions (p. 670)
- Design and assessment of adult learning (p. 670)

- Educational technology leadership (p. 671)
- Global leadership in teams and organizations (p. 671)
- Incorporating international perspectives in education (p. 672)
- Instructional design (p. 672)
- Israel education (p. 673)
- Job development and placement (p. 673)
- Leadership development (p. 674)
- Literacy education (p. 674)
- Organizational learning and change (p. 674)
- Special education for culturally and linguistically diverse learners (p. 675)
- STEM master teacher (p. 675)
- Teaching English to speakers of other languages (p. 676)
- Teaching strategies and classroom management for Jewish studies educators (p. 676)
- Transition special education (p. 677)

Post-Master's Certificates

- Advanced practice of education policy (p. 677)
- Counseling (p. 677)
- Educational leadership and administration (p. 678)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Counseling (CNSL) (p. 1522)
- Curriculum and Pedagogy (CPED) (p. 1526)
- Education (EDUC) (p. 1545)
- Human Development (HDEV) (p. 1645)
- Human and Organizational Learning (HOL) (p. 1647)
- School of Education and Human Development (SEHD) (p. 1812)
- Special Education (SPED) (p. 1830)

COUNSELING AND HUMAN DEVELOPMENT

GRADUATE

Graduate certificates

- Graduate certificate in counseling and life transitions (p. 670)
- Graduate certificate in job development and placement (p. 673)
- Post-master's certificate in counseling (p. 677)

Master's programs

- Master of Arts in Education and Human Development in the field of clinical mental health counseling (p. 638)
- Master of Arts in Education and Human Development in the field of rehabilitation counseling (p. 640)
- Master of Arts in Education and Human Development in the field of rehabilitation counseling with licensure eligibility
- Master of Arts in Education and Human Development in the field of school counseling (p. 653)
- Master of Arts in Education and Human Development individualized program (p. 637)

Doctoral program

- Doctor of Philosophy in the field of counseling (p. 667)

FACULTY

Professors J. Garcia, K. Hergenrather, S. Marotta-Walters
(Chair)

Associate Professors S. Beveridge, R. Dedmond, R. Froelich,
R. Lanthier, M. McGuire-Kuletz, M. Megivern

Assistant Professors M. Attia, B. Das, M. DeRaedt, M. Parker,
H. Peters, D. Pittman

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Programs in counseling are offered at the graduate level by the Graduate School of Education and Human Development (<http://gsehd.gwu.edu>) through its Department of Counseling

and Human Development (<http://gsehd.gwu.edu/content/departments-counseling-and-human-development/>).

CNSL 0920. Continuing Research - Master's. 1 Credit.

CNSL 0940. Continuing Research - Doctoral. 1 Credit.

CNSL 2102. Foundations of Counseling. 3 Credits.

CNSL 2162. Professional and Ethical Orientation to Counseling. 3 Credits.

The roles and functions of a professional counselor and the ethical standards that govern the profession.

CNSL 2163. Psychosocial Adjustment. 3 Credits.

Mental health problems; emphasis on needs of counselors, teachers, and others working with children and adolescents.

CNSL 2376. Introduction to Rehabilitation Counseling. 3 Credits.

Overview of rehabilitation profession, including philosophy, history, ethics, theory, legislation, settings, and practice.

CNSL 2378. Disability Management and Psychosocial Rehabilitation. 3 Credits.

Case management services for persons with physical, mental, and emotional disabilities.

CNSL 2381. Medical and Psychosocial Aspects of Disabilities. 3 Credits.

Chronic and traumatic disorders; rehabilitation and psychosocial implications.

CNSL 5099. Variable Topics. 1-99 Credits.

CNSL 6100. Special Workshop. 1-12 Credits.

Topics to be announced in the Schedule of Classes. May be repeated for credit. Credit cannot be earned for this course and CPED 6100, CPED 6199, SPED 6100, SPED 6299.

CNSL 6101. Research and Independent Study. 1-3 Credits.

Individual research under guidance of a staff member. Program and conferences arranged with an instructor.

CNSL 6103. Thesis Research. 3 Credits.

CNSL 6104. Thesis Research. 3 Credits.

CNSL 6114. Introduction to Research and Evaluation in Counselor Education. 3 Credits.

Conceptual understanding of research design and analysis of quantitative, qualitative, and mixed methods designs for the consumer and future producer of research. Restricted to students in master's and doctoral counseling programs.

CNSL 6130. Vocational Assessment of Individuals with Disabilities. 3 Credits.

Investigation of vocational appraisal processes and techniques for individuals with disabilities. Includes assessment for transition using field-based assignments. Three credits of practicum experience for students specializing in vocational evaluation. Material fee. Same as SPED 6230.

CNSL 6151. Professional and Ethical Orientation to Counseling. 3 Credits.

The roles and functions of a professional counselor and the ethical standards that govern the profession.

CNSL 6153. Counseling Interview Skills. 3 Credits.

Acquisition of counseling skills common to all theories through lectures, demonstrations by faculty, role playing, and videotaping. Permission of the instructor required for non-counseling majors. CNSL 6151 may be taken as a corequisite. Material fee. Prerequisites: CNSL 6151 for counseling majors.

CNSL 6154. Theories and Techniques of Counseling. 3 Credits.

An introduction to basic counseling and psychotherapeutic theories and associated techniques. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others.

CNSL 6155. Career Counseling. 3 Credits.

A consideration of theory, practice, and the body of information related to career counseling, choice, and development over the life span. Prerequisite: CNSL 6153, EDUC 6114 for counseling majors; permission of instructor is required for others. Material fee.

CNSL 6157. Individual Assessment in Counseling. 3 Credits.

Detailed study of individual analysis and appraisal techniques. Development of systematic case study. Prerequisite: CNSL 6153, EDUC 6114 for counseling majors; permission of instructor is required for others. Material fee.

CNSL 6159. Psychosocial Adaptation. 3 Credits.

Mental health problems; emphasis on needs of counselors, teachers, and others working with children, adolescents, and adults.

CNSL 6161. Group Counseling. 3 Credits.

Principles of group dynamics as related to interaction within groups. Techniques and practice in group counseling. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others.

CNSL 6163. Social and Cultural Dimensions - CNS. 3 Credits.

Basic sociocultural concepts in counseling theory and how they apply to the practice of the counseling profession. CNSL 6153 may be taken as a corequisite. Permission of the instructor required for non-counseling majors. Prerequisites: CNSL 6153 for counseling majors.

CNSL 6164. Values, Spiritual, and Religious Issues in Counseling. 3 Credits.

The theoretical and practical intersection of counseling, psychotherapy, and mental health considerations with religion and spirituality. The clinically effective and ethically responsible integration of religion and spirituality into counseling. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others.

CNSL 6169. Counseling Substance Abusers. 3 Credits.

Individual, group, family, and self-help counseling applied to substance abusers. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.

CNSL 6170. Grief and Loss. 3 Credits.

Exploration and discussion of grief and loss from theoretical, practical, cross-cultural, and personal perspectives; implications for counselors within a multidisciplinary environment.

CNSL 6171. Family Counseling. 3 Credits.

The family as a system: how it affects the client and how the client affects it. Didactic presentations, role playing, and work with simulated families. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.

CNSL 6172. Human Sexuality for Counselors. 3 Credits.

Issues of sexuality as related to counseling in contemporary society. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.

CNSL 6173. Diagnosis and Treatment Planning. 3 Credits.

For counselors and mental health practitioners. Symptoms and treatment of various mental disorders. The process of making psychiatric diagnoses. A variety of treatment strategies are covered, along with their application to various disorders. Prerequisite: CNSL 6153.

CNSL 6174. Trauma and Crisis Intervention. 3 Credits.

This course provides the counseling student with an introduction to research, theory, and practices within the field of traumatology. The course covers the historical evolution of the field; biopsychosocial underpinnings of trauma and trauma spectrum disorders; issues in diagnosis, assessment, and intervention from a culturally diverse framework; and a synthesis of best practices as they are currently evolving. Using a developmental and systemic approach, the course provides a counseling perspective on the knowledge base from the multiple disciplines that contribute to the field of traumatology.

CNSL 6175. Living and Dying: A Counseling Perspective. 3 Credits.

Survey of fundamental psychosocial issues surrounding grief, loss, and life-threatening illness. Topics include AIDS, suicide, multiple loss, caregiver's grief, spirituality, and cross-cultural issues.

CNSL 6177. Spirituality and Loss. 3 Credits.

Exploration of how spiritual beliefs, faith traditions, and life philosophy affect the process of dying, bereavement, and grieving. Effective counseling approaches.

CNSL 6179. Children and Loss. 3 Credits.

The process of grief, loss, and death as experienced by children and adolescents from theoretical, moral, spiritual, and developmental perspectives. Development of effective and sensitive skills and competencies to meet the needs of children and their families as they face life-challenging transitions.

CNSL 6185. Internship in Counseling. 3 Credits.

First part of a two-semester clinical experience for degree and certificate candidates in counseling. Includes 100 hours of supervised practicum in a counseling setting.

CNSL 6186. Advanced Internship in Counseling. 3 Credits.

Second part of a two-semester clinical experience for degree and certificate candidates in counseling. Includes 600 hours of supervised counseling experience in a counseling setting. Prerequisite: CNSL 6185.

CNSL 6188. Systems in Career Counseling Development. 3 Credits.

The complex role of systems in career counseling and development. Class and work experience in the areas of career assessment, computerized career planning, and the design and evaluation of career counseling systems.

CNSL 6189. Career Development and the Contemporary Workforce. 3 Credits.

Through case studies, simulations, and group work, the demographics and challenges of the workforce in the United States are examined. The knowledge, skills, and competencies necessary to respond to current trends and projected changes in the global workforce.

CNSL 6190. Advanced Career Counseling. 3 Credits.

Expansion of career development theory, concepts, and practice: the helping relationship, delivery systems, current market and economic information, and available resources. Prerequisite: CNSL 6155 (for counseling majors); permission of instructor is required for others. Material fee.

CNSL 6268. Foundations of Clinical Mental Health Counseling. 3 Credits.

Description of community counseling settings, problems clients present, and a consideration of appropriate intervention strategies.

CNSL 6269. Practicum I in Counseling. 3 Credits.

First in a two-semester clinical experience. Working with clients in the practicum clinic, agency, or school setting under intensive supervision from faculty, developing the therapeutic relationship and basic counseling competencies. Six to eight hours of work per week are required for a minimum of 100 hours total over two practica. Prerequisites: CNSL 6151, CNSL 6153, CNSL 6154, CNSL 6157, CNSL 6163, CNSL 6173, CNSL 6174, CNSL 6268, EDUC 6115 and HDEV 6108.

CNSL 6270. Practicum II in Counseling. 3 Credits.

Second in a two-semester clinical experience. Working with clients in the practicum clinic, agency, or school setting under intensive supervision, developing therapeutic relationship and basic counseling competencies. Six to eight hours of work per week are required for a minimum of 100 hours total over two practica. Prerequisite: CNSL 6269.

CNSL 6271. Advanced Clinical Skills. 3 Credits.

The practice of empirically supported counseling practice; essential interviewing and case conceptualization skills; developmentally relevant assessment, diagnosis, and treatment; and multicultural and social justice counseling. Restricted to students in master's and doctoral counseling programs. Prerequisites: CNSL 6269.

CNSL 6376. Foundations of Rehabilitation Counseling. 3 Credits.

Introduction to the field of rehabilitation counseling. History, development, and current practices. Key concepts, including vocational rehabilitation, roles and functions of the rehabilitation counselor, and independent living rehabilitation.

CNSL 6378. Disability Management and Psychosocial Rehabilitation. 3 Credits.

Disability management services; psychosocial aspects of disability; rehabilitation services for persons with psychiatric disabilities.

CNSL 6380. Job Placement and Supported Employment. 3 Credits.

Job development and modification: placement of persons with disabilities.

CNSL 6381. Medical and Psychosocial Aspects of Disabilities. 3 Credits.

Chronic and traumatic disorders with rehabilitation and psychosocial implications.

CNSL 6395. Foundations of Forensic Rehabilitation Counseling I. 3 Credits.

Overview of the roles and functions of professionals who provide forensic rehabilitation services in matters of litigation. Vocational assessments, labor market issues, transferable skills analysis, job analyses. Instruments utilized in forensic rehabilitation.

CNSL 6396. Foundations of Forensic Rehabilitation Counseling II. 3 Credits.

Workers' compensation, personal injury, medical/professional malpractice, catastrophic injury, loss of earnings capacity, and life care planning. Ethical standards, practices, federal court rules, and common situations found in the litigation process.

CNSL 6397. Law and the Rehabilitation Consultant. 3 Credits.

Overview of law and court procedures for forensic rehabilitation professionals. Qualification of forensic experts, roles and functions of expert witnesses, discovery, work product, hearsay, direct and cross-examination, admissibility of evidence, and opinions in state and federal venues.

CNSL 6398. Psychopharmacology. 3 Credits.**CNSL 6466. Foundations of School Counseling K-12. 3 Credits.**

Study of the environmental and specialty elements for school counseling, with special attention to the principles and practices of school counseling.

CNSL 6467. Coordination of Comprehensive School Counseling Services. 3 Credits.

Theory and practice of classroom management for school counselors; creation and implementation of guidance programming, school system support; designation, coordination of services, systemic and student support for special education students Restricted to students in the school counseling program. Prerequisites: CNSL 6466 and CNSL 6269.

CNSL 8100. Special Workshop. 1-12 Credits.

Topics to be announced in the Schedule of Classes. May be repeated for credit.

CNSL 8101. Research and Independent Study. 1-3 Credits.

Guided individual research. Program and conferences arranged with an instructor.

CNSL 8244. Advanced Group Counseling. 3-6 Credits.

A post-master's course on interpersonal process groups, with didactic, experiential, and supervisory components. Prerequisites: CNSL 6161 and permission of the instructor.

CNSL 8251. Advanced Psychopathology and Pharmacology. 3 Credits.

In-depth study of psychopathology and standard pharmacological intervention to psychological dysfunction associated with distress or impaired functioning; the range of child, adolescent, and adult presentations of psychological disorders seen in clinical practice.

CNSL 8252. Leadership and Advocacy in Counseling. 3 Credits.

Exploration of leadership styles as they apply to counseling professionals. Ethical and multicultural issues associated with leadership and advocacy will be presented, consultation models will be introduced.

CNSL 8253. Work, Identity, and Adult Development. 3 Credits.

The influence of work on identity, intellectual and personality development, and other developmental attributes. Same as HDEV 8253/HOL 8742.

CNSL 8254. Advanced Multicultural Counseling. 3 Credits.

Recent research addressing key aspects of multicultural counseling. Practical knowledge about effective skills practice in the provision of services to clients from different cultural backgrounds, with emphasis on experiential and cognitive/behavioral approaches. Permission of the instructor required prior to enrollment. Prerequisite: CNSL 6163. Recommended background: PhD degree student in the field of counseling; completed a master's degree in counseling.

CNSL 8255. Supervision in Counseling. 3 Credits.

Theory and practice of clinical supervision and consultation for preparation to enter supervisory positions in the field of counselor education. Current thinking regarding supervisory theory/models, practice, research, and ethics. Permission of the instructor required prior to enrollment. Restricted to students in the PhD in counseling program.

CNSL 8256. Doctoral Practicum in Counseling. 3 Credits.

Supervised clinical experiences in applied settings. Students receive University-based supervision related to their cases through group supervision and case presentations.

CNSL 8257. Doctoral Internship in Teaching. 3 Credits.

Minimum 300 clock hours of supervised didactic and experiential learning activities relevant to instructional roles and responsibilities in counselor education.

CNSL 8258. Advanced Theories of Counseling. 3 Credits.

Current research on counseling and psychotherapy process and outcome; critical analysis of theory with applications for practice and research. For EdS and PhD degree candidates in the field of counseling. Permission of the instructor required prior to enrollment.

CNSL 8259. Doctoral Internship in Supervision I. 3 Credits.

Doctoral internship.

CNSL 8260. Doctoral Internship in Supervision II. 3 Credits.

Doctoral internship. Prerequisite: CNSL 8259.

CNSL 8961. Doctoral Internship in Research. 3 Credits.

Critical approach to reading research; practical experience in applied research design; integration of theoretical, research, and applied elements of the profession of counseling.

CNSL 8998. Predissertation Seminar. 3 Credits.

Required of all doctor of philosophy in the field of counseling degree candidates.

CNSL 8999. Dissertation Research. 3,6 Credits.

. Prerequisites: CNSL 8998 or EDUC 8998.

HDEV 5099. Variable Topics. 1-99 Credits.

HDEV 6108. Life Span Human Development. 3 Credits.

Continuity and change in developmental attributes. The developing person in relation to social norms, roles, and stage-graded expectations from birth to death. Interaction between biogenetics and environment.

HDEV 6109. Child Development. 3 Credits.

Typical development and the familial and social antecedents of developmental risk. Environments that foster competent children and developmental sequelae of childhood vulnerability and trauma. For graduate students in counseling, psychology, and related disciplines.

HDEV 6110. Adolescent Development. 3 Credits.

Key attributes and problems in adolescent development. Typical adolescent development and contemporary social problems in relation to stress, risk, and resilience. For graduate students in counseling, psychology, and related areas.

HDEV 6129. Cultural Effects on Human Development. 3 Credits.

Effects of culture on the experience and expression of self, others, space, time, faith systems, norms, and other attributes. Egocentric and sociocentric effects, primitive and technological effects. Group immersion as the basis for prejudice. Developmental consequences as a consequence of cultural context.

HDEV 6161. Practicum in Human Development. 3 Credits.

Permission of the instructor required prior to enrollment.

HDEV 6162. Internship in Human Development. 3 Credits.

Permission of the instructor required prior to enrollment.

HDEV 6701. Adult Learning. 3 Credits.

Same as HOL 6701.

HDEV 8100. Issues and Special Topics in Human Development. 3-6 Credits.

Issues and special contemporary topics related to child, adolescent, and adult development. Applications for professional roles.

HDEV 8241. Emotional and Cognitive Development. 3 Credits.

Emotional and cognitive development as related to self-esteem, social cognition, and interpersonal skills. Relationships among cognitive development, intellectual reasoning, insight, and social development.

HDEV 8244. Adult and Aging Development. 3 Credits.

Theories and research on personality and intelligence in adulthood. Research designs and methods. Implications of developmental data for counseling and selected professional roles.

HDEV 8253. Work, Identity, and Adult Development. 3 Credits.

The influence of work on identity, intellectual and personality development, and other developmental attributes. Same as CNSL 8253/ HOL 8742.

CURRICULUM AND PEDAGOGY

GRADUATE

Minor program

STEM Teaching Minor ((p. 66) Undergraduate GWTeach Program) (p. 66)

Graduate certificates

- Graduate Certificate in literacy education (p. 674)
- Graduate Certificate in STEM master teacher (p. 675)
- Graduate Certificate in teaching English to speakers of other languages (p. 676)
- Graduate Certificate in teaching strategies and classroom management for Jewish studies educators (p. 676)

Master's programs

- Master of Arts in Education and Human Development in the field of curriculum and instruction (p. 640)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in elementary education (p. 640)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration

in interdisciplinary studies of literacy and reading education (p. 641)

- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in Jewish education (p. 642)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in secondary education (p. 642)
- Master of Arts in Education and Human Development individualized program (p. 637)
- Master of Arts in Education and Human Development in the field of language education, teaching world languages K-12 licensure concentration (p. 650)
- Master of Arts in Education and Human Development in the field of language education, teaching world languages non-licensure concentration (p. 651)
- Master of Arts in Education and Human Development in the field of language education, TESOL K-12 licensure concentration (p. 651)
- Master of Arts in Education and Human Development in the field of language education, TESOL non-licensure concentration (p. 652)
- Master of Education in the field of elementary education (p. 635)
- Master of Education in the field of secondary education (p. 636)

Combined programs

- Dual bachelor of arts with a major in English and a master of education in the field of secondary education with a concentration in English (p. 656)
- Dual Bachelor of Arts with a major in history and a Master of Education in the field of secondary education with a concentration in social studies (p. 656)
- Dual Bachelor of Arts with a Major in Spanish and Latin American languages, literatures, and cultures, and Master of Education in Secondary Education with a concentration in foreign language education (p. 657)
- Dual Master of Arts in Education and Human Development in the field of Curriculum and Instruction with a concentration in Elementary Education and Graduate Certificate in Incorporating International Perspectives in Education (IIPE) (p. 657)
- Dual Master of Arts in Education and Human Development in the field of Curriculum and Instruction with a concentration in Elementary Education and Graduate Certificate in TESOL (p. 657)
- Dual Master of Arts in Education and Human Development in the field of curriculum and instruction with a concentration in secondary education and Graduate Certificate in Incorporating International Perspectives in Education (IIPE) (p. 658)
- Dual Master of Arts in Education and Human Development in the field of Curriculum and Instruction with a

concentration in Secondary Education and Graduate Certificate in TESOL (p. 658)

- Dual Master of Arts in Education and Human Development in the field of International Education and Graduate Certificate in TESOL (p. 658)

Doctoral program

- Doctor of Education in the field of curriculum and instruction (p. 660)

FACULTY

Associate Professors S. Beck, E. Brown, B. Casemore, J. Eakle (Chair), C. Green, C. Pyke, P. Tate

Assistant Professors J. Grooms, T. Sikorski

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CPED 0920. Continuing Research - Masters. 1 Credit.

CPED 0940. Continuing Research - Doctoral. 1 Credit.

CPED 5099. Variable Topics. 1-99 Credits.

CPED 6100. Special Topics. 1-12 Credits.

Topics and fees announced in the Schedule of Classes. Credit cannot be earned for this course and CNSL 6100, SPED 6100.

CPED 6100W. Special Topics. 1-12 Credits.

Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CPED 6101. Research and Independent Study. 1-3 Credits.

Individual research under the guidance of a staff member; program and conferences arranged with an instructor.

CPED 6131. Teaching Jewish History to Middle and High School Students. 3 Credits.

Concepts for educators surrounding the ways in which Jewish historians interpret primary sources and analyze historiographic debates.

CPED 6132. Strategies for Teaching Biblical Texts. 3 Credits.

Analysis of major biblical narratives using study methods ranging from the historical to the literary; key aspects of biblical interpretation and strategies for teaching Bible effectively.

CPED 6133. Rabbinic Judaism and the Teaching of Rabbinic Texts. 3 Credits.

The development of rabbinic Judaism through a study of its thought and literature using primary texts from 100 to 500 C.E.; best practices for teaching rabbinic texts using different pedagogical approaches; distinctions between a historically-based academic approach and a more imaginative, theological approach.

CPED 6134. Practicum in Jewish Education. 2 Credits.

Field-based experiences and weekly seminar for students seeking to teach in classrooms dedicated to Jewish education; honing disciplinary expertise in the curriculum; lesson planning, instructional strategies, classroom management and intervention, and new methods and tools.

CPED 6172. Strategies for Inclusion: Addressing the Needs of Diverse Learners. 3 Credits.

Strategies by which teachers can more effectively assume the responsibility to serve all children in an inclusionary setting, including those who are second language learners and students with disabilities. Same as SPED 6272.

CPED 6175. The Culturally and Linguistically Diverse Student with Special Needs: Policy, Research, and Trends. 3 Credits.

Educational service delivery for the culturally and linguistically diverse student. National, state, and local policies; current research in bilingual education, special education, and bilingual special education. Material fee. Same as SPED 6275.

CPED 6176. Academic and Psychosocial Assessment of the Culturally and Linguistically Diverse Student. 3 Credits.

Issues in academic and psychosocial assessment of second language learners. The impact of second language acquisition and culture on the assessment process; differentiation between language difference and disability; IEP development; the use of interpreters and translators; the involvement of family and communities; standardized and alternative assessments; and legislative mandates. Material fee. Same as SPED 6276.

CPED 6199. Federal Education Policy Institute. 3 Credits.

The federal role in education policymaking in the context of national, state, and local efforts to create school environments for effective learning and the promotion of social and emotional health in children and youth. Same as SPED 6299.

CPED 6221. Developmental Reading: Emergent Literacy. 3 Credits.

The components of a balanced literacy program for emergent, beginning, and early-instructional-level readers. Incorporation of phonological awareness, phonics, fluency, reading comprehension, and writing lessons into a balanced reading-literacy program.

CPED 6223. Interdisciplinary Elementary School Literacies. 3 Credits.

Theory and practice of interdisciplinary elementary school studied in the context of the interactions between the domain-specific and strategic processes involved in teaching and learning from printed text and other media in science, literature, mathematics, social studies, and the arts.

CPED 6224. Diagnostic Teaching of Reading: K-6. 3 Credits.

Collection of diagnostic data; construction of informal traditional and non-traditional reading and writing tests; other instruments of evaluation; selecting and planning activities suitable to specific problems. Prerequisite: at least one previous course in reading.

CPED 6225. Introduction to International Curricula. 3 Credits.

CPED 6229. Current Issues in Elementary Education. 3 Credits.

Identification, definition, and analysis of some of the most important problems facing the contemporary American elementary school.

CPED 6236. Analysis of Teaching. 3 Credits.

Teaching viewed as a system; component aspects are examined with a view toward developing a critical method of analysis. Material fee.

CPED 6239. Practicum in Curriculum and Instruction. 3-6 Credits.

Supervised field experience in curriculum and instruction. Permission of the instructor required prior to enrollment.

CPED 6289. New Literacies Coach and Reading Specialist. 3 Credits.

Contemporary issues and conditions influencing literacy/reading leadership roles and the expanded roles of the new literacy reading coach and reading specialist. Topics include designing and evaluating interdisciplinary literacy education environments. Students work with educators on instructional and professional development activities to meet the literacy education needs of children. Prerequisites: CPED 6224 and permission of the department.

CPED 6292. Practicum 2: Leadership in Interdisciplinary Literacies. 3-6 Credits.

Drawing on prior program experiences in leadership and interdisciplinary literacies, students develop and refine effective interdisciplinary literacy education leadership qualities and skills, facilitate change in school communities, and foster teacher growth and student achievement. Students demonstrate lessons and provide assistance with lesson planning to teachers in, across, and between subject area disciplines and conduct professional development workshops in school settings. Prerequisite: CPED 6289.

CPED 6305. Foundations of Curriculum Theory. 3 Credits.

Examination of the educational ideas of individuals and groups that have influenced American and international curriculum development and practice during the 20th and 21st centuries. Comparisons of the issues, models, and principles that have guided curricular thought, development, and innovation.

CPED 6339. Teachers as Researchers. 3 Credits.

Qualitative and quantitative methods of research in teaching and learning with a focus on practitioner-based research. Prepares teachers to develop an inquiry stance towards their practice and provides them with the knowledge, experiences, and skills to systematically examine their own practice and student learning.

CPED 6340. Teacher Leadership in Education. 3 Credits.

From the perspectives of educational theory and practice, the ideals and realities of contemporary public school teaching are viewed within a system of local, state, and federal organizations, with the goal of enhancing the role of teachers as knowledgeable and effective leaders in their profession. Material fee.

CPED 6353. Post-Master's Internship in Curriculum and Instruction. 3-6 Credits.

Supervised professional internship in curriculum, instruction, teaching, research, or policymaking. Internships are individually arranged. (Same as SPED 8353).

CPED 6365. Perspectives and Research in Teaching Computer Science. 3 Credits.

CPED 6366. Perspectives and Research in Teaching English. 3 Credits.

The teaching of English in the context of the social and historical foundations of education and through conceptual frameworks from contemporary curriculum theory.

CPED 6367. Perspectives and Research in Teaching Science. 3 Credits.

Significant trends, findings, and perspectives in science education in the United States from the early nineteenth century to the present.

CPED 6368. Perspectives and Research in Teaching Social Studies. 3 Credits.

Deepens students' understanding of the social studies curriculum through analysis of current research, theory, and practice, and application of this knowledge to instructional planning.

CPED 6370. Perspectives and Research in Teaching Mathematics. 3 Credits.

Survey of the history of mathematics, mathematics education research, instructional design, and the teaching of science, technology, engineering, and mathematics (STEM) curriculum standards. The impact of history in the field and research on teaching.

CPED 6410. Reading Children's Literature across the Curriculum. 2,3 Credits.

Participants read and analyze multicultural children's literature (from folktale to nonfiction) while simultaneously practicing discussion, dramatization, art, and writing response strategies suitable for involving all students and integrating literature across the school curriculum.

CPED 6412. Elementary School Curriculum and Methods. 2 Credits.

A comprehensive block course with sections in mathematics, science, language arts, and social studies. Integrated with CPED 6635. Pre-service teachers taking the four sections learn to be successful teachers of elementary methods in all content areas, including how to incorporate content and pedagogy into practice at their internships. May be repeated for up to 8 credits; with permission, up to four blocks (to a total of 8 credits) may be taken in one semester. Permission of the advisor required prior to enrollment.

CPED 6507. Instructional Models and Classroom Management. 3 Credits.

The interconnections between effective instruction and positive classroom management. Through planning, implementing, and evaluating learning activities that apply research-based practices, students link instructional and management strategies to specific content and thinking goals. Microteaching lab. Material fee.

CPED 6530. Assessment in the Secondary Classroom. 3 Credits.

Key concepts and principles in the field of educational assessment, with emphasis on practical applications for classroom teachers. Students design and evaluate a range of assessment tools in their content areas.

CPED 6532. Professional Internship in Middle School Education. 3-6 Credits.

Supervised internship in middle schools; required seminar. Restricted to permission from instructor.

CPED 6534. Professional Internship in Secondary Education. 6 Credits.

Internship seminar providing various means of support related to the field placement and program portfolio, as well as a forum for engaging in academic conversation around the field experiences. Fee applies.

CPED 6544. Educational Technology and Computer Literacy Methods. 3 Credits.

Computers and related technologies in educational settings. Using national technology standards for teachers as a framework, the course combines discussion of key issues related to technology in education, demonstration of technology-related instructional methods, and hands-on computer use and materials development. Material fee.

CPED 6545. Teaching Computer Science in Secondary Schools. 3 Credits.

Theoretical, curricular, and practical considerations. Thirty hours of field experience in a secondary classroom is required. Material fee.

CPED 6546. Teaching English in Secondary Schools. 3 Credits.

Offers theoretical, curricular, and practical considerations for teaching the content area concerned. Requires a 30-hour field experience in a secondary classroom. Material fee. Prerequisites: CPED 6606 and CPED 6507 and the approved certification coursework in the content area.

CPED 6547. Teaching Science in Secondary Schools. 3 Credits.

Offers theoretical, curricular, and practical considerations for teaching the content area concerned. Requires a 30-hour field experience in a secondary classroom. Material fee. Prerequisites: CPED 6606 and CPED 6507 and the approved certification coursework in the content area.

CPED 6548. Teaching Social Studies in Secondary Schools. 3 Credits.

Theoretical, curricular, and practical considerations. 30-hour field experience in a secondary classroom is required. Material fee. Prerequisites: CPED 6507 and CPED 6606.

CPED 6549. Teaching Art in Secondary Schools. 3 Credits.

Theoretical, curricular, and practical considerations. Material fee.

CPED 6550. Teaching Mathematics in Secondary Schools. 3 Credits.

Introductory course in mathematics teaching that derives its goals from pedagogy standards for secondary mathematics developed in collaboration with the National Council of Teachers of Mathematics (NCTM). Focus on developing and understanding middle and high school curriculum standards. Material fee.

CPED 6551. Second Language Instructional Methods. 3 Credits.

Knowledge and skills related to the instruction and assessment of language students in English and foreign language settings; past second language teaching methods, contemporary instructional approaches and materials, and other considerations in developing academic and social language proficiency. Requires field experience in a classroom. Materials fee. Prerequisites: CPED 6507 and CPED 6606.

CPED 6554. Issues, Study, and Practices - ESL. 3 Credits.

A critical review of scholarship and research findings in English as a second language. Major policy issues and implications that relate to ESL practice.

CPED 6555. Educating Language Minorities. 3 Credits.

A study of federal, state, and local policies and issues affecting the education of linguistically diverse populations. Resources for use with specific linguistically diverse groups.

CPED 6556. Linguistic Applications in English as a Second Language. 3 Credits.

The science of language and how its different branches may be used for English as a Second Language (ESL) teacher training, classroom instruction, material development, evaluation, research, and policy development.

CPED 6557. Second Language Acquisition. 3 Credits.

The nature of first and second language acquisition and development; social, psychological, and linguistic factors affecting language acquisition; implications of language acquisition research and theory on English and foreign language classroom instruction.

CPED 6604. Perspectives in American Education. 3 Credits.

Historical and social development of education in the United States; evolution of American education related to the growth of the nation and the changing social order; examination of selected issues in contemporary education.

CPED 6606. Theories of Learning and Development. 3 Credits.

A comprehensive investigation of the complex relationship between teaching and learning. How learning takes place, how it is motivated, and how it is influenced. Material fee.

CPED 6608. Development and Diversity. 3 Credits.

Student diversity in relation to theories of human growth and development. Diverse student strengths and needs; the special needs population; dynamics of inclusion; and intercultural issues related to the teaching/learning process. Material fee.

CPED 6622. Foundations of Reading Development. 3 Credits.

Theories of printed text reading acquisition and development; strategic processes of teaching and learning from printed texts; linguistic, cognitive, developmental, sociocultural, and affective dimensions and models of reading; design and implementation of meaningful reading instruction.

CPED 6623. Foundations of Reading Development. 2 Credits.

Basic theories and processes of reading acquisition and assessment; linguistic, cognitive, developmental, social, and affective bases of reading; influences of media, instructional strategies, including formal and informal assessment. Design and implementation of instruction in critical literacy.

CPED 6624. Foundations and Research of Literacy and Reading Education. 3 Credits.

Study of the scholarship on foundational and new literacy knowledge, concepts, and practices. Topics include models of literacy, theories and relations of multimodal and printed text reading (e.g., linguistic, psychological, and sociocultural), and the uses of these theories for the teaching and learning of literacies.

CPED 6626. Practicum 1: Reading Diagnosis, Assessment, and Solutions. 3 Credits.

Candidates learn advanced diagnostic and assessment procedures to determine specific difficulties associated with printed-text reading, generate diagnostic profiles, and make instructional recommendations. Data are collected from children who struggle with printed texts; and, from those data, case studies are developed with implications for instruction.

CPED 6627. Teaching Second Language Reading and Writing. 3 Credits.

Literacy development for language learners; theories of literacy development in a second or foreign language, strengths and needs of language learners, reading and writing instructional strategies for language and content classrooms. Appropriate for students interested in teaching ESL, foreign languages, or content areas in elementary or secondary schools. Materials fee.

CPED 6628. Literacies in Informal Learning Environments. 3 Credits.

How culture, language, and out-of-school literacy experiences, particularly those in museums, influence attitude, learning, affective and interdisciplinary knowledge, and teaching practices. New literacy research, curriculum, and literature, and how social and cultural factors contribute to the literacies of everyday life.

CPED 6635. Professional Internship in Elementary Education. 3-6 Credits.

Supervised internship; required seminar. Permission of the instructor required prior to enrollment. Material fee.

CPED 6691. Interdisciplinary Adolescent Literacies. 3 Credits.

Theory and practice of interdisciplinary adolescent literacies studied in the context of the interactions between the domain-specific and strategic processes involved in teaching and learning from printed text and other media in science, literature, mathematics, social studies, and the arts.

CPED 6701. Arts in the STEM Curriculum. 3 Credits.

In-depth coverage of approaches to integrating arts and design into STEM curricula ("STEAM") for student learning; criteria and approaches for assessing student learning in arts-integrated STEM curricula; building a culture of craftsmanship; and collaborating with arts and design professionals.

CPED 6702. Integrating Engineering in the Math and Science Classroom. 3 Credits.

Approaches to integrating engineering and design into K-12 math and science classrooms. Students develop competencies by engaging in various forms of engineering and design, from small "design challenges" to more complex, semester-long engineering projects.

CPED 6703. Advanced STEM Teaching Methods. 3 Credits.

Advanced approaches for integrating science, technology, engineering, and mathematics into the K-12 classroom.

CPED 8100. Special Topics. 1-12 Credits.

Topics and fees announced in the Schedule of Classes.

CPED 8101. Research and Independent Study. 1-3 Credits.

Individual research under guidance of a faculty member.

Program and conferences arranged with an instructor.

CPED 8199. Federal Education Policy Institute. 3 Credits.

.

CPED 8309. Supervising Preservice Clinical Experience. 1-3 Credits.

.

CPED 8325. Curriculum Theory. 3 Credits.

History and development of the field of curriculum studies; theoretical perspectives on curriculum and the nature and purposes of curriculum research, development, and theorizing.

CPED 8330. Foundations of Education Research in Curriculum and Instruction. 3 Credits.

Works that have influenced twenty-first century curriculum and instruction: post-positivism, constructivism, critical theory, and post-structuralism/new materialism.

CPED 8331. Seminar in Teaching. 3 Credits.

Key issues that define the complexities of teaching; the connections between advanced teaching and learning.

CPED 8332. Search of the Literature in Curriculum and Instruction. 3 Credits.

Analysis of types of literature reviews in the field of curriculum and instruction and development of a literature review; the relationship of theory building to review of literature, and how research questions arise from extant theory and related literature. For doctoral students in curriculum and instruction, to precede CPED 8998. Material fee.

CPED 8333. School Reform through Professional Development. 3 Credits.

Fundamental perspectives of school reform through professional development of educators (K-12); evolution of contemporary professional development models and trends: examination of interactive modules using selected professional development activities. Material fee.

CPED 8334. Seminar in Learning. 3 Credits.

Theories and processes for making claims about learning.

CPED 8335. Seminar in Research in Curriculum and Instruction II. 3 Credits.

Students develop research skills in curriculum and instruction; create an individual, unique, and focused research study that is feasible for a doctoral student to accomplish; and learn skills and strategies for writing a research proposal. Prerequisite: CPED 8334.

CPED 8340. Education Policy, Reform, and Teacher Leadership. 3 Credits.

This online course engages students in the study of education policies and reforms that specifically focus on teaching and teachers. Further, this course examines teacher leadership as it impacts school reform through professional development initiatives that sustain change efforts. Four areas of study ground the focus of this course: education policy, change theories and school reform, teacher leadership, and professional development. Restricted to doctoral students; permission of the instructor required for master's students.

CPED 8341. Evaluation in Curriculum and Instruction. 3 Credits.

This course teaches doctoral and master's students about evaluating curriculum and instruction related programs, projects, or policies. This course provides students with the theoretical grounding and practical experiences they need to develop and implement evaluation research. Students in the course are required to: 1) read current literature that covers the breadth of theories and models applied in the field of evaluation, 2) participate in live online discussions and instructor presentations and, 3) design, implement and report on a targeted evaluation of a curriculum and instruction related program, project or policy. Restricted to doctoral students; master's students with approval of instructor.

CPED 8354. Doctoral Internship: Teacher Education. 3-6 Credits.

Supervised professional internship in college teaching, administration, supervision, research, policymaking, or private agency function. Permission of the advisor required prior to enrollment.

CPED 8998. Doctoral Seminar in Curriculum and Instruction. 3-6 Credits.

Review of literature; preparation of a dissertation proposal and a manuscript of publishable quality. Permission of the instructor and major advisor required prior to enrollment. Material fee.

CPED 8999. Dissertation Research. 3-6 Credits.

Prerequisite: CPED 8998.

EDUCATIONAL LEADERSHIP

GRADUATE

Graduate certificates

- Graduate Certificate in assessment, testing, and measurement in education (p. 668)
- Graduate Certificate in educational technology leadership (p. 671)
- Graduate Certificate in incorporating international perspectives in education (p. 672)
- Graduate Certificate in instructional design (p. 672)
- Graduate Certificate in Israel education (p. 673)
- Graduate Certificate in teaching strategies and classroom management for Jewish studies educators (p. 676)

- Post-master's Certificate in advanced practice of education policy (p. 677)
- Post-master's Certificate in educational leadership and administration (p. 678)

Master's programs

- Master of Arts in Teaching in the field of museum education (p. 656)
- Master of Arts in Education and Human Development in the field of assessment, testing, and measurement in education (p. 637)
- Master of Arts in Education and Human Development in the field of education policy studies (p. 643)
- Master of Arts in Education and Human Development in the field of educational leadership and administration (p. 644)
- Master of Arts in Education and Human Development in the field of educational technology leadership (p. 645)
- Master of Arts in Education and Human Development in the field of experiential Jewish education (p. 647)
- Master of Arts in Education and Human Development in the field of higher education administration (p. 645)
- Master of Arts in Education and Human Development in the field of international education (p. 649)
- Master of Arts in Education and Human Development individualized program (p. 637)

Post-master's program

- Education Specialist in the field of educational leadership and administration (p. 659)

Combined programs

- Dual Master of Arts in Education and Human Development in the field of International Education and Graduate Certificate in assessment, testing, and measurement (p. 658)
- Dual Master of Arts in Education and Human Development in the field of International Education and Graduate Certificate in Incorporating International Perspectives in Education (IIPE) (p. 658)
- Dual Master of Arts in Education and Human Development in the field of International Education and Graduate Certificate in TESOL (p. 658)
- Dual Master of Business Administration and Master of Arts in Education and Human Development in the field of higher education administration (p. 585)
- Joint Master of Arts in Education and Human Development in the field of education policy studies and Juris Doctor (p. 659)
- Joint Master of Arts in Education and Human Development in the field of higher education administration and Juris Doctor (p. 659)

Doctoral programs

- Doctor of Education in the field of educational leadership and administration (p. 661)
- Doctor of Education in the field of higher education administration (p. 662)

FACULTY

Professors M. Corry, M. Feuer, N. Milman, I. Rotberg, R. Watkins, J. Williams

Associate Professors J. Choi, J. Clayton, S. Dannels, W. Dardick, L. Engel, J. Glazer, L. Howard (*Chair*), R. Jakeman, M. Kim, Y. Nakib, C. Stapp, S. Swayze, A. Tekleselassie, B. Weiss

Assistant Professors A. Ali, M. Madden, C. Nganga, K. Sherrill, M. Shirrell, A. Stone, B. Streitwieser, R. Thessin, L. Trimmer

Lecturers L. Lent, J. Washburn

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

EDUC 0920. Continuing Research - Master's. 1 Credit.

EDUC 0940. Continuing Research: Doctoral. 1 Credit.

EDUC 1099. Variable Topics. 1-36 Credits.

EDUC 2701. Museums as Cultural and Educational Resources. 3 Credits.

A general introduction to museums as institutions, sources of information, and places for enjoyment. Classes take place on campus and at museums in the metropolitan area. Admission by permission of instructor.

EDUC 3002. Special Workshops. 3 Credits.

EDUC 5099. Variable Topics. 1-99 Credits.

EDUC 6100. Experimental Courses. 1-12 Credits.

Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

EDUC 6101. Research and Independent Study. 1-3 Credits.

Individual research under guidance of a staff member. Program and conferences arranged with a program advisor.

EDUC 6112. Foundations of Assessment, Testing, and Measurement in Education. 3 Credits.

Foundations of assessment, testing, and measurement with a focus on basic statistical concepts for assessment data literacy, research design issues for assessments, a review of other educational assessments (IQ and psychological, personality and diagnostic), and other issues with assessment and testing including technology, ethical, and legal issues.

EDUC 6114. Introduction to Quantitative Research. 3 Credits.

Development of a conceptual understanding of research design and quantitative analysis options for the consumer of research. Appropriate use of vocabulary and interpretation of research findings. Critique of research articles and/or development of a small-scale proposal.

EDUC 6116. Introduction to Educational Statistics. 3 Credits.

Fundamentals of descriptive statistics and hypothesis testing; introduction to inferential statistics and research design, distinguishing between nonexperimental, quasi-experimental, and true experimental designs. Designed for those with little preparation in quantitative methods or who are not prepared for Educ 8120.

EDUC 6232. Supervision of Curriculum, Instruction, and Assessment. 3 Credits.

Preparation to lead and assess curriculum, instruction, and assessment practices in educational settings.

EDUC 6234. Foundations of K-12 Educational Leadership. 3 Credits.

Function, processes, and best practices involved in school principal leadership.

EDUC 6236. School Law and Policy. 3 Credits.

The legal basis of education and public schools in the United States. Constitutional provisions and federal statutes that guide school law. Legal factors that influence school policy. Consideration of practical school situations for legal implications, development of skills to research legal issues affecting schools, and preventive law measures.

EDUC 6238. Leadership for Equity and Social Justice. 3 Credits.

Cultural diversity and social justice in the context of teaching, learning, and leadership practice; systemic inequities in schools and how inclusive and socially just leadership practices can address these inequities.

EDUC 6240. Instructional Leadership for School Improvement. 3 Credits.

Introduction to the theory and practice of school improvement with a focus on the role of school leaders in the process.

EDUC 6242. Administrative Issues in Education. 3 Credits.

The impact of major social, political, economic, and education issues on the role of school leaders and the delivery and quality of programs and services.

EDUC 6244. School, Family, and Community Engagement. 3 Credits.

The purpose, scope, essential elements, and impact of a successful school-community relations program; community power structures, the roles of policy and leadership, communication techniques for interacting with various audiences and the media, and evaluation of public relations and marketing for educational institutions.

EDUC 6246. School Finance and Resource Management for School Leaders. 3 Credits.

Theory and practice of personnel and resource management for school administrators; selection, compensation, evaluation, promotion, retention, and removal of staff; principles of effective financial and resource management, including accounting, budgeting, and reporting; technology acquisition, building operations, and facilities management.

EDUC 6252. Human Relations Diversity. 3 Credits.

Application of current theory and research findings in human relations to staff motivation, change, conflict management, and communication techniques for working with individuals and groups within organizations.

EDUC 6256. School Business Management. 3 Credits.

Management and control of the business functions of school districts. Assessing, planning, developing, and presenting educational budgets; the legal contexts affecting school business management. Risk management and school-site budgeting.

EDUC 6258. School Finance. 3 Credits.

The financing of public elementary and secondary education in the United States; current revenue sources, distribution decisions, and trends in the fiscal operations of schools. Litigation, finance policies, and equitable investments of public monies.

EDUC 6260. Practicum in Supervision. 3-6 Credits.

Practical experience in supervision of instruction. Admission by permission of instructor.

EDUC 6262. Internship in Supervision and Instructional Leadership. 3-6 Credits.

Service in a school situation directed by the University's faculty and school systems; integration of theory and practice.

EDUC 6264. Problems and Practices in Staff. 3 Credits.

Application of principles and practices concerned with change and evaluation of educational administration.

EDUC 6270. Education Policy for School Leaders. 3 Credits.

Overview of education policy for educational leaders; economic and social dimensions of education policy and analysis of the policy process; policy development, planning, implementation, analysis, and evaluation.

EDUC 6272. Leading Evidence-Based Action Research for School Improvement. 3 Credits.

Culminating experience implementing the design and leadership of an action research project at a school or central office location. Gathering and analysis of data, reviewing the literature, developing and implementing a program to address an identified area of need; and measuring the program's effectiveness and reflecting on/modifying it based on results. Prerequisite: EDUC 6287.

EDUC 6287. Internship: Administration. 1-6 Credits.

Standards-based work in a practical setting, planned and guided cooperatively by GW and personnel in the placement school district.

EDUC 6314. History of American Education Reform. 3 Credits.

An examination of how evolving social, economic, and political forces have propelled and opposed American education reform efforts throughout history.

EDUC 6368. Leadership and Education. 3 Credits.

A general introduction to issues of leadership applicable to education settings and to key features of educational organizations; leadership as a process and a set of skills and how its styles interact with organizational contexts.

EDUC 6371. Education Policy. 3 Credits.

An introduction to the development, implementation, and assessment of education policies at national, state, and local levels.

EDUC 6381. Program Evaluation: Theory and Practice. 3 Credits.

Introduction to the theory of social program evaluation, alternative evaluation models and methodologies, and the political and social contexts of evaluation.

EDUC 6388. Analysis of Education Policy Issues. 3 Credits.

Covers a range of education policy options, assessing their advantages and disadvantages based on evidence, and drawing implications for policy formulation. A critical approach is applied to the assigned readings, questioning the sources of evidence, appropriateness of analysis, and validity of the findings. Prerequisite: EDUC 6371, EDUC 6114, or permission of instructor.

EDUC 6392. Practicum in Educational Policy Program Evaluation. 3-6 Credits.

Supervised practical experience in field placements. Admission by permission of instructor. Prerequisite: EDUC 6381.

EDUC 6401. Foundations in Educational Technology. 3 Credits.

Theory and practice of educational technology. Key characteristics of different media, principles of application, and issues concerning their appropriate use.

EDUC 6402. Trends and Issues in Educational Technology. 3 Credits.

The research and practice surrounding the use of computers in educational and training settings. Students acquire the practical knowledge necessary to the development and evaluation of computer-related curricula through projects and case studies.

EDUC 6403. Educational Hardware Systems. 3 Credits.

Design and implementation of educational hardware systems, including computers and computer networks.

EDUC 6404. Managing Computer Applications. 3 Credits.

For managers and prospective managers in education and human services who are concerned with the automation of their operations. Basic principles needed to design, implement, and manage an information system. Admission by permission of instructor.

EDUC 6405. Developing Multimedia Materials. 3 Credits.

The design, development, integration, and use of multimedia resources in education and training settings. Students examine and critique multimedia technologies, develop instructional materials, and create a unit or module that applies instructional design theory.

EDUC 6406. Instructional Design. 3 Credits.

Designing, implementing, and evaluating instructional strategies for learners. Assessing needs, writing objectives, selecting curriculum/content, selecting and implementing methods and techniques, selecting appropriate devices and evaluating instruction.

EDUC 6407. Design and Implementation of Educational Software. 3 Credits.

Theory and practice of creating educational software; psychological basis of using software in learning; instructional programs; authoring tools; artificial intelligence applications; interactive media. Students design and evaluate an educational program. Prerequisite: EDUC 6401 or permission of instructor.

EDUC 6421. Critical Issues in Distance Education. 3 Credits.

Historical, conceptual, theoretical, and practical issues associated with distance education as a foundation for research and practice in the domain of distance education as well as adult learning, educational systems design, and school administration and policy.

EDUC 6422. Instructional Needs Assessment and Analysis. 3 Credits.

An introduction to the role of instructional needs assessment and analysis. The design and development of instruction. Key elements of the instructional design cycle, including data analysis.

EDUC 6423. Technology and Disabilities. 3 Credits.

Assistive technology as it impacts the lives of people with disabilities, including the performance of tasks related to employment, education, and activities of daily living.

EDUC 6424. Learning Technologies and Organizations. 3 Credits.

The role of learning technology in organizations, learning in the workplace, and knowledge management in corporations, schools, and universities.

EDUC 6425. Developing Effective Training with Technology. 3 Credits.

Development of skills in planning and producing effective technology-rich training that meets institutional and organizational needs.

EDUC 6426. Computer Interface Design for Learning. 3 Credits.

Human-computer interaction, both in general and with emphasis on issues in education. General design aspects; theories, principles, and guidelines related to human-computer interaction.

EDUC 6427. Advanced Instructional Design. 3 Credits.

Development of a prototype instructional design project and documentation report requiring rapid design and development strategies. Prerequisites: EDUC 6406.

EDUC 6428. Developing Digital Professional Portfolios. 3 Credits.

Students create a digital professional portfolio, using advanced skills in the design, development, integration, and use of multimedia resources.

EDUC 6441. Internship in Educational Technology Leadership. 3 Credits.

Students are assigned to a cooperating agency and work in consultation under the guidance of the course instructor. Admission by permission of instructor.

EDUC 6442. Educational Technology Leadership Master's Project. 1-6 Credits.

Students design, develop, implement, and evaluate an individual project. Admission by permission of instructor.

EDUC 6500. Introduction to Student Affairs and Higher Education. 3 Credits.

Introduction to the study of higher education and the student affairs profession, including the ways in which broader aspects of higher education research, theory and policy inform the work of student affairs practitioners. Historical and current contexts of American higher education, the academic community, and existing issues and emerging challenges surrounding the practice of student affairs in the current higher education landscape.

EDUC 6510. Administration of Higher Education. 3 Credits.

Government, organization, and administration of colleges and universities; duties of trustees and administrators.

EDUC 6520. Foundations of College Student Development. 3 Credits.

College student development theories, practices, and problems, including historical overview and human development theories related to college students.

EDUC 6525. Managing College Student Services Programs. 3 Credits.

An overview of student affairs administrative practices, including planning models, budgeting, policy development, program development, facility management, and team building. Admission by permission of instructor.

EDUC 6530. Intercultural Campus Leadership. 3 Credits.

This course is designed to explore intercultural leadership skills through the lens of understanding group identity differences, multicultural competence, and the foundations of effective advocacy for social justice. Lectures, readings, class discussions, written assignments, and experiential activities are used to promote an understanding of intercultural leadership skills to help create inclusive learning environments. The course explores how oppression and privilege relate to differences based on gender, race and ethnicity, sexual orientation, and (dis)ability. Students also study how these identities intersect with each other.

EDUC 6540. Group and Organizational Theories. 3 Credits.

Review of major organizational theories inside and outside higher education, including systems, institutional, cultural, cognitive, environmental, ecological, as well as power and influence.

EDUC 6550. Assessment in Higher Education. 3 Credits.

Key concepts in the assessment of outcomes in higher education and in student affairs. History of the assessment movement in higher education, strategies and methods for measuring outcomes of the college experience, identifying the limitations of operational processes that can be improved, and current issues in measuring student success in higher education.

EDUC 6555. Higher Education Policy. 3 Credits.

Assessment of policies that impact higher education, including the relationship of K-12 policy to higher education. Policy networks and mechanisms of policymaking. Policy development and assessment.

EDUC 6560. Legal Problems in Higher Education. 3 Credits.

Investigation of legal problems in higher education related to the legal structure of higher education, religious concerns, students, faculty, and academic programs.

EDUC 6565. Financing Higher Education. 3 Credits.

Analysis of private, state, federal, and other revenue sources; strategic planning, program budgets, and financial methods and practices.

EDUC 6570. Educational Planning. 3 Credits.

An examination of the planning movement in education: its historical development and the recent shift in premises, context, and expectations. Different approaches to the planning process; its role in research; and overview of main analytical techniques currently in use.

EDUC 6572. Dynamics of Change. 3 Credits.

An analysis of the process of change, particularly as it relates to educational policy. Comparison of theories; analytical tools; historical precedents; examples of federal education policies.

EDUC 6575. Personnel Administration. 3 Credits.

Human resource management: planning, recruitment, selection, placement and induction, staff development, rewards, and negotiations. Issues and legislation that influence personnel functions and policy; communication skills for human resource leadership.

EDUC 6579. Managing Multicultural Environments. 3 Credits.

Application of multicultural research in identifying key elements for managing diverse environments, communicating with families, planning professional development activities, and increasing student learning.

EDUC 6585. Master's Internship in Higher Education Administration. 3-6 Credits.

Supervised field experience in higher education settings. Admission by permission of instructor.

EDUC 6590. Capstone in Higher Education Administration. 0 Credits.

The capstone is designed to promote the integration of the core curriculum and practitioner experiences of the Master's degree program in Higher Education Administration, and to prepare for student transition to a professional student affairs or academic affairs position following completion of the degree. Restricted to students in the MAEd&HD in higher education administration program.

EDUC 6601. International and Comparative Education. 3 Credits.

Theoretical foundations of comparative and international education; systematic investigation of the structure and practices of selected representative school systems in different parts of the world. Emphasis on development of methodologies for comparative study.

EDUC 6602. Regional Studies in International Education. 3 Credits.

In-depth study of education in a selected region of the world. Structures and issues facing education systems in social, political, economic, cultural, and historical context. Prospects of education for human national development. May be repeated for credit provided the region differs.

EDUC 6610. Programs and Policies in International Education. 3 Credits.

Overview of policies and programmatic responses to issues in international education. Topics include education and development, international higher education and student services, and education and marginalized people. May be repeated for credit provided the topic differs.

EDUC 6615. Internationalizing U.S. Schools. 3 Credits.**EDUC 6620. Strategies and Analysis in International Education. 3 Credits.**

Strategies for improving education in international contexts. Topics include education and development, international higher education and student services, or education and marginalized people. May be repeated for credit provided the topic differs.

EDUC 6630. International Experiences. 1-6 Credits.

Study and research in a foreign country as part of a group program. Admission may require permission of the instructor.

EDUC 6631. Internship: International Education. 1-6 Credits.

Service in an international education institution or related individually designed program planned to enable the student to connect theory to practice. Admission may require permission of instructor. May be repeated for credit.

EDUC 6640. Selected Topics in International Education. 3 Credits.

Current trends, themes, and issues in international education. May be repeated for credit provided the topic differs.

EDUC 6650. Education and National Development. 3 Credits.

The role education plays in the process of national development in advanced industrial societies and societies moving to industrialism.

EDUC 6660. Capstone in International Education. 3 Credits.

Review of core topics in international education and completion of major supervised project or paper. Taken near the end of the master's program in lieu of the Comprehensive Examination.

EDUC 6701. Museums as Institutions I: Fundamentals. 3 Credits.

An overview of the museum as an environment for learning, considering the influence of institutional history and organizational structure on the museum's mission of serving the public.

EDUC 6702. Facilitating Museum Learning I: Fundamentals. 3 Credits.

Theory of and practice in the development of communication skills in the museum. Educational concepts; teaching strategies and techniques; institutional liaison and group process.

EDUC 6703. Museum Audiences. 3 Credits.

A survey of the museum's diverse audience, emphasizing implications for effective programming, with attention to audience research.

EDUC 6704. Facilitating Museum Learning II: Field Placement and Seminar. 3-6 Credits.

Supervised placement in local educational institutions. On-campus seminar focuses on human development and learning theory. Placement requires a 16 hour per week commitment.

EDUC 6705. Museums as Institutions II: Field Placement and Seminar. 6 Credits.

Supervised placement in area museums and related organizations where students carry out projects in cooperation with the site. On-campus seminar includes presentations by leading practitioners. Placement requires a commitment of 32 hours per week. Restricted to museum education students. Prerequisites: EDUC 6701, 6702, 6703 and 6704.

EDUC 6706. Evaluating Museum Learning. 3 Credits.

Evaluation and research methods appropriate to the museum setting. Review of research on museum audiences; designing exhibition and program evaluations.

EDUC 6707. Museum Proposal Writing. 3 Credits.

Preparation of proposals for museums seeking support from public and private funders. Proposals are developed in cooperation with local museums.

EDUC 6709. Interpretation in the Historic House Museum. 3 Credits.

Seminar integrating advanced practices of museum education with current scholarship in architectural history, material culture, and social history. Extensive use of Washington museum resources. Same as AMST 6709. Admission by permission of instructor.

EDUC 6710. Museums and Technology. 3 Credits.

Applications of technology that link the public with the museum: Internet exhibitions, interactive computer programs, video conferencing, the electronic classroom. Guest lectures, field trips, and group projects.

EDUC 6711. Museum as a Learning Environment. 3 Credits.

Exploration of why visitors frequent museums and how they create personal meaning. Approaches to support the audience's engagement with the museum's resources.

EDUC 6801. Prelude to Experiential Education and Jewish Cultural Arts. 1 Credit.

Theme-based orientation to the program in experiential education and Jewish cultural arts and to the metropolitan Washington, DC, Jewish community. Includes extensive site visits. Restricted to students in the experiential education and Jewish cultural arts program.

EDUC 6802. Finale in Experiential Education and Jewish Cultural Arts. 1 Credit.

Theme-based orientation to the program in experiential education and Jewish cultural arts and to the metropolitan Washington, DC, Jewish community. Students plan and implement extensive site visits. Restricted to students in their final semester of the experiential education and Jewish cultural arts major. Prerequisite: EDUC 6801.

EDUC 6803. Introduction to Experiential Jewish Education. 4 Credits.

Introduction to the theory and practice of experiential Jewish education in a variety of settings, addressing the relationship of education to identity development. Includes a fieldwork experience.

EDUC 6804. Applied Research in Experiential Jewish Education. 3 Credits.

Overview of research methods employed in experiential Jewish educational settings and their various applications to practice. Prerequisite: EDUC 6803 Introduction to Experiential Jewish Education.

EDUC 6805. Capstone in Experiential Education and Jewish Cultural Arts. 3 Credits.

Six-week, full-time internship at leading Jewish cultural institutions in the United States and abroad. Restricted to students in the experiential education and Jewish cultural arts program.

EDUC 6806. Jews, Social Justice, and Activism. 3 Credits.

Critical examination of the important place of social activism, civic engagement, and community service in American Jewish life.

EDUC 6807. Fieldwork in Experiential Jewish Education. 3 Credits.

Sixteen-week, part-time internship at leading Jewish organizations or institutions. Restricted to students in the master's degree in experiential Jewish education program.

EDUC 6810. Paideia and Jewish Education. 2 Credits.

Analysis of the ancient Greek concept of paideia and its implications for the theory and practice of contemporary experiential Israel education.

EDUC 6811. Foundations of Contemporary Israel. 3 Credits.

Key questions and concepts surrounding Israel's history, and Israeli society, politics, and culture, from 1948 to present. Restricted to students in the graduate certificate in Israel education program.

EDUC 6812. American Jews and Modern Israel. 2 Credits.

The relationships of young American Jews, and the American Jewish community more broadly, to the modern State of Israel, particularly in the context of new political and ideological dynamics in the United States and Israel.

EDUC 6813. The Israel Educational Experience. 4 Credits.

Held in Israel over an eight-day period. Students learn about issues that characterize contemporary Israeli society and apply this learning to educational programming. Restricted to students in the graduate certificate in Israel education program.

EDUC 6840. Introduction to Improvement Science in Education. 3 Credits.

The process and application of improvement science to complex educational problems.

EDUC 6841. Inquiry Tools Supporting Improvement Science. 3 Credits.

The means by which improvement science uses and adapts to a range of established qualitative and quantitative tools, processes, and methods to support educator inquiry within the context of K-12 school settings.

EDUC 6842. Teacher Leadership through Improvement Science. 3 Credits.

Improvement science practices that facilitate teacher leadership; dispositions, knowledge, processes, and relationships supportive of teacher leaders working in different school contexts.

EDUC 6843. Improvement Science as Educational Change. 3 Credits.

Improvement science as a staged, interpretive educational change process; diverse role group perspectives; past and current reforms efforts.

EDUC 6998. Thesis Research. 3 Credits.

Thesis research.

EDUC 6999. Thesis Research. 3 Credits.

EDUC 8100. Experimental Courses. 1-12 Credits.

Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

EDUC 8101. Research and Independent Study. 1-3 Credits.

Review of literature. Preparation of a dissertation proposal and a manuscript of publishable quality.

EDUC 8110. Advanced Study: Ideas, Issues, and Practices in Education. 3 Credits.

For precandidates for the EdD Alternative means of responding to the complexities of the educational process. Topics vary but concern education as an individual process and as sociocultural preservation and renewal. May be repeated for credit.

EDUC 8120. Group Comparison Designs and Analyses. 3 Credits.

Designs and analyses to assess differences for more than two groups when compared on one dependent variable. Fixed, random, and mixed effects ANOVA and ANCOVA models within factorial design, multiple comparison tests, and introduction to regression analysis. Prerequisites: EDUC 6116.

EDUC 8122. Qualitative Research Methods. 3 Credits.

A general introduction to several major qualitative research traditions (e.g., biography, grounded theory, ethnography, phenomenology, and case study). Application of qualitative research design and procedures, including preliminary data collection, analysis, and writing.

EDUC 8130. Survey Research Methods. 3 Credits.

Techniques used to collect an array of information from a large number of people through structured interviews and mailed, e-mailed, or web-based questionnaires. Defining the research question and design; sampling, survey development, data collection procedures, pretesting, and data handling. Prerequisite: EDUC 8120, EDUC 8122.

EDUC 8131. Case Study Research Methods. 3 Credits.

Techniques used to examine one or a few complex cases, collecting data from several types of sources and by several methods. The course covers design, data collection, and data analysis/integration. Prerequisite: EDUC 8122.

EDUC 8140. Ethnographic Research Methods. 3 Credits.

Techniques used to examine systematically the contemporary daily life of a given group in its natural setting, focusing on culture—the recurring patterns of thought and social relations. Issues of research design and data collection and analysis. Prerequisite: EDUC 8122.

EDUC 8142. Phenomenological Research Methods. 3 Credits.

Techniques used to elicit and recognize perceptions, interpretations, motives, expectations, and imaginations. The framing of appropriate research questions, data collection and analysis, and the statement of conclusions. Prerequisite: EDUC 8122.

EDUC 8144. Discourse Analysis. 3 Credits.

Techniques used to examine verbal and nonverbal communication to understand identity, beliefs, intentions, relationships, and culture. The framing of appropriate research questions; data collection and analysis. Prerequisite: EDUC 8122.

EDUC 8147. Critical Methodologies in Educational Research. 3 Credits.

Theoretical foundations of multiple critical research traditions; researcher responsibility, power and the construction of knowledge; scholarly research in design, practice, and report, drawing upon relevant critical epistemologies. Prerequisite: EDUC 8122.

EDUC 8148. Qualitative Data Collection. 3 Credits.

Identification of appropriate data sources, participant recruitment, mechanics of data collection, and research protocol development. Conducting observations, interviews, focus groups, and other ethnographic methods. Prerequisite: EDUC 8122.

EDUC 8149. Qualitative Data Analysis. 3 Credits.

Analysis of ethnographic and other forms of qualitative data in educational research. Interpretive strategies for analyzing qualitative data. Prerequisite: EDUC 8122.

EDUC 8170. Educational Measurement. 3 Credits.

Classical and modern measurement theory, item response theory, and factor analysis. Educational and psychological instrument development and validation. Interpretation of scale scores and assessment of instrument adequacy. Prerequisites: EDUC 8120. Recommended background: EDUC 6112 or equivalent.

EDUC 8171. Predictive Designs and Analyses. 3 Credits.

Techniques used to assess how independent variables are related to one dependent variable. Multiple linear regression, logistic regression, ordinal regression, and non-linear regression. Appropriate research questions, data interpretation, and design within generalized linear modeling. Prerequisites: EDUC 8120.

EDUC 8172. Multivariate Analysis. 3 Credits.

Techniques for assessment of relationships among multiple independent variables and dependent variables. Multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), discriminant analysis, and exploratory factor analysis. Prerequisite: EDUC 8171.

EDUC 8173. Structural Equation Modeling. 3 Credits.

Multivariate techniques used for assessment of structural (causal) relations among latent (unobserved) variables with multiple observed indicators: observed and latent variable path analysis and confirmatory factor analysis. Latent means analysis and latent growth modeling. Prerequisite: EDUC 8171.

EDUC 8174. Hierarchical Linear Modeling. 3 Credits.

Techniques appropriate for analyses of hierarchically structured data. Theoretical concepts of hierarchical linear models (HLM); social and behavioral research; popular HLM software such as HLMwin; and large scale datasets. Prerequisites: EDUC 8171.

EDUC 8175. Item Response Theory. 3 Credits.

Conceptual, mathematical, and applied issues in item response theory. Dichotomous models, item response theory software used for estimation and model fit, test construction, differential item functioning, and item response theory equating. Prerequisites: EDUC 8170.

EDUC 8177. Assessment Engineering. 3 Credits.

In-depth coverage of topics related to assessment engineering, including cognitive model development using cognitive diagnostic assessment and formative assessment modeling, item model development using auto item generation, and automated test assembly and psychometric model development using computer adaptive testing. Introduction to current assessment engineering and educational big-data analytic applications. Prerequisites: EDUC 8170.

EDUC 8179. Capstone Project in Assessment, Testing, and Measurement in Education. 3,6 Credits.

Multifaceted assessment that serves as a culminating academic and intellectual experience for students during the end of their academic program. The capstone project is similar to a thesis or dissertation but may take a variety of forms. Permission of the instructor required prior to enrollment. Prerequisite: EDUC 8170.

EDUC 8240. Organizational Theory and Leadership in Education. 3 Credits.

Theories and models examining how pk-12 school organizations are part of larger bureaucratic structures and how micro processes that help the overall organization function occur. Restricted to students in the EdD in educational leadership and administration program.

EDUC 8268. Leadership Theory for Education. 3 Credits.

Historical and contemporary theories of leadership through the lens of education; leadership, adaptive leadership, and power analysis.

EDUC 8270. Fundamentals of Educational Planning. 3 Credits.

The planning movement in education at the federal, state, division, and building levels; strategic, short-term, and long-term planning processes for school and educational leaders.

EDUC 8271. Education Policy for School Leaders. 3 Credits.

The interactions of policy development, interpretation, and implementation at different levels of the system; how policy actors draw upon different values to advance and critique current problem formulations and related solutions in education.

EDUC 8276. Seminar: Administration and Supervision. 1-12 Credits.**EDUC 8277. Advanced Instructional Leadership for School Improvement. 3 Credits.**

Introduction to the role of the instructional leader from school and district perspectives. Students gain theoretical and practical skills and knowledge in areas including instructional improvement; education reform; accountability; conditions for improvement; and planning and sustaining change.

EDUC 8280. Critical Review of Educational Leadership Literature. 1,3 Credit.

The techniques, tools, and presentation of critical reviews and syntheses of educational literature used to inform forthcoming research. Systematic mapping of what is known and deriving research questions, conceptual frameworks, and applicable methods. Prerequisite: an approved dissertation topic or permission of instructor.

EDUC 8320. The Politics of Education. 3 Credits.

Examination of the contextual factors (political, economic, and historical) and the nature of political decision making on education issues, primarily at the state and local level. Prerequisite: EDUC 6371.

EDUC 8321. Economics of Education. 3 Credits.

Application of economic theory and analysis to education problems and policies; analysis of contemporary education reforms adopted to improve educational outcomes. Prerequisites: EDUC 6371 and EDUC 8171.

EDUC 8322. Education Policy Implementation. 3 Credits.

The evolution and implementation of education policies. Analysis of policy implementation at varying governance levels and types of educational systems. Policy is analyzed as a process and as it interacts with organizational, social, economic, and political factors. Prerequisites: EDUC 6371.

EDUC 8323. Policies of Education Equity. 3 Credits.

Analysis of the development, implementation, and evaluation of education equity policies, with consideration of their context, formulation, and application. Prerequisites: EDUC 6371 and EDUC 8171.

EDUC 8325. Policy Design: Accountability in Education. 3 Credits.

Models of educational accountability and their implementation within the broader U.S. education system; approaches to accountability, including contemporary policies such as market-based systems, regulatory approaches, and professional accountability. Prerequisite: EDUC 6371.

EDUC 8329. Seminar in Program Evaluation. 3 Credits.

Contemporary problems and issues in evaluation of social programs: design, implementation, analysis, and utilization. Prerequisite: EDUC 6381 and approval of instructor.

EDUC 8334. Doctoral Internship in Educational Policy. 3-6 Credits.

Methods of analysis used in the study of educational policy issues. Case studies on a range of policy issues and trends, including testing and accountability, school finance, school choice, and the federal role. Prerequisite: EDUC 6371, EDUC 6114, or permission of instructor.

EDUC 8340. Methods of Policy Analysis in Education. 3 Credits.

Methods of analysis used in the study of educational policy issues; policy issues and trends, including testing and accountability, school finance, school choice, and the federal role. Prerequisites: EDUC 6116 and EDUC 6371.

EDUC 8345. Advanced Studies in Educational Policy Analysis. 1-12 Credits.

The process by which education policies are designed, adopted, and implemented by education systems. Case studies of specific policies, examining their assumptions and objectives, the criteria for assessing their effectiveness, and their governance at federal, state, and local levels. Prerequisite: EDUC 6371, EDUC 8120, or permission of instructor.

EDUC 8505. Seminar: Higher Education Administration. 1-12 Credits.**EDUC 8510. Administration and Organization of Higher Education. 3 Credits.**

Organizational characteristics and administrative nature of colleges and universities; challenges and opportunities for governance; cultures, norms, and changes in higher education organizations.

EDUC 8515. Comparative and International Higher Education. 3 Credits.

An exploration of cultural, theoretical, and disciplinary perspectives of international higher education through a comparative lens.

EDUC 8520. Theories for Research on College Students. 3 Credits.

Theoretical approaches used to study college students; competing frameworks and the contributions of emergent approaches to understanding college students.

EDUC 8525. College and University Curriculum. 3 Credits.

Development, patterns, creative design, issues, problems, evaluation, and trends in the higher education curriculum.

EDUC 8530. Leadership in Higher Education. 3 Credits.

Cognitive leadership theory as articulated in higher education: what leadership is, how it works, how it is practiced, how it is considered by scholars and practitioners, and how it is researched.

EDUC 8540. History of Higher Education. 3 Credits.

History, philosophy, scope, purpose, present status, programs, and trends in higher education in the United States.

EDUC 8555. Policy Analysis in Higher Education. 3 Credits.

The intricacies of major policy debates in higher education, focusing on policy framing, goals, solutions, and implementation.

EDUC 8560. Case Studies in Higher Education Administration. 3 Credits.

An analysis of case studies related to administrative functions in colleges and universities.

EDUC 8565. College and University Governance. 3 Credits.

Organizational and administrative structures, patterns, and relationships in higher education.

EDUC 8566. Higher Education Finance. 3 Credits.

Fundamental concepts in higher education finance; state finance and policy issues; and the impact of financial decisions made at the federal, state, and institutional levels on faculty and students.

EDUC 8580. The Community/Junior College. 3 Credits.

The two-year college as it relates to secondary education, four-year colleges, and universities. Objectives, curricula, students, faculty, legal concerns, and special problems of two-year colleges.

EDUC 8582. Administration and Governance of Two-Year Colleges. 3 Credits.

A study of the community/junior college, focusing on administrative and governance patterns and national, regional, state, and local influences, as well as the theory and structure of two-year college organization.

EDUC 8585. Doctoral Internship in Higher Education Administration. 3-6 Credits.

Service in a higher education situation directed by the University and the cooperating institution to integrate theory and practice. Admission by permission of instructor.

EDUC 8594. Current Issues in Higher Education. 3 Credits.

Analysis of contemporary issues in higher education practice and scholarship.

EDUC 8701. Education Policy Design. 3 Credits.

Processes and practices of policy planning and design in a system of federal, state and local control; effect of federal actions on the work of state and local educators; the state role in shaping federal education policies.

EDUC 8702. Evidence in Education Policymaking. 3 Credits.

Review of theory and research on evidence-informed policymaking and the practical skills of drafting evidence-informed policy initiatives; integrating research with other types of evidence to understand policy problems and formulate responses.

EDUC 8703. Implementation for Education Policymakers. 3 Credits.

The challenge of designing and implementing policy with attention to implementation. Review of research on the organizational, social, and political factors that influence implementation and case study analyses of successful and unsuccessful policy implementation.

EDUC 8704. Advocacy and Strategic Communications. 3 Credits.

The ways in which public discourse and political advocacy shape policy making and implementation; framing policy issues, advancing policy objectives, and engaging stakeholders and members of the media.

EDUC 8998. Pre-Dissertation Seminar. 3-6 Credits.

Required of all departmental EdD degree candidates. Approval of the dissertation research proposal by the dissertation committee is necessary for successful completion of the seminar. Admission by permission of instructor.

EDUC 8999. Dissertation Research. 3,6 Credits.

Prerequisite: EDUC 8998.

HUMAN AND ORGANIZATIONAL LEARNING

GRADUATE

Graduate certificates

- Graduate Certificate in design and assessment of adult learning (p. 670)
- Graduate Certificate in global leadership in teams and organizations (p. 671)
- Graduate Certificate leadership development (p. 674)
- Graduate Certificate in organizational learning and change (p. 674)

Master's programs

- Master of Arts in Education and Human Development in the field of organizational leadership and learning (p. 652)
- Master of Arts in Education and Human Development individualized program (p. 637)

Doctoral program

- Doctor of Education in the field of human and organizational learning (p. 663)

FACULTY

Professors D. Burley, E. Goldman, S. Khilji

Associate Professors A. Casey, M. Cseh, R. Korte, E. Scully-Russ (*Chair*), J. Storberg-Walker

Assistant Professor Y. Nakamura, S. Ray

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

HOL 0920. Continuing Research - Master's. 1 Credit.

HOL 0940. Cont. Res. - Doctoral. 1 Credit.

HOL 5099. Variable Topics. 1-99 Credits.

HOL 6100. Special Workshop. 1-12 Credits.

Topics to be announced in the Schedule of Classes. May be repeated for credit.

HOL 6101. Research and Independent Study. 1-3 Credits.

Preparation of an in-depth project under the guidance of a faculty member. The course is arranged individually with the program advisor.

HOL 6700. Human Behavior and Learning in Organizations. 3 Credits.

How individuals and groups learn and interact within organizations and how organizations function and learn. Motivation, group dynamics, leadership, systems theory, organizational culture, and change.

HOL 6701. Adult Learning. 3 Credits.

Premises and theories used to meet learning needs of adults. Overview of various learning theories and the impact of various stages of adult development on learners. Topics including self-directed learning, accommodating individual learning needs, and creation of effective learning techniques. Same as HDEV 6701.

HOL 6702. Organizational Change. 3 Credits.

Assessing organizational conditions; operations, problems (human, structural, and systemic), and the process of collecting and interpreting information.

HOL 6703. Consulting Skills. 3 Credits.

Concepts, methods, and skills required for effective consultation in organizations, as either an internal or an external consultant; meeting the human needs in organizations while improving performance and productivity. Students undertake a consulting project in an organization.

HOL 6704. Leadership in Organizations. 3 Credits.

Developments in theory and research centered on organizational leadership. Emphasis on various types of leadership including transformational, responsible, authentic, and ethical.

HOL 6705. Strategic Change. 3 Credits.

Overview of best practices for organizing and managing people and organizations to compete successfully. Leading an organization through a process of self-examination, redesign, and change that results in sustained effectiveness, learning, and high performance.

HOL 6706. Current Issues in Organizational Leadership. 3 Credits.

Current issues and future trends in organizational leadership. Students gather data and analyze key topics associated with areas such as talent management, leading through demographic shifts, leadership in a globalized world, leading global change, and developing new forms of leadership, ethics, and sustainability.

HOL 6707. Organizational Learning. 3 Credits.

Learning in an organizational context. Processes through which the organization as a system learns, unlearns, changes, and disseminates information. Organizational learning theories address the processes and barriers of gathering, using, developing, and retaining knowledge in organizations.

HOL 6708. Global Leadership. 3 Credits.

The changes taking place in organizations due to the process of globalization and the requirements for leadership. The changing global environment, how those changes influence operational and strategic issues within global organizations, and how a leader can better understand the global environment to help organizations meet these new challenges.

HOL 6709. Leadership Development. 3 Credits.

Theories of and processes used in leader/leadership development; effects of leadership development on the individual and its importance to organizations. Prerequisite: HOL 6704.

HOL 6710. Globalization, Change, and Learning. 3 Credits.

With learning as the coping strategy, focus on how policymakers and global leaders can be helped to take advantage of the opportunities and address the challenges that globalization presents.

HOL 6712. Diversity, Equity and Inclusion in Organizations. 3 Credits.

Developments in the theory of diversity, equity, and inclusion (DEI). Practice of diversity management as an integrative, structural, and social change effort within organizations. Prerequisites: HOL 6700, HOL 6702, HOL 6704, and HOL 6746.

HOL 6720. Advanced Strategies for Adult Learning. 3 Credits.

Theoretical and practical strategies of adult learning in various settings, including corporate environments. Learning strategies, such as creative thinking and self-directed learning. Critical adult learning issues.

HOL 6721. Assessing the Impact of Organizational Change Using Qualitative and Quantitative Methods. 3 Credits.

Knowledge and skills needed to evaluate the impact and return on investment of change efforts; planning and conducting systematic evaluations of change efforts, including the choice, development, and use of various tools for measuring individual, group, and organizational change; assessing the success of the planned change.

HOL 6724. Increasing the Capacity to Learn. 3 Credits.

Identification of actions that can help increase the capacity to learn. Emphasis on experimental learning and critical reflection.

HOL 6725. Internship in Organizational Leadership and Learning. 3-6 Credits.

Supervised experience in selected areas of leadership, learning, and/or change. Admission by permission of the program advisor.

HOL 6726. Curriculum Design for Adult Learners. 3 Credits.

Exploration of theories, methods, and models of curriculum design for adult learners. Application of major design steps. Restricted to students in the master teacher leadership development program. Prerequisite: HOL 6701.

HOL 6727. Assessment of Adult Learning. 3 Credits.

Exploration of the major methods used to assess adult learning in classroom and workplace environments; means of ensuring the validity and reliability of the major methods. Restricted to students in the master teacher leadership development program. Prerequisite: HOL 6701.

HOL 6742. Design of Adult Learning Interventions. 3 Credits.

Designing and implementing adult learning programs. Topics include instructional design techniques, designing effective programs, program planning and marketing techniques, and conducting needs assessments and evaluations of adult learning programs.

HOL 6743. Action Learning. 3 Credits.

Processes, principles, and skills necessary to participate in and lead both single- and multiple-problem action learning sets. The six dimensions of action learning; educational psychological, political, sociological, and management theories underlying action learning.

HOL 6744. Meaningful Workplaces. 3 Credits.

Characteristics of the humane organization and of meaningful work. Intrinsic motivation, work-life balance, and the workplace community.

HOL 6745. Technology and Human Resource Development. 3 Credits.

How technology can best be utilized in the HRD environment. Discussion of CBT, use of the Internet for instruction, and distance learning techniques.

HOL 6746. Work Groups and Teams in Organizations. 3 Credits.

Exploration of the nature of work groups and teams as they are utilized in organizational settings. Group and team dynamics, facilitating and leading skills, and group roles and culture.

HOL 6747. International and Multicultural Issues in Organizations. 3 Credits.

The impact of culture and globalization on U.S. and international human and organizational learning programs and practices. Adult learning and organizational change approaches that develop and utilize the synergy of a global workforce.

HOL 6998. Thesis Research. 3 Credits.

Thesis research.

HOL 6999. Thesis Research. 3 Credits.

Thesis research.

HOL 8100. Special Topics in Human and Organizational Learning - Doctoral Studies. 3 Credits.

Topics to be announced in the Schedule of Classes. May be repeated for credit.

HOL 8101. Research and Independent Study. 1-3 Credits.

HOL 8700. Foundations of Human and Organizational Learning. 3 Credits.

The study of individuals and their interactions within an organizational context. Overview of key theories in leadership, systems theory, group dynamics, learning, organizational culture, and motivational theory. The use of research in human and organizational learning.

HOL 8701. Theory, Research, and Practice in Adult Learning and Development. 3 Credits.

Learning theories as applied to adults in individual and group learning transactions; effect of age on learning; psychological, physical, and social environments in adult education situations.

HOL 8702. Theory and Design of Organizational Diagnosis and Development. 3 Credits.

Focus on various paradigms through which organizations and their functions may be viewed; a variety of analytical models of organizations; techniques for assessing systems; application of analysis techniques.

HOL 8703. Human Systems Change. 3 Credits.

The classical and contemporary ideas related to social systems change; the relation of these ideas to current issues in organizations.

HOL 8704. Leadership Theory, Research, and Practice. 3 Credits.

Leadership in organizations with a focus on transformational leadership. Historical review of leadership theory and research; current developments in understanding leadership. Students examine their own leadership style and plan for continued development as a leader.

HOL 8705. Organizational Culture. 3 Credits.

Theory and research on organizational culture, from the multidisciplinary seminal works in anthropology, psychology, sociology, and management to current day theorizing and empirical research on culture. The rituals, values, and behaviors that differentiate cultural groups and the way cultural identities manifest themselves in organizational practices; and how organizational culture evolves and its relationship to other organizational phenomena such as innovation, strategy, sensemaking, and performance. Current trends in organizational culture theorizing.

HOL 8706. Interdisciplinary Readings in Human and Organizational Learning. 3 Credits.

Seminal works from various disciplines related to current research and practice.

HOL 8707. Advanced Organizational Learning. 3 Credits.

The psychological and sociological paradigms associated with the learning of a collective whole.

HOL 8708. Introduction to Doctoral Research. 3 Credits.

An introduction to scholarly inquiry for doctoral students. The role of the scholar-practitioner; types of scholarly inquiry and their components; diverse paradigms used to frame scholarly inquiry; and critical thinking skills for evaluating research in human and organizational learning.

HOL 8720. Seminar: Applied Research in Human and Organizational Learning. 3 Credits.

Identification of initial constructs and theories that support the identified research interest, with a problem statement and critical analysis of research reports and review of research literature.

HOL 8721. Practicum in Human and Organizational Learning. 3-6 Credits.

HOL 8722. Seminar: Advanced Issues in Human and Organizational Learning. 1-12 Credits.

Forum in which candidates critically examine relevant classic and contemporary literature, with analysis and synthesis to defend their research questions and conceptual frameworks.

HOL 8723. Organizations and Strategy in Human Resource Systems. 3 Credits.

Overview of paradigms, theories, models, and constructs of organizations and strategy to understand organizations and their environments.

HOL 8724. Creating and Planning Doctoral Research. 3 Credits.

Students learn to develop an evidence-based problem statement, design a conceptual framework, craft a research question, and conduct a literature review. Fundamental principles of both qualitative and quantitative research and various research strategies and designs.

HOL 8725. Integration of Theory, Research and Practice. 3 Credits.

Provides students with the opportunity to apply adult learning principles explored in the curriculum towards an integration and synthesis of the knowledge base in human and organizational studies. Aids in preparation for the comprehensive examinations and subsequently, dissertation development.

HOL 8741. Managerial and Organizational Cognition. 3 Credits.

The emerging field of collective cognition in organizations, including theoretical foundations and seminal and current literature on knowledge structures and their role in strategy formation, organizational change, and sensemaking.

HOL 8742. Work, Identity, and Adult Development. 3 Credits.

The influence of work on identity, intellectual and personality development, and other developmental attributes. Same as CNSL 8253/HDEV 8253.

HOL 8746. Work Groups and Teams in Organizations. 3 Credits.

Theoretical understanding and practical considerations of working with groups and teams. Group dynamics, facilitating and leading groups, and member roles. Group facilitation techniques across different group settings and environments.

HOL 8997. Preparation and Delivery of Doctoral Research. 3 Credits.

Students develop and present a mock dissertation proposal, receiving feedback from faculty and colleagues in order to refine their proposal. Prerequisites: none. Recommended background: Students are expected to have developed a literature review, conceptual framework, and research question for their dissertation research prior to enrolling in this class.

HOL 8998. Predissertation Seminar. 3-6 Credits.

Platform for further development of the dissertation proposal.

HOL 8999. Dissertation Research. 3,6 Credits.

Prerequisite: HOL 8998.

SPECIAL EDUCATION AND DISABILITY STUDIES

GRADUATE

Graduate certificates

- Autism Spectrum Disorders (<http://bulletin.gwu.edu/education-human-development/certificate/autism-spectrum-disorders/>)
- Brain Injury: Educational and Transition Services (<http://bulletin.gwu.edu/education-human-development/certificate/brain-injury-educational-transition-services/>)
- Special Education for Culturally and Linguistically Diverse Learners (<http://bulletin.gwu.edu/education-human-development/certificate/special-education-culturally-linguistically-diverse-learners/>)

- Transition Special Education (<http://bulletin.gwu.edu/education-human-development/certificate/secondary-special-education-transition-services/>)

Master's programs

- Master of Arts in Education and Human Development in the field of early childhood special education (p. 643)
- Master of Arts in Education and Human Development in the field of interdisciplinary secondary transition services (p. 648)
- Master of Arts in Education and Human Development in the field of secondary special education (p. 654)
- Master of Arts in Education and Human Development in the field of special education for children with emotional and behavioral disabilities (p. 654)
- Master of Arts in Education and Human Development in the field of special education for culturally and linguistically diverse learners (p. 655)
- Master of Arts in Education and Human Development individualized program (p. 637)

Post-master's program

- Education Specialist in the field of special education (p. 660)

Doctoral program

- Doctor of Education in the field of special education (p. 665)

FACULTY

Professor M. Freund

Associate Professors J. Frey, L. Rice (*Chair*), E. Tuckwiller (*Assistant Chair*)

Assistant Professors D. Gresham, K. Ihrig, J. Kester

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

SPED 0920. Continuing Research - Master's. 1 Credit.

SPED 0940. Continuing Research - Doctoral. 1 Credit.

SPED 5099. Variable Topics. 1-99 Credits.

SPED 6100. Selected Topics. 1-12 Credits.

Topics and fees announced in the Schedule of Classes. Credit cannot be earned for this course and CNSL 6100, CPED 6100, CPED 6199.

SPED 6101. Research and Independent Study. 1-3 Credits.

Individual study or research under guidance of staff member. Permission of the advisor required prior to enrollment. May be repeated for credit.

SPED 6201. Overview and Legal Issues in Educating Exceptional Learners. 3 Credits.

Survey course to acquaint prospective teachers with special education and to help them become aware of the various educational modifications necessary to accommodate children with special needs in a school program.

SPED 6202. Research and Current Trends in Special Education: Teacher Decision Making. 3 Credits.

Using a data-driven framework for assessing evidence-based practices in special education and competency in understanding, collecting, analyzing, and communicating relevant data.

SPED 6203. Research and Practice: Diagnostic Reading for Exceptional Learners. 3 Credits.

Understanding the reading process and knowledge of diagnostic measures and instructional interventions to promote reading competency for students with disabilities.

SPED 6210. Universal Design for Learning and Assessment. 3 Credits.

Overview and introduction to universal design for learning, including contemporary issues, applications of digital and assistive technologies, and tools for developing a comprehensive plan for implementation.

SPED 6214. Applied Research in Secondary Transition Practices. 3 Credits.

Students develop applied research knowledge and skills in the field of secondary transition; evaluate evidence-based transition practices to ensure positive post-school outcomes of youth with disabilities; and conduct, evaluate, and use inquiry to guide professional practices and interventions.

SPED 6221. Accessing Community Systems for Individuals with Disabilities. 3 Credits.

Overview of access to community systems and service delivery for individuals with special needs and their families. Material fee.

SPED 6222. Legal Issues and Public Policy for Individuals With Disabilities. 3 Credits.

Examination, interpretation, and analysis of legislation and policies affecting the education and career development of individuals with disabilities. Emphasis on federal legislation in the context of national policy reform in disability services. Material fee.

SPED 6223. Introduction to Brain Injury: Programs, Policies, and Resources. 3 Credits.

An overview of acquired brain injury and its effects; current trends in the field, related policy, research, and development of new resources.

SPED 6224. Brain Function and Impact of Brain Injury on Learning and Education. 3 Credits.

Provides an in-depth understanding of neuroanatomy related to the impact of brain injury on child and adolescent development and learning to prepare educators to participate in educational assessment and planning.

SPED 6227. Technology in Vocational Evaluation. 3 Credits.

Introduction to an array of assistive technology services and products facilitating professional interventions and vocational evaluation procedures; application to the assessment of persons with disabilities. Material fee.

SPED 6228. Community-Based Assessment and Work Sample Development. 3 Credits.

Introduction to community-based vocational appraisal methods; development of job training analysis skills, labor market surveys, work samples; requirements of The Americans with Disabilities Act; incorporation of assistive technology; classroom theory and field work. Material fee.

SPED 6229. Interpretation and Application of Academic and Vocational Assessment Information. 3 Credits.

Specific strategies and techniques to analyze, interpret, and synthesize assessment information for the development of comprehensive academic/vocational profiles for adolescents and adults with disabilities. Observation and recording procedures, report development, and postassessment conferencing are emphasized. Material fee.

SPED 6230. Vocational Assessment of Individuals with Disabilities. 3-6 Credits.

Investigation of vocational appraisal processes and techniques for individuals with disabilities. Includes assessment for transition using field-based assignments. Three credits of practicum experience for students specializing in vocational evaluation. Material fee. Same as CNSL 6130.

SPED 6231. Curriculum and Instructional Methods in Special Education and Transition. 3 Credits.

Techniques and processes used in programming for the needs of individuals with disabilities as they prepare for inclusion at the secondary level, transition to postsecondary programs, and employment; skills related to professional liaison and support roles in the design of curriculum and instructional strategies for students with disabilities. Material fee.

SPED 6232. Foundations in Special Education, Career Development, and Transition. 3 Credits.

Overview of historical, theoretical, and philosophical foundations of career development and transition. Explores directions for career development/transition practices in the context of educational reform and social and political change. Material fee.

SPED 6233. Curriculum in Special Education. 3 Credits.

Theory and practice in planning, implementing, and evaluating curriculum for individuals with disabilities; techniques for modifying curriculum and materials for individualized programming. Field-site curriculum implementation is required. Materials fee.

SPED 6234. Seminar in Advanced Writing and Professional Presentation. 3-6 Credits.

Analysis and development of advanced professional writing skills, including literature synthesis, persuasive writing, and proposal writing. Material fee.

SPED 6235. Employment Models for Individuals with Disabilities. 3 Credits.

Rationale, occupational resources, and programming strategies for job placement and the development and coordination of employment programs for individuals with disabilities. Material fee.

SPED 6236. Introduction to Career and Career-Technical Education and Transition Services. 3-6 Credits.

Introduction to programs and services that provide career development and transition planning for individuals with disabilities. Material fee.

SPED 6237. Learning Strategies, Assessment, and Instruction for Individuals with Learning Disabilities. 3-6 Credits.

Theory and practice in evidence-based reading interventions. Learning strategies; content enhancement focused on literacy and self-determination. Material fee.

SPED 6238. Issues in Educating Individuals with Learning, Emotional, and Intellectual Disabilities. 3 Credits.

Introduction to the academic, cognitive, social, and emotional characteristics of individuals with learning disabilities; etiological theories; educational service delivery models, with particular emphasis on the adolescent with learning disabilities. Policy issues, continuum of services, and the transition from school to post-school environments. Material fee.

SPED 6239. Teaching and Collaboration for Professionals Working with Students with Disabilities. 3 Credits.

Attitudes and beliefs regarding team teaching, collaboration, and inclusionary environments; interpersonal communication, the dynamics of collaborative teams, and environments in which special educators work. Materials fee.

SPED 6240. Family Support and Guidance in Special Education. 3 Credits.

The developmental process of parenting and how that process is affected by having a child with developmental delay or disability. Family systems theory, stress and coping mechanisms, and communication and support strategies. Material fee.

SPED 6242. Neurodevelopmental Assessment and Programming for Infants and Toddlers with Disabilities. 3 Credits.

Application of the neurodevelopmental model to techniques for developing and implementing educational programs for infants and toddlers with disabilities. SPED 6263 or SPED 6268 may be taken as a corequisite. Material fee. Prerequisites: SPED 6263 or SPED 6268; or permission of the instructor.

SPED 6243. Developmental Assessment of Infants. 3 Credits.

Theory and current practice in the assessment of infants with or at risk for developmental disabilities. Material fee.

SPED 6244. Ethical Considerations in Neonatal and Infant Intervention. 3 Credits.

Overview of the major ethical issues involved in neonatal and infant intervention. The impact of recent and emerging technological innovations considered from medical, legal, ethical, and psychosocial perspectives. Material fee.

SPED 6245. Developmental Implications of Prematurity and Risk. 3 Credits.

Causes of prematurity. Conditions that place children at developmental and educational risk.

SPED 6253. Introduction to Autism Spectrum Disorders. 3 Credits.

Overview of autism spectrum disorders with a focus on etiology, characteristics, and evidence-based practices. Topics include defining, assessing, accommodating, and instructing students with autism spectrum disorders.

SPED 6254. Autism Spectrum Disorders and Transition to Employment and Post-Secondary Life. 3 Credits.

The policies, principles, models, and processes involved in job development, job accommodations and modifications, and employment and post-secondary placement services for individuals with autism and related disabilities. Legislation is reviewed in terms of its impact on placement of persons with autism who transition into the workplace and/or post-secondary education.

SPED 6255. Collaboration with Systems and Families. 3 Credits.

Overview of models and strategies for coordinating services across disciplines and among school and community agencies for special populations. Emphasis on interdisciplinary team coordination, communication, decision making, planning, and follow-up for individuals with disabilities. Material fee.

SPED 6260. Developmental Assessment in Special Education. 3 Credits.

Key issues of effective collaboration, culture, and school-family partnerships in special education explored through a framework of educational research best practice.

SPED 6261. Practicum: Methods and Materials for Young Children with Disabilities. 3,6 Credits.

Implementation of educational strategies and materials, including designing and developing teaching materials, classroom teaching, feedback and evaluation with professor. A seminar accompanies this clinical experience.

SPED 6262. Formal Assessment of Young Children with Disabilities. 3 Credits.

Weekly seminar designed to prepare early childhood special educators to translate formal assessment data into instructional programming. Requires fieldwork with children. Material fee. Prerequisite: SPED 6260 .

SPED 6263. Development of the Infant with Special Needs. 3 Credits.

The processes of normal infant development and interrelationships among areas of development; relationship of these processes to the growth and development of infants with or at risk for developmental disabilities. Material fee.

SPED 6264. Medical and Genetic Conditions of Infants and Children with Developmental Disabilities. 3 Credits.

Introduction to medical and genetic conditions that affect the cognitive, language, and social development of infants and children with developmental disabilities.

SPED 6266. The Development of Language and Literacy. 3 Credits.

Within the context of typical and atypical development, the impact of various disabilities on language and literacy development. Material fee.

SPED 6267. Instructional and Assistive Technology in Early Childhood Special Education. 2,3 Credits.

Instructional strategies and assistive technology and their implications and uses for young children (0 to 5 yrs) in a wide variety of environments. Lectures, laboratory, and demonstrations. Material fee.

SPED 6268. Development of Children and Youth with Disabilities. 3 Credits.

Theories of human growth and development are considered as a framework for examination of typical and atypical development of children and youth. Material fee.

SPED 6269. Etiology, Symptomatology, and Approaches to Intervention with Children with Disabilities. 3 Credits.

An in-depth examination of the causes and characteristics of various disabilities. Current principles and approaches to intervention are examined. Material fee.

SPED 6272. Strategies for Inclusion: Addressing the Needs of Diverse Learners. 3 Credits.

Strategies by which teachers can more effectively assume the responsibility to serve all children in an inclusionary setting, including those who are second language learners and students with disabilities. Same as CPED 6172. Material fee.

SPED 6273. Impact of Culture on Education. 3 Credits.

The impact of culture and ethnicity on educational experiences. The relationship between school culture in the United States, one's own culture(s), and the cultures of diverse populations existing within our schools. Values, norms, rules, ethics, beliefs, attitudes, expectations, and assumptions of various cultures. Material fee.

SPED 6274. In-Service Planning/Programmng. 3 Credits.

SPED 6275. The Culturally and Linguistically Diverse Student with Disabilities: Policy, Research, and Trends. 3 Credits.

Educational service delivery for the culturally and linguistically diverse student. National, state, and local policies; current research in bilingual education, special education, and bilingual special education. Same as CPED 6175. Material fee.

SPED 6276. Academic and Psychosocial Assessment of the Culturally and Linguistically Diverse Student. 3 Credits.

Issues in academic and psychosocial assessment of second language learners. The impact of second language acquisition and culture on the assessment process; differentiation between language difference and disability; IEP development; the use of interpreters and translators; the involvement of family and communities; standardized and alternative assessments; and legislative mandates. Same as CPED 6176. Material fee.

SPED 6277. Teaching Culturally and Linguistically Diverse Students with Disabilities. 3 Credits.

Methods and materials for teaching students with disabilities who are English language learners. Classroom management, instructional and assessment strategies, materials and curricula, and collaborating with families and communities to meet the cultural, linguistic, academic, social, and emotional needs of students in various settings. Material fee.

SPED 6280. Developmental Assessment of Adolescents. 3 Credits.

Formal and informal psychoeducational assessment; assessment instruments commonly used with upper-elementary, junior, and senior high school students; the writing of psychoeducational reports. Material fee.

SPED 6283. The Urban Impact on Children and Youth with Disabilities. 3 Credits.

Effects of the total environment in which inner-city children live on their ability to learn and their cognitive, social-behavioral, and physical/health development. Material fee.

SPED 6288. Characteristics of Individuals with Learning, Emotional, and Intellectual Disabilities. 3 Credits.

An in-depth examination of typical and atypical growth and development, psychiatric diagnosis and psychosocial development issues, and general and specific characteristics of the student with serious emotional disabilities. May be repeated for credit. Material fee.

SPED 6290. Affective Development and Behavior Management in Special Education. 3 Credits.

Theory, programming, and behavior management strategies from theoretical and practical points of view. Material fee.

SPED 6299. Federal Education Policy Institute. 3 Credits.

The federal role in education policymaking in the context of national, state, and local efforts to create school environments for effective learning and the promotion of social and emotional health in children and youth. Same as CPED 6199.

SPED 6990. Internship in Teaching Children with Emotional and Behavioral Disabilities: Assistant Teacher. 3-6 Credits.

The federal role in education policymaking in the context of national, state, and local efforts to create school environments for effective learning and the promotion of social and emotional health in children and youth. Same as CPED 6199.

SPED 6991. Internship in Teaching Children with Emotional and Behavioral Disabilities: Co-Teacher. 3-6 Credits.

Continuation of SPED 6990. Graduate students become the primary teaching team in the classroom with ongoing supervision. Graduate students plan and apply psychoeducational teaching strategies with children with emotional and behavioral disabilities. Refinement of instructional and behavior management strategies. Weekly seminar continues. Material fee.

SPED 6992. Behavior Management Practicum: Adolescents with Disabilities. 3 Credits.

Field-based examination of theory of behavior development and techniques for classroom management. Material fee.

SPED 6993. Internship: Teaching Young Children with Disabilities. 3,6 Credits.

Supervised internship in early childhood special education. Weekly seminar. Material fee.

SPED 6994. Internship: Early Intervention. 3-6 Credits.

Supervised internship in early intervention. Weekly seminar. Material fee.

SPED 6995. School- and Community-Based Internship in Special Education and Transition. 1-9 Credits.

A 50- to 450-hour supervised internship in school- and community-based settings involved in career, vocational, and transition services.

SPED 6996. Teaching Internship in Transition Special Education. 3-6 Credits.

Supervised teaching internship; seminar required. Permission of the instructor required prior to enrollment. Material fee.

SPED 6997. Internship in Teaching Culturally and Linguistically Diverse Students with Disabilities. 3-6 Credits.

Supervised internship and weekly seminar. A full-time, field-based teaching experience working with students with disabilities who are English language learners. Writing an appropriate IEP, interacting with families and communities, and planning and implementing instructional approaches and strategies. Material fee.

SPED 8100. Selected Topics. 1-12 Credits.

Topics and fees announced in the Schedule of Classes.

SPED 8101. Research and Independent Study. 1-3 Credits.

Individual research under guidance of a staff member. Program and conferences arranged with program advisor.

SPED 8301. Research Seminar in Special Education. 1-12 Credits.

Participation in a small group with a selected faculty member; research on and discussion of an area of common interest. Permission of the instructor required prior to enrollment.

SPED 8303. Administration and Supervision of Special Education. 3 Credits.

Philosophy and nature of special education; program organization, administration, and development. Surveying local needs; program evaluation and supervision. Permission of the instructor required prior to enrollment. Material fee.

SPED 8304. Research and Trends in Special Education. 3 Credits.

Emphasis on topical research issues, problems of conducting research, and research syntheses. Material fee.

SPED 8305. Foundations of Neuroscience in Special Education. 3 Credits.

Develops understanding of the neurological bases of sensation and perception, object recognition, control of motor action, learning and memory, emotion and language, attention, consciousness and cognitive control, and social cognition.

SPED 8306. Advanced Study in Development Science and Variance I: The Early Years. 3 Credits.

Consideration of cognitive neuroscience research on developmental issues of infancy and early years; assessment, identification, and related prevention and intervention. Prerequisite: SPED 8305.

SPED 8308. Preparation for the Professoriate in Special Education. 3 Credits.

Philosophical, ethical, and methodological aspects of personnel preparation in university and field-based programs; opportunities for practice in pedagogical design and delivery. Material fee.

SPED 8310. Advanced Study in Development Science and Variance II: The Later Years. 3 Credits.

Consideration of cognitive neuroscience research on adolescent development, including executive functioning, self-regulation, atypicality in learning, social and emotional behavior, motivation, and attention. Prerequisite: SPED 8306.

SPED 8311. Doctoral Proseminar: Scholarly Writing in Applied Settings. 3 Credits.

Professional writing enrichment course that builds upon recent approaches to scholarly writing instruction and adapts them to the level of skill required of graduate and advanced graduate students. Prerequisite: SPED 8310.

SPED 8343. Psychoeducational Diagnosis in Special Education. 3 Credits.

The range of diagnostic and intervention strategies applicable to the student who presents psychosocial and related learning difficulties. Permission of the instructor required prior to enrollment. Material fee.

SPED 8345. Consultation and the Change Process. 3 Credits.

Consultation models from organizational development, organizational psychology, and mental health applied to professional practice in education and special education. Material fee.

SPED 8352. Disability and Public Policy. 3 Credits.

Overview of current legislation and public policy affecting education, employment, and civil rights of individuals with disabilities. The evolution of disability policies and their relationship to principles of social justice. Material fee.

SPED 8353. Post-Master's Internship in Special Education. 1-6 Credits.

Supervised professional internship in college teaching, administration, supervision, research, or policymaking. Internships are individually arranged. Permission of the instructor required prior to enrollment.

SPED 8354. Doctoral Internship: Special Education. 1-6 Credits.

Supervised professional internship in research college teaching, administration, policymaking, or private agency function. Permission of the advisor required prior to enrollment.

SPED 8360. Interdisciplinary Techniques in the Diagnostic Process in Special Education. 3 Credits.

Application of theoretical concepts of assessment; development of assessment programs; interpretation and application of interdisciplinary diagnostic evaluations. Material fee. Prerequisites: SPED 6260 and permission of the instructor.

SPED 8998. Doctoral Seminar in Special Education. 3-6 Credits.

Review of literature in a topical area; preparation of a dissertation proposal and a manuscript of publishable quality. Permission of the instructor and major advisor required prior to enrollment. Material fee.

SPED 8999. Dissertation Research. 3,6 Credits.

Prerequisite: SPED 8998.

MASTER'S PROGRAMS

Master of Arts in Teaching

- Master of Arts in Teaching in the field of museum education (p. 656)

Master of Education

- Master of Education in the field of elementary education (p. 635)

- Master of Education in the field of secondary education (p. 636)

Master of Arts in Education and Human Development

- Master of Arts in Education and Human Development individualized program (p. 637)
- Master of Arts in Education and Human Development in the field of assessment, testing, and measurement in education (p. 637)
- Master of Arts in Education and Human Development in the field of clinical mental health counseling (p. 638)
- Master of Arts in Education and Human Development in the field of curriculum and instruction (p. 640)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in elementary education (p. 640)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in interdisciplinary studies of literacy and reading education (p. 641)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in Jewish education (p. 642)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in secondary education (p. 642)
- Master of Arts in Education and Human Development in the field of early childhood special education (p. 643)
- Master of Arts in Education and Human Development in the field of education policy studies (p. 643)
- Master of Arts in Education and Human Development in the field of educational leadership and administration (p. 644)
- Master of Arts in Education and Human Development in the field of educational technology leadership (p. 645)
- Master of Arts in Education and Human Development in the field of experiential Jewish education (p. 647)
- Master of Arts in Education and Human Development in the field of higher education administration (p. 645)
- Master of Arts in Education and Human Development in the field of interdisciplinary secondary transition services (p. 648)
- Master of Arts in Education and Human Development in the field of international education (p. 649)
- Master of Arts in Education and Human Development in the field of language education, teaching world languages K-12 licensure concentration (p. 650)
- Master of Arts in Education and Human Development in the field of language education, teaching world languages non-licensure concentration (p. 651)

- Master of Arts in Education and Human Development in the field of language education, TESOL K-12 licensure concentration (p. 651)
- Master of Arts in Education and Human Development in the field of language education, TESOL non-licensure concentration (p. 652)
- Master of Arts in Education and Human Development in the field of organizational leadership and learning (p. 652)
- Master of Arts in Education and Human Development in the field of rehabilitation counseling (p. 640)
- Master of Arts in Education and Human Development in the field of rehabilitation counseling with licensure eligibility (p. 640)
- Master of Arts in Education and Human Development in the field of school counseling (p. 653)
- Master of Arts in Education and Human Development in the field of secondary special education (p. 654)
- Master of Arts in Education and Human Development in the field of special education for children with emotional and behavioral disabilities (p. 654)
- Master of Arts in Education and Human Development in the field of special education for culturally and linguistically diverse learners (p. 655)

Combined programs

- Dual Bachelor of Arts with a major in English and a Master of Education in the field of secondary education with a concentration in English (p. 656)
- Dual Bachelor of Arts with a major in history and a Master of Education in the field of secondary education with a concentration in social studies (p. 656)
- Dual Bachelor of Arts with a major in Spanish and Latin American languages, literatures, and cultures, and Master of Education in secondary education with a concentration in foreign language education (p. 657)
- Dual Master of Arts in Education and Human Development in the field of curriculum and instruction with a concentration in elementary education and Graduate Certificate in incorporating international perspectives in education (IIPE) (p. 657)
- Dual Master of Arts in Education and Human Development in the field of curriculum and instruction with a concentration in secondary education and Graduate Certificate in incorporating international perspectives in education (IIPE) (p. 657)
- Dual Master of Arts in Education and Human Development in the field of curriculum and instruction with a concentration in elementary education and Graduate Certificate in TESOL (p. 657)
- Dual Master of Arts in Education and Human Development in the field of curriculum and instruction with a concentration in secondary education and Graduate Certificate in TESOL (p. 658)
- Dual Master of Arts in Education and Human Development in the field of International Education and Graduate

Certificate in assessment, testing, and measurement (ATM) (p. 658)

- Dual Master of Arts in Education and Human Development in the field of international education and Graduate Certificate in incorporating international perspectives in education (IIPE) (p. 658)
- Dual Master of Arts in Education and Human Development in the field of international education and Graduate Certificate in TESOL (p. 658)
- Dual Master of Business Administration and Master of Arts in Education and Human Development in the field of higher education administration (p. 585)
- Joint Master of Arts in Education and Human Development in the field of education policy studies and Juris Doctor (p. 659)
- Joint Master of Arts in Education and Human Development in the field of higher education administration and Juris Doctor (p. 659)

MASTER OF EDUCATION IN THE FIELD OF ELEMENTARY EDUCATION

The master of education in the field of elementary education degree program is designed for those with an undergraduate degree in the arts and sciences. The program includes coursework for students who wish to become eligible for licensure/certification for teaching at the elementary school level (grades 1 to 6). Additional coursework in content areas may be needed to meet specific jurisdictional requirements for licensure/certification.

Visit the program website (<http://gsehd.gwu.edu/programs/elementary-education/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits in required courses and successful completion of a master's comprehensive examination.

Code	Title	Credits
Required		
Foundations		
CPED 6604	Perspectives in American Education	
CPED 6606	Theories of Learning and Development	
CPED 6608	Development and Diversity	
SPED 6290	Affective Development and Behavior Management in Special Education	
Methodology		

CPED 6410	Reading Children's Literature across the Curriculum
CPED 6412	Elementary School Curriculum and Methods (Math)
CPED 6412	Elementary School Curriculum and Methods (Science)
CPED 6412	Elementary School Curriculum and Methods (Language Arts)
CPED 6412	Elementary School Curriculum and Methods (Social Studies)
CPED 6623	Foundations of Reading Development
EDUC 6114	Introduction to Quantitative Research
Internship	
CPED 6635	Professional Internship in Elementary Education (taken for 6 credits)

Successful completion of comprehensive examination.

MASTER OF EDUCATION IN THE FIELD OF SECONDARY EDUCATION

Graduate students become part of a diverse community of scholars and teachers dedicated to the improvement of teaching and learning in public schools. The Graduate School of Education and Human Development's secondary education program opens the door to a broad range of teaching possibilities. A variety of concentrations are available: Languages: Arabic; Chinese; French; German; Latin; Spanish; Russian Humanities: English; English as a Second Language; Social Studies Math and Sciences: Biology; Chemistry; Computer Science; General Science; Mathematics; Physics The program is approved by the State Education Agency-Board of Education of the District of Columbia and is part of the GSEHD unit accredited by the National Council for Accreditation of Teacher Education (NCATE). The program offers many regional partnerships and opportunities for tuition assistance, flexible scheduling and self-paced learning.

Visit the program website (<http://gsehd.gwu.edu/programs/secondary-education/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits (36 credits for the ESL concentration), including the required core courses and all courses and elective credits indicated in one concentration.

In addition, all students must complete a teaching portfolio and the relevant teacher licensure assessments, the latter of which

are required by the District of Columbia Educator Licensure Services Office.

Code	Title	Credits
Required core		
CPED 6339	Teachers as Researchers	
CPED 6340	Teacher Leadership in Education	
CPED 6507	Instructional Models and Classroom Management	
CPED 6606	Theories of Learning and Development	
CPED 6608	Development and Diversity	
6 credits in one or 3 credits in both of the following courses:		
CPED 6532	Professional Internship in Middle School Education	
CPED 6534	Professional Internship in Secondary Education (taken twice)	

Concentrations

ESL concentration		
Required		
CPED 6176	Academic and Psychosocial Assessment of the Culturally and Linguistically Diverse Student	
CPED 6551	Second Language Instructional Methods	
CPED 6556	Linguistic Applications in English as a Second Language	
CPED 6557	Second Language Acquisition	
CPED 6627	Teaching Second Language Reading and Writing	

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT, INDIVIDUALIZED PROGRAM

The master of arts in education and human development individualized degree program provides students with an opportunity to develop a program of study that cuts across existing fields, both within the Graduate School of Education and Human Development (GSEHD) and between GSEHD and other schools and departments of the University as well as the Consortium of Universities. It is designed to meet specific career and professional objectives of applicants who have unique needs. The flexible program structure can be tailored to prepare for new and emerging fields in education and human development. This program is available (with program advisor approval) within or across the five departments within GSEHD.

Visit the Graduate School of Education and Human Development website (<https://gsehd.gwu.edu/programs/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits distributed as outlined below, with the approval of the faculty program advisor:

Code	Title	Credits
3 credits in research courses		
27 credits in courses that meet student's program goals and objectives		
All work toward the degree must be specified at the time the initial program is developed.		

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF ASSESSMENT, TESTING, AND MEASUREMENT IN EDUCATION

Develop the expertise to analyze fifth graders in a school district, all workers at a company, everyone taking a graduate entrance exam, or a sampling of patients in a counseling lab. Assessment, testing, and measurement (ATM) in education combines statistical analysis, testing theory, the study of human behavior, educational measurement, and evaluation into the science of measuring educational/behavioral factors such as learning, preference, aptitude, and personality. Specialists in this field (psychometricians) design tests that collect empirical data and quantify the personal characteristics of individuals, comparing those results within or across populations.

Code	Title	Credits
Foreign language concentration		
Required

Social studies concentration		
Required		
CPED 6548	Teaching Social Studies in Secondary Schools	
CPED 6691	Interdisciplinary Adolescent Literacies	
Electives		
3 credits of elective courses selected in consultation with program advisor		

This master's program is designed for individuals who are entering or advancing in positions associated with assessment, testing, and measurement in diverse settings. The program offers some of the nation's premier graduate training in psychometric and statistical methods taught by faculty who are engaged in world-class research. Students are provided mentorship through all phases of the research process and become trained in modern analytical methods.

Visit the program website (<http://gsehd.gwu.edu/programs/assessment-testing-and-measurement-education/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 24 credits in required courses, 6 credits in elective courses, and completion of a written qualifying examination.

Code	Title	Credits
Required		
EDUC 6112	Foundations of Assessment, Testing, and Measurement in Education	
EDUC 8120	Group Comparison Designs and Analyses	
EDUC 8170	Educational Measurement	
EDUC 8171	Predictive Designs and Analyses	
EDUC 8175	Item Response Theory	
EDUC 8177	Assessment Engineering	
EDUC 8179	Capstone Project in Assessment, Testing, and Measurement in Education (taken for 6 credits)	
Electives		
6 credits in approved electives		
Elective courses should be selected in consultation with the program advisor.		
A written qualifying exam (administered during the early spring semester by an ATM committee).		

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CLINICAL MENTAL HEALTH COUNSELING

One of the first programs of its kind, this course of study prepares students to work in social services agencies,

employment centers and substance abuse programs. It takes an integrated approach to counseling research and practice.

The course of study includes classroom, laboratory and field-site education and training. The program includes a two-semester internship. Interns deliver counseling services, under supervision, both in the program's Community Counseling Services Center and at health and human services agencies in the community.

Visit the program website (<http://gsehd.gwu.edu/programs/clinical-mental-health-counseling/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 60 credits, including 57 credits in required courses and 3 credits in elective courses; completion of 600 hours in internships and 100 hours in a practicum; and successful completion of a pre-practicum portfolio and a comprehensive examination.

Code	Title	Credits

Elective

3 credits in elective courses selected in consultation with the program advisor.

Portfolio and comprehensive examination requirements

Successful completion of pre-practicum portfolio requirements as outlined in the counseling and human development master's student handbook.

Successful completion of the counselor preparation comprehensive examination.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF REHABILITATION COUNSELING WITH LICENSURE ELIGIBILITY

For those facing physical, mental, emotional, or social challenges, rehabilitation counselors offer hope and empowerment. For individuals and their families, these counselors serve as a source of personal support and guidance thus enhancing their quality of life. Ranked 3rd in the nation by U.S. News and World Report and accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP), GW's Rehabilitation Counseling with Licensure Eligibility program prepares you to become a skillful Rehabilitation Counselor.

Through intensive coursework, practicum and internship experiences in federal, state, and private settings, and mentoring relationships, you will be able to integrate the critical knowledge and clinical skills necessary to be fully prepared for professional practice. This program encompasses a wide range of counseling theories and practices, including multicultural counseling, attitudinal and environmental barriers for people with disabilities, rehabilitation services, case management, medical and psychosocial aspects of disability, job placement and ethical standards for rehabilitation counselors. Graduates of this program are eligible to apply for licensure and for Certification as a Rehabilitation Counselor (CRC), as well as both public and private employment opportunities. While in the program, students participate in GW's mentorship program. This program pairs you with program graduates who are now working in a variety of

industries to help you network while you engage in first-hand learning.

Visit the program website (<https://gsehd.gwu.edu/programs/masters-rehabilitation-counseling-licensure-eligibility/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 60 credits in required courses. In addition, students are required to complete 600 hours in internships (300 hours in each of CNSL 6185 and CNSL 6186) and 100 hours as part of a practicum.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION

The program examines research and reflective practice related to curriculum, teaching and learning, teacher education and broader educational policies. The program applies curriculum and instruction research and practice in the context of educational reform for diverse student populations. Students become part of a community that links scholars with practicing professionals, policymakers and educational organizations. Master's degree students may choose to work toward improving their practice or conduct research within subject domains of K-12 curriculum or with a concentration in elementary education, reading and literacy, or secondary education.

Visit the program website (<https://gsehd.gwu.edu/programs/masters-curriculum-and-instruction/>) for additional information.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION WITH A CONCENTRATION IN ELEMENTARY EDUCATION

The dual master of arts in education and human development in the field of curriculum and instruction with a concentration in elementary education and graduate certificate in teaching English to speakers of other languages (TESOL) program prepares teachers and other educational personnel for increased responsibilities in the planning, implementation, research, and evaluation of curriculum and instruction. The program of study includes curriculum development, research and evaluation of instructional practice, teacher education, work with special populations, and school policy and leadership. The 12 credits earned in the certificate program may be applied toward the master's. The addition of

the TESOL certificate is designed to prepare pre-service and in-service teachers for working with English learners in classrooms in and beyond the United States.

Visit the program website (<http://gsehd.gwu.edu/programs/masters-curriculum-and-instruction/>)for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 9 credits in core courses, 15 credits in courses in the concentration, 9 credits in elective courses, and successful completion of the master of arts in education and human development comprehensive examination.

Code	Title	Credits

CPED 6606	Theories of Learning and Development	
EDUC 6615	Internationalizing U.S. Schools	
Electives		
9 credits in elective courses selected in consultation with the program advisor.		
Other requirements		
Successful completion of the master of arts in education and human development comprehensive examination.		

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION WITH A CONCENTRATION IN INTERDISCIPLINARY STUDIES OF LITERACY AND READING EDUCATION

The master of arts in education and human development in the field of curriculum and instruction with a concentration in interdisciplinary studies of literacy and reading education degree program prepares teachers, education professionals, and others with diverse experiences for leadership roles in school and out-of-school settings. The program incorporates traditional and novel contemporary aspects of literacy curriculum and instruction and provides pathways to becoming reading specialists and literacy coaches. Study in theories and practices in the arts, humanities, museums and informal

learning environments, and digital technologies prepares educators for new teaching and learning opportunities.

Visit the program website (<http://gsehd.gwu.edu/programs/masters-curriculum-and-instruction/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 9 credits in core course, 21 credits in courses in the concentration, successful completion of the master of arts in education and human development comprehensive examination, and completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office.

CPED 6628	Literacies in Informal Learning Environments	
CPED 6691	Interdisciplinary Adolescent Literacies	
Other requirements		
Successful completion of the master of arts in education and human development comprehensive examination.		

Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION WITH A CONCENTRATION IN JEWISH EDUCATION

The master of arts in curriculum and pedagogy with a concentration in Jewish education prepares pre-service and in-service educators to master curriculum development and teaching strategies generally and in the specific disciplines of Bible, rabbinics, and Jewish history. The program also includes research in Jewish experiential education with an understanding that successful educators appreciate educational growth inside and beyond the classroom. The degree offers internship opportunities to help students integrate and implement their learning with their practice while benefiting from mentor evaluation and assessment. Students also have elective options to develop arenas of specific interest. This program does not lead to teacher licensure.

Visit the program website (<https://gsehd.gwu.edu/programs/masters-curriculum-and-instruction/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 9 credits in core courses, 18 credits in courses in the concentration, 3 credits in elective courses, and successful completion of the master of arts in education and human development comprehensive examination.

Code	Title	Credits
Jewish education concentration		
CPED 6131	Teaching Jewish History to Middle and High School Students	
CPED 6132	Strategies for Teaching Biblical Texts	
CPED 6133	Rabbinic Judaism and the Teaching of Rabbinic Texts	
CPED 6134	Practicum in Jewish Education (taken for 2 credits)	
CPED 6305	Foundations of Curriculum Theory	
EDUC 6803	Introduction to Experiential Jewish Education (taken for 4 credits)	
Electives		
3 elective credits selected from the following in consultation with the advisor:		

CPED 6606	Theories of Learning and Development
EDUC 6630	International Experiences
HDEV 6109	Child Development
HDEV 6110	Adolescent Development

Comprehensive examination

Successful completion of the master of arts in education and human development comprehensive examination.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION WITH A CONCENTRATION IN SECONDARY EDUCATION

The master of arts in education and human development in the field of curriculum and instruction with a concentration in secondary education degree program prepares teachers and other educational personnel for increased responsibilities in the planning, implementation, research, and evaluation of curriculum and instruction. The program of study includes curriculum development, research and evaluation of instructional practice, teacher education, work with special populations, and school policy and leadership.

Students in this program also can enroll in and receive a graduate certificate in either:

- Incorporating International Perspectives in Education (IIPE) (p. 672) or
- Teaching English Speakers of Other Languages (TESOL) (p. 676).

Certain credits are applied toward both the master's degree and the certificate.

Visit the program website (<https://gsehd.gwu.edu/programs/masters-curriculum-and-instruction/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 9 credits in core courses, 27 credits in the concentration, and successful completion of a comprehensive examination.

Code	Title	Credits
Secondary education concentration		
CPED 6305	Foundations of Curriculum Theory	

The remaining 21 credits should be selected in consultation with the departmental advisor.

Master of Arts in Education and Human Development comprehensive exam required.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EARLY CHILDHOOD SPECIAL EDUCATION

The early childhood special education program offers a non-categorical program that prepares students to work with children who are typically developing, those with disabilities and their respective families. Graduates who focus on the birth-to-age-3 group work in home-based early intervention programs, Early Head Start or developmental clinics, and can pursue a concentration in infant special education. A 3-to-5-year-old focus prepares graduates to teach special education preschool or Head Start or to consult with community-based inclusive preschools. Those interested in teaching kindergarten through third grade are prepared to work in special education resource rooms or inclusive classrooms.

Program graduates meet the competencies recommended by NAEYC and DEC in the following areas:

- Child development and learning
- Curriculum development and implementation
- Working with families
- Assessment of young children
- Cultural, linguistic and economic diversity
- Assistive and instructional technology
- A concentration in infant special education is also offered.

Visit the program website (<http://gsehd.gwu.edu/programs/masters-early-childhood-special-education/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 39 credits. Successful completion of the master of arts in education and human development comprehensive examination and completion of the relevant teacher licensure assessments (see below) are required.

Code	Title	Credits
Core		
EDUC 6114	Introduction to Quantitative Research	

SPED 6222 Legal Issues and Public Policy for Individuals With Disabilities

SPED 6260 Developmental Assessment in Special Education

SPED 6262 Formal Assessment of Young Children with Disabilities

SPED 6993 Internship: Teaching Young Children with Disabilities (taken for six credits)

Master of Arts in Education and Human Development comprehensive exam required

Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EDUCATION POLICY STUDIES

The program is designed for students who wish to develop skills in policy research, program evaluation, and the technical, political, and managerial aspects of education policy. Emphasis is placed on developing both an understanding of the political and social environments affecting education policy and the competencies needed to develop policy options, analyze their potential, select the most promising, implement policies effectively, and evaluate impacts. Internships are offered in a variety of federal, state, and local agencies. The 36-credit-hour program includes 12 elective credits that can be used

for courses, independent research, and internships in federal, state, or professional organizations.

Visit the program website (<http://gsehd.gwu.edu/programs/masters-education-policy-studies/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 24 credits in required courses and 12 credits in elective courses.

12 credits in elective courses selected in consultation with the program advisor.		

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EDUCATIONAL LEADERSHIP AND ADMINISTRATION

GW's educational leadership and administration program has garnered national recognition from the Educational Leadership Constituent Council (ELCC) and is nationally accredited and

recognized as a program of distinction by the National Council for Accreditation of Teacher Education (NCATE).

The program has been designed for the working professional in the K-12 arena and diverse school communities interested in various school-based and central office leadership and supervisory positions, increased responsibility in teaching, and advanced levels of professional responsibility.

The program is designed to meet the required credits, courses, and field experiences that are part of the administrative licensure process in the District of Columbia, Commonwealth of Virginia, and many other states. Graduates are prepared for positions of assistant principal, principal, and instructional supervision.

Visit the program website (<http://gsehd.gwu.edu/programs/educational-leadership-administration-0/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits in required courses.

Code	Title	Credits
Required		
EDUC 6114	Introduction to Quantitative Research	
EDUC 6232	Supervision of Curriculum, Instruction, and Assessment

EDUC 6287	Internship: Administration (taken for 3 credits)	

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EDUCATIONAL TECHNOLOGY LEADERSHIP

The program is founded on three beliefs: that leadership skills and technological competence are fundamental to the appropriate and successful utilization of technologies in educational settings; that access to the requisite knowledge should be universal, despite the barriers of distance, personal physical limitations and lifestyle; and that educational technologies focus on improving human performance and learning. The program is guided by commitment to continuing improvement as technology changes through:

- The development and delivery of effective distance education methods
- Support services for the distance-learning community
- Influence upon the creation of knowledge and practices
- The development of leaders in the global expansion of educational technology
- Emphasis on the interaction of individual, corporate, governmental and educational interests.

Visit the program website (<http://gsehd.gwu.edu/programs/educational-technology-leadership/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 24 credits in required courses and 12 credits in elective courses.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF HIGHER EDUCATION ADMINISTRATION

Students in the master's program in higher education administration (HEA) acquire the skills and knowledge needed for success in their chosen field. They undertake coursework, internships and other professional opportunities.

The HEA master's program is designed to provide students with the skills and knowledge for successful work in entry- and mid- career professional positions in institutions of higher education, post-secondary education and other related organizations. Students participate in active coursework, field-experiences/internships, and other professional opportunities so that they may become engaged and thoughtful practitioners in higher education and student affairs. To prepare students for professional requirements, the master's program provides four concentrations in student affairs administration, higher education policy & finance, college & university administration, and international higher education.

Students in the master's program acquire the skills and knowledge needed for success in their chosen field. They undertake coursework, internships and other professional opportunities.

Visit the program website (<http://gsehd.gwu.edu/programs/higher-education-administration-0/>) for additional information.

ADMISSIONS

Admission Fall - Rolling admissions (January 15 to be
deadlines: considered for merit-based tuition support)

Standardize test scores: Either the GRE general test (institutional code 5246) or the Miller Analogies Test (institutional code 1047) is required. May be waived for applicants with a cumulative undergraduate GPA of 3.3 or above.

Recommendations: Two (2) recommendations (preferably one from a faculty member and the other from a professional supervisor) required:

Prior academic records: Transcripts are required from all colleges and universities attended, whether or not credit was earned, the program was completed, or the credit appears as transfer credit on another transcript. Unofficial transcripts from all colleges and universities attended should be uploaded to your online application. Official transcripts are required only of applicants who are offered admission.

Transcripts from institutions outside the United States must be accompanied by an official transcript evaluation from an accredited independent evaluating agency. Please be sure you request a detailed evaluation that includes all course titles, credit hours, grade-point average (GPA), United States degree equivalency, and date of degree conferral. Please see the list of acceptable foreign credential evaluation services.

Statement of purpose: In an essay of 250 to 500 words, state your purpose in undertaking graduate study at George Washington University, describing your academic objectives, research interests, and career plans. Also discuss your related qualifications, including collegiate, professional, and community activities and any other substantial accomplishments not already mentioned in the application.

Additional requirements: A resumé is required.

International applicants only: Please review International Applicant Information (<https://graduate.admissions.gwu.edu/international-student-application-requirements>) (<https://graduate.admissions.gwu.edu/international-student-application-requirements/>) carefully for details on required documents, earlier deadlines for applicants requiring an I-20 or DS-2019 from GW, and English language requirements.

Supporting documents not submitted online should be mailed to:

Office of Graduate Admissions
Graduate School of Education and Human Development
The George Washington University
2136 G Street, NW
Washington, DC 20052

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EXPERIENTIAL JEWISH EDUCATION

GW's program in experiential education and Jewish cultural arts, the only master's degree of its kind in the United States, offers an intensive 13-month, cross-disciplinary curriculum in Jewish cultural arts, experiential Jewish education, and museum education. At GW, content and creativity go hand in hand.

Experiential Jewish education courses provide the tools to integrate Jewish culture and the arts into the lives of contemporary audiences. Museum education courses offer a hands-on approach to experiential education through site visits and projects.

The program prepares the next generation of professionals and cultural leaders in Jewish museums, JCCs, college campus organizations, foundations, summer camps, and Jewish cultural arts management.

Visit the program website (<http://gsehd.gwu.edu/programs/experiential-education-jewish-cultural-arts/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 9 credits in required core courses, 9 credits in specialization courses, and 12 credits in elective courses.

EDUC 6807 Fieldwork in Experiential Jewish Education

and/or 6 to 12 credits of approved professional or academic specialization courses selected in consultation with the program advisor.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF INTERDISCIPLINARY SECONDARY TRANSITION SERVICES

The online master of arts in education and human development in interdisciplinary secondary transition services prepares you to be a change agent in teaching, leadership and support roles. The master's program will also assist youth with disabilities and at-risk youth to make successful transitions through high school to post-secondary education, employment and independent adulthood.

The program meets the Transition Guideposts of the U.S. Department of Labor National Collaborative on Workforce & Disability for Youth (NCWD-Youth) and the CEC Advanced Knowledge and Skills Base for Transition Specialists (2008).

This nationally-recognized program provides critical knowledge and experience in the ever-emerging field of secondary transition based upon legislative requirements, research, and evidence-based practices. With a strong social justice focus, you are prepared to effectively lead quality

transition programs and services for all youth with disabilities in various settings.

Visit the program website (<https://gsehd.gwu.edu/programs/masters-interdisciplinary-secondary-transition-services/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 30 credits in required courses and 6 credits in a field of specialization, and successful completion of a comprehensive examination.

Code	Title	Credits
Required		
SPED 6210	Universal Design for Learning and Assessment	
SPED 6214	Applied Research in Secondary Transition Practices

SPED 6236	Introduction to Career and Career-Technical Education and Transition Services	
SPED 6255	Collaboration with Systems and Families	
SPED 6995	School- and Community-Based Internship in Special Education and Transition	
6 credits in one area of specialization:		
Acquired brain injury specialization		
SPED 6223	Introduction to Brain Injury: Programs, Policies, and Resources	
SPED 6224	Brain Function and Impact of Brain Injury on Learning and Education	
or		
Autism spectrum disorder specialization		

SPED 6253	Introduction to Autism Spectrum Disorders
SPED 6254	Autism Spectrum Disorders and Transition to Employment and Post-Secondary Life

Comprehensive examination

Successful completion of a comprehensive examination is required of all students.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF INTERNATIONAL EDUCATION

Enrolled students, representing interests as far-ranging as educational programs for children in Ghana to international study programs in Asia, learn about traditions and systems of education in other nations and cultures. They also acquire skills and experience relevant to working in these programs. A growing number of internship opportunities, both in the United States and abroad, are made available to our students, who consistently earn prestigious full-time positions after graduation. The international education program boasts highly placed alumni in organizations such as USAID, the World Bank, the Agency for Educational Development, Save the Children, the Academy for Educational Development and the Institute of International Education, as well as in governments and universities all over the world. International education program faculty regularly draws on local experts and professionals from around the District of Columbia to enhance the curriculum. The program offers expertise in three areas: education and development, global education, and international higher education.

Students in this program also can enroll in and receive a graduate certificate in either:

- Assessment Testing and Measurement in Education (p. 668)
- Incorporating International Perspectives in Education (IIPE) (p. 672) or
- Teaching English Speakers of Other Languages (TESOL) (p. 676).

Certain credits are applied toward both the master's degree and the certificate.

Visit the program website (<http://gsehd.gwu.edu/programs/international-education/>) for additional information.

REQUIREMENTS

Required: 30 credits, including 18 credits in required courses, 9 credits in courses in a specialization, and 3 credits in elective courses.

Successful completion of a portfolio, which serves as a comprehensive examination.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF ORGANIZATIONAL LEADERSHIP AND LEARNING

Students in the organizational leadership and learning master's program focus on increasing the learning capacity of individuals, teams, and organizations to optimize growth and effectiveness. In coursework, students learn about

interrelationships among people, organizations, and learning resulting in leaders with high self/others-awareness. The program includes a solid foundation in organization, leadership, and concepts with an applied emphasis. Electives are chosen with an adviser in the areas of organizational development, human performance and learning or training/development and may include two courses from other departments within the university or from the Washington Metropolitan Area Consortium of Universities.

Visit the program website (<http://gsehd.gwu.edu/programs/organizational-leadership-learning/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 21 credits in required courses and 9 credits in elective courses.

Code	Title	Credits
Required		
HOL 6700	Human Behavior and Learning in Organizations	
HOL 6701	Adult Learning	
HOL 6702	Organizational Change	
HOL 6704	Leadership in Organizations	
HOL 6709	Leadership Development	
HOL 6721	Assessing the Impact of Organizational Change Using Qualitative and Quantitative Methods	
HOL 6746	Work Groups and Teams in Organizations	
Electives		
9 credits in elective courses, selected in consultation with advisor		

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF SCHOOL COUNSELING

The master's program in school counseling includes classroom, laboratory and field-site education and training. The program also includes a two-semester internship during which interns deliver counseling services under supervision both in the program's Community Counseling Services Center, a fully equipped training facility, and at schools in the community. Accredited by the Council for the Accreditation of Counseling and Related Education Programs (CACREP) and the National

Council for the Accreditation of Teacher Education (NCATE), the program emphasizes reflective practice, innovate inquiry and responsible social action.

Visit the program website (<http://gsehd.gwu.edu/programs/school-counseling/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 60 credits, including 54 credits in required courses and 6 credits in elective courses. Three elective credits must be from either a child development or an adolescent development course.

Students also must complete 600 hours as part of the required internships (300 hours in each of CNSL 6185 and CNSL 6186) and 100 hours as part of the required practicum (CNSL 6269).

Code	Title	Credits
Required

Electives		

6 credits in elective courses selected in consultation with advisor.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF SECONDARY SPECIAL EDUCATION

GW's nationally recognized secondary special education (SSE) master's program has a strong focus on social justice, and graduates of this program are effective advocates for enhanced learning, classroom experiences, and outcomes for all students. The program focuses on preparing teachers to work in secondary (middle and high) schools and results in teacher licensure in addition to the master's degree. The SSE model is an innovative approach to prepare special education teachers who have the knowledge and skills to be psychoeducators. The program addresses teacher and student well being, efficacy, resilience, and social emotional competence, factors that lead to improved social-emotional learning and academic performance among students and teachers. The program also bridges best practice and new learning in adolescent development to optimize how teachers design and deliver innovative instruction in classrooms to maximize student engagement and learning. A small cohort design provides significant mentoring and support. Graduates of this program are highly sought after for post-program employment, as well as demonstrate teacher-retention rates many times higher than the national average.

Visit the program website (<https://gsehd.gwu.edu/programs/masters-secondary-special-education/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits in required courses, successful completion of a master's comprehensive examination, and completion of the relevant teacher licensure assessments (see below).

Code	Title	Credits
Required		
SPED 6201	Overview and Legal Issues in Educating Exceptional Learners	
SPED 6203	Research and Practice: Diagnostic Reading for Exceptional Learners	
SPED 6231	Curriculum and Instructional Methods in Special Education and Transition	
SPED 6236	Introduction to Career and Career-Technical Education and Transition Services	

SPED 6238	Issues in Educating Individuals with Learning, Emotional, and Intellectual Disabilities
SPED 6239	Teaching and Collaboration for Professionals Working with Students with Disabilities
SPED 6280	Developmental Assessment of Adolescents
SPED 6288	Characteristics of Individuals with Learning, Emotional, and Intellectual Disabilities
SPED 6290	Affective Development and Behavior Management in Special Education
SPED 6992	Behavior Management Practicum: Adolescents with Disabilities
SPED 6996	Teaching Internship in Transition Special Education

Comprehensive examination

Successful completion of a comprehensive examination is required of all students.

Teacher Licensure

Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF SPECIAL EDUCATION FOR CHILDREN WITH EMOTIONAL AND BEHAVIORAL DISABILITIES

The Graduate School of Education and Human Development offers a 39-credit-hour master's degree program for teachers of students with emotional and behavioral disabilities (EBD) in a professional development school model. Graduate students complete a two-semester clinical internship at a regional partner school during the day and attend courses at night. Student interns receive intensive video supervision on site and participate in a learning community to improve outcomes of elementary-aged students with the primary diagnosis of EBD.

Visit the program website (<http://gsehd.gwu.edu/programs/special-education-children-emotional-behavioral-disorders/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 34 credits in required courses, successful completion of the master of arts in education and human development comprehensive examination, and completion of the relevant teacher licensure assessments (see below).

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF SPECIAL EDUCATION FOR CULTURALLY AND LINGUISTICALLY DIVERSE LEARNERS

The master's program in special education for culturally and linguistically diverse learners is one the few programs in the country that prepares educators to meet the cultural, language, social, and learning needs of a growing number of culturally and linguistically diverse, and/or exceptional students. The program emphasizes culturally responsive instruction, assessment and service practices in order to prepare professionals to distinguish—and differentiate appropriately—between students with a disability and students who are in the process of second language acquisition. The master's program combines 45 credit hours of coursework with field-based experience and mentoring. It is nationally recognized by NCATE and leads to K-12 certification in ESOL, special education and bilingual special education.

Visit the program website (<http://gsehd.gwu.edu/programs/special-education-culturally-linguistically-diverse-learners/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits in required courses; and successful completion of the master of arts in education and human development comprehensive examination; and completion of the relevant teacher licensure assessments (see below).

Code	Title	Credits
Required		
CPED 6551	Second Language Instructional Methods	
CPED 6556	Linguistic Applications in English as a Second Language	
CPED 6627	Teaching Second Language Reading and Writing	
EDUC 6114	Introduction to Quantitative Research	
SPED 6266	The Development of Language and Literacy	
SPED 6268	Development of Children and Youth with Disabilities

SPED 6276	Academic and Psychosocial Assessment of the Culturally and Linguistically Diverse Student (taken twice)
SPED 6277	Teaching Culturally and Linguistically Diverse Students with Disabilities
SPED 6997	Internship in Teaching Culturally and Linguistically Diverse Students with Disabilities (taken for 3 credits)
Master of Arts in Education and Human Development comprehensive exam required	

Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office

MASTER OF ARTS IN TEACHING IN THE FIELD OF MUSEUM EDUCATION

Our graduates come from diverse academic and professional backgrounds. They qualify for positions in art, history or science museums; children's museums; zoos; aquariums and historical societies or sites. With the assistance of a strong alumni base and valuable relationships with local professionals, about 85 percent of the Museum Education Program's graduates from the past decade currently hold museum education or related positions. They most often serve as directors of education, with many becoming museum directors. Graduates also hold positions in professional associations, government agencies, private foundations, schools and universities.

Visit the program website (<http://gsehd.gwu.edu/programs/museum-education/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 27 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
EDUC 6701	Museums as Institutions I: Fundamentals	
EDUC 6702	Facilitating Museum Learning I: Fundamentals	
EDUC 6703	Museum Audiences	

EDUC 6704	Facilitating Museum Learning II: Field Placement and Seminar (taken for 6 credits)
EDUC 6705	Museums as Institutions II: Field Placement and Seminar (taken for 6 credits)
EDUC 6706	Evaluating Museum Learning
EDUC 6707	Museum Proposal Writing

Electives

6 credits in elective courses.

Elective courses should be selected in consultation with the program advisor.

DUAL BA WITH A MAJOR IN ENGLISH AND MED IN THE FIELD OF SECONDARY EDUCATION WITH A CONCENTRATION IN ENGLISH

The Columbian College of Arts and Sciences and the Graduate School of Education and Human Development offer a dual bachelor of arts with a major in English (p. 248) and master of education in secondary education with a concentration in English (p. 636) degree program. The program allows students to take 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

DUAL BA WITH A MAJOR IN HISTORY AND MED IN THE FIELD OF SECONDARY EDUCATION WITH A CONCENTRATION IN SOCIAL STUDIES

The Columbian College of Arts and Sciences and the Graduate School of Education and Human Development offer a dual bachelor of arts with a major in history (p. 308) and master of education in secondary education with a concentration in social studies (p. 636) degree program. The program allows students to take 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Visit the program website (<https://gsehd.gwu.edu/programs/masters-secondary-education/>) for additional information.

DUAL BA WITH A MAJOR IN SPANISH AND LATIN AMERICAN LANGUAGES, LITERATURES, AND CULTURES AND MED IN SECONDARY EDUCATION WITH A CONCENTRATION IN FOREIGN LANGUAGE EDUCATION

Columbian College's Department of Romance, German, and Slavic Languages and Literatures and the Graduate School of Education and Human Development offer a dual bachelor of arts with a major in Spanish (p. 464) and master of education in the field of secondary education with a concentration in foreign language education (p. 636). Undergraduate students take 6 graduate credits as part of their degree program, thereby decreasing the number of credits normally required for the master's degree. Students in the combined program must complete all requirements for both degrees. By completing the requirements for the MEd, students are eligible for K-12 licensure in world language teaching, Spanish.

Students apply for and gain admission to the master's program in their junior year, assuming they are progressing satisfactorily in meeting Spanish content area requirements. Consult Spanish & Latin American Languages, Literatures & Cultures (<https://rgsll.columbian.gwu.edu/spanish/>) for more details.

DUAL MAED&HD IN CURRICULUM AND INSTRUCTION, ELEMENTARY EDUCATION CONCENTRATION, AND GRADUATE CERTIFICATE IN INCORPORATING INTERNATIONAL PERSPECTIVES IN EDUCATION

The dual master of arts in education and human development in the field of curriculum and instruction with a concentration in elementary education (p. 640) and graduate certificate in incorporating international perspectives in education (p. 672) (IIPE) program prepares teachers and other educational personnel for increased responsibilities in the planning, implementation, research, and evaluation of curriculum and instruction. The program of study includes curriculum development, research and evaluation of instructional practice, teacher education, work with special populations, and school policy and leadership. The 12 credits earned in the certificate program may be applied toward the master's. The addition of the IIPE certificate is designed to allow students to pursue individual interests while providing a foundation in internationalization as it relates to school systems and the development of curriculum in K-12 settings.

Visit the program website (<https://gsehd.gwu.edu/programs/masters-curriculum-and-instruction/>) for more details.

DUAL MAED&HD IN CURRICULUM AND INSTRUCTION, ELEMENTARY EDUCATION CONCENTRATION, AND GRADUATE CERTIFICATE IN TESOL

The dual master of arts in education and human development in the field of curriculum and instruction with a concentration in elementary education (p. 640) and graduate certificate in teaching English to speakers of other languages (p. 676) (TESOL) program prepares teachers and other educational personnel for increased responsibilities in the planning, implementation, research, and evaluation of curriculum and instruction. The program of study includes curriculum development, research and evaluation of instructional practice, teacher education, work with special populations, and school policy and leadership. The 12 credits earned in the certificate program may be applied toward the master's. The addition of the TESOL certificate is designed to prepare pre-service and in-service teachers for working with English learners in classrooms in and beyond the United States.

Visit the program website (<https://gsehd.gwu.edu/programs/masters-curriculum-and-instruction/>) for more details.

DUAL MAED&HD IN CURRICULUM AND INSTRUCTION, SECONDARY EDUCATION CONCENTRATION, AND GRADUATE CERTIFICATE IN INCORPORATING INTERNATIONAL PERSPECTIVES IN EDUCATION

The dual master of arts in education and human development in the field of curriculum and instruction with a concentration in secondary education (p. 642) and graduate certificate in incorporating international perspectives in education (p. 672) (IIPE) program prepares teachers and other educational personnel for increased responsibilities in the planning, implementation, research, and evaluation of curriculum and instruction. The program of study includes curriculum development, research and evaluation of instructional practice, teacher education, work with special populations, and school policy and leadership. The 12 credits earned in the certificate program may be applied toward the master's. The addition of the IIPE certificate is designed to allow students to pursue individual interests while providing a foundation in internationalization as it relates to school systems and the development of curriculum in K-12 settings.

Visit the program website (<https://gsehd.gwu.edu/programs/masters-curriculum-and-instruction/>) for more details.

DUAL MAED&HD IN CURRICULUM AND INSTRUCTION, SECONDARY EDUCATION CONCENTRATION, AND GRADUATE CERTIFICATE IN TESOL

The dual MAEd&HD in the field of curriculum and instruction with a concentration in secondary education (p. 642) and graduate certificate in teaching English to speakers of other languages (TESOL) (p. 676) program prepares teachers and other educational personnel for increased responsibilities in the planning, implementation, research, and evaluation of curriculum and instruction. The program of study includes curriculum development, research and evaluation of instructional practice, teacher education, work with special populations, and school policy and leadership. The addition of the TESOL certificate is designed to prepare pre-service and in-service teachers for working with English learners in classrooms within and beyond the United States.

The 12 credits required for the certificate may be applied toward the master's degree program requirements. Students in the combined program must complete all requirements for both the MAEd&HD and the certificate.

Visit the program website (<https://gsehd.gwu.edu/programs/masters-curriculum-and-instruction/>) for more details.

DUAL MAED&HD IN INTERNATIONAL EDUCATION AND GRADUATE CERTIFICATE IN ASSESSMENT, TESTING, AND MEASUREMENT

The dual MAEd&HD in the field of international education (p. 649) and graduate certificate in assessment, testing, and measurement (p. 668) (ATM) is designed for individuals who are entering or advancing in positions associated with training, education, adult learning, and development activities in diverse settings that require international and intercultural understanding. Students are equipped with the knowledge and skills to become informed and active scholar-practitioners in international education, with opportunities to specialize in international higher education, international education development, and global education. The addition of the ATM certificate is designed to prepare students with specific research skills in measurement and assessment.

The 12 credits earned in the graduate certificate may be counted toward requirements for the master's degree. All requirements for both programs must be fulfilled.

Visit program website (<https://gsehd.gwu.edu/programs/masters-international-education/>) for additional information.

DUAL MAED&HD IN INTERNATIONAL EDUCATION AND GRADUATE CERTIFICATE IN INCORPORATING INTERNATIONAL PERSPECTIVES IN EDUCATION

The dual MAEd&HD in the field of international education (p. 649) and graduate certificate in incorporating international perspectives in education (p. 672) (IPE) program is designed for individuals who are entering or advancing in positions associated with training, education, adult learning, and development activities in diverse settings that require international and intercultural understanding. Students are equipped with the knowledge and skills to become informed and active scholar-practitioners in international education, with opportunities to specialize in international higher education, international education development, and global education. In addition, students acquire tools, methods, and habits of analysis that enable them to play a variety of roles as leaders and change agents. The addition of the IPE certificate is designed to allow students to develop specialized knowledge of internationalization as it relates to school systems and the development of internationalized curriculum in K-12 settings.

The 12 credits earned in the graduate certificate may be counted toward requirements for the master's degree. All requirements for both programs must be fulfilled.

Visit the program website (<https://gsehd.gwu.edu/programs/masters-international-education/>) for more details.

DUAL MAED&HD IN THE FIELD OF INTERNATIONAL EDUCATION AND GRADUATE CERTIFICATE IN TESOL

Enrolled students, representing interests as far-ranging as educational programs for children in Ghana to international study programs in Asia, learn about traditions and systems of education in other nations and cultures. They also acquire skills and experience relevant to working in these programs.

A growing number of internship opportunities, both in the United States and abroad, are made available to our students, who consistently earn prestigious full-time positions after graduation. The international education program boasts highly

placed alumni in organizations such as USAID, the World Bank, the Agency for Educational Development, Save the Children, the Academy for Educational Development and the Institute of International Education, as well as in governments and universities all over the world.

International education program faculty regularly draws on local experts and professionals from around the District of Columbia to enhance the curriculum. The program offers expertise in three areas: education and development, global education, and international higher education.

Visit the program website (<https://gsehd.gwu.edu/programs/masters-international-education/>) for more details.

JOINT MAED&HD IN HIGHER EDUCATION ADMINISTRATION AND JURIS DOCTOR

The Graduate School of Education and Human Development (GSEHD) in cooperation with the Law School offers a joint master of education and human development (MAEd&HD) in the field of higher education administration (p. 645) and juris doctor (JD) (<https://www.law.gwu.edu/juris-doctor/>) degree program. Students must be admitted separately to each program and must fulfill all requirements for each degree. GSEHD accepts up to 6 credits of law courses toward requirements for the MAEd&HD and the Law School accepts up to 12 credits in GSEHD courses towards requirements for the JD. The degrees are conferred simultaneously once all requirements have been met.

Visit the Graduate School of Education and Human Development (<https://gsehd.gwu.edu/programs/juris-doctoratemasters-higher-education-administration/>) and Law School (<https://www.law.gwu.edu/juris-doctor/>) websites for additional information.

JOINT MAED&HD IN THE FIELD OF EDUCATION POLICY STUDIES AND JURIS DOCTOR

The close connection between law and public policy is well established and is increasingly leading law students and education students into seeking careers in public policy. Law and education policy have long had strong interconnections, and GW's Graduate School of Education and Human Development (GSEHD) continues to engage in activities that address the cross-section of education policy and law.

This program joins the Graduate School of Education and Human Development Education Policy Program (p. 643) (MAEd&HD) and the JD (<https://www.law.gwu.edu/juris-doctor/>) in the GW Law School. The Master of Arts in Education and Human Development degree in Education Policy requires 36 credits and, similar to the other joint degrees, the Law School accepts 12 credits of Education Policy courses toward

the 84-credit requirement for graduation. Similarly, the Graduate School of Education and Human Development also accepts 12 credits in the Law School toward the MAEd&HD. In addition to the required eight courses for the MAEd&HD, Education Policy and other GSEHD potential elective courses are required to complete the Masters in Education Policy degree.

Students who enroll full-time in the joint JD/MAEd&HD program should normally be able to complete both degrees in four years. During their first year, students are in residence at the GW Law School, taking exclusively first-year law courses. Thereafter, students take a mix of classes in both the Law School and GSEHD.

Visit the Graduate School of Education and Human Development (<https://gsehd.gwu.edu/programs/juris-doctor-masters-education-policy/>) and Law School (<https://www.law.gwu.edu/juris-doctor/>) websites for additional information.

EDUCATION SPECIALIST PROGRAMS

Education Specialist Programs

- Education Specialist in the field of educational leadership and administration (p. 659)
- Education Specialist in the field of special education (p. 660)

Visit the Graduate School of Education and Human Development (<https://gsehd.gwu.edu/programs/>) website for additional information.

EDUCATION SPECIALIST IN THE FIELD OF EDUCATIONAL LEADERSHIP AND ADMINISTRATION

GW's Educational Leadership and Administration program has garnered national recognition from the Educational Leadership Constituent Council (ELCC) and is nationally accredited and recognized as a program of distinction by the National Council for Accreditation of Teacher Education (NCATE).

The programs have been designed for the working professional in the K-12 arena and diverse school communities interested in various school-based and central office leadership and supervisory positions, increased responsibility in teaching, and advanced levels of professional responsibility.

The Master of Arts in Education and Human Development, the Post-Master's Certificate, and the Education Specialist (Ed.S.) degrees have been designed to meet the required credits, courses, and field experiences that are part of the administrative licensure process in the District of Columbia,

Commonwealth of Virginia, and many other states. Graduates are prepared for positions of assistant principal, principal and instructional supervision.

Visit the program website (<http://gsehd.gwu.edu/programs/education-specialist-educational-leadership-and-administration/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits in required courses.

Code	Title	Credits
Required		
EDUC 6232	Supervision of Curriculum, Instruction, and Assessment	
EDUC 6234	Foundations of K-12 Educational Leadership	
EDUC 6236	School Law and Policy	
EDUC 6238	Leadership for Equity and Social Justice	
EDUC 6240	Instructional Leadership for School Improvement	
EDUC 6244	School, Family, and Community Engagement	
EDUC 6246	School Finance and Resource Management for School Leaders	
EDUC 6270	Education Policy for School Leaders	
EDUC 6272	Leading Evidence-Based Action Research for School Improvement	
EDUC 6287	Internship: Administration	

EDUCATION SPECIALIST IN THE FIELD OF SPECIAL EDUCATION

The educational specialist (EdS) in the field of special education degree program offers advanced study for students with master's degrees in education who seek further professional preparation in the various subfields of special education and disability studies. Specific programs are developed in concert with faculty advisors and consist of a minimum of 30 graduate credits.

Visit the program website (<https://gsehd.gwu.edu/academics/#spededucationanddisabilitystudies>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits in a program developed in consultation with the advisor. This program must include at least 12 credits in graduate courses in the following general areas:

- Background and general principles of the field of study.
- An area of specialization.
- Research methods.
- Professional internship.

DOCTORAL PROGRAMS

Doctoral Programs

- Doctor of Education in the field of curriculum and instruction (p. 660)
- Doctor of Education in the field of educational leadership and administration (p. 661)
- Doctor of Education in the field of higher education administration (p. 662)
- Doctor of Education in the field of human and organizational learning (p. 663)
- Doctor of Education in the field of special education (p. 665)
- Doctor of Philosophy in the field of counseling (p. 667)
- Doctor of Philosophy in the field of education (p. 666)

Visit the Graduate School of Education and Human Development (<https://gsehd.gwu.edu/programs/>) website for additional information.

DOCTOR OF EDUCATION IN THE FIELD OF CURRICULUM AND INSTRUCTION

The doctoral program in curriculum and instruction examines research and reflective practice related to curriculum, teaching and learning, teacher education, and broader educational policies.

The program applies curriculum and instruction research and practice in the context of educational reform for diverse student populations. Students become part of a community that links scholars with practicing professionals, policymakers, and educational organizations.

Doctoral students conduct research and critically examine curriculum, teaching, and learning processes. They gain knowledge about assessment and the characteristics and politics of learning environments. Students can also gain understanding through linkages with arts and sciences, opportunities for additional learning in the disciplines, or internships in local schools and agencies.

Visit the program website (<http://gsehd.gwu.edu/programs/curriculum-instruction/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

The requirements for the Doctor of Education programs (p. 604).

A minimum of 48 credits, successful completion of a master's comprehensive examination, and an approved dissertation proposal.

Code	Title	Credits
Required		
CPED 8325	Curriculum Theory	
CPED 8330	Foundations of Education Research in Curriculum and Instruction	
CPED 8331	Seminar in Teaching	
CPED 8334	Seminar in Learning	
Doctoral Internship		
CPED 8354	Doctoral Internship: Teacher Education (taken for 6 to 9 credits)	
Electives		
3 to 6 credits in elective courses selected in consultation with advisor.		
Research Methods		
EDUC 8120	Group Comparison Designs and Analyses *	
EDUC 8122	Qualitative Research Methods	
3 credits from the following:		
EDUC 8100	Experimental Courses	
EDUC 8130	Survey Research Methods	
EDUC 8131	Case Study Research Methods	
EDUC 8140	Ethnographic Research Methods	
EDUC 8142	Phenomenological Research Methods	
EDUC 8144	Discourse Analysis	
EDUC 8170	Educational Measurement	
EDUC 8171	Predictive Designs and Analyses	
EDUC 8172	Multivariate Analysis	

EDUC 8173	Structural Equation Modeling
EDUC 8174	Hierarchical Linear Modeling
EDUC 8175	Item Response Theory
EDUC 8177	Assessment Engineering

Dissertation	
CPED 8998	Doctoral Seminar in Curriculum and Instruction (taken for 3 credits)
CPED 8999	Dissertation Research (taken for a minimum of 12 credits to meet program requirements)

An approved dissertation proposal is required.

Comprehensive Examination

Successful completion of a comprehensive examination is required.

*Prerequisite statistics courses must be taken during the master's degree program or must be completed prior to taking required advanced courses. For students who have not had an introductory statistics course or do not feel confident in their understanding and application of basic statistical techniques (i.e., through one way analysis of variance), EDUC 6116 should be completed prior to enrolling in EDUC 8120.

DOCTOR OF EDUCATION IN THE FIELD OF EDUCATIONAL LEADERSHIP AND ADMINISTRATION

The doctoral program in educational leadership and administration program has garnered national recognition from the Educational Leadership Constituent Council (ELCC) and is nationally accredited and recognized as a program of distinction by the National Council for Accreditation of Teacher Education (NCATE).

The programs have been designed for the working professional in the K-12 arena and diverse school communities interested in various school-based and central office leadership and supervisory positions, increased responsibility in teaching, and advanced levels of professional responsibility.

The doctoral program offers a premier degree preparing candidates to achieve high-level success in a K-12 school setting. With an emphasis on promoting high student achievement through teacher mentoring, problem-solving, and data analysis, the program will prepare you for a leadership position in a school setting of your choice. Researchers and practitioners who aspire to high levels of responsibility in educational organizations will develop leadership skills through

coursework, seminars, research associations with faculty, and self-directed activities. This academically rigorous program prepares graduates for leadership responsibilities

Visit the program website (<https://gsehd.gwu.edu/programs/doctorate-educational-leadership-and-administration/>) for additional information.

Dissertation

EDUC 8998	Pre-Dissertation Seminar
EDUC 8999	Dissertation Research (taken for a minimum of 12 credits)

An approved dissertation proposal is required.

Comprehensive Examination

Successful completion of a comprehensive examination is required.

DOCTOR OF EDUCATION IN THE FIELD OF HIGHER EDUCATION ADMINISTRATION

The doctoral program in higher education administration is designed to prepare leaders within the field of higher education. Students complete seated and online coursework to develop the knowledge, skills, and background useful for serving in advanced and senior level academic, administrative, and research roles in 2-year and 4-year institutions of higher education, national and international associations, government agencies, and other post-secondary educational settings. The program provides a high-quality, fast-paced scholarly experience in which students can integrate theory and research seamlessly with practice.

Visit the program website (<http://gsehd.gwu.edu/programs/higher-education-administration/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

The requirements for the Doctor of Education program (p. 604).

A minimum of 53 credits and successful completion of a comprehensive examination.

Code	Title	Credits
Required		
EDUC 8505	Seminar: Higher Education Administration	
EDUC 8510	Administration and Organization of Higher Education	
EDUC 8515	Comparative and International Higher Education	
EDUC 8520	Theories for Research on College Students	
EDUC 8525	College and University Curriculum

Dissertation

EDUC 8280 Critical Review of Educational Leadership Literature

EDUC 8998 Pre-Dissertation Seminar (taken for 3 credits)

EDUC 8999 Dissertation Research (minimum 12 credits needed to complete requirement)

An approved dissertation proposal is required.

Comprehensive examination

Successful completion of a comprehensive examination is required.

DOCTOR OF EDUCATION IN THE FIELD OF HUMAN AND ORGANIZATIONAL LEARNING

Human and organizational learning is an interdisciplinary approach that offers insights about people facing complex issues concerning individual and organizational effectiveness. The doctor of education degree in human and organizational learning provides professionals, managers, and consultants with a foundation in relevant theories, concepts and practices.

The program focuses on the inter-relationships among people, organizations and learning while utilizing systemic change processes. Theory, research, and practice are balanced throughout the curriculum. Students are encouraged to form communities to provide collective support, promote action learning, and model a learning culture.

Visit the program website (<http://gsehd.gwu.edu/programs/human-organizational-learning/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

The requirements for the Doctor of Education program (p. 604).

60 credits in coursework, a dissertation, and successful completion of a comprehensive examination.

The doctor of education (EdD) in the field of human and organizational learning program is available in two formats, the Main Campus program and the Executive Leadership program, as outlined below:

Main Campus Program

Code	Title	Credits
Required		
HOL 8700	Foundations of Human and Organizational Learning	
HOL 8701	Theory, Research, and Practice in Adult Learning and Development	
HOL 8703	Human Systems Change	
HOL 8704	Leadership Theory, Research, and Practice	
HOL 8724	Creating and Planning Doctoral Research	
Research methods		
EDUC 8120	Group Comparison Designs and Analyses	
EDUC 8122	Qualitative Research Methods	
HOL 8720	Seminar: Applied Research in Human and Organizational Learning	
HOL 8722	Seminar: Advanced Issues in Human and Organizational Learning (taken for 3 credits)	
3 credits from the following:		
EDUC 8100	Experimental Courses	
EDUC 8130	Survey Research Methods	
EDUC 8131	Case Study Research Methods	
EDUC 8140	Ethnographic Research Methods	
EDUC 8142	Phenomenological Research Methods	
EDUC 8144	Discourse Analysis	
EDUC 8170	Educational Measurement	
EDUC 8171	Predictive Designs and Analyses	
EDUC 8172	Multivariate Analysis	
EDUC 8173	Structural Equation Modeling	
EDUC 8174	Hierarchical Linear Modeling	
EDUC 8175	Item Response Theory	
EDUC 8177	Assessment Engineering	
Dissertation		

HOL 8998 Predissertation Seminar (taken for 3 credits)

HOL 8999 Dissertation Research (taken for a minimum of 12 credits)

An approved dissertation proposal required.

Electives

15 credits in elective courses selected in consultation with advisor.

Comprehensive examination

Successful completion of comprehensive examination is required.

Executive Leadership Program

Code	Title	Credits
Required		
HOL 8100	Special Topics in Human and Organizational Learning - Doctoral Studies (taken for 3 credits)	
HOL 8700	Foundations of Human and Organizational Learning

EDUC 8177	Assessment Engineering

Dissertation

HOL 8998 Predissertation Seminar (taken for 3 credits)

HOL 8999 Dissertation Research (taken for a minimum of 12 credits)

An approved dissertation proposal is required.

Comprehensive examination

Successful completion of a comprehensive examination is required.

DOCTOR OF EDUCATION IN THE FIELD OF SPECIAL EDUCATION

The doctoral program in special education utilizes a transdisciplinary approach to the preparation of special education scholars and leaders. The program is designed to support the development of doctoral students as they acquire knowledge in the fields of neuroscience, cognitive psychology, and the developmental sciences in an effort to meaningfully translate that knowledge to the most pressing issues to special education today.

The program works closely with Graduate School of Education and Human Development's Center for Applied Developmental Science and Neuroeducation to provide research and internship opportunities for students to translate and apply neuroscience research related to learning for diverse populations. Students collaborate with faculty in the areas of

early intervention and early childhood education, secondary and transition to post-secondary education, culturally and linguistically diverse learners with exceptionalities, and students with various disabilities, such as those with emotional and behavioral challenges. The Center also seeks students who can advance research with transdisciplinary partners to improve outcomes for children and families.

Visit the program website for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

The requirements for the Doctor of Education program (p. 604).

54 credits, including 12 credits in foundation courses, a minimum 15 credits in research courses including 3 credits in advanced research, a 3-credit internship, 9 credits in elective courses, a minimum 15 credits in dissertation courses, and successful completion of a comprehensive examination.

Code	Title	Credits
Required		
Neuroscience Foundations (6 credits)		
SPED 8306	Advanced Study in Development Science and Variance I: The Early Years	
SPED 8310	Advanced Study in Development Science and Variance II: The Later Years	
Leadership Foundations (6 credits)		
SPED 8308	Preparation for the Professoriate in Special Education	
SPED 8352	Disability and Public Policy

Internship

SPED 8354 Doctoral Internship: Special Education

Interdisciplinary electives

9 credits in interdisciplinary elective courses selected from the following in consultation with the advisor:

SPED 6299	Federal Education Policy Institute
SPED 8303	Administration and Supervision of Special Education
SPED 8311	Doctoral Proseminar: Scholarly Writing in Applied Settings
SPED 8345	Consultation and the Change Process

Dissertation

SPED 8998	Doctoral Seminar in Special Education
SPED 8999	Dissertation Research (minimum 12 credits needed to complete requirement)

taken for a minimum of 12 credits

Comprehensive examination

Successful completion of a comprehensive examination is required.

DOCTOR OF PHILOSOPHY IN EDUCATION

The doctor of philosophy (PhD) in education degree program is designed to create opportunities for cross-disciplinary research by concentrating on critical national and global

problems in which education and human development play a significant role. To adequately address issues, scholars require both a strong foundation in education as well as theoretical and disciplinary grounding in multiple disciplines. The PhD program is distinguished by four characteristics: candidates apply to a cross-disciplinary research team that is focused on a critical problem related to education and human development; approaches to the research problems require a cross-disciplinary lens; students engage in individual and collaborative research throughout their program; and candidates aspire to careers in which the production of research is paramount.

Visit the program website (<https://gsehd.gwu.edu/programs/#crossdisciplinary>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 60 credits in required courses and successful completion of the comprehensive examination.

The requirements of the Doctor of Philosophy program (p. 604).

Code	Title	Credits
Required

EDUC 8131	Case Study Research Methods	
EDUC 8140	Ethnographic Research Methods	
EDUC 8142	Phenomenological Research Methods	
EDUC 8144	Discourse Analysis	
EDUC 8170	Educational Measurement	
EDUC 8171	Predictive Designs and Analyses	
EDUC 8172	Multivariate Analysis	
EDUC 8173	Structural Equation Modeling	
EDUC 8174	Hierarchical Linear Modeling	

EDUC 8175	Item Response Theory
EDUC 8177	Assessment Engineering
SEHD 8100	Special Topics

Cross-disciplinary concentration

24 credits in graduate-level courses determined in consultation with the advisor at the time of admission. Course selections are determined by the focus of the cross-disciplinary research team and the specific interests of the student.

Dissertation

SEHD 8999 Dissertation Research (taken for a minimum of 12 credits.)

Second-year research project, an oral defense of both dissertation proposal and dissertation, and successful completion of a comprehensive examination are required.

DOCTOR OF PHILOSOPHY IN THE FIELD OF COUNSELING

The doctor of philosophy in counseling degree program balances training in rigorous research with advanced counseling and supervision. Graduates typically serve in faculty positions in universities, or in leadership positions in counseling practices.

The program offers challenging coursework and continued development of counseling and counseling supervision skills at the Graduate School of Education and Human Development's Community Counseling Service Center (<https://gsehd.gwu.edu/ccsc/>). Designed to be completed in three to four years, the program builds students' knowledge and capacity to conduct research, publish, provide advanced counseling services, develop counseling supervision skills, and teach at the graduate level. Faculty expertise is represented in several areas including trauma, human sexuality, child and adolescent development, ethics and counselor development, grief and loss, substance abuse, and multicultural counseling. The program is accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP).

Visit the program website (<http://gsehd.gwu.edu/programs/counseling/>) for additional information.

REQUIREMENTS

Applicants must possess a master's degree by the time they start the program. If the master's degree is not CACREP-accredited, then significant master's-level course work will be added to the program plan described below.

The following requirements must be fulfilled:

A minimum of 75 credits, including 33 credits in core courses, 12 credits in research courses, 6 credits in human development courses, 9 credits in an area of specialization, 15 credits in dissertation courses, and successful completion of the comprehensive examination.

Requirements of the Doctor of Philosophy (<http://bulletin.gwu.edu/education-human-development/#doctoraltext>) program.

Code	Title	Credits
------	-------	---------

Counseling core

CNSL 8251	Advanced Psychopathology and Pharmacology	
-----------	---	--

CNSL 8252	Leadership and Advocacy in Counseling	
-----------	---------------------------------------	--

CNSL 8254	Advanced Multicultural Counseling	
-----------	-----------------------------------	--

CNSL 8255	Supervision in Counseling	
-----------	---------------------------	--

CNSL 8256	Doctoral Practicum in Counseling (taken for a total of 6 credits)	
-----------	---	--

CNSL 8257	Doctoral Internship in Teaching	
-----------	---------------------------------	--

CNSL 8258	Advanced Theories of Counseling	
-----------	---------------------------------	--

CNSL 8259	Doctoral Internship in Supervision I

EDUC 8177 Assessment Engineering

Human development emphasis

Two of the following courses:

HDEV 6129 Cultural Effects on Human Development

HDEV 8100 Issues and Special Topics in Human Development (taken for 3 credits)

HDEV 8241 Emotional and Cognitive Development

HDEV 8244 Adult and Aging Development

HDEV 8253 Work, Identity, and Adult Development

Area of specialization

9 credits in courses selected in consultation with the advisor.

Dissertation

CNSL 8998 Predissertation Seminar

CNSL 8999 Dissertation Research (taken for a minimum total of 12 credits.)

An approved dissertation proposal is required.

Comprehensive examination

Successful completion of a comprehensive examination is required.

*Prerequisite statistics courses must have been taken during the student's master's degree program or must be completed prior to taking required advanced courses. For students who have not had an introductory statistics course, have not had such a course in recent years, or do not feel confident in their understanding and application of basic statistical techniques (i.e. through one-way analysis of variance), EDUC 6116 Introduction to Educational Statistics should be completed prior to enrolling in EDUC 8120 Group Comparison Designs and Analyses.

GRADUATE CERTIFICATE PROGRAMS

Graduate Certificates

- Assessment, testing, and measurement in education (p. 668)
- Autism spectrum disorders (p. 669)
- Brain injury: educational and transition services (p. 669)
- Counseling and life transitions (p. 670)
- Design and assessment of adult learning (p. 670)
- Educational technology leadership (p. 671)
- Global leadership in teams and organizations (p. 671)
- Incorporating international perspectives in education (p. 672)
- Instructional design (p. 672)
- Israel education (p. 673)
- Job development and placement (p. 673)
- Leadership development (p. 674)
- Literacy education (p. 674)
- Organizational learning and change (p. 674)
- Special education for culturally and linguistically diverse learners (p. 675)
- STEM master teacher (p. 675)
- Teaching English to speakers of other languages (p. 676)
- Teaching strategies and classroom management for Jewish studies educators (p. 676)
- Transition special education (p. 677)

Post-Master's Certificates

- Advanced practice of education policy (p. 677)
- Counseling (p. 677)
- Educational leadership and administration (p. 678)

Visit the Graduate School of Education and Human Development (<https://gsehd.gwu.edu/programs/>) website for more information.

GRADUATE CERTIFICATE IN ASSESSMENT, TESTING, AND MEASUREMENT IN EDUCATION

Develop the expertise to analyze fifth graders in a school district, all workers at a company, everyone taking a graduate entrance exam, or a sampling of patients in a counseling lab. Assessment, Testing, and Measurement (ATM) in Education combines statistical analysis, testing theory, the study of human behavior, educational measurement, and evaluation into the science of measuring educational/behavioral factors such as learning, preference, aptitude, and personality. Specialists in this field (psychometricians) design tests that collect empirical

data and quantify the personal characteristics of individuals, comparing those results within or across populations.

The 24-credit hour certificate program is designed for individuals strengthening their skill set to include data analysis in an educational setting.

Visit the program website (<http://gsehd.gwu.edu/programs/graduate-certificate-assessment-testing-and-measurement-education/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required:		
EDUC 8120	Group Comparison Designs and Analyses	
EDUC 8170	Educational Measurement	
EDUC 8171	Predictive Designs and Analyses	
EDUC 8175	Item Response Theory	
or EDUC 8177	Assessment Engineering	

GRADUATE CERTIFICATE IN AUTISM SPECTRUM DISORDERS

The certificate program is designed for individuals with a bachelor's or master's degree that are interested in focusing on a multi-intervention approach to instructing students with Autism Spectrum Disorders.

Graduates of this program will be able to more effectively address the following issues in working with children with Autism Spectrum Disorders: (1) academic achievement and study skills commensurate with their cognitive strength; this will provide the widest range of options of college and career choices, (2) social skills for navigating all of the environments in which they live, work, and play, and (3) problem-solving strategies that enable them to respond flexibly and successfully to challenging situations.

Visit the program website (<https://gsehd.gwu.edu/programs/graduate-certificate-autism-spectrum-disorders/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 15 credits in required courses.

Code	Title	Credits
Required		
SPED 6240	Family Support and Guidance in Special Education	
SPED 6253	Introduction to Autism Spectrum Disorders	
SPED 6260	Developmental Assessment in Special Education	
SPED 6261	Practicum: Methods and Materials for Young Children with Disabilities (3 credits)	
SPED 6290	Affective Development and Behavior Management in Special Education	

GRADUATE CERTIFICATE IN BRAIN INJURY: EDUCATIONAL AND TRANSITION SERVICES

This is a 15-credit program, which many graduates use to increase their professional opportunities and develop a specialty in managing the educational needs of individuals who have suffered brain injury.

Two delivery modes are available to students who qualify for the program, and a limited number of partial scholarships are offered depending upon current funding from external sources.

We also offer a master's program in Transition Special Education with an emphasis in acquired brain injury.

The program is based on coursework that has been offered since 1992 through the GSEHD master's program in transition special education with an emphasis in acquired brain injury. It is offered in collaboration with the GW Center for Education and Human Services in Acquired Brain Injury (CEHSABI)

Visit the program website (<https://gsehd.gwu.edu/programs/graduate-certificate-brain-injury-transition-services/>) for additional information

REQUIREMENTS

The following requirements must be fulfilled: 15 credits in required courses.

Code	Title	Credits
Required		
SPED 6223	Introduction to Brain Injury: Programs, Policies, and Resources	

SPED 6224	Brain Function and Impact of Brain Injury on Learning and Education
SPED 6231	Curriculum and Instructional Methods in Special Education and Transition
SPED 6240	Family Support and Guidance in Special Education
SPED 6255	Collaboration with Systems and Families

GRADUATE CERTIFICATE IN COUNSELING AND LIFE TRANSITIONS

The graduate certificate in Counseling & Life Transitions equips students with a range of skills that can be used to assist the community in coping with the different transitions that may occur in their lives. Students may choose to focus in one of three concentrations: Career & Workforce Development, Grief, Loss & Life Transition, and Counseling Culturally and Linguistically Diverse Persons.

Career & Workforce Development: This certificate prepares career practitioners to assist students, workers, employers, and retirees navigate the challenges that are inherent in a global workplace.

Grief, Loss & Life Transition: This certificate prepares counselors with the knowledge to effectively and compassionately counsel the chronically ill, dying, their caregivers, bereaved loved ones, or to work with others facing difficult life transitions such as unemployment. This specialized program is ideal for counselors, social workers, clergy, and other professionals who work with those facing loss and life transitions.

Counseling Culturally & Linguistically Diverse Persons: This certificate expands the skills of counselors, teachers, and other professionals' to better understand cultural and linguistic diversity within the workplace, school, and community settings, and, in the process, enhance their understanding of their own psycho-social identity.

Visit the program website (<http://gsehd.gwu.edu/programs/graduate-certificate-counseling-and-life-transitions/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 3 credits in a required course and 9 credits in elective courses.

Code	Title	Credits
Required		
HDEV 6108	Life Span Human Development	
Electives		

Three elective courses selected in consultation with the advisor to be taken in one of the following specializations:

Grief, loss, and life transitions

CNSL 6100	Special Workshop (Grief, Loss, and Life Transitions Focus)
-----------	--

CNSL 6170	Grief and Loss
-----------	----------------

CNSL 6175	Living and Dying: A Counseling Perspective

HDEV 6109	Child Development
-----------	-------------------

HDEV 6110	Adolescent Development
-----------	------------------------

HDEV 6701	Adult Learning
-----------	----------------

GRADUATE CERTIFICATE IN DESIGN AND ASSESSMENT OF ADULT LEARNING

This certificate program teaches skills for designing, developing, delivering and evaluating workplace-learning

interventions. Each course in the program is part of the existing curriculum for the master's degree in human resource development (HRD). Upon completion of the certificate, students may choose to continue in the master's program, at which point they would be required to submit an application and meet entrance requirements. All coursework completed in the certificate will transfer into the master's program.

The certificate in design and assessment of adult learning is a four-course program (12 credits total) that can be completed in two semesters.

Visit the G (<https://gsehd.gwu.edu/programs/#educationalleadership>) graduate School of Education and Human Development website (<https://gsehd.gwu.edu/programs/#humanamporganizationallearning>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and one 3-credit elective course.

Code	Title	Credits
Required		
HOL 6701	Adult Learning	
HOL 6721	Assessing the Impact of Organizational Change Using Qualitative and Quantitative Methods	
HOL 6742	Design of Adult Learning Interventions	
Electives		
One 3-credit elective course selected in consultation with the advisor.		

GRADUATE CERTIFICATE IN EDUCATIONAL TECHNOLOGY LEADERSHIP

The program is founded on three beliefs: that leadership skills and technological competence are fundamental to the appropriate and successful utilization of technologies in educational settings; that access to the requisite knowledge should be universal, despite the barriers of distance, personal physical limitations and lifestyle; and that educational technologies focus on improving human performance and learning. The program is guided by commitment to continuing improvement as technology changes through:

- The development and delivery of effective distance education methods

- Support services for the distance-learning community
- Influence upon the creation of knowledge and practices
- The development of leaders in the global expansion of educational technology
- Emphasis on the interaction of individual, corporate, governmental and educational interests.

Visit the program website (<https://gsehd.gwu.edu/programs/graduate-certificate-educational-leadership-technology/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
EDUC 6368	Leadership and Education	
EDUC 6401	Foundations in Educational Technology	
EDUC 6402	Trends and Issues in Educational Technology	
or EDUC 6403	Educational Hardware Systems	
or EDUC 6421	Critical Issues in Distance Education	
EDUC 6404	Managing Computer Applications	
or EDUC 6428	Developing Digital Professional Portfolios	
EDUC 6405	Developing Multimedia Materials	
or EDUC 6425	Developing Effective Training with Technology	
EDUC 6406	Instructional Design	

GRADUATE CERTIFICATE IN GLOBAL LEADERSHIP IN TEAMS AND ORGANIZATIONS

Theory, research and practice are balanced throughout the curriculum in order to enable students to develop and implement strategies that increase organizational development and learning. The program of study includes international company site visits, cultural exchanges, world-renowned faculty and guest speakers. With courses offered at sites in Asia, Europe, Africa and South America, students go beyond classroom learning to developing their own global competence through actionable learning around the world.

The four-course, 12-credit program in Global Leadership in Teams and Organizations meets four times a year. Two classes are offered in Ashburn as well as overseas which allows students the option of taking two, three or four courses

overseas. The courses take place at the Virginia Campus and affiliate sites in Asia, Europe, and South America.

This program benefits mid to senior level executives who are charged with leading in international and multinational organizations. Current students looking for interesting electives may take the individual courses for their master's or doctoral programs.

Visit the G (<https://gsehd.gwu.edu/programs/#educationalleadership>)raduate School of Education and Human Development website (<https://gsehd.gwu.edu/programs/#humanamporganizationallearning>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
HOL 6704	Leadership in Organizations	
HOL 6706	Current Issues in Organizational Leadership	
HOL 6746	Work Groups and Teams in Organizations	
HOL 6747	International and Multicultural Issues in Organizations	

GRADUATE CERTIFICATE IN INCORPORATING INTERNATIONAL PERSPECTIVES IN EDUCATION

The certificate program is designed for individuals with a bachelor's or master's degrees who are interested in learning about internationalization and how to incorporate global perspectives into curriculum, pedagogy, and school policy and practice.

Courses provide students with a foundation in internationalization, as it relates to school systems and the development of curriculum in K-12 settings. Upon completion of the certificate, students can apply to one of the Graduate School of Education and Human Development's Master's programs. All 12 certificate credits may transfer into one of these degree programs upon admission.

Visit the program website (<https://gsehd.gwu.edu/programs/graduate-certificate-incorporating-international-perspectives-education/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 6 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
CPED 6305	Foundations of Curriculum Theory	
EDUC 6615	Internationalizing U.S. Schools	
Elective		
6 credits from the following:		
CPED 6225	Introduction to International Curricula	
CPED 6557	Second Language Acquisition	
CPED 6608	Development and Diversity

GRADUATE CERTIFICATE IN INSTRUCTIONAL DESIGN

From the assessment of needs and the analysis of learning objectives to the rapid-development of instructional materials

and their evaluation, the certificate program prepares students to apply the theories, principles, models, tools and techniques of systematic instructional design in diverse organizational settings.

Throughout this 18-credit certificate program, students have numerous opportunities to integrate their professional experiences into their learning, apply their course assignments to their current professional activities and actively engage with other professionals in the development of valued instructional design proficiencies.

Students who complete the Instructional Design Certificate will:

- Apply foundational instructional design principles to the design, development and implementation of learning activities in their workplace
- Demonstrate an ability to lead the design of effective instruction through proficient planning, development, evaluation and management
- Demonstrate a comprehensive knowledge of numerous theories, principles, models, tools and techniques that can be applied to the systematic design of instruction
- Demonstrate their capacity to successfully lead all phases of an instructional design project

Having created one of the first online graduate programs in the United States, the experienced Educational Technology Leadership Program faculty and staff ensures flexibility along with meaningful substance and engaging online participation.

Visit the program website (<https://gsehd.gwu.edu/programs/graduate-certificate-instructional-design/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
EDUC 6401	Foundations in Educational Technology	
EDUC 6405	Developing Multimedia Materials	
EDUC 6406	Instructional Design	
EDUC 6422	Instructional Needs Assessment and Analysis	
EDUC 6426	Computer Interface Design for Learning	
EDUC 6427	Advanced Instructional Design	

GRADUATE CERTIFICATE IN ISRAEL EDUCATION

Students in the graduate certificate in Israel education program sharpen their knowledge of Israel and Zionism by taking part in two special seminars as well as monthly webinars. Special emphasis is placed on connecting new content with innovative approaches for dissemination. Cohort members apply what they have learned to develop and test curricular or other educational projects for use in the setting in which they teach or work.

Visit the program website (<https://www.theicenter.org/initiative/professional-certificate/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 15 credits in required courses.

Code	Title	Credits
EDUC 6803	Introduction to Experiential Jewish Education	
EDUC 6810	Paideia and Jewish Education	
EDUC 6811	Foundations of Contemporary Israel	
EDUC 6812	American Jews and Modern Israel	
EDUC 6813	The Israel Educational Experience	

GRADUATE CERTIFICATE IN JOB DEVELOPMENT AND PLACEMENT

Offered online and on campus

The graduate certificate in job development and placement is ideal for a variety of professionals in state, federal, nonprofit, and community-based rehabilitation. Students delve into the social and cultural dimensions of rehabilitation counseling, as well as job development and job placement methods and techniques. The curriculum provides specialized experiential learning opportunities by integrating classroom course work with hands-on experience through a required 50-hour practicum.

Visit the program website (<https://gsehd.gwu.edu/programs/graduate-certificate-job-development-job-placement/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
CNSL 6130	Vocational Assessment of Individuals with Disabilities	
or SPED 6230	Vocational Assessment of Individuals with Disabilities	
CNSL 6163	Social and Cultural Dimensions - CNS	
CNSL 6376	Foundations of Rehabilitation Counseling	
CNSL 6380	Job Placement and Supported Employment	

In addition to the required coursework, students are required to complete a 50-hour supervised practicum in a vocational rehabilitation agency (public or community partner program) to gain job development and job placement experience. The practicum must be completed within one year from date of entry to the program in order for the student to complete all requirements in the allowed period and receive the certificate. Students should consult with the program coordinator and/or academic advisor prior to beginning the practicum.

GRADUATE CERTIFICATE IN LEADERSHIP DEVELOPMENT

The graduate certificate in leadership development provides in-depth understanding of organizations as human systems and the practical knowledge required to improve organizational effectiveness through leadership and training. Students explore leadership as an individual ability as well as an organizational learning and development process.

Visit the program website (<https://gsehd.gwu.edu/programs/graduate-certificate-leadership-development/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 15 credits, including 6 credits in required courses, and 9 credits in elective courses.

Code	Title	Credits
Required		
HOL 6700	Human Behavior and Learning in Organizations	
or HOL 6701	Adult Learning	
HOL 6704	Leadership in Organizations	
Electives		

9 credits in elective courses selected in consultation with the advisor.

GRADUATE CERTIFICATE IN LITERACY EDUCATION

The graduate certificate in literacy education provides students opportunities to learn about teaching and learning principles of interdisciplinary reading, writing, and viewing texts in and out of schools. Coursework takes advantage of resources near campus, such as national museums, memorials, and the Library of Congress.

Please visit the program website (<https://gsehd.gwu.edu/programs/graduate-certificate-literacy-education/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses and completion of a portfolio to be evaluated during the final semester of study.

Code	Title	Credits
Required		
Courses must be taken in the order shown.		
CPED 6691	Interdisciplinary Adolescent Literacies	
CPED 6622	Foundations of Reading Development	
CPED 6223	Interdisciplinary Elementary School Literacies	
CPED 6628	Literacies in Informal Learning Environments	

GRADUATE CERTIFICATE IN ORGANIZATIONAL LEARNING AND CHANGE

This certificate provides an in-depth understanding of how a learning focus helps organizations improve their performance and create sustainable change. This is one of the largest programs of its kind in the United States. It is active in advancing research and practice within the human resource development field. Each course in the program is part of the existing curriculum for the master's degree in human resource development.

Upon completion of the certificate, students may choose to continue in the master's program, at which time they would be required to submit an application and meet entrance requirements. All coursework completed in the certificate will transfer into the master's program. The certificate in

organizational learning and change is a four-course (12 credits total) program that can be completed in two semesters. Courses are:

HOL 6702 – Organizational Diagnosis and Development

HOL 6704 – Leadership in Organizations

HOL 6703 – Consulting Skills for Organizational Learning and Change

HOL 6707 – Organizational Learning

The certificate is also offered at the GW Hampton Roads Center.

Visit the program website (<http://gsehd.gwu.edu/programs/graduate-certificate-organizational-learning-and-change/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
HOL 6702	Organizational Change	
HOL 6703	Consulting Skills	
HOL 6704	Leadership in Organizations	
HOL 6707	Organizational Learning	

GRADUATE CERTIFICATE IN SPECIAL EDUCATION FOR CULTURALLY AND LINGUISTICALLY DIVERSE LEARNERS

Offered online and on campus

The graduate certificate in special education for culturally and linguistically diverse learners is designed to enhance skills to meet the needs of students with diverse cultural and linguistic backgrounds and those with varying social and learning abilities. Students focus on the inter-relationships of school, home, and community to improve the quality of education for children with diverse needs. A holistic approach to the curriculum utilizes the latest research, theory, and data-driven best practices to prepare you to empower and improve the quality of learning for children with diverse needs.

Visit the program website (<https://gsehd.gwu.edu/programs/graduate-certificate-special-education-culturally-and-linguistically-diverse-learners/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 6 credits in required courses and 12 credits in electives.

Code	Title	Credits
Required		
SPED 6276	Academic and Psychosocial Assessment of the Culturally and Linguistically Diverse Student	
SPED 6277	Teaching Culturally and Linguistically Diverse Students with Disabilities	
Electives		
12 credits from the following:		
CPED 6221	Developmental Reading: Emergent Literacy	
CPED 6551	Second Language Instructional Methods	
CPED 6556	Linguistic Applications in English as a Second Language	
CPED 6627	Teaching Second Language Reading and Writing	
SPED 6266	The Development of Language and Literacy	
SPED 6268	Development of Children and Youth with Disabilities	
SPED 6272	Strategies for Inclusion: Addressing the Needs of Diverse Learners	
SPED 6275	The Culturally and Linguistically Diverse Student with Disabilities: Policy, Research, and Trends	

GRADUATE CERTIFICATE IN STEM MASTER TEACHER

The STEM Master Teacher Graduate Certificate provides current K-12 science and mathematics teachers with 12 hours of credit-bearing coursework that offers advanced techniques and approaches to STEM instruction, curriculum, and assessment. The certificate focuses on topics of importance to local districts including best math and science practices.

Visit the program website (<http://gsehd.gwu.edu/programs/graduate-certificate-stem-teaching/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and one 3-credit elective course.

Code	Title	Credits
Required		
CPED 6701	Arts in the STEM Curriculum	
CPED 6702	Integrating Engineering in the Math and Science Classroom	
CPED 6703	Advanced STEM Teaching Methods	
Elective		
One of the following:		
CPED 6367	Perspectives and Research in Teaching Science	
CPED 6370	Perspectives and Research in Teaching Mathematics	
CPED 8309	Supervising Preservice Clinical Experience	

Students may apply courses toward the Master of Arts in Education and Human Development in the field of Curriculum and Instruction.

Students may apply courses toward the Master of Arts in Education and Human Development in the field of Curriculum and Instruction.

GRADUATE CERTIFICATE IN TEACHING ENGLISH TO SPEAKERS OF OTHER LANGUAGES

Offered online and on campus

The Graduate Certificate in Teaching English Speakers of Other Languages (TESOL) prepares educators to work with English learners in both U.S. and international contexts. Coursework provides students with knowledge of applied linguistics, language acquisition theories, and methods of teaching. Students have opportunities to apply foundational concepts in TESOL through critical discussions about issues facing English learners in today's classrooms and direct experiences in classrooms in and around the nation's capital. Dual enrollment

options enable students to earn the Graduate Certificate as part of selected Masters programs.

Visit the program website (<https://gsehd.gwu.edu/programs/graduate-certificate-teaching-english-speakers-other-languages-tesol/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
CPED 6551	Second Language Instructional Methods	
CPED 6556	Linguistic Applications in English as a Second Language	
CPED 6557	Second Language Acquisition	
CPED 6627	Teaching Second Language Reading and Writing	

GRADUATE CERTIFICATE IN TEACHING STRATEGIES AND CLASSROOM MANAGEMENT FOR JEWISH STUDIES EDUCATORS

Students completing the Online Certificate in Teaching Strategies & Classroom Management for Jewish Educators will: Examine, reflect, and demonstrate an understanding of the essential questions and approaches for pedagogy in Jewish education, including: a conceptual basis in formal education - both within and beyond their specific content expertise - and be able to integrate hands-on learning components within formal classroom instruction.

The capacity to analyze, explore, explain and interpret Jewish texts in a variety of disciplines and apply critical thinking in the selection of material when creating curricula. Have the ability to be reflective on their knowledge and understandings and apply a deeper level of analysis and critique by: Examining and reflecting on the interconnections between effective instruction and positive classroom management.

Engaging in reflective writings in response to course readings and experiences. Leading and participating in giving feedback and critiques to discussion-board prompts. Will be knowledgeable and effective leaders in their profession by: Engaging in individual inquiry into questions that explore issues related to teachers and teaching. Planning, implementing, and evaluating learning activities that apply research-based practices. Linking instructional and management strategies to specific content and thinking goals.

After completion of the certificate, Jewish educators who pursue the work will possess the pedagogical skills needed to teach content specific to a Jewish studies curriculum.

Visit program website (<https://gsehd.gwu.edu/programs/graduate-certificate-teaching-strategies-classroom-management-jewish-studies-educators/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses and a portfolio.

Code	Title	Credits
Required		
CPED 6131	Teaching Jewish History to Middle and High School Students	
CPED 6132	Strategies for Teaching Biblical Texts	
CPED 6133	Rabbinic Judaism and the Teaching of Rabbinic Texts	
CPED 6507	Instructional Models and Classroom Management	

In addition, students must successfully complete a portfolio consisting of representative works from each of the four required courses.

GRADUATE CERTIFICATE IN TRANSITION SPECIAL EDUCATION

Offered online

Empowering Youth to Lead a Better Future Earn your Graduate Certificate in Transition Special Education from the George Washington University (GW) and gain the required knowledge, skills and competencies to assist youth and young adults with disabilities as they transition to postsecondary opportunities. In the special education transition certificate program, you will focus on social justice as you join a community of transition leaders from across the country, learning to design and implement transition and career assessment strategies to help ensure the success of youth as they transition to adult life.

Visit the program website (<https://gsehd.gwu.edu/programs/graduate-certificate-transition-special-education/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
SPED 6230	Vocational Assessment of Individuals with Disabilities	
SPED 6233	Curriculum in Special Education	
or SPED 6235	Employment Models for Individuals with Disabilities	
SPED 6236	Introduction to Career and Career-Technical Education and Transition Services	
SPED 6255	Collaboration with Systems and Families	

POST-MASTER'S CERTIFICATE IN ADVANCED PRACTICE OF EDUCATION POLICY

The Advanced Practice of Education Policy Post-Master's Certificate prepares the next generation of policy leaders to take on today's complex education challenges. This distinctive, practice-oriented graduate certificate trains students in theories and tools of policy design, development of evidence-informed solutions, negotiation of the political context, strategic communications and other skills of professional practice in policy. Leveraging the resources of GW and experts in the surrounding community, program participants develop deeper knowledge, connections and skills to expand educational excellence and equity.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
EDUC 8701	Education Policy Design	
EDUC 8702	Evidence in Education Policymaking	
EDUC 8703	Implementation for Education Policymakers	
EDUC 8704	Advocacy and Strategic Communications	

POST-MASTER'S CERTIFICATE IN COUNSELING

A variety of counseling programs are designed to prepare students to become skilled professional practitioners in an expansive range of counseling specialties, including school

counseling, clinical mental health counseling, rehabilitation counseling and career and workforce development, among others.

Our esteemed faculty members hold leadership positions in national counseling associations and can help you build networks that will last a lifetime. The post-masters certificate in counseling is designed to allow students who have obtained a 48 credit Masters in counseling to gain additional credits necessary for licensure.

Please visit the program website (<http://gsehd.gwu.edu/programs/post-masters-certificate-counseling/>) for more information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
CNSL 6169	Counseling Substance Abusers	
CNSL 6171	Family Counseling	
CNSL 6175	Living and Dying: A Counseling Perspective	
CNSL 6190	Advanced Career Counseling	

POST-MASTER'S CERTIFICATE IN EDUCATIONAL LEADERSHIP AND ADMINISTRATION

GW's Educational Leadership and Administration program has garnered national recognition from the Educational Leadership Constituent Council (ELCC) and is nationally accredited and recognized as a program of distinction by the National Council for Accreditation of Teacher Education (NCATE).

The programs have been designed for the working professional in the K-12 arena and diverse school communities interested in various school-based and central office leadership and supervisory positions, increased responsibility in teaching, and advanced levels of professional responsibility.

The Post-Master's Certificate program in Educational Leadership and Administration is designed for individuals who have teaching credentials, hold a master's degree from an accredited institution and are seeking licensure in administration in order to be qualified for a position as assistant principal, principal or central office supervisor. The program

is designed to give prospects with masters' degrees a second option for licensure.

Visit the program website (<http://gsehd.gwu.edu/programs/post-masters-certificate-educational-leadership-and-administration/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
EDUC 6232	Supervision of Curriculum, Instruction, and Assessment	
EDUC 6234	Foundations of K-12 Educational Leadership	
EDUC 6236	School Law and Policy	
EDUC 6240	Instructional Leadership for School Improvement	
EDUC 6246	School Finance and Resource Management for School Leaders	
EDUC 6287	Internship: Administration	

SCHOOL OF ENGINEERING AND APPLIED SCIENCE

Dean John Lach

Associate Deans C.E. Korman, B. Narahari, R. Riffat

The School of Engineering and Applied Science (SEAS) was organized in 1884 as the Corcoran Scientific School of Columbia University, named in honor of William W. Corcoran, president of the University's Board of Trustees from 1869 to 1888. The School was among the first to accept women for degree candidacy in engineering. While the organization and offerings of the School have evolved over the years, throughout most of its history its programs have been characterized by an emphasis on principles guiding the advancement of technology.

The School offers the bachelor of arts, bachelor of science, master of engineering, master of science, doctor of engineering, doctor of philosophy, and the professional degrees of engineer and applied scientist through its six departments—Biomedical Engineering, Civil and Environmental Engineering, Computer Science, Electrical and Computer Engineering, Engineering Management and Systems Engineering, and Mechanical and Aerospace Engineering. In addition, the School offers several graduate certificate programs, as well as dual bachelor's/master's degree programs.

Research centers and institutes provide opportunities for students and faculty to strengthen ties with counterparts in government and industry and contribute to the development and harnessing of emerging technology. Extensive and varied laboratories and computing facilities support the academic programs. The School strongly supports co-curricular activities to broaden and deepen its students' overall educational programs, including an extensive array of internship opportunities at government laboratories and private companies in the Washington, DC, area and elsewhere. Other co-curricular opportunities include engineering-type team competitions, research projects, and the SEAS student government organization, the Engineers' Council.

REGULATIONS

Undergraduate Programs

University Regulations

All SEAS students are required to review the University Regulations (<http://bulletin.gwu.edu/university-regulations/>) as outlined in the Bulletin, as they are responsible for understanding and adhering to this document.

Advising

SEAS practices a hybrid advising system. Every entering undergraduate student is assigned a professional advisor to

assist with the transition to the University. Faculty advisors are assigned at the end of the first year to counsel students on their programs of study, achievement, and maintenance of satisfactory scholastic performance, professional development, and extracurricular activity as part of the educational process. Until all work required for the degree is completed, students must consult with their faculty advisors in all academic matters, including obtaining the advisor's approval of their program of study prior to registration for each academic semester and summer session. In addition, a student must consult their faculty advisor before they register for a course at another institution. The faculty advisor represents the student in all cases requiring faculty action. However, the faculty advisor may not deny entry into any course or activity to which the student is entitled under the regulations of the School. Students may consult other members of the faculty on an informal basis.

Mathematics Placement

All incoming first-year students are required to take a math proficiency examination, administered through the mathematics department, which places students in either MATH 1220 or MATH 1231. Visit the math placement exam webpage (<https://math.columbia.gwu.edu/gw-mathematics-placement-test/>) for more information.

Makeup of Credit for Waived Courses

Waiver of a required course requires the approval of the student's faculty advisor and department chair. If a course required by the SEAS curriculum is waived, the corresponding credits must be earned by satisfactory completion of a university-level academic course, either technical or nontechnical, approved by the student's faculty advisor. The grade earned will be used in determining the SEAS GPA only if the substituted course would normally be considered part of the student's curriculum.

Scholarship Requirements

To be eligible for graduation a student in SEAS must have:

- A minimum overall GPA of 2.0.
- A minimum overall GPA of 2.0 in their SEAS program.
- A minimum GPA of 2.2 for technical courses (see below).
- Completed all degree and University General Education requirements.

Technical GPA

What constitutes a technical course is determined by each program. For applied science and technology, biomedical engineering, civil engineering, computer engineering, electrical engineering, mechanical engineering, and systems engineering majors, all technical courses taken during the fifth through eighth semesters as outlined on each program's four-year curriculum sheet and approved by the student's faculty advisor, are counted towards the student's technical GPA. Current and archived curriculum sheets are available from SEAS departments.

As of fall 2014, for the BA and BS programs in computer science, all CSCI courses count toward the student's technical GPA.

Each student is assigned a curriculum year, with its own set of requirements, based either on time of matriculation at GW or time of declaring a major. For students who choose to update their curriculum year to a more recent one, courses that apply toward their technical GPA may change. The same is true for students who change their SEAS major. Students should consult their faculty advisor before making any changes to their academic plans.

Incompletes

For more information see Incompletes under University Regulations (<http://bulletin.gwu.edu/university-regulations/>). In addition, SEAS students must get an incomplete agreement in writing by completing a Request for an Incomplete form (<http://www.seas.gwu.edu/forms/>) with the instructor.

Pass/No Pass Grading System

SEAS students may not take required courses on the Pass/No Pass grading system. They may, however, take courses outside their required SEAS academic program on a P/NP basis.

Academic Workload

SEAS adheres to all academic workload regulations outlined under University Regulations (p. 27). In exceptional cases, these limits may be exceeded with the faculty advisor's approval.

Humanities, Social Science, and Non-Technical Elective Requirement

Each SEAS major must complete a series of non-technical areas of study. Of these courses, at least two (6 credits) must be from the Critical Analysis in Social Science list and at least one course (3 credits) from the Critical Analysis in Humanities list of the University General Education Requirement (p. 42). The remaining courses must be chosen from an approved list, or approved by the advisor, and satisfy specific departmental requirements. A full list of courses by major is available on the humanities and social science form located on the SEAS forms page (<https://www.seas.gwu.edu/policies-procedures-forms/>). Non-technical areas of study cannot include courses in scientific disciplines or mathematics, or courses focusing on technology.

When a foreign language course is taken as part of the humanities requirement, the following rules apply:

- The foreign language studied may not be a native language of the student, unless the courses taken are literature courses.
- If the student has studied the language previously, he or she must first take a placement test given by the language department concerned and enroll in a course recommended by that department.
- The advisor must approve the course selection.

*Students in the systems engineering program must complete all required University General Education humanities or social science requirements within this minimum.

Bachelor of Science Degree Programs

Students should consult the department concerned for total credit requirements for the degree programs. The listed curricula assume that all elective courses are offered for at least 3 credits. Credits for Lifestyle, Sport, and Physical Activity (LSPA) courses cannot be counted toward the degree.

Bachelor of Arts Degree Programs

SEAS offers a bachelor of arts degree with majors in applied science and technology and in computer science. Each program provides a strong and level base for students who intend to make their careers in fields allied to science and technology or computer science. The curriculum requirements for these programs can be viewed under the Undergraduate tab in this section of the Bulletin. The listed curricula assume that all elective courses are offered for at least 3 credits. Credits for Lifestyle, Sport, and Physical Activity (LSPA) courses cannot be counted toward the degree.

Special Programs

The School of Engineering and Applied Sciences offers a variety of combined, 5-year degree programs that are available to any student who meets the eligibility requirements outlined by the program in question. For a comprehensive list of programs, eligibility requirements, and deadlines is available on the SEAS website.

Double Major

Students in the School of Engineering and Applied Science (SEAS) who complete the requirements for two SEAS majors may graduate with a double major, provided the majors are in different departments and are both BS degrees.

SEAS students may also pursue a double major (second major) in another school in the University but must also adhere to all requirements outlined by that school or department. SEAS students must consult both their SEAS faculty advisor and an advisor in the department offering the second major. To officially declare a second major, students must complete a Declaration of Second Major form and have it approved by both their SEAS faculty advisor and the second major department advisor.

Additionally, any SEAS student wanting to complete a Double Major within SEAS must fulfill the following requirements:

- Due to ABET accreditation, the completion of a distinct number of major specific credits/courses for each major must be met, and approved by respective major departments.
- Completion of two capstone projects, one for each major, following registration for the two capstone course sequences approved by the major departments.

Any undergraduate student pursuing a Bachelor of Science degree outside of SEAS may declare a double major (second major) in the following fields: biomedical engineering, computer science (BS)*, computer engineering, electrical engineering, mechanical engineering, systems engineering. The student must follow all the degree requirements as those receiving a bachelor of science in engineering/computer discipline, which includes SEAS general, major, technical electives, humanities/social science, and technical GPA requirements. In addition, SEAS does not offer a double major (second major) in Civil Engineering or Applied Science and Technology.

The degree is earned from the home school, and students must complete the major in their own school in order to graduate. In no case will a double major result in two degrees. For more information see Double Degrees (<http://bulletin.gwu.edu/university-regulations/#dddegrees>) under University Regulations and the SEAS Regulations (<http://bulletin.gwu.edu/engineering-applied-science/#undergraduate>) for a Double Degree outlined below.

All other scenarios (BBA, BFA, BA, etc.) require the student to complete either a BA in computer science or a double degree. See Double Degree (<http://bulletin.gwu.edu/university-regulations/#DDdegrees>).

Graduation grade-point average criteria:

To satisfactorily complete a double major (second major) in any engineering/computer science discipline, a student must have a minimum grade-point average of 2.20 in all technical engineering/computer science courses and a 2.00 overall in courses required for the double major (second major). See *Technical GPA* section for more information about how this GPA is calculated.

*SPECIAL NOTE: The Department of Computer Science has specific requirements for admission into a double major (second major) before a student will be allowed to declare either a BS or BA degree. However, a student with a BA primary degree must complete all requirements for the BA degree outlined by the Department and students with a primary BS degree must complete all the degree requirements as those outlined in the BS in Computer Science degree program.

Double Degree

Any SEAS students pursuing a double degree must meet all eligibility requirements outlined under Double Degree (<http://bulletin.gwu.edu/university-regulations/#double>) under University Regulations. They also must:

- Complete SEAS double degree application.
- Provide a course plan approved by both primary and second-degree departments.
- Receive approval from both the primary and second-degree programs' Dean's offices.

Additionally, a SEAS student wanting to complete a double degree within SEAS must:

- Complete a distinct number of major-specific credits/courses for each major, and approved by respective major departments, in accordance with ABET accreditation requirements.
- Complete two capstone projects, one for each major, with registration in the two capstone course sequences approved by the major departments.

Minors

The School of Engineering and Applied Science offers a variety of minors, including biomedical engineering, computer engineering, computer science, electrical engineering, mechanical engineering, operations research, and systems engineering to all students. The School may require students to meet certain eligibility requirements to declare the minor. SEAS students may only declare a minor outside their department and must consult their faculty advisor before enrolling in a minor in another school of the University.

SEAS students who wish to declare a minor officially should complete a Declaration of Minor form, which must be signed by both their SEAS faculty advisor and the minor department advisor. Depending on the student's major, additional credits beyond the minimum required for the minor may be required. Students from schools other than SEAS, should email seasadvising@gwu.edu for more information about requirements and eligibility criteria, before requesting to declare a minor through the department.

Graduate Programs

Degree Programs

Fields of graduate study offered by SEAS include biomedical engineering, civil and environmental engineering, computer engineering, computer science, electrical engineering, engineering management, mechanical and aerospace engineering, systems engineering, and (at the MS level only) cybersecurity in computer science, telecommunications engineering, and regulatory biomedical engineering (MEng). Degree requirements and representative areas of focus within each field are listed in this section of the Bulletin. In some fields, students may choose to focus their coursework in other specialties as well. For information on certificate, professional, and doctoral degree studies in a given field students should contact the relevant department.

Entrance requirements are outlined under individual degree programs. The following information pertains to all SEAS graduate and certificate programs.

Transfer of Credit

With the approval of the student's advisor and department chair, graduate credit earned at a level of study equivalent to that being pursued at GW may be transferred, when applicable, to meet degree requirements of the School. For

a master's or professional degree candidate, or a doctoral candidate whose highest earned degree is a master's, up to 6 credits may be transferred. For a doctoral candidate whose highest earned degree is a bachelor's, up to 24 credits may be transferred. In all cases, credits must have been completed with a minimum GPA of 3.0 at another accredited and recognized institution. The professional and doctoral degree programs require that the credit be earned no more than five years prior to admission to the GW program, and some departments require that it be earned more recently. Credit applied toward a previously earned degree may not be transferred. Transfer of credit regulations apply to courses taken as a non-degree student through GW's Office of Non-Degree Students; that is, up to 6 credits may be taken in non-degree status before applying for admission to degree status. For purposes of transfer of credit, SEAS graduate certificate programs are not considered prior degrees. At the discretion of the department concerned, the credits earned in a SEAS certificate program may be applied to a subsequent master's degree program.

English Language Requirements for International Students

Applicants who do not hold a degree from a regionally accredited U.S. institution of higher learning are required to submit scores from the Test of English as a Foreign Language (TOEFL), the academic International English Language Testing System (IELTS), or the Pearson Test of English-Academic (PTE). Visit the SEAS Graduate Admissions website (<http://graduate.seas.gwu.edu/admissions-requirements/>) for possible exemptions from this policy. The required minimum score for admission is 550 paper-based or 80 Internet-based on the TOEFL, an overall band score of 6.0 on the IELTS with no individual band score below 5.0, or a score of 53 on the PTE. The Department of Engineering Management and Systems Engineering requires a TOEFL score of 600 paper-based or 100 internet-based, or an overall band score of 7.0 on the IELTS with no individual band score below 6.0, or a score of 68 on the PTE. Applicants for graduate teaching assistantships must have a minimum score of 600 paper-based or 100 Internet-based on the TOEFL, an overall band score of 7.0 on the IELTS with no individual band score below 6.0, or a score of 68 on the PTE.

Undergraduate and graduate international students who are admitted but whose test scores fall below 100 (TOEFL), 7.0 (IELTS), or 68 (PTE) are required to take one or more courses in the English for Academic Purposes (EAP) Program. Both undergraduate and graduate students receive credit for EAP courses; however, in most cases graduate EAP credits cannot be applied to a degree. Graduate students placed in EAP courses should anticipate additional tuition expenses as well as possible extension of time needed to complete their degree programs. For detailed information concerning this requirement, consult the English for Academic Purposes Program website.

Grades

Information on grades and computing the grade-point average (GPA) is found under University Regulations (<http://bulletin.gwu.edu/university-regulations/>).

Incompletes

At the option of the instructor, the symbol of *I* (Incomplete) may be recorded if a student, for reasons beyond their control, is unable to complete the work of the course and if the instructor is informed of and approves such reasons before the date when grades must be reported. The symbol *I* may be recorded only if the student's prior performance and class attendance in the course have been satisfactory. Any course in which a student fails to complete the work of the course and does not provide the instructor with a satisfactory explanation before the date when grades must be turned in will be graded *F*. If acceptable reasons are later presented, the instructor may initiate an appropriate grade change. Although the *I* may remain on the record for a maximum of one year, the instructor should normally set a much briefer period within which the uncompleted work must be made up. The *I* cannot be removed by the student's re-registering for the course at GW or taking its equivalent elsewhere. An Incomplete that is not removed within one calendar year or at the time of the student's graduation, whichever occurs first, is automatically changed to an *F*. As of fall 2014, when the *I* is changed to a letter grade the *I* will be replaced by the letter grade on the transcript. As of fall 2014, when the *I* is changed to a letter grade the *I* will be replaced by the letter grade on the transcript. Engineering Management and Systems Engineering students with two or more outstanding Incompletes are barred from further course enrollment; see Incompletes under University Regulations regarding continuous enrollment.

Credit/No Credit Grading System

SEAS students may take SEAS courses under the Credit/No Credit grading system, but credit for such courses cannot be applied toward any degree program in SEAS.

Residence and Continuous Enrollment

All work for the degree must be completed in residence unless an exception is granted by the department chair. Students in a degree program are expected to be continuously enrolled in the School until the degree is conferred. To maintain continuous enrollment, students may register in one of the following categories. See Residence and Continuous Enrollment under University Regulations (<http://bulletin.gwu.edu/university-regulations/>) for more information.

Leave of Absence

This status is available to students who, with special permission, are attending classes at another institution; who have temporarily transferred out of the area, e.g., for military TDY; or who are having temporary medical problems. A leave of absence is usually limited to two semesters. See Leave of

Absence under University Regulations (<http://bulletin.gwu.edu/university-regulations/>) for more information.

Continuing Research

Students who have completed their research credits but are not yet ready to defend a thesis or dissertation, must register for 1 credit of SEAS 0920 Continuing Research - Master's or SEAS 0940 Continuing Research - Doctoral each semester as appropriate.

Examination Preparation

Students who are studying for a comprehensive or qualifying examination for the current or following semester, and are not taking any courses, must register for SEAS 0930 Examination Preparation (Examination Preparation) as appropriate. A student who breaks their registration must apply for readmission to the degree program under whatever conditions and regulations are in force at that time.

Master of Science

The MS degree is offered in the fields of biomedical engineering, civil and environmental engineering, computer engineering, computer science, data analytics, electrical engineering, engineering management, mechanical and aerospace engineering, systems engineering, cybersecurity in computer science, and telecommunications engineering. Each field in turn encompasses several areas of focus. The course of study responds to the unique interests of the student, who designs an individual program in close consultation with an assigned advisor. In most areas, students follow a prescribed core and approved elective courses from within SEAS and from other schools of the University. Because engineering expertise includes a broad foundation in technology, engineering students may profit from study in other academic areas to sharpen their focus in practice. Students must satisfy, through undergraduate studies or otherwise, either the prerequisites specified for the desired field or approved equivalents.

Entrance Requirements

Admission to the master of science degree program requires an appropriate bachelor's degree from a recognized institution and evidence of a strong academic background and capacity for productive work in the field selected. All applicants must submit scores from the Graduate Record Examination (GRE) general test, with the exception of applicants from SEAS undergraduate programs and those applying to the data analytics program, special cohort and contract programs. In general, a minimum GPA of 3.0 (on a 4.0 scale) in the last 60 credits of undergraduate coursework is recommended. Students must submit a statement of purpose and a minimum of two letters of recommendation, which may be from the student's advisor, faculty member(s) from the institution where the highest degree was earned, and/or workplace supervisor. Visit the Graduate Admissions website (<https://graduate.admissions.gwu.edu/>) for more information.

Special Programs

Admission to the 5-year dual BS/MS degree program requires an appropriate bachelor's degree from SEAS undergraduate programs recognized in the Regulations section. In general, a minimum GPA of 3.4 (on a 4.0 scale) is required. Students must submit a statement of purpose and a minimum of two letters of recommendation, which may be from the student's advisor, faculty member(s) from the institution where the highest degree was earned, and/or workplace supervisor. Visit the Graduate Admissions website (<https://graduate.admissions.gwu.edu/>) for more information.

Completion of the program should occur within two semesters but can take up to four semesters after the conferral of their SEAS undergraduate degree.

Graduation and Scholarship Requirements

To meet graduation requirements, courses specified in a student's program of study must be completed with a minimum GPA of 3.0. This is in addition to the requirements specified for graduation under University regulations. Courses specified upon admission as deficiency or prerequisite courses do not form part of the program of study. Students who receive two grades of *F* or three grades below *B–* are barred from further enrollment in graduate courses and will not be readmitted as a degree candidate. Students may not repeat for credit a course in which they have received a minimum grade of *C–*, unless required to do so by the department chair. A written statement requiring a student to repeat such a course for credit must be submitted to the registrar by the department chair. See further graduation policies under University Regulations (<http://bulletin.gwu.edu/university-regulations/>).

Time Limits

Full-time students in the master's program are allowed a maximum of three calendar years from the date of first registration as a degree candidate in prerequisite or graduate courses to complete all degree requirements; this time limit excludes any time spent taking English for Academic Purposes courses only. Part-time students in the master's program are allowed a maximum of five calendar years. The time limit does not include any period of registration as an unclassified student before admission to degree candidate status or any period spent on approved leave of absence. Students on F1 or J1 visas and students with external funding may have different time limits. Students who do not complete degree requirements within the allowed time will have their degree candidate status terminated. They may be readmitted to degree candidate status under conditions specified by the department chair and approved by the dean.

Master's Thesis

The master's thesis must demonstrate a student's ability to make independent use of the knowledge and discipline of thought acquired through graduate study, to undertake constructive work in a given field, and to communicate the

results of the work in writing. Suitable work for which the student has professional responsibility may be considered, whether done on or off campus, provided no significant amount of work is completed without faculty supervision. An accepted thesis is the property of the University.

To register for the thesis course sequence, students must submit their advisor-approved thesis area to the appropriate department chair. While registered in the thesis course sequence, students are entitled to the advice of the faculty member under whom the thesis is to be written. Students may consult with their advisors, but they have primary responsibility for their own thesis. Students defend their theses orally before a committee of SEAS faculty members.

The thesis in final form must be submitted by the stated deadline. In the event a thesis is unfinished on the date specified, the student must register for SEAS 0920 (Continuing Research - Master's). The overall time limit for earning the degree (see Time Limits, above) may not be exceeded. All theses must be submitted electronically and meet the formatting and other requirements set forth on GW's Electronic Theses and Dissertations Submission website (<http://library.gwu.edu/etds/>). Additional information regarding thesis requirements and dates may be found under University Regulations (<http://bulletin.gwu.edu/university-regulations/>).

Master of Engineering (MEng)

The MEng degree is offered in the fields of cybersecurity policy and compliance (CPC) and regulatory biomedical engineering (rBME). The MEng (CPC) is a cohort program offered online. Its interdisciplinary content comprises courses from SEAS's departments of computer science, electrical and computer engineering, and engineering management and systems engineering. The degree presents the latest trends in cybersecurity policy to provide the tools needed to stay at the forefront of this fast-changing discipline. Course materials can be absorbed by those with technical and nontechnical bachelor's degrees. Visit the program website (<https://onlinecybersecurity.seas.gwu.edu/>) for more information. The master of engineering in regulatory biomedical Engineering (rBME) is an interdisciplinary program offered through the Department of Biomedical Engineering (<https://www.bme.seas.gwu.edu/>) in partnership with GW's School of Medicine and Health Sciences (<http://smhs.gwu.edu/>). The new program addresses a pressing need for a graduate program to train engineers in the specific set of skills of regulatory science, biomedical innovation, and entrepreneurship. Students with training in engineering or physics and/or relevant industry/government experience study the fundamentals of biomedical engineering, global regulatory affairs, regulatory strategy in the development of devices and diagnostics, regulatory compliance, engineering patent law, medical measurements, and instrument design. In addition to coursework, students gain experience in SBIR/STTR grant applications and/or

FDA Premarket Notification (510(k)) submissions for medical devices.

Entrance Requirements

Admission to the master of engineering degree program requires an appropriate bachelor's degree from a recognized institution and evidence of a strong academic background and capacity for productive work in the field selected. All applicants must submit scores from the Graduate Record Examination (GRE) general test, with the exception of applicants from SEAS undergraduate programs and those applying to cohort and contract programs. In general, a minimum GPA of 3.0 (on a 4.0 scale) in the last 60 credits of undergraduate coursework is recommended. MEng(CPC) applicants (<https://onlinecybersecurity.seas.gwu.edu/admissions/>) must submit an up-to-date resume; three letters of recommendation, at least one of which must come from a professional reference; and evidence of work experience in an IT field if they do not hold a degree in a technical discipline. MEng (BME) students must submit a statement of purpose and a minimum of two letters of recommendation. Recommendation letters may be from the student's advisor, faculty member(s) from the institution where the highest degree was earned, and/or workplace supervisor. Visit the Graduate Admissions website (<http://www.gwu.edu/gradapply/>) for more information.

Graduation and Scholarship Requirements

To meet graduation requirements, courses specified in a student's program of study must be completed with a minimum GPA of 3.0. This is in addition to the requirements specified for graduation under University regulations. Courses specified upon admission as deficiency or prerequisite courses do not form part of the program of study. Students who receive two grades of F or three grades below B- are barred from further enrollment in graduate courses and will not be readmitted as a degree candidate in SEAS. Students may not repeat for credit a course in which they have received a minimum grade of C-, unless required to do so by the department chair. A written statement requiring a student to repeat such a course for credit must be submitted to the registrar by the department chair. See further graduation policies under University Regulations (<http://bulletin.gwu.edu/university-regulations/>).

Time Limits

All MEng (CPC) cohort students must complete the program in three years. Full-time students in the MEng (BME) program are allowed a maximum of three calendar years from the date of first registration as a degree candidate in prerequisite or graduate courses to complete all degree requirements; this time limit excludes any time spent taking English for Academic Purposes courses only. Part-time rBME students are allowed a maximum of five calendar years. The time limit does not include any period of registration as an unclassified student before admission to degree candidate status or any period spent on approved leave of absence. Students on F1 or J1 visas and students with external funding may have different time limits. Students who do not complete degree requirements

within the allowed time will have their degree candidate status terminated. They may be readmitted to degree candidate status under conditions specified by the department chair and approved by the dean.

Graduate Certificates

Entrance Requirements

Admission to SEAS certificate programs requires an appropriate bachelor's degree from a recognized institution and evidence of a strong academic background and capacity for productive work in the field selected. All applicants must provide an online application, statement of purpose, and resume and/or curriculum vitae. In general, a minimum GPA of 3.0 (on a 4.0 scale) in the last 60 credits of undergraduate coursework is recommended. Certificate applicants are not required to submit letters of recommendation. Visit the Graduate Admissions website (<https://www.gwu.edu/graduate-admissions/>) for more information.

Graduation and Scholarship Requirements

In order to receive the graduate certificate students must have a minimum GPA in courses specified in their program of study. Courses specified upon admission as deficiency or prerequisite courses do not form part of the program of study. Students who receives two grades of *F* or three grades below *B–* are barred from further enrollment in graduate courses, and will not be readmitted as a candidate. Students may not repeat for credit a course in which they have received a minimum grade of *C–*, unless required to do so by the department chair. A written statement requiring a student to repeat such a course for credit must be submitted to the registrar by the department chair. Additional information regarding graduation requirements may be found under University Regulations (<http://bulletin.gwu.edu/university-regulations/>).

Professional Degrees

The SEAS professional degree programs are designed for those students who wish to pursue coursework beyond the master's degree with emphasis on applied subject material rather than on basic research. Successful completion of the professional degree program leads to the degree of engineer or of applied scientist.

For admission to the degree of engineer, an applicant must have earned both a bachelor's and master's degree in an area of engineering. For the degree of applied scientist, an applicant must possess a master's degree in engineering, computer science, natural science, or mathematics. Applicants who have an equivalent quantitative background may be considered as special cases by the respective departments.

Entrance Requirements

For admission to the degree of engineer, an applicant must have earned both a bachelor's and master's degree in an

area of engineering. For the degree of applied scientist, an applicant must possess a master's degree in engineering, computer science, natural science, or mathematics. Applicants who have an equivalent quantitative background may be considered as special cases by the respective departments.

Entrance requirements may vary by department within SEAS. A minimum GPA of 3.0 in graduate work is usually required, although individual departments often set higher admission standards. Some programs have specified prerequisites. An applicant who has significant deficiencies in preparation may be required to take prerequisite courses, which do not count toward any part of the requirements for the professional degree. The Departments of Computer Science and Electrical and Computer Engineering require applicants for the professional degree to have had two years of professional experience after receiving the master's degree. For specific entrance and application requirements see Master's Degree.

Graduation and Scholarship Requirements

The professional degree programs consist of a minimum of 30 credits in approved graduate-level courses beyond a master's degree. Programs of study are determined by established prerequisites and the requirements of the department in which the student wishes to enroll. The student's program must be approved by the faculty advisor and the department chair. Departments may require degree candidates to undertake and defend the results of a technical design project or development problem, or to prepare a comprehensive technical report to demonstrate the candidate's ability to make independent use of the knowledge and discipline of thought acquired through graduate study. When applicable, the student is informed of this requirement by the faculty advisor at the time when the student's program is being formulated. The project may not account for more than 6 credits.

If a student studying for the professional degree receives two grades of *F* or three grades below *B–*, study is terminated and further enrollment prohibited. A student must have a minimum of GPA of 3.0 in order to receive the degree.

Time Limits

A full-time student in the master's program is allowed a maximum of three calendar years from the date of first registration as a degree candidate in prerequisite or graduate courses to complete all degree requirements. A part-time student is allowed a maximum of five calendar years. The time limit does not include any period of registration as an unclassified student before admission to degree candidate status or any period spent on approved leave of absence. Students who do not complete degree requirements within the allowed time will have their degree candidate status terminated. Such students may be readmitted to degree candidate status under conditions specified by the department chair.

Transfer Between Degree Programs

Candidates for the professional or doctor of philosophy degree who are in good academic standing may, with the approval of the faculty advisor and department chair, transfer from one degree program to the other within their department if they meet the qualifications and requirements specified by the department. In the Department of Engineering Management and Systems Engineering, only one such transfer is permitted.

Doctoral Programs

Doctor of Philosophy

The doctoral program is designed to prepare students for careers of creative scholarship by providing a broad but balanced background of knowledge and guidance in the performance of research. The program is divided into two stages: the first comprises a study of related fields of learning that support the general area of research concentration and culminates in a qualifying examination; the second, composed of original research and the presentation of findings in a written dissertation, culminates in a final examination.

Entrance Requirements

Admission to the PhD program requires an appropriate bachelor's or master's degree from a recognized institution, evidence of a strong academic or relevant professional background, coursework designated by the department as pertinent to the field to be studied, and capacity for research. With the exception of applicants from SEAS BS and M.S. programs, applicants must submit scores from the Graduate Record Examination (GRE) general test. All applicants must submit a minimum of three letters of recommendation, at least one of which should be from the advisor and/or faculty members at the institution(s) from which a degree was earned. Students for whom the bachelor's is the highest earned degree must have a minimum GPA of 3.3 (on a 4.0 scale) in undergraduate work. Students for whom the master's is the highest earned degree, departmental requirements for the GPA in coursework leading to that degree are as follows (on a 4.0 scale): Civil and Environmental Engineering, Electrical and Computer Engineering, and Mechanical and Aerospace Engineering—3.4; Computer Science, and Engineering Management and Systems Engineering—3.5. Consult the department concerned for field-specific admission requirements.

Graduation and Scholarship Requirements

Upon admission to the first stage of the program—study of related fields culminating in the qualifying examination—students are assigned a faculty advisor who directs their studies. In some departments, a faculty committee may be appointed instead of a single advisor. Consult the department concerned for requirements.

For students who enter the program with a master's degree, the formal program of study consists of a minimum of 30

graduate-level credits. For students who enter with a bachelor's degree only, the program of study consists of a minimum of 54 graduate-level credits. These credits include both course and dissertation research credit. Individual requirements may vary by department. In many cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits stated above. Departments may establish a tool requirement, such as an examination in a computer language. Consult the department concerned for specific curriculum requirements.

If a doctoral student receives two grades of *F* or three grades below *B–*, graduate study is terminated and further enrollment prohibited. Courses in which the student earned grades below *B–* are not included in the total credit requirement for the degree. Students who receive any grade below *B–* are required to review their programs of study with their advisors. Visit the doctor of engineering in engineering management (<https://seasonline.gwu.edu/doctoral-degrees/doctor-of-engineering/>) and doctor of philosophy in systems engineering (<https://seasonline.gwu.edu/doctoral-degrees/doctor-of-philosophy/>) program websites for graduation and scholarship information for those distance learning doctorates.

Time Limits

In general, one year of full-time study is the minimum amount of time needed to prepare for the qualifying examination. Students should consult the individual department for specific timelines and regulations. In general, the qualifying examination must be completed within five years of the date of admission, unless specified otherwise by the department. The entire degree program must be completed within seven years, unless the department grants an extension. Approval of an extension is conditional on satisfactory progress. The time period for completion of the degree may be adjusted by the department for an approved leave of absence. A minimum of two years of full-time study and three years of research should be expected. All time periods indicated here are increased by two years for students entering the doctoral program without a master's degree.

Full-time doctoral students must register for a minimum of 9 credits per semester until the minimum number of credits are completed, and 1 credit of SEAS 0940 (Continuing Research - Doctoral) each semester thereafter until satisfactory completion of the final examination. Part-time doctoral students usually register for a minimum of 6 credits per semester until the minimum number of credits is completed, and 1 credit of Continuing Research each semester thereafter until satisfactory completion of the final examination. No minimum workload is required during the summer session.

Preliminary and Qualifying Examinations

The Department of Computer Science requires a preliminary examination that must be passed within four semesters of

starting the program. It comprises material from the areas of algorithms and theory, and software and systems.

The Department of Electrical and Computer Engineering requires a preliminary examination that must be taken before completing 18 credits after initial registration. The examination is guided by, but not limited to, the core material of the GW master's program. Specific details regarding the structure of the exam are available in the department.

To be admitted to the qualifying examination that is required of all doctoral students, students must have a minimum cumulative GPA of 3.2 in the Departments of Civil and Environmental Engineering and Computer Science, and of 3.4 in the Departments of Biomedical Engineering, Electrical and Computer Engineering, Engineering Management and Systems Engineering, and Mechanical and Aerospace Engineering.

The qualifying examination is the principal means of determining whether a student will qualify as a candidate for the doctoral degree and progress to the second stage of the program. Its purpose is to ascertain whether the student's background and intellectual development are adequate to support doctoral research in the central field.

Preliminary and qualifying examinations may be written or oral or both. Students should consult the departments for specific guidelines. The examinations are conducted on dates established by the departments and are administered by a faculty committee. Upon favorable report of the examiners following the qualifying examination, students are admitted to candidacy for the degree. Students then begin specialized study and research under the supervision of a designated member of the full-time faculty. At the discretion of the committee that prepared the examination, students who fail any part of the qualifying examination may be given a second opportunity to qualify for candidacy. Usually, the entire examination must be retaken. Students who fail to qualify for candidacy in a doctoral program of the School will be considered to have failed on a school-wide basis and will not be admitted to further doctoral study within the School.

The Dissertation and Final Examination

Students admitted to candidacy for the degree of Doctor of Philosophy choose the faculty member under whom they wish to conduct research. The faculty member may accept or reject the request to serve as the student's director of research. The research area must be approved by the director, under whom the candidate conducts dissertation research throughout the remainder of the doctoral program. Students may consult other members of the faculty on an informal basis. In the Departments of Engineering Management and Systems Engineering and Civil and Environmental Engineering, students are required to present a written dissertation proposal to a committee of three full-time faculty members and to successfully defend the proposal in an oral defense prior to performing the bulk of their dissertation research. Work on

the dissertation encompasses a minimum of 12 to 24 credits, depending on the department.

The dissertation should embody the results of extended original study and include material deemed worthy of publication in recognized scientific and engineering journals. Students are expected to attempt to have the results of the research published as soon as possible after they receive the degree and to submit copies of the published material to the dean. The Department of Computer Science requires that at least one article be accepted for publication by a refereed conference or journal prior to completion of degree requirements. The Department of Engineering Management and Systems Engineering requires that an article be accepted for review by a refereed journal prior to completion of degree requirements; see the Doctor of Philosophy in Systems Engineering program (p. 679) website. The Department of Electrical and Computer Engineering requires the submission of a paper to a refereed journal and its acceptance for publication prior to the completion of degree requirements. Credit must be given in the publication to the fact that the material is abstracted, summarized, or developed from a dissertation submitted to The George Washington University in partial fulfillment of the requirements for the PhD.

All dissertations must be submitted electronically and meet the formatting and other requirements set forth at GW's Electronic Theses and Dissertations Submission website (<http://library.gwu.edu/etds/>). Regulations regarding the form of the dissertation and preparation of the abstract are available in department offices. The dissertation, with accompanying files, becomes the property of the University.

Upon acceptance of the dissertation by the research committee, the candidate is presented for the final examination. The final examination is oral and is open to the public. The candidate must demonstrate a mastery of the special field of study and of the materials and techniques used in the research. The committee of examiners may include qualified experts brought to the University especially to participate in the examination. The director of research usually serves as advocate for the candidate. Students should consult department regulations concerning the formation of the committee and scheduling of the examination. When the examining committee is convinced of the quality and originality of the candidate's contribution to knowledge as well as his or her mastery of the scholarship and research techniques of the field, the committee recommends the candidate for the degree of doctor of philosophy. Students completing their degree program should refer to the sections on Eligibility for Graduation and Participation in the Commencement Ceremony under University Regulations (p. 27).

Doctor of Engineering

The School of Engineering and Applied Science offers an off-campus doctor of engineering (DEng) degree program. The doctor of engineering program addresses the widespread

need for practitioners who can apply the knowledge they gain in the program of study within a business or technical environment, wherein the constant challenge is to create useful applications of the latest engineering principles and lead organizations that are occupied in this work.

The doctor of engineering degree currently is offered only in engineering management.

Doctor of Engineering in Engineering Management

The DEng (EM) program demands that research be applied to the solution of a real-world problem using the latest engineering concepts and tools—in other words, research toward the DEng program is applied, rather than basic. Its purpose is to empower students, who are likely to be practicing engineers, to create advanced, practice-based solutions.

Admission to the DEng (EM) program requires: (1) bachelor's and master's degrees from accredited institutions in engineering, applied science, mathematics, computer science, business administration, or information technology; (2) a minimum of two college-level calculus courses passed with grades of B- or above; and (3) a minimum graduate-level GPA of 3.2 (on a 4.0 scale).

The DEng (EM) program consists of 45 credits divided into a classroom phase of 10 graduate-level, three-credit courses, and a research phase during which a practice-based case study is undertaken on a topic related to engineering management, chosen by the student and approved by the adviser. Research for the case study comprises 15 credits. Prospective students are advised to contact the Engineering Management and Systems Engineering Department for additional information.

Visit the program website for additional information.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in applied science and technology (p. 738)
- Bachelor of Arts with a major in computer science (p. 740)
- Bachelor of Science with a major in biomedical engineering (p. 743)
- Bachelor of Science with a major in civil engineering (p. 744)
- Bachelor of Science with a major in civil engineering, environmental engineering option (p. 747)
- Bachelor of Science with a major in civil engineering, medical preparation option (p. 749)
- Bachelor of Science with a major in civil engineering, transportation and sustainability engineering option (p. 751)
- Bachelor of Science with a major in computer engineering (p. 753)
- Bachelor of Science with a major in computer science (p. 755)
- Bachelor of Science with a major in electrical engineering (p. 759)
- Bachelor of Science with a major in electrical engineering, energy option (p. 760)
- Bachelor of Science with a major in electrical engineering, medical preparation option (p. 762)
- Bachelor of Science with a major in mechanical engineering (p. 764)
- Bachelor of Science with a major in mechanical engineering, aerospace option (p. 765)
- Bachelor of Science with a major in mechanical engineering, biomechanical option (p. 767)
- Bachelor of Science with a major in mechanical engineering, medical preparation option (p. 768)
- Bachelor of Science with a major in mechanical engineering, patent law option (p. 770)
- Bachelor of Science with a major in mechanical engineering, robotics option (p. 771)
- Bachelor of Science with a major in systems engineering (p. 773)

Minors

- Minor in biomedical engineering (p. 786)
- Minor in computer engineering (p. 786)
- Minor in computer science (p. 788)
- Minor in electrical engineering (p. 787)
- Minor in mechanical engineering (p. 787)
- Minor in operations research (p. 788)
- Minor in systems engineering (p. 788)

Combined programs

- Dual Bachelor of Arts with a major in applied science and technology and master of science in the field of computer science (p. 775)
- Dual Bachelor of Arts with a major in applied science and technology and Master of Science in the field of cybersecurity in computer science (p. 776)
- Dual Bachelor of Arts with a major in applied science and technology and Master of Science in the field of data analytics (p. 776)
- Dual Bachelor of Arts with a major in computer science and Master of Science in the field of computer science (p. 776)
- Dual Bachelor of Arts with a major in computer science and Master of Science in the field of cybersecurity in computer science (p. 776)
- Dual Bachelor of Science with a major in biomedical engineering and Master of Engineering in the field of regulatory biomedical engineering (p. 777)
- Dual Bachelor of Science with a major in biomedical engineering and Master of Science in the field of

biomedical engineering (<http://bulletin.gwu.edu/engineering-applied-science/biomedical-engineering/combined-bs-ms-biomedical-engineering/>)

- Dual Bachelor of Science with a major in biomedical engineering and Master of Science in the field of computer science (p. 777)
- Dual Bachelor of Science with a major in civil engineering and Master of Science in the field environmental engineering (p. 777)
- Dual Bachelor of Science with a major in civil engineering and Master of Science in the field structural engineering (p. 777)
- Dual Bachelor of Science with a major in civil engineering and Master of Science in the field transportation engineering (p. 779)
- Dual Bachelor of Science with a major in computer engineering and Master of Science in the field of computer engineering (p. 781)
- Dual Bachelor of Science with a major in computer engineering and Master of Science in the field of electrical engineering (p. 781)
- Dual Bachelor of Science with a major in computer engineering and Master of Science in the field of telecommunications engineering (p. 782)
- Dual Bachelor of Science with a major in computer science and Master of Science in the field of computer science (p. 782)
- Dual Bachelor of Science with a major in computer science and Master of Science in the field of cybersecurity in computer science (p. 782)
- Dual Bachelor of Science with a major in electrical engineering and Master of Science in the field of computer engineering (p. 782)
- Dual Bachelor of Science with a major in electrical engineering and Master of Science in the field of electrical engineering (p. 782)
- Dual Bachelor of Science with a major in mechanical engineering and Master of Science in the field mechanical engineering (p. 783)
- Dual Bachelor of Science with a major in electrical engineering and Master of Science in the field of telecommunications engineering (p. 784)
- Dual SEAS Bachelor of Science majors and Master of Science in the field of computer science (p. 784)
- Dual SEAS Bachelor of Science majors and Master of Science in the field of cybersecurity in computer science (p. 785)
- Dual SEAS Bachelor of Science majors and Master of Science in the field of data analytics (p. 785)

MASTER'S

Master's programs

- Master of Engineering in the field of cloud computing management (p. 789) (online)
- Master of Engineering in the field of construction engineering (p. 790)
- Master of Engineering in the field of cybersecurity analytics (p. 791) (online)
- Master of Engineering in the field of cybersecurity policy and compliance (p. 790) (online)
- Master of Engineering in the field of regulatory biomedical engineering (p. 791)
- Master of Science in the field of biomedical engineering (p. 792)
- Master of Science in the field of civil and environmental engineering (p. 793)
- Master of Science in the field of computer engineering (p. 794)
- Master of Science in the field of computer science (p. 795)
- Master of Science in the field of cybersecurity in computer science (p. 796)
- Master of Science in the field of data analytics (p. 798)
- Master of Science in the field of electrical engineering (p. 799) (on-campus or online)
- Master of Science in the field of engineering management (p. 802) (on-campus or online)
- Master of Science in the field of mechanical and aerospace engineering (p. 804)
- Master of Science in the field of systems engineering (p. 805) (on-campus or online)
- Master of Science in the field of telecommunications engineering (p. 807)

DOCTORAL

Doctoral programs

- Doctor of Engineering in the field of engineering management (p. 807) (on-campus or online)
- Doctor of Philosophy in the field of biomedical engineering (p. 808)
- Doctor of Philosophy in the field of civil and environmental engineering (p. 809)
- Doctor of Philosophy in the field of computer engineering (p. 810)
- Doctor of Philosophy in the field of computer science (p. 811)
- Doctor of Philosophy in the field of electrical engineering (p. 813)
- Doctor of Philosophy in the field of engineering management (p. 814)

- Doctor of Philosophy in the field of mechanical and aerospace engineering (p. 816)
- Doctor of Philosophy in the field of systems engineering (p. 818) (on-campus or online)

CERTIFICATES

Certificate Programs

At the discretion of the respective departments, credit earned in a certificate program may be applied to a subsequent master's degree program. Scholarship requirements are the same as those for the master's degree program. Details are available in the Office of the Dean.

Graduate Certificates

- Gateway to computer science graduate certificate (<http://bulletin.gwu.edu/engineering-applied-science/computer-science/certificate-gateway-to-cs/>)
- Graduate certificate in computer-integrated design in mechanical and aerospace engineering (p. 820)
- Graduate certificate in computer security and information assurance (p. 821)
- Graduate certificate in emergency management and public health (p. 821)
- Graduate certificate in energy engineering and management (p. 822)
- Graduate certificate in engineering and technology management (p. 822)
- Graduate certificate in environmental engineering (p. 823)
- Graduate certificate in environmental and energy systems management (p. 824)
- Graduate certificate in geoenvironmental engineering (p. 824)
- Graduate certificate in high-performance computing (p. 825)
- Graduate certificate in homeland security emergency preparedness and response (p. 826)
- Graduate certificate in structural engineering (p. 826)
- Graduate certificate in systems engineering (p. 827)
- Graduate certificate in systems management (p. 827)
- Graduate certificate in transportation engineering (p. 828)

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Applied Sciences (APSC) (p. 1417)
- Biomedical Engineering (BME) (p. 1438)
- Civil Engineering (CE) (p. 1454)
- Computer Science (CSCI) (p. 1471)
- Electrical and Computer Engineering (ECE (p. 1553)) (p. 1553)
- Engineering Management and Systems Engineering (EMSE (p. 1567)) (p. 1567))
- Mechanical and Aerospace Engineering (MAE (p. 1692)) (p. 1692))
- School of Engineering and Applied Sciences (SEAS (p. 1812)) (p. 1812))

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

BIOMEDICAL ENGINEERING

OVERVIEW

Mission

The mission of the Department of Biomedical Engineering is to motivate and inspire students by providing high-caliber, fully integrated programs to prepare them to lead and participate in advancing the state of the art in health care technologies. In addition, graduates earn advanced degrees and further knowledge in the discipline by actively pursuing scholarly research for publication and dissemination.

Biomedical Engineering Program Educational Objectives

The biomedical engineering program prepares graduates who achieve employment in biomedical and related industry, government, or organizational fields using skills and knowledge learned while an undergraduate student. This is evidenced by their:

- Employment history and/or career advancement.
- Professional visibility (e.g., patents, invention disclosures, honors or awards, refereed journal articles, conference papers and other publications, and involvement in professional associations).
- Entrepreneurial activities.

Student Outcomes

The Department of Biomedical Engineering aims to produce graduates who are able to:

- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments that consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- Function effectively on a team whose members work together to provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

UNDERGRADUATE

Bachelor's program

- Bachelor of Science with a major in biomedical engineering (p. 743)
- Bachelor of Science with a Second Major in Biomedical Engineering.

Any undergraduate student who is enrolled at GW, may declare a second major in biomedical engineering only if their primary degree is a bachelor of science and the student must follow all the same degree requirements as those receiving a bachelor of science in biomedical engineering which including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students pursuing other bachelor's degrees (e.g., BA, BBA, BFA) must complete a double degree (p.).

GRADUATION GRADE-POINT AVERAGE CRITERIA

To satisfactorily complete a second major in biomedical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

Minor

- Minor in biomedical engineering (p. 786)

Combined programs

- Dual Bachelor of Science with a major in biomedical engineering and Master of Engineering in the field of regulatory biomedical engineering (p. 777)
- Dual Bachelor of Science with a major in biomedical engineering and Master of Science in the field of biomedical engineering (p. 777)
- Dual Bachelor of Science with a major in biomedical engineering and Master of Science in the field of computer science (p. 777)

GRADUATE

Master's programs

- Master of Engineering in the field of regulatory biomedical engineering (p. 791)
- Master of Science in the field of biomedical engineering (p. 792)

Doctoral program

- Doctor of Philosophy in the field of biomedical engineering (p. 808)

FACULTY

Professors I. Efimov (Chair), E. Entcheva, M. Kay, M. Loew, J. Zara, V. Zderic

Associate Professors Z. Li, C. Park

Assistant Professors A. Papa, L. Lu

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BME 1010. Introduction to Biomedical Engineering. 1 Credit.

Basic and emerging concepts in electrical, computer, and biomedical engineering. Hands-on experiments and projects. Introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills. (Fall, Every Year).

BME 1020. Introduction to Biomedical Engineering. 2 Credits.

Continuation of BME 1010. Basic and emerging concepts in electrical, computer, and biomedical engineering; practical experiments and projects; introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills. Prerequisite: BME 1010. (Spring, Every Year).

BME 2810. Biomedical Engineering Seminar I. 1 Credit.

BME 2810 and BME 2815 are taken in sequence by students in the biomedical engineering major. Overview of the field of biomedical engineering, including biomechanics, bioinformatics, telemedicine, instrumentation, and medical imaging. Prerequisite: BME 1020. (Fall).

BME 2815. Biomedical Engineering Seminar II. 1 Credit.

BME 2810 and BME 2815 are taken in sequence by students in the biomedical engineering major. Overview of the field of biomedical engineering, including biomechanics, bioinformatics, telemedicine, instrumentation, and medical imaging. (Fall and spring).

BME 2820. Biomedical Engineering Programming I. 3 Credits.

Introduction to Matlab Programming and fundamentals of programming in general with a focus on biomedical engineering problems. Functions, input/output, selection statements, loop statements, string manipulation, and debugging techniques are covered; manipulation of vectors and matrices and the use of vectorized code. (Fall, Every Year).

BME 2825. Biomedical Engineering Programming II. 3 Credits.

Introduction to C Programming and fundamentals of data structures with a focus on biomedical engineering problems; the use of data structures, pointers, and linked lists and discuss concepts such as binary trees and sorting algorithms. Students are expected to understand the basics of programming concepts such as the use of functions, input/output, selection statements, loop statements, string manipulation, and debugging techniques are understood, but no prior knowledge of C is required. Prerequisites: BME 2820 or permission of the instructor. (Fall, Every Year).

BME 3820. Principles and Practice of Biomedical Engineering. 4 Credits.

Introduction to engineering principles applicable to medicine; medical measurements for clinical use and research; anatomy and physiology of the human body from system and cellular approaches. Principles of biomedical engineering are reinforced by determining and analyzing physiological measurements in laboratory exercises. Prerequisites: ECE 2110 and APSC 2113. (Fall).

BME 3907. Special Topics in Biomedical Engineering. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. See department for more details. (Fall, spring, and summer, Every Year).

BME 3910. Capstone Design Preparation. 1 Credit.

Elements of project design; formulation of project ideas. Prerequisites: BME 2810 and BME 2815. (Fall, Every Year).

BME 3915W. Biomedical Engineering Capstone Project Lab I. 1 Credit.

BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: BME 3910. (Same as ECE 3915W) (Spring, Every Year).

BME 4480. Bioelectricity. 3 Credits.

Origin and applications of bioelectric phenomena; engineering tools for excitable cells, tissues and organs; biophysical and equivalent electrical engineering analysis; heart and brain abnormalities from a quantitative perspective. (Spring, Every Year) Same As: BME 6480.

BME 4488. Cell and Molecular Imaging. 3 Credits.

Basics of optics, microscopy, spectroscopy, and fluorescence in the context of imaging at the cellular and molecular level; advanced techniques for probing protein interactions and live cell functions; image processing algorithms and principles of scientific visualization. Restricted to juniors and seniors. Prerequisites: BME 2825 and ECE 3220. (Same as BME 6488) (Fall, Every Year).

BME 4489. Socially Assistive Robotics and Interactive Learning. 3 Credits.

Application of advanced robotic solutions to promoting human lives through social, emotional, and interactive therapies in areas such as social and behavioral therapies for children with autism spectrum disorder (ASD) and emotional and rehabilitation assistance in elder care. Prerequisite: BME 2825. Recommended background: Experience with computer programming. (Fall, Every Year) Same As: BME 6489.

BME 4820. Anatomy and Physiology for Engineers. 3 Credits.

Human anatomy and physiology from an engineering viewpoint. Analysis of functions of major physiological systems. Biopotentials, mechanics, gas exchange, chemical balance, electrical and chemical signaling, nervous control, voluntary and reflex factors. (Same as BME 6820) (Fall).

BME 4825. Biomedical Properties Laboratory. 1 Credit.

Introduction to biophysical concepts in a laboratory setting; emphasis on biomedical engineering. (Spring).

BME 4830. Introduction to Medical Imaging Methods. 3 Credits.

Application of linear systems analysis methods to medical imaging techniques; basic properties of imaging systems; physics and instrumentation behind modalities; advantages, disadvantages, and primary applications of modalities. Prerequisites: BME 3820 and ECE 3220. (Spring, Every Year).

BME 4835. Introduction to Assistive Robotics. 3 Credits.

Application of advanced robotic solutions to promoting human lives through social, emotional, and interactive therapies in areas such as social and behavioral therapies for children with autism spectrum disorder (ASD) and emotional and rehabilitation assistance in elder care. Prerequisites: BME 2825 and ECE 3220. (Spring, Every Year).

BME 4920W. Biomedical Engineering Capstone Project Lab II. 3 Credits.

BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: BME 3915W. (Same as ECE 4920W) (Fall, Every Year).

BME 4925W. Biomedical Engineering Capstone Project Lab III. 3 Credits.

BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Spring, Every Year).

BME 4990. Research. 1-3 Credits.

Applied research and experimentation projects, as arranged. Restricted to juniors and seniors. (Fall and spring, Every Year).

BME 6045. Special Topics. 1-3 Credits.

Topics to be announced in the Schedule of Classes. (Fall and spring).

BME 6050. Research. 1-12 Credits.

Applied research and experimentation projects, as arranged. May be repeated for credit. (Spring, Every Year).

BME 6065. Colloquium. 3 Credits.

Seminars and meetings featuring visiting scholars in biomedical engineering. Topics vary. See department for details. Restricted to graduate students in biomedical engineering. (Fall and spring, Every Year).

BME 6480. Bioelectricity. 3 Credits.

Origin and applications of bioelectric phenomena; engineering tools for excitable cells, tissues and organs; biophysical and equivalent electrical engineering analysis; heart and brain abnormalities from a quantitative perspective. Restricted to graduate students. (Spring, Every Year) Same As: BME 4480.

BME 6481. Regulatory Law for Medical Devices. 3 Credits.

An introduction to legal issues pertinent to medical device regulation; device classification, general and special controls, quality system regulation, 510(k) submissions, premarket approval applications (PMAs), clinical trials, investigational device exemptions (IDEs) and medical device reporting (MDR), recalls, labeling and advertising, enforcement, and emerging legal issues. Pharmaceutical regulation. (Fall).

BME 6482. Medical Measurements. 3 Credits.

Theory of measurements in biological areas and techniques for electronic measurements on biological specimens. Experiments in acquisition, processing, and measurement of physiological signals, ECG, EEG, and EMG. (Fall).

BME 6483. Medical Instrumentation Design. 3 Credits.

The medical device design process and many of its key aspects, including needs assessment, regulatory processes and concerns, intellectual property, patient safety, and market analysis. Prerequisites: BME 6482. (Spring).

BME 6484. Biomedical Signal Analysis. 3 Credits.

Origin, acquisition, and analysis of physiological signals. Deterministic and probabilistic modeling; fitting models; sequences and time series. Feature extraction from EEG and ECG; Fourier analysis and filtering; modeling. Noise and artifact removal and signal compensation. Prerequisites: BME 6482. (Spring).

BME 6485. Medical Imaging I. 3 Credits.

Principles of projection radiography, fluoroscopy, tomography, ultrasound and nuclear sources; biomagnetic imaging. Source and object; recorder resolution and noise; scatter and attenuation. Ultrasound techniques and instrumentation, including physics of ultrasound, transducers, ultrasound imaging, hemodynamics, Doppler techniques. Prerequisite: BME 4830. (Fall).

BME 6486. Clinical Medicine for Engineers. 3 Credits.

Overview of clinical medicine with emphasis on those areas most affected by engineering and technology. (Spring, Every Year).

BME 6487. Rehabilitation Medicine Engineering. 3 Credits.

Cross-sectional view of those areas of medicine most involved with the treatment of handicapped individuals; application of engineering theory and techniques to the rehabilitation of handicapped individuals; solutions to major problem areas and specific problems. Prerequisite: BME 6482. (Spring, Every Year).

BME 6488. Cell and Molecular Imaging. 3 Credits.

Basics of optics, microscopy, spectroscopy, and fluorescence in the context of imaging at the cellular and molecular level; advanced techniques for probing protein interactions and live cell functions; image processing algorithms and principles of scientific visualization. Students taking this course for graduate credit complete additional work. Restricted to graduate students. Recommended background: Computer Programming. (Fall, Every Year) Same As: BME 4488.

BME 6489. Socially Assistive Robotics and Interactive Learning. 3 Credits.

Application of advanced robotic solutions to promoting human lives through social, emotional, and interactive therapies in areas such as social and behavioral therapies for children with autism spectrum disorder (ASD) and emotional and rehabilitation assistance in elder care. Restricted to graduate students. Recommended background: Experience with computer programming. (Fall, Every Year) Same As: BME 4489.

BME 6820. Anatomy and Physiology for Engineers. 3 Credits.

Human anatomy and physiology from an engineering perspective. Analysis of functions of major physiological systems. Biopotentials, mechanics, gas exchange, chemical balance, electrical and chemical signaling, nervous control, voluntary and reflex factors. (Same as BME 4820) (Fall).

BME 6830. Introduction to Medical Imaging Methods. 3 Credits.

Application of linear systems analysis methods to medical imaging techniques; basic properties of imaging systems; physics and instrumentation behind modalities; advantages, disadvantages, and primary applications of modalities. Recommended background: Knowledge of signal processing. (Same as BME 4830) (Spring, Every Year).

BME 6840. Digital Image Processing. 3 Credits.

Properties of images and visual systems. Image acquisition, sampling, quantization. One- and two-dimensional image transform techniques; enhancement and restoration. Image coding and data compression. Segmentation, representation, boundary and shape, texture, matching. Image understanding. Prerequisites: ECE 6800. (Same as ECE 6840) (Spring, odd years).

BME 6842. Image Engineering. 3 Credits.

Sensor/camera design and analysis as a system. Detection and noise processes underlying the sensing of optical radiation; the engineering and physics of image formation. Topics covered include radiometry/photometry, optics and image formation, device and camera characterization, and image quality metrics and system design trades. Prerequisites: ECE 6010 and ECE 6015. (Same as ECE 6842) (Fall, Every Year).

BME 6850. Pattern Recognition. 3 Credits.

Random vectors, transformations. Hypothesis testing, error probability: bias, variance, and sample size, resampling; sequential methods. Bayes, other linear classifiers. Discriminant functions, support vector machines, maximum-likelihood and parameter estimation, dimensionality reduction. Nonparametric methods; unsupervised learning and clustering; feature selection and ordering. Applications in industry and medicine. Student projects. Learning is reinforced by homework problems and in-class and at-home computer examples. Prerequisite: ECE 6015. (Same as ECE 6850) (Fall, Spring, and Summer, Every Year).

BME 6885. Computer Vision. 3 Credits.

Image processing; edge detection, segmentation, local features, shape and region description in 2D and 3D. Insights from human vision studies. Representation for vision: object models, synthetic images, matching, gaps, algorithms. Interference, production system, syntactic networks. Planning spatial reasoning for robot vision. Prerequisites: BME 6840 or ECE 6840 or equivalent. (Same as ECE 6885) (Fall, Spring, and Summer, Every Year).

BME 6994. Biomedical Engineering Regulatory Practicum I. 3 Credits.

First part of the BME 6994 and BME 6995 practicum sequence. Students work with a practicum mentor to develop either an application for federal funding using the Small Business Innovation Research (SBIR) or Small Business Technology Transfer (STTR) mechanism or a 510(k) submission for U.S. Food and Drug Administration (FDA) medical device review. Independent research combined with the synthesis of technical and regulatory topics covered in the program. Restricted to students who have completed a minimum of 9 credits in the Master of Engineering in Regulatory Biomedical Engineering program. (Fall, spring, and summer, Every Year).

BME 6995. Biomedical Engineering Regulatory Practicum II. 3 Credits.

Second part of the BME 6994 and BME 6995 practicum sequence. Prerequisite: BME 6994. (Fall, spring, and summer, Every Year).

BME 6998. Thesis Research. 3 Credits.

Thesis research. (Fall and spring).

BME 6999. Thesis Research. 3 Credits.

Thesis research. (Fall and spring).

BME 8484. Medical Imaging II: Image Analysis. 3 Credits.

Review of medical imaging modalities; review of image formation and characteristics, both static and dynamic; methods for and evaluation of: medical image reconstruction, enhancement, segmentation, registration, and description; feature extraction and classification; error analysis and the receiver operating characteristic; imaging applications in diagnosis and treatment, including surgery; metrics of truth and quality, with implications for image compression. Prerequisites: BME 6484. (Fall).

BME 8999. Dissertation Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates. (Fall, spring, and summer, Every Year).

CIVIL AND ENVIRONMENTAL ENGINEERING

Mission Statement

The mission of the Department of Civil and Environmental Engineering is to provide an academic environment where professional education can be pursued, scholarly research in science and technology can be conducted, and the interest of the public can be served through the advancement of knowledge.

In pursuit of this mission, the administration, faculty, and staff join to provide a broad-based, rigorous professional education in civil engineering at the undergraduate level; a graduate education at the master's level in major areas of civil engineering; and doctoral programs in selective areas of excellence within civil engineering.

Educational Objectives of the Bachelor of Science Program

The civil engineering undergraduate program of study prepares its graduates with the following capabilities necessary to attain career and professional accomplishments:

- Technical knowledge: students are able to use their technical knowledge and expertise in mathematics, science, and engineering to identify, formulate, and solve problems involving design, experimentation, and analysis of a wide variety of civil engineering applications;
- Team skills: students develop leadership skills, demonstrate proficiency in all forms of communication, and perform well in a multidisciplinary team environment;
- Continuous education: students recognize the need for continuing their education through graduate studies, continuous education opportunities, and/or self-education;
- Professionalism: students are prepared to exercise the highest standards of personal and professional integrity, demonstrate an understanding of the ethical and professional issues related to the procurement of work, and provide coordination between the design and construction aspects of the civil engineering profession.

These objectives are accomplished through a rigorous curriculum that emphasizes fundamentals in basic sciences, mathematics, humanities, and engineering in five major areas of civil engineering: environmental engineering, geotechnical engineering, structural engineering, water resources engineering, and transportation engineering. The curriculum enables students to use modern engineering tools to work individually and in teams. The curriculum contains a well-structured set of courses that enable students to develop the required analytical, experimental, and design skills.

Educational Outcomes of the Bachelor of Science Program

The civil engineering undergraduate program of study prepares its graduates to have the following capabilities for career and professional advancement:

- Apply knowledge of mathematics, science, and engineering; design and conduct experiments; and analyze and interpret data;
- Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, health and safety, manufacturability, and sustainability constraints;
- Identify, formulate, and solve engineering problems;
- Use the techniques, skills, and modern engineering tools necessary for engineering practice;
- Function on multidisciplinary teams; and
- Communicate effectively.

Students are provided with the broad education necessary to understand the impact of engineering solutions in a global

economic, environmental, and social context; a knowledge of contemporary issues; an understanding of professional and ethical responsibility; and a recognition of the need for and ability to engage in lifelong learning.

The civil engineering undergraduate program curriculum includes coverage of proficiency in mathematics through differential equations, probability and statistics, calculus-based physics, and general chemistry; proficiency in a minimum of four recognized major civil engineering areas; the ability to conduct laboratory experiments and to critically analyze and interpret data in more than one of the recognized major civil engineering areas; the ability to perform civil engineering design by means of design experiences integrated throughout the professional component of the curriculum; and an understanding of professional practice issues such as procurement of work, bidding versus quality-based selection processes, how the design professionals and the construction professions interact to construct a project, the importance of professional licensure and continuing education, and/or other professional practice issues.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in civil engineering (p. 744)
- Bachelor of Science with a major in civil engineering, environmental engineering option (p. 747)
- Bachelor of Science with a major in civil engineering, medical preparation option (p. 749)
- Bachelor of Science with a major in civil engineering, transportation and sustainability option (p. 751)

Combined programs

- Dual Bachelor of Science with a major in civil engineering and Master of Science in the field environmental engineering (p. 777)

GRADUATE

Master's program

- Master of Engineering in the field of construction engineering (p. 790)
- Master of Science in the field of civil and environmental engineering (p. 793)

Doctoral program

- Doctor of Philosophy in the field of civil and environmental engineering (p. 809)

CERTIFICATE

- Graduate certificate in environmental engineering
- Graduate certificate in geoenvironmental engineering

- Graduate certificate in structural engineering (p. 826)
- Graduate certificate in transportation engineering (p. 828)

FACULTY

Professors S.S. Badie, M.T. Manzari (*Chair*), R. Riffat, K. Roddis, P.F. Silva

Associate Professors L. Farhadi, T. Li, S.H. Hamdar, D. Shuai

Assistant Professors X. Liu, Z. Xu

Research Professor K.H. Digges

Professorial Lecturers M.O. Critchfield, K. Garrahan, K. Ghavami, F. Sadek, C. Tin

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CE 1010. Introduction to Civil and Environmental Engineering. 1 Credit.

An introduction to the profession of civil and environmental engineering. Field visits and laboratory exercises complement classroom instruction. (Fall).

CE 1020. Introduction to a Sustainable World. 1 Credit.

The science underlying the basic processes that gave rise to the world we live in and that maintain its viability for human life. Ecosystem-functioning environmental issues, such as greenhouse gas emission and ozone, with current efforts to resolve them. Technological innovations in the context of sustainability.

CE 1098. Variable Topics. 1-36 Credits.

CE 1099. Variable Topics. 1 Credit.

CE 2210. Engineering Computations. 3 Credits.

Numerical methods for engineering applications. Methods for solving systems of linear equations, root finding, curve fitting, and data approximation. Numerical differentiation and integration and numerical solution of differential equations. Computer applications. Prerequisites: APSC 2113 and CSCI 1121. (Spring).

CE 2220. Introduction to the Mechanics of Solids. 3 Credits.

Stress and strain, axial load problems, torsion, shear force and bending moment, pure bending of beams, shearing stresses in beams, compound stresses, analysis of plane stress and plane strain, combined stresses, deflection of beams, statically indeterminate problems, columns, energy methods. Prerequisites: APSC 2057 and APSC 2113. (Fall and spring, Every Year).

CE 2510. Environmental Sustainability. 3 Credits.

An introduction to environmental sustainability with focus on the nexus of water, energy, and climate; energy demands of water systems, water footprints of energy generation, and how the two valuable resources are limiting each other; technologies and research frontiers toward a sustainable water and energy supply.

CE 2710. Introduction to Transportation Engineering. 3 Credits.

Transportation system components; roadway traffic capacity and network performance measures; signalized and un-signalized intersections; monitoring techniques, instruments and data processing. Sustainability issues and environmental impact of transportation systems with focus on urban design, planning and regulation. Prerequisite: MATH 2233. (Spring, Every Year).

CE 3110W. Civil Engineering Materials. 2 Credits.

Mechanical properties and behavior of civil engineering materials such as metals, concrete, and fiber-reinforced polymer composites. Properties range from plastic deformations of metallic materials to crushing of confined and unconfined concrete. Basis of the strength of materials. Concepts of creep, fatigue, fracture, and crack propagation. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: CE 2220 and CHEM 1111. (Fall, Every Year).

CE 3111W. Civil Engineering Materials Lab. 1 Credit.

Measurement of stress-strain characteristics and study of failure modes in ductile steel, brittle concrete, and anisotropic composite materials. Experiments include data collection, data analysis, and interpretation and presentation of results regarding tension, compression, bending, impact, and shear properties. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. CE 3110W may be taken as a corequisite. Prerequisites: CE 3110W. (Fall).

CE 3230. Structural Theory I. 3 Credits.

Theory of statically determinate structures; stability and determinacy; influence lines and moving loads. Analysis of beams, frames, trusses, and arches. Calculation of deflections. Prerequisites: CE 2210 and CE 2220. (Fall, Every Year).

CE 3240. Structural Theory II. 3 Credits.

Theory of statically indeterminate structures using matrix methods and classical approaches such as moment distribution and slope-deflection; influence lines; energy methods. Prerequisite: CE 3230. (Spring, Every Year).

CE 3310. Reinforced Concrete Structures. 3 Credits.

Properties of concrete and reinforcement; design of flexural reinforcement, shear reinforcement; development of reinforcement; design of columns, floor slabs; ethics and professionalism in design. A design project, including the use of computer software and a detailed report, is required. CE 3240 may be taken as a corequisite. Prerequisite: CE 3240. (Fall and spring, Every Year).

CE 3520. Environmental Engineering I: Water Resources and Water Quality. 3 Credits.

Physical and chemical analyses of water quality and characteristics. Microbiology of water and pathogens. Introduction to water treatment processes involving coagulation, flocculation, filtration, and disinfection. Prerequisites: CE 3610 and CHEM 1111. (Spring, Every Year).

CE 3521. Environmental Engineering Laboratory. 1 Credit.

Laboratory experiments for physical and chemical analyses of water and wastewater. Measurement of turbidity, alkalinity, dissolved oxygen, BOD, COD, suspended solids, and optimum coagulant dose using jar tests. Corequisite: CE 3520.

CE 3610. Hydraulics. 3 Credits.

Fluid statics: pressure forces, buoyancy, and flotation. Application of kinematic principles; flow fields, stream tubes, and flow nets. Fluid dynamics: applications to pipe flow, hydraulic models, measurement of pressure, and velocity. Open channel flow: applications to water resources engineering. Prerequisites: CE 2210 and MAE 3126. (Spring, Every Year).

CE 3611. Hydraulics Laboratory. 1 Credit.

Laboratory experiments and demonstrations of hydraulics in pipe and open-channel flow. Topics include center of pressure, floating bodies, Bernoulli's theorem, discharge coefficients, velocity profile, and head losses. Prerequisite or corequisite: CE 3610.

CE 3720. Highway Engineering and Design. 3 Credits.

Road vehicle performance. Principles of highway design: horizontal and vertical alignments, roadside design; drainage and drainage structures, earthwork, intersections, interchanges, parking facilities; basic traffic models; highway materials. Application of safety standards. APSC 3115 and CE 2220 may be taken as a corequisite. Prerequisites: APSC 3115, CE 2220 and MATH 2233. (Fall and spring, Every Year).

CE 4320. Metal Structures. 3 Credits.

Principles of the design of metal structures, structural elements, connections, specific problems of analysis including the use of computer software, methods of construction, professionalism in design. Prerequisite: CE 3240.

CE 4330W. Contracts and Specifications. 3 Credits.

Law of contracts, construction contracts, specifications, bidding, insurance and bonds, professional liability, arbitration of disputes, litigation. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to juniors and seniors. (Spring, Every Year).

CE 4341. Senior Design Project I. 1 Credit.

First in a two-course sequence for the senior design project in civil and environmental engineering. Outcomes include team formation, project selection, task formulation and assignments, preliminary design validation and/or prototyping. Restricted to students in the civil engineering program with senior standing. (Fall, Every Year).

CE 4342. Senior Design Project II. 3 Credits.

Second in a two-course sequence for the senior design project in civil and environmental engineering. Application of civil and environmental engineering concepts in the design of a project that integrates the concepts and technical knowledge learned in two or more of the following disciplines: engineering mechanics, materials, environmental engineering, geotechnical engineering, structural engineering, transportation engineering, and water resources engineering. Restricted to students in the civil engineering program with senior standing. Prerequisite: CE 4341. Recommended background: Knowledge of structural analysis of indeterminate structures, reinforced concrete and structural steel design, and soil mechanics. (Spring, Every Year).

CE 4410. Introduction to Geotechnical Engineering. 3 Credits.

Soils and rock formation, soil composition, permeability, seepage and flow net analysis, stresses in soil medium, consolidation and settlement, shear strength of soil, analysis of lateral earth pressures, soil compaction. Prerequisites: CE 2220, CHEM 1111 and MAE 3126. (Fall, Every Year).

CE 4411. Geotechnical Engineering Laboratory. 1 Credit.

Laboratory experiments to evaluate liquid and plastic limits, grain-size distribution, shear strength, compressibility, permeability, and moisture-density relationship of soils. CE 4410 may be taken as a corequisite. Prerequisite: CE 4410. (Fall and spring, Every Year).

CE 4450. Introduction to Geo-environmental Engineering. 3 Credits.

Characterization of soils and wastes, engineering properties of soils and geo-synthetics, fundamental concepts of fate and transport of contaminants, common practice in design and construction of waste containment systems, current methods for remediation of contaminated groundwater and soils. Prerequisites: CE 3520 and CE 4410. (Spring, Every Year).

CE 4530. Environmental Engineering II: Water Supply and Pollution Control. 3 Credits.

Introduction to wastewater treatment systems including clarification, suspended and attached growth processes. Use of dissolved oxygen models. Water supply and wastewater collection systems, applied hydraulics of pipelines and pumps. Planning to meet quality needs and regulatory requirements. Prerequisite: CE 3520.

CE 4620. Hydrology and Hydraulic Design. 3 Credits.

Descriptive hydrology: hydrologic cycle, precipitation, stream flow, evaporation, and transpiration. Quantitative hydrology: hydrograph analysis, hydrographs of basin outflow, storage routing. Probability concepts in hydrology: flood frequency, rainfall frequency, stochastic hydrology. Culverts and stilling basins. APSC 3115 and CE 3610 may be taken as a corequisite. Prerequisites: APSC 3115 and CE 3610. (Fall and spring, Every Year).

CE 4810. Research. 1-8 Credits.

Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status. (Fall and spring, Every Year).

CE 4820. Special Topics. 1-6 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

CE 5099. Variable Topics. 1-99 Credits.**CE 6101. Numerical Methods in Engineering. 3 Credits.**

Eigenvalue problems. Numerical solution of systems of equations and ordinary differential equations. Solution techniques for elliptic, parabolic, and hyperbolic partial differential equations. Numerical methods for solving finite element equations. Introduction to solution of fluid-flow problems. Prerequisite: CE 2210.

CE 6102. Application of Probability Methods in Civil Engineering. 3 Credits.

Uncertainty in real-world information; basic probability concepts and models; random variables; useful probability distributions, statistical estimation of distribution parameters from observed data; empirical determination of distribution models; testing hypothesis; regression and correlation analyses; decision theory. Prerequisite: APSC 3115.

CE 6110. Contracts and Specifications In Construction Engineering. 3 Credits.

Overview of contracts, specifications, and the legal environment for engineers; construction contracts, specifications, bidding, contract administration, bonds and securities, dispute resolution. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6111. Project Management For Construction. 3 Credits.

Principles of project management in construction industry. Elements of project management such as structural organization, planning, scheduling, communications, bidding, change orders, contractual relationship, and labor relations and related activities in construction. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6112. Construction Project Acquisition. 3 Credits.

Basic principles used in the procurement and tendering stages of projects up to delivery; construction management activities, financial activities, and cost estimating software and techniques. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall, Every Year).

CE 6113. Construction Contracts, Insurance, and Bonds. 3 Credits.

Common laws used in construction such as contract, tort and statutory/regulatory laws. Elements of project dispute avoidance, subcontracts, project delivery, and insurance and performance and payment bonds. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6114. Construction Methods, Materials, Equipment, and Systems. 3 Credits.

Principles of construction methods, machinery and equipment selection, and production estimation. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6115. Project Planning and Scheduling. 3 Credits.

Fundamentals of project planning and scheduling, scoping estimation risk analysis with a focus on the tools and techniques available to a project planner for mitigation of project risks. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6116. Green Building Design and Construction. 3 Credits.

Sustainability issues and green building design and delivery with a focus on development of commercial and institutional high performance green buildings; LEED ratings and accreditation. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6117. Construction Finance and Engineering Economics. 3 Credits.

Fundamentals of financing construction projects. Commonly used business models, life cycle cost analysis, and software tools for construction project cost control. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6118. Advanced Construction and Computer-Aided Design. 3 Credits.

Integration of construction techniques and computer-aided design; building information modeling and other technologies in various phases of construction management. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall, Every Year).

CE 6119. Construction Safety And Quality Control. 3 Credits.

Principles and importance of construction quality assurance and contractor quality control. Quality control methods to assess design activities in design-build contracts. Overview of hazardous situations that may arise in the construction jobsite and methods for mitigation these dangerous situations. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6121. Construction Project Control. 3 Credits.

Basic principles of scope, cost, schedule, risk, and quality management; the organization of construction firms at the general corporate level and the project level, flow of information between parties in the project, scheduling software. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6201. Advanced Strength of Materials. 3 Credits.

Deflection of beams using singular functions, unsymmetrical bending of beams, beams on elastic foundation. Beam-column problems, shear center for thin-walled beam cross sections, curved beams. Applications of energy methods, torsion, basic equations for theory of elasticity, thin- and thick-walled cylinders, stress concentration, and failure criteria. Prerequisites: CE 2220 and CE 3240. (Spring, Every Year).

CE 6202. Methods of Structural Analysis. 3 Credits.

Theory and applications of modern methods of structural analysis, direct stiffness approach, energy and variational methods, elastoplastic analysis of frames, P-delta effects, application of commonly available structural analysis software. Prerequisites: CE 2220 and CE 3240. (Fall, Every Year).

CE 6203. Reliability Analysis of Engineering Structures. 3 Credits.

Probability theory, theory of structural reliability, probabilistic analysis of strength and loads, risk and reliability function, empirical distribution, probability plot. The design service life, method of perturbation, Monte Carlo simulation. Fatigue and fracture, proof testing, inspection and repair-replacement maintenance. Prerequisite: APSC 3115.

CE 6204. Analysis of Plates and Shells. 3 Credits.

Bending and stretching of thin elastic plates under loading with various boundary conditions, continuous plates and plates on elastic foundations, theory of folded-plate structures. Theory of curved surfaces; general linear bending theory and its simplification to membrane theory; bending stresses in shells of revolution, shallow-shell theory. Prerequisites: CE 2220 and CE 3240. (Spring, odd years).

CE 6205. Theory of Structural Stability. 3 Credits.

General criteria for stability, buckling of elastic and inelastic columns and frames, torsional and lateral buckling, variational methods. Buckling of plates and shells under static loads, stability of stiffened structures, effect of imperfections and boundary conditions. Prerequisites: CE 2220 and CE 3240. (Fall, Every Year).

CE 6206. Continuum Mechanics. 3 Credits.

Introduction to the mechanics of continuous media. Tensor calculus; kinematics; stress and stress rate, conservation of mass, conservation of linear and angular momentum, energy balance, second law of thermodynamics; constitutive theory; linear and nonlinear elasticity, newtonian fluids, micropolar elasticity. Prerequisites: CE 2220. (Fall, spring, and summer, even years).

CE 6207. Theory of Elasticity I. 3 Credits.

Introduction to Cartesian tensors; deformation, stress, constitutive relations for linear elasticity; formulation of boundary value problems, variational principles, torsion and bending of prismatic rods, plane problems. Prerequisites: CE 2220. (Same as MAE 6207) (Spring).

CE 6208. Plasticity. 3 Credits.

Introduction to the continuum theory of plastic deformation. Physical basis of rate-independent plasticity. Concepts of yield, strain hardening and softening, reverse yield, and cyclic plasticity. Constitutive equations describing plastic deformation. Prerequisite: CE 6201 or CE 6206.

CE 6209. Mechanics of Composite Materials. 3 Credits.

Stress-strain relationship for orthotropic materials, invariant properties of an orthotropic lamina, biaxial strength theory for an orthotropic lamina. Mechanics of materials approach to stiffness, elasticity approach to stiffness. Classical lamination theory, strength of laminates. Statistical theory of fatigue damage. Prerequisite: CE 3240. (Spring, even years).

CE 6210. Introduction to Finite Element Analysis. 3 Credits.

Calculus of variations. Variational formulation of the finite element method. Weighted residual techniques. Computer implementation of the finite element method. Application to problems in heat transfer, stress analysis, fluid flow, and structural analysis. Prerequisites: Proficiency in one computer language; and CE 2220 and CE 3240. (Fall, Every Year).

CE 6301. Design of Reinforced Concrete Structures. 3 Credits.

Structural behavior of reinforced concrete structures, ultimate strength and deformation characteristics; design of structural components including beams, columns, floor slabs, deep beams, corbels, and composite slab/beam systems. Prerequisite: CE 3310.

CE 6302. Prestressed Concrete Structures. 3 Credits.

Structural behavior and failure modes of prestressed concrete structures; design in prestressed concrete, including long-span structures, bridges, and precast systems. Prerequisite: CE 3310.

CE 6310. Advanced Reinforced Concrete Structures. 3 Credits.

Conception, analysis, and design of low-rise and high-rise buildings by ultimate-strength methods, precast systems, progressive collapse, earthquake considerations, domes, folded plates, shell-type structures, and special topics. Prerequisite: CE 6301.

CE 6311. Bridge Design. 3 Credits.

Application of basic design procedures for reinforced and prestressed concrete bridges, according to AASHTO bridge specifications. Various types of concrete bridges, design superstructure bridge elements (deck slab, girders, bearing pads), and development of superstructure/substructure details. Prerequisite: CE 6302.

CE 6320. Design of Metal Structures. 3 Credits.

Structural behavior of metal structures and composite girders. Conception, analysis, and design of low-rise and high-rise buildings by elastic and inelastic methods. Earthquake considerations and special topics. Prerequisite: CE 4320.

CE 6321. Advanced Metal Structures. 3 Credits.

Conception and design of advanced structural components and systems, hysteretic behavior, plastic design principles, box-type girders, cable systems, and unique structural systems. Prerequisite: CE 6320. (As arranged).

CE 6340. Structural Dynamics. 3 Credits.

Vibration of continuous systems: membranes, beam plates, and shells; approximate methods of vibration analysis; methods of integral transform; analysis of nonlinear systems; wave propagation. Prerequisites: APSC 2058 and CE 3240. (Fall, odd years).

CE 6341. Random Vibration of Structures. 3 Credits.

Introduction to random processes, responses of linear structures to stationary and nonstationary random inputs. Structural responses to earthquakes, waves, boundary-layer turbulences, wind loads, etc. Failure analysis of structures under random loads. Prerequisites: APSC 3115 and CE 6340. (Spring, even years).

CE 6342. Structural Design to Resist Natural Hazards. 3 Credits.

Prediction of forces due to earthquakes and strong winds; generalized codes; pseudostatic methods for preliminary design; codes based on spectra, energy absorption and ductility; influence of foundations; ground failures; static and aeroelastic effects of strong winds. Design project. Prerequisites: CE 3240 and CE 4340; and CE 6340 or CE 6701. (Spring, Every Year).

CE 6350. Introduction to Biomechanics. 3 Credits.

Fundamentals of continuum mechanics as they apply to biological materials: concepts of stress, strain, and equilibrium; elastic and viscoelastic properties of solids; physiological fluid mechanics and bioheat and mass transfer. Fundamentals of solid mechanics of soft tissues and bone structures. Development of computer models and applications. Prerequisite: CE 2220. (Fall, Every Year).

CE 6401. Fundamentals of Soil Behavior. 3 Credits.

Soil mineralogy, clay-water-electrolyte systems, soil composition, fabric, structure, volume change behavior, permeability, coupled phenomena, in-situ evaluation of soil behavior. Prerequisite: CE 4410. (Fall, even years).

CE 6402. Theoretical Geomechanics. 3 Credits.

Porous media, stress-strain behavior of soil skeleton, elastic and elastoplastic models for soil behavior, critical state concept, cam clay, strength of soils, stress-dilatancy, stress paths. (Fall, odd years).

CE 6403. Foundation Engineering. 3 Credits.

Principles of soil mechanics applied to the analysis and design of mat foundations, pile foundations, retaining structures including sheeting and bracing systems, and waterfront structures. Foundations on difficult soils and reinforced earth structures. Prerequisite: CE 4410. (Spring, Every Year).

CE 6404. Geotechnical Earthquake Engineering. 3 Credits.

Ground motion, wave propagation, foundation isolation, site response analysis, seismic stability of retaining structures, soil structure interaction. Prerequisite: graduate standing.

CE 6405. Rock Engineering. 3 Credits.

Classification and properties of rock; nature of rock masses and rock discontinuities; field exploration; methods of excavation; design and applications to foundation slopes, tunnels, and chambers in rock. Prerequisite: CE 4410.

CE 6501. Environmental Chemistry. 3 Credits.

Principles of thermodynamics and kinetics, acid-base chemistry, alkalinity, coordination chemistry, precipitation, adsorption, redox chemistry. Prerequisites: CHEM 1111 and CHEM 1112. (Fall, Every Year).

CE 6502. Advanced Sanitary Engineering Design. 3 Credits.

Elements of design, including basic parameters and hydraulic requirements; layout and design of water supply and wastewater systems, pumping stations, and treatment plants; plant expansions and modifications. Prerequisite: CE 4530. (Spring, Every Year).

CE 6503. Principles of Environmental Engineering. 3 Credits.

Principles of chemical equilibrium and reaction kinetics, acid-base and redox reactions, chemical transport, and reactors. Reactor design of ozone contactor, air stripping tower, activated carbon adsorption, and membrane filtration by the principle of mass balance. Prerequisite: CE 3520. (Fall, Every Year).

CE 6504. Water and Wastewater Treatment Processes. 3 Credits.

Theory and application of commonly used processes. Sedimentation, coagulation, filtration, disinfection, gas transfer, activated sludge, trickling filters, oxidation ponds, sorption, and sludge stabilization and disposal. Process combinations to produce treatment systems. Nanotechnology and water reuse systems. Prerequisite: CE 3520. (Spring, Every Year).

CE 6505. Environmental Impact Assessment. 3 Credits.

Public policy and legislation on environmental quality. Methods for assessing impacts of engineering projects. Technology for assessing impacts on air, water, and land environments, applied to transportation facilities, water and wastewater facilities, industrial and community development. Prerequisites: CE 3520. (Fall).

CE 6506. Microbiology for Environmental Engineers. 3 Credits.

Principles of microbiology and their applications to biological processes in the natural environment and engineered systems. Engineering applications, principles of biochemistry and microbiology of drinking water quality, waste and wastewater treatment, and bioremediation. Prerequisite: CE 3520. (Spring, even years).

CE 6507. Advanced Treatment Processes. 3 Credits.

Principles and applications of advanced treatment systems for water, waste-water, and hazardous wastes, including: biological nutrient removal, oxidation-reduction processes, stripping, sorption, membrane processes, chemical precipitation, others. Prerequisite: CE 6504. (Fall and spring, Every Year).

CE 6508. Industrial Waste Treatment. 3 Credits.

Types of industries, waste sources. Characteristics, measurements, and evaluation. Minimization and reuse. Treatment process selection, development, and design. Regulations, permits, standards, monitoring, and pretreatment. (Fall, Every Year).

CE 6509. Introduction to Hazardous Wastes. 3 Credits.

Regulations, including RCRA and Superfund; transport and fate of hazardous substances; elements of environmental toxicology, risk assessment, and hazard ranking; monitoring, data collection, and evaluation; waste minimization. Prerequisite: CE 3520. (Spring, Every Year).

CE 6601. Open Channel Flow. 3 Credits.

Types and regimes of flow; energy and momentum principles, uniform flow, gradually varied flow, spatially and rapidly varied flow. Flow in nonprismatic channels. Unsteady flow; dam break problem, flood routing. Prerequisite: CE 3610.

CE 6602. Hydraulic Engineering. 3 Credits.

Hydraulic design of conveyance, regulating, and measurement structures. Design for spillways, energy dissipators, inlet and outlet works related to dams. Forces on hydraulic structure and stability analysis. Hydraulic turbines and pumps. Design considerations for flow through pipes. Transients and cavitation. Prerequisite: CE 3610.

CE 6603. Design of Dams. 3 Credits.

Project planning and investigations. Types of dams; design of earth-rock fill dams; stability analysis, foundation treatment, wind-wave protection. Construction methods for dams. Reservoir sedimentation. Safety inspection of dams. Prerequisite: CE 3610.

CE 6604. Advanced Hydrology. 3 Credits.

Precipitation, evaporation, and transpiration. Soil physics; stream flow, drainage basins, hydrograph analysis, and stream-flow routing. Design criteria, flood frequency statistics and analysis, flood forecasting and control, water supply forecasting. Prerequisite: CE 4620.

CE 6605. Ground Water and Seepage. 3 Credits.

Permeability theory of groundwater flow, flow nets, analogs, computer solutions; applications to engineering problems such as excavation dewatering, flow through dams, stabilization of earth slopes. Prerequisites: CE 4410. (Spring).

CE 6606. Mechanics of Water Waves. 3 Credits.

Irrrotational theory for deep- and shallow-water waves, reflexion, refraction, diffraction, attenuation. Water waves of finite amplitude: shallow-water theory, tides, bores, long-waves theory, conoidal and solitary waves. Wave generation by wind. Wave breaking and reflexion. Prerequisites: APSC 6213 and permission of the instructor. (Fall and spring, Every Year).

CE 6607. Water Resources Planning and Control. 3 Credits.

The parameters of water resources planning and control, economics of water resources and related natural resources, economics of water-quality control, physical parameters of water resource development, water resources law. Prerequisite: CE 4410. (Fall and spring, Every Year).

CE 6608. Hydraulic Modeling. 3 Credits.

Dimensional analysis and similitude. Types of models—physical, mathematical. Distortions in physical models. Erodible bed models. Prerequisite: CE 3610.

CE 6609. Numerical Methods in Environmental and Water Resources. 3 Credits.

Use of microcomputers in water resources. Elements of finite difference schemes, basic operations, convergence, stability, and consistency. Nonuniform flow and error analysis; unsteady laminar flow; diffusion problems; unsteady flow in open channels; water hammer, seepage flow, and diffusion-dispersion problems. Prerequisites: CE 2210 and MAE 3126. (Spring, Every Year).

CE 6610. Pollution Transport Systems. 3 Credits.

Distribution of pollutants in natural waters and atmosphere, diffusive and advective transport, mathematics for stream pollutant deoxygenation rates, groundwater pollution transport, sediment transport, thermal transport, numerical simulation of pollutant transports in streams and estuaries. Prerequisites: CE 3610 and MAE 2131. (Fall and spring, Every Year).

CE 6701. Analytical Mechanics. 3 Credits.

Fundamental principles, particle and rigid-body dynamics, generalized coordinates, variational principles and Lagrange's equations, nonholonomic systems, Hamilton's equations, theory of small oscillations. Prerequisites: APSC 2058 and APSC 2113. (Fall, Every Year).

CE 6702. Vehicle Dynamics. 3 Credits.

Engineering principles and analytical methods explaining the performance of an automotive vehicle. Basic mechanics governing vehicle dynamic performance in longitudinal, ride, and handling modes. Engineering analysis techniques applied to basic systems and subsystems to derive the governing equations. CE 6701 may be taken as a corequisite. Prerequisite: CE 6701. (Spring, even years).

CE 6705. Nonlinear Finite Element Modeling and Simulation. 3 Credits.

Rigid and flexible body methods for modeling crashes. Application of dynamic nonlinear finite element methods with contact algorithms for modeling crash phenomena. Modeling and simulation of vehicles, airbags, safety restraining systems, and highway barriers. (Spring).

CE 6706. Pavement and Runway Design. 3 Credits.

Pavement types, wheel-load characteristics; stresses in pavements and subgrades; empirical methods of design of flexible and rigid highway and airfield pavements; general principles of runway design. (Spring, odd years).

CE 6707. Systems Dynamics Modeling and Control. 3 Credits.

Introduction of concepts in control theory and applications to solve problems in civil and transportation engineering dealing with single-input/single-output and multi-input/multi-output systems. Review of classical control theory in the frequency and time domain, state-space analysis, system optimization, and non-linear control. (Fall).

CE 6721. Traffic Engineering and Highway Safety. 3 Credits.

Roadway traffic capacity and network performance measures; steady and unsteady traffic flow phenomena; traffic control signalization theory and practical implementation; monitoring techniques, instruments, and data processing for highway safety. Traffic related highway safety design concepts. (Fall).

CE 6722. Intelligent Transportation Systems. 3 Credits.

Commands, controls, and communications in modern multimodal transportation; infrastructure/highway and vehicle automation, advanced traffic management, vehicle control and safety systems; information, data, and sensory requirements; practical applications and projects. Prerequisites: CE 2710 or CE 3720. Recommended background: Basic knowledge of transportation engineering. (Spring, Every Year).

CE 6730. Sustainable Urban Planning. 3 Credits.

Human and physical processes shaping urban ecologies and environments; human-environment interactions in the context of an urban region; urban land use, transport, and planning. Departmental approval is required prior to enrollment. Prerequisites: CE 2710. (As arranged, Every Year).

CE 6800. Special Topics. 1-6 Credits.

Topic to be announced in the Schedule of Classes.

CE 6801. Civil and Environmental Engineering Graduate Internship. 1 Credit.

May be repeated once for credit. Additional prerequisites may be required for a specific internship as determined by the research supervisor. Restricted to graduate students in the civil and environmental engineering program. Prerequisites: Required courses in the area of focus and permission of the department. (Fall and spring, Every Year).

CE 6808. Research. 1-12 Credits.

Basic research projects, as arranged. May be repeated for credit.

CE 6998. Thesis Research. 3 Credits.**CE 6999. Thesis Research. 3 Credits.****CE 8320. Theory of Elasticity II. 3 Credits.**

Application of integral transform and analytic function theory to solution of plane problems; elastic wave propagation. Three-dimensional elasto-statics. Prerequisites: APSC 6211 and CE 6207. (Spring, Every Year).

CE 8321. Nonlinear Mechanics of Continua. 3 Credits.

Polar decomposition, invariance, isotropy, representation theorems for invariants and isotropic tensor functions. Deformation, kinematics, stress, balance principles. Principles for constitutive relations. Applications to nonlinear elasticity and non-Newtonian fluids. Prerequisite: CE 6206.

CE 8330. Advanced Finite Element Analysis. 3 Credits.

Review of variational formulation of the finite element method. Formulation of various continuum and structural elements. Application to static and dynamic problems in elasticity, plasticity, large deflection, and instability in plates and shells. Recent developments in finite element methods. Prerequisites: CE 6206 and 6210; or MAE 6210 and MAE 6286. (Same as MAE 6288) (Fall and spring, Every Year).

CE 8350. Sedimentation Engineering. 3 Credits.

Problems of erosion and sedimentation. Properties of sediment. Initiation of motion. Suspension of sediment and sediment discharge theories. Sedimentation measurements. Economic and legal aspects. Prerequisites: CE 6601 or permission of the department. (Fall and spring, Every Year).

CE 8351. Mechanics of Alluvial Channels. 3 Credits.

Physical processes in drainage basins and channels. Channel forms and bed forms. Hydraulics and sediment transport in alluvial channels. Design of stable channels. Qualitative and quantitative response of rivers. Channel stabilization, navigation channels. Case studies including environmental impacts. Prerequisites: CE 6601 or permission of the department. (Fall and spring, Every Year).

CE 8352. Advanced Hydraulics. 3 Credits.

Theory of unsteady flow. Diffusion and dispersion through pipes and open channels. Numerical solutions using finite element and finite difference methods. Prerequisites: CE 6601 or permission of the department. (Fall and spring, Every Year).

CE 8370. Intelligent Systems Theory and Applications. 3 Credits.

Overview of artificial intelligence, neural networks, genetic algorithms, fuzzy systems, and hybrid intelligent systems and their integration with other information processing methods. Intelligent systems applications; examples are drawn from ITS and traffic engineering, vehicle safety, remote sensing, and structural design optimization. Prerequisite: CE 6707.

CE 8380. Advanced Biomechanics. 3 Credits.

Historical overview of biomechanics and biomaterials. Fundamental concepts in mechanics as applied to the treatment of biological systems. Approaches to the mechanical analysis of the human structure under physiological and non-physiological loading conditions. Constitutive laws for biological materials. Finite element applications. Prerequisite: CE 6206. (Fall and spring, Every Year).

CE 8998. Advanced Reading and Research. 1-12 Credits.

Doctoral candidates preparing for qualifying examination. (Fall and spring, Every Year).

CE 8999. Dissertation Research. 1-12 Credits.

Doctoral candidate research. Restricted to doctoral candidates. (Fall and spring, Every Year).

COMPUTER SCIENCE

Mission Statement

The mission of the Department of Computer Science is to serve the global community by providing high-quality computer science education, research, and professional services and to advance computer technology in selective areas while upholding standards of excellence.

Educational Objectives

The undergraduate program of study is designed to prepare graduates to earn an advanced degree in computer science

or related disciplines; for a professional degree such as law, business, or medicine; or for employment in the computer or IT industry, where they apply the skills and knowledge learned in the program. Graduates conduct themselves professionally and ethically, work effectively in teams, and communicate effectively with both technical and non-technical audiences.

Educational Outcomes

A graduate in computer science has the ability to do the following:

- Apply knowledge of computing and mathematics appropriate to the discipline;
- Analyze a problem and identify and define the computing requirements appropriate to its solution;
- Design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs;
- Function effectively on teams to accomplish a common goal;
- Understand professional, ethical, legal, security, and social issues and responsibilities;
- Communicate effectively with a range of audiences;
- Analyze the local and global impact of computing on individuals, organizations, and society;
- Recognize the need to engage in continuing professional development;
- Use current techniques, skills, and tools necessary for computing practice;
- Apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the trade-offs involved in design choices; and
- Apply design and development principles in the construction of software systems of varying complexity.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in computer science (p. 740)
- Bachelor of Science with a major in computer science (p. 755)

Minor

- Minor in computer science (p. 788)

Combined programs

- Dual Bachelor of Arts with a major in computer science and Master of Science in the field of computer science (p. 776)
- Dual Bachelor of Arts with a major in computer science and Master of Science in the field of cybersecurity in computer science (p. 776)

- Dual Bachelor of Science with a major in computer science and Master of Science in the field of computer science (p. 782)
- Dual Bachelor of Science with a major in computer science and Master of Science in the field of cybersecurity in computer science (p. 782)

GRADUATE

Master's programs

- Master of Science in the field of computer science (p. 795)
- Master of Science in the field of cybersecurity in computer science (p. 796)

Doctoral program

- Doctor of Philosophy in the field of computer science (p. 811)

CERTIFICATES

Certificate programs

- Gateway to computer science graduate certificate (p. 820)
Offered online
- Graduate certificate in computer security and information assurance (p. 821)

FACULTY

Professors X. Cheng, H.A. Choi, M. Diab, J.K. Hahn, R.S. Heller, L. Hoffman, B. Narahari, R. Pless, R. Simha, P. Vora, A. Youssef

Associate Professors G. Parmer, T. Wood

Assistant Professors A. Caliskan, A. Yerukhimovich

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses; computer science courses in this numerical range may only be taken for graduate credit with permission of the course instructor, permission of the student's academic advisor, and by completing additional work in the course
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: With the exception of CSCI 1010, CSCI courses numbered CSCI 1041 and below normally may not be counted toward degree requirements for computer science majors, unless approved by a departmental advisor.

CSCI 1010. Computer Science Orientation. 1 Credit.

Introduction to the field of computer science. Basic and emerging concepts and applications of computer science. Hands-on experiments and team projects. Technical resources, professional ethics, writing, and presentation.

CSCI 1011. Introduction to Programming with Java. 3 Credits.

An introductory course in programming a computer, using the Java language. Object-oriented programming, classes, applets, methods, control structures, inheritance, overriding, GUI widgets, containers, and exceptions.

CSCI 1012. Introduction to Programming with Python. 3 Credits.

Introduction to programming a computer using the Python language; variables, types, assignment, conditionals, loops, lists, and program units. (Fall, spring, and summer, Every Year).

CSCI 1020. Applications Software. 3 Credits.

Introduction to the use of microcomputer hardware and software for word processing (e.g., Word), spreadsheets (e.g., Excel), and database management (e.g., Access), with emphasis on the use of computers to solve typical problems in academia and business.

CSCI 1021. Introduction to Computers and the Internet. 3 Credits.

Survey of computers and languages. Introduction to computer programming. History of computing and networking. The effects of computing and the Internet on our lives. E-commerce and new technologies. Concepts of web page design. (Fall and spring).

CSCI 1022. Introduction to Internet Technology. 3 Credits.

An introductory course for non-technical students who wish to obtain a better understanding of the hardware and software that comprise the Internet. Information transfer over fiber, routing and switching of packets, methods of information transfer, protocols, software, ISP, web pages and multimedia.

CSCI 1023. Introduction to Web Software Development. 3 Credits.

Introduction to the Internet. Topics include address and URL to find your way, linking to a URL, HTML and web programming, building a web page, building a home page, client-server techniques. (Fall and spring).

CSCI 1030. Technology and Society. 3 Credits.

Historical, social, and ethical issues of the technological age. Ethical principles and skills and social analysis skills needed to evaluate the design and implementation of complex computer systems. Privacy, computer crime, equity, intellectual property, professional ethics. Data collection, analysis, and presentation; technical writing and oral communication skills.

CSCI 1030W. Technology and Society. 3 Credits.

Historical, social, and ethical issues of the technological age. Ethical principles and skills and social analysis skills needed to evaluate the design and implementation of complex computer systems. Privacy, computer crime, equity, intellectual property, professional ethics. Data collection, analysis, and presentation; technical writing and oral communication skills. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Fall and spring, Every Year).

CSCI 1041. Introduction to FORTRAN Programming. 3 Credits.

Structured programming with high-level language using FORTRAN. Control structures. Different data types with emphasis on real and complex number computations. Arrays used with vector and matrix manipulation to solve simultaneous equations. External subroutines for mathematical and graphical applications. MATH 1220 or MATH 1231 may be taken as a corequisite. Prerequisites: MATH 1220 or MATH 1231. (Fall and spring, Every Year).

CSCI 1099. Variable Topics. 1-36 Credits.**CSCI 1111. Introduction to Software Development. 3 Credits.**

Introduction to the solution of problems on a digital computer using the Java language. Object-oriented programming concepts; documentation techniques; design of test data. Writing, debugging, and running programs in an interactive computing environment.

CSCI 1112. Algorithms and Data Structures. 3 Credits.

Object-oriented software. Inheritance, exceptions, development of classes, event-driven programming. Data structures such as trees, lists, stacks, queues, and strings. Sorting and searching. Introduction to algorithm performance prediction. May be taken for graduate credit by students in fields other than computer science. Prerequisites: CSCI 1111 with a minimum grade of C; and MATH 1220 or MATH 1231. (Spring, Every Year).

CSCI 1121. Introduction to C Programming. 3 Credits.

Structured programming with the C language; control structures; data types; use of pointers; matrix manipulation to solve simultaneous equations; external subroutines for mathematical and graphical applications; introduction to C++; complex number representation. Co-requisites: MATH 1220 and MATH 1231. (Spring, Every Year) Credit cannot be earned for this course and ECE 1120.

CSCI 1131. Introduction to Programming with C. 3 Credits.

Intensive introductory course for students with a science, mathematics, or other quantitative background. Solution of numerical and nonnumerical problems on a digital computer using C programming language in a Unix environment. Recommended for graduate and advanced undergraduate students in other departments. Prerequisite: MATH 1232.

CSCI 1132. Data Structures and Software Design. 3 Credits.

Data structures such as trees, lists, stacks, queues, and strings. Big-O notation and introduction to algorithm performance analysis. Solutions of numerical and non-numerical problems. Use of I/O libraries. Application development and software testing. Prerequisite: CSCI 1121.

CSCI 1311. Discrete Structures I. 3 Credits.

Mathematics for computer science. Sets, functions, sequences. Propositional and predicate calculus, formal proofs, mathematical induction. Matrices, semigroups, groups, isomorphism. Relations, partitions, equivalence relations, trees, graphs. May be taken for graduate credit by students in fields other than computer science. Prerequisites: MATH 1220 or MATH 1231. (Fall).

CSCI 2113. Software Engineering. 3 Credits.

Programming techniques and software development in one or more programming languages; application development with GUIs, database access, threads, web programming. Prerequisites: CSCI 1112 with a minimum grade of C; and MATH 1221 or MATH 1231. (Fall and spring, Every Year).

CSCI 2312. Discrete Structures II. 3 Credits.

Basic discrete techniques in computer science; proofs, algebraic structures, number theory, graph theory, (coloring and planar graphs, communication networks), advanced recurrences, advanced sums, approximations and asymptotics. Students must have received a minimum grade of C in CSCI 1311. Prerequisites: CSCI 1311; and MATH 1220 or MATH 1231; and MATH 1221. (Fall, Every Year).

CSCI 2441. Database Systems and Team Projects. 3 Credits.

Design of relational database systems, relational query languages, normal forms, and design of database applications. Team software development, integration, and testing. Professional code of ethics, intellectual property, privacy, and software copyrights. Students cannot receive credit for both CSCI 2441 taken while an undergraduate and CSCI 6441 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 2541 and CSCI 6441. (Fall and spring, Every Year).

CSCI 2441W. Database Systems and Team Projects. 3 Credits.

Design of relational database systems, relational query languages, normal forms, and design of database applications. Team software development, integration, and testing. Professional code of ethics, intellectual property, privacy, and software copyrights. Students cannot receive credit for both CSCI 2441W taken while an undergraduate and CSCI 6441 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 2441W and CSCI 6441. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Corequisite: CSCI 2113. (Spring, Every Year).

CSCI 2460. Introduction to Computer Systems. 1,2 Credit.

Introduction to computer organization and computer systems. Data representation; computer organization; processor instruction sets and assembly programming; language translation; memory; input/output; introduction to operating systems. Restricted to students in the BA and minor programs in computer science. Prerequisites: CSCI 1112; and CSCI 1311 with a minimum grade of C. Corequisites: CSCI 2113. Recommended background: introductory coursework and background in computer science, programming, and discrete mathematics. (Spring, Every Year).

CSCI 2461. Computer Architecture I. 3 Credits.

Number representation, computer arithmetic, digital logic, and circuit design. Computer organization, micro-architecture and processor datapath, assembly and machine language programming. Introduction to memory organization and the hardware-software interface. Implementation of high-level language constructs. Prerequisites: CSCI 1112 and CSCI 1311. (Fall, Every Year).

CSCI 2501. Ethical Issues in Computing. 1 Credit.

Introduction and analysis of the ethical issues of the technological age; ethical principles and skills and social analysis skills needed to evaluate future consequences of the design and implementation of complex computer systems; application of professional ethics codes in decision-making in professional practice. Restricted to computer science majors. Prerequisites: CSCI 1010 and CSCI 1011. (Fall and spring, Every Year).

CSCI 2541W. Database Systems and Team Projects. 3 Credits.

Design of relational database systems, relational query languages, Introduction to Not just SQL (NoSQL) database systems, normal forms, and design of database applications. Team software development, integration, and testing. Students cannot receive credit for both CSCI 2541W taken while an undergraduate and CSCI 6441 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 2541 and CSCI 6441. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Corequisite: CSCI 2113. Prerequisite: CSCI 1311. (Spring, Every Year).

CSCI 3212. Algorithms. 4 Credits.

Core concepts in design and analysis of algorithms, data structures, and problem-solving techniques. Hashing, heaps, trees. Graph algorithms, searching, sorting, graph algorithms, dynamic programming, greedy algorithms, divide and conquer, backtracking. Combinatorial optimization techniques. NP-completeness. Prerequisites: CSCI 1311 and CSCI 2113. (Fall and spring, Every Year).

CSCI 3221. Programming Languages. 3 Credits.

Programming language and software design fundamentals. Writing programs in a non-procedural programming language. Closures; procedure and data abstraction; object-oriented, procedural, and declarative programming; continuation compilation and interpretation, and syntactic extension. Advanced control structures appropriate for parallel programming. Prerequisite: CSCI 2113.

CSCI 3240. Pre-Senior Design with Research. 3 Credits.

For students who wish to combine a research project with their Senior Design project. The goal is to complete the research, under a faculty mentor, within three semesters. Prerequisites: CSCI 3212, CSCI 3313, CSCI 3411 and permission of the instructor. (Fall and spring, Every Year).

CSCI 3313. Foundations of Computing. 3 Credits.

Introduction to the theory of computing and automata theory. Formal languages and automata; regular expressions, context-free languages; finite state automata and pushdown automata; Turing machines and computability, recursive function theory, undecidability. Prerequisites: CSCI 1311, CSCI 2113, and CSCI 2461. (Fall and spring, Every Year).

CSCI 3362. Probability for Computer Science. 3 Credits.

Introduction to probability and statistics for computer scientists; random variables; conditional probability, independence, correlation; applications to computer science, including information theory, data compression, coding, inference, Markov chains, randomized algorithms. Students cannot receive credit for both CSCI 3362 taken while an undergraduate and CSCI 6362 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 3362 and CSCI 6362. Prerequisites: CSCI 1311 and MATH 1232. (Spring, Every Year).

CSCI 3410. Systems Programming. 3 Credits.

Concepts underlying all computer systems. Processor operation, hierarchical memory systems, embedded boards, data acquisition, actuation, and systems software such as compilers, linkers, and operating systems from the programmer's perspective. Use of embedded platforms to examine how programs interact with and are constrained by hardware. Prerequisites: CSCI 2461 and CSCI 2113. (Fall and spring, Every Year).

CSCI 3411. Operating Systems. 4 Credits.

Process management, process state, concurrent processing, synchronization, events; operating system structure, the kernel approach, processor scheduling, task switching, monitors, threads; system management, memory management, process loading, communication with peripherals; file systems; socket programming, packets, Internet protocols. Prerequisites: CSCI 2113 and CSCI 2461. (Fall, Every Year).

CSCI 3462. Computer Architecture II. 3 Credits.

Computer organization; design of computer components and of a simple computer. Instruction set and assembly language of a pipelined RISC processor; introduction to high-performance processors; design of cache, main memory, and virtual memory systems; program performance models and system performance; I/O structure and peripherals. Prerequisites: CSCI 2113 and CSCI 2461. (Spring, Every Year) Credit cannot be earned for this course and ECE 3515.

CSCI 3571. Introduction to Bioinformatics. 3 Credits.

An introduction to the use of computational techniques in molecular biology, genetics, and evolution. Techniques and software for database searching, sequence alignment, gene finding, phylogenetics, genomics, and proteomics. May be taken for graduate credit. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126. (Same as BISC 2584) (Spring, Every Year).

CSCI 3907. Special Topics. 1-3 Credits.

Topic to be announced in the Schedule of Classes. (Fall and spring).

CSCI 3908. Research. 1-3 Credits.

Applied research and experimentation projects, as arranged. Restricted to juniors and seniors. (Fall and spring, Every Year).

CSCI 4222. Theory of Computer Translators. 3 Credits.

Lexical and syntax analysis, regular expressions, context-free grammars, parsing techniques, top-down parsing, efficient parsing, syntax-directed translation, intermediate formats, flow of control, block structures, procedure calls, symbol tables, run-time storage, error-detection and recovery, code optimization, code generation. Prerequisites: CSCI 3313 and CSCI 3462. (Fall and spring, Every Year).

CSCI 4223. Principles of Programming Languages. 3 Credits.

Fundamental concepts underlying design of programming languages. Detailed study of functional and object-oriented computational models. Types, evaluation, abstraction, control flow, modules, mutation, laziness, polymorphism, subtyping, inheritance. Practice learning new languages. Students cannot receive credit for both CSCI 4223 taken while an undergraduate and CSCI 6223 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4223 and CSCI 6223. Prerequisites: CSCI 1311 and CSCI 2113. (Spring, odd years).

CSCI 4235. Development of Open-Source Software. 3 Credits.

Design, process, tools, and culture of open-source software development. Cross-platform development and testing. Geographic dispersal, social and team dynamics, licenses (GPL, BSD, other); code reuse (modular code, shared libraries); very-large-scale distributed development techniques (CVS, Bugzilla, release-management, mailing-lists). May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4237. Software Design for Handheld Devices. 3 Credits.

Design of interactive software for handheld devices. Event driven programming, user interface design practices, memory management, handheld debugging techniques. May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4243. Capstone Design Project I. 3 Credits.

Planning, design, and construction of the capstone project. Economic analysis of the project. Application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Report writing and presentations. Prerequisite: senior status.

CSCI 4243W. Capstone Design Project I. 4 Credits.

Planning, design, and construction of the capstone project; economic analysis of the project; application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: CSCI 3212 and CSCI 3411. (Fall, Every Year).

CSCI 4244. Capstone Design Project II. 4 Credits.

Continuation of CSCI 4243. Planning, design, and construction of the capstone project. Economic analysis of the project. Application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Restricted to seniors. Prerequisites: CSCI 4243W or CSCI 4243. (Spring, Every Year).

CSCI 4314. Discrete Analysis-Computer Science. 3 Credits.

Combinatorial theory: permutations and combinations, generating functions, recurrence relations, the principle of inclusion and exclusion. Block designs. Applications to the analysis of algorithms, computer organization, VLSI placement, coding theory, simulation, and other problems. May be taken for graduate credit. Prerequisites: CSCI 1311 or permission of the instructor. (Fall, Every Year).

CSCI 4331. Cryptography. 3 Credits.

Algorithmic principles of cryptography from Julius Caesar to public key cryptography. Key management problems and solutions. Cryptographic systems and applications. Students cannot receive credit for both CSCI 4331 taken while an undergraduate and CSCI 6331 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4331 and CSCI 6331. Prerequisites: CSCI 2312, CSCI 3212 and CSCI 3313. (Spring, Every Year).

CSCI 4341. Continuous Algorithms. 3 Credits.

Structures in continuous mathematics from a computational viewpoint; continuous system simulation, computational modeling, probability, statistical techniques, next-event simulation, algorithms for continuous optimization, machine learning, neural networks, statistical language processing, robot control algorithms. Students cannot receive credit for both CSCI 4341 taken while an undergraduate and CSCI 6341 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4341 and CSCI 6341. Prerequisites: CSCI 1311 and CSCI 2113. (Spring, Every Year).

CSCI 4342. Computational Linear Algebra and Applications. 3 Credits.

Application of linear algebra to computer science and engineering, with a computational perspective; points, vectors, matrices, and their programming representations; algorithms for 3D transformations, pose and viewpoint estimation; linear equations, independence, rank; algorithms for matrix decompositions, reduction of dimension; computation with large matrices, under and over-determined systems; applications to large data, computer vision, text processing. Students cannot receive credit for both CSCI 4342 taken while an undergraduate and CSCI 6342 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4342 and CSCI 6342. Prerequisite: CSCI 2113. (Spring, Every Year).

CSCI 4361. Simulation Methods. 3 Credits.

Computational methods for continuous and discrete system simulation; effects of computer software and hardware architectures on computational precision and accuracy requirements. Random-number generation and testing; calibration and scaling technique; verification and validation technique. May be taken for graduate credit. Prerequisite: CSCI 2113 or permission of the instructor. (Spring, Every Year).

CSCI 4364. Machine Learning. 3 Credits.

Overview of core machine learning techniques: nearest-neighbor, regression, classification, perceptron, kernel methods, support vector machine (SVM), logistic regression, ensemble methods, hidden Markov models (HMM), non-parametrics, online learning, active learning, clustering, feature selection, parameter tuning, and cross-validation. Students cannot receive credit for both CSCI 4364 taken while an undergraduate and CSCI 6364 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4364 and CSCI 6364. Prerequisites: CSCI 3212, CSCI 3362 and MATH 2184. (Fall, Every Year).

CSCI 4414. Introduction to Blockchain Technology and Applications. 3 Credits.

Introduction to blockchain concepts. Illustrates applications in both technical and business contexts. May be taken for graduate credit. Recommended background: prior coursework and background in computer science disciplines, programming, security protocols, machine learning, and distributed systems is helpful. (Fall and spring, Every Year).

CSCI 4415. Real-Time and Embedded Systems. 3 Credits.

Development of software for real-time control of physical systems; reliability and fault tolerance, exceptions and exception handling, reliability and concurrent processes, timeouts, deadline scheduling, shared-memory and message-based device drivers. May be taken for graduate credit. Prerequisite: CSCI 2113. (Spring, Every Year).

CSCI 4417. UNIX System Programming. 3 Credits.

Exposure to UNIX internals. Use of UNIX system calls and utilities in conjunction with script and C programs. RFCs, GNU project, and other collaborative traditions in the UNIX community. May be taken for graduate credit. Prerequisite: Senior status or 1 year of C programming and UNIX user experience.

CSCI 4418. UNIX System Administration. 3 Credits.

System administration for the stand-alone system or small networks. Installation of two or more UNIX variants (Linux, FreeBSD, Solaris) on Intel or Sparc platforms. Configuration of mail, name services, and other network utilities. Backup and recovery, security and ethics. May be taken for graduate credit. Prerequisite: CSCI 4417.

CSCI 4431. Computer Networks I. 3 Credits.

Higher-layer protocols and network applications on the Internet, such as session layer, presentation layer, data encryption, directory services and reliable transfer services, telnet, network management, network measurements, e-mail systems, and error reporting. Students cannot receive credit for both CSCI 4431 taken while an undergraduate and CSCI 6431 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4431 and CSCI 6431. Prerequisites: CSCI 2113 and CSCI 2461. (Fall, Every Year).

CSCI 4431W. Computer Networks I. 3 Credits.

Higher-layer protocols and network applications on the Internet, such as session layer, presentation layer, data encryption, directory services and reliable transfer services, telnet, network management, network measurements, e-mail systems, and error reporting. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: CSCI 2113 and CSCI 2461. (Fall and spring, Every Year).

CSCI 4432. Computer Networks II. 3 Credits.

Computer networks and open system standards. Network configurations and signals, encoding and modulation, transmission media, connection interfaces, error detection and correction, signal compression, switching, link layer control, ISDN, X.25, frame relay, ATM, and Sonet. Bridges, routers, and routing algorithms. Prerequisite: CSCI 4431.

CSCI 4455. Computer Game Design and Programming. 3 Credits.

Principles, techniques, and design of computer games. Graphic game engines, modeling, motion, AI and interaction; sound design and synthesis; real-time software and hardware issues. May be taken for graduate credit. (Fall).

CSCI 4511. Artificial Intelligence Algorithms. 3 Credits.

Knowledge representation and reasoning, propositional logic and predicate calculus. Logic programming; search, game trees, backtracking; planning. May be taken for graduate credit. Prerequisites: CSCI 3212 and CSCI 3221. (Spring, Every Year).

CSCI 4521. Introduction to Mobile Robotics. 3 Credits.

Overview of autonomous mobile robotics. Sensing, localization, calibration, mapping, perception, decision making, planning, and control. Emphasis on algorithmic rather than hardware aspects of robotics. Development of algorithms that can operate autonomous mobile platforms in complex, real-world environments. Prerequisites: MATH 1232 and MATH 2184; and CSCI 3362 or CSCI 4341. (Fall and spring, Every Year).

CSCI 4525. Autonomous Robotics: Manipulation. 3 Credits.

Introduction to robot manipulation. Core principles necessary to program robots for autonomous operation in dynamic and typically human-centric environments. Transdisciplinary concepts from computer science (reinforcement learning, perception), mechanical engineering (kinematics, dynamics), and electrical engineering (control theory). Prerequisites: Permission of the instructor. (Fall and spring, Every Year).

CSCI 4527. Introduction to Computer Vision. 3 Credits.

Introduction and overview of computer vision. Image-formation signal processing and filtering. Saliency, image features and feature extraction, tracking, stereo disparity estimation, structure from motion, photogrammetry, optic flow, homography estimation and warping, scene segmentation, place recognition, object recognition, robust estimation, and camera calibration. Prerequisites: MATH 1232 and MATH 2184; and CSCI 3362 or CSCI 4341. (Spring, Every Year) Same As: CSCI 6527.

CSCI 4531. Computer Security. 3 Credits.

Risk analysis, cryptography, operating system security, identification and authentication systems, database security. Students cannot receive credit for both CSCI 4531 taken while an undergraduate and CSCI 6531 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4531 and CSCI 6531. Corequisite: CSCI 4331. Prerequisite: CSCI 3411. (Spring, Every Year).

CSCI 4532. Information Policy. 3 Credits.

Roles, issues, and impacts of computer-based information systems in national and international arenas, focusing on privacy, equity, freedom of speech, intellectual property, and access to personal and governmental information. Professional responsibilities, ethics, and common and best practices in information use. Students cannot receive credit for both CSCI 4532 taken while an undergraduate and CSCI 6532 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4532 and CSCI 6532. (Fall, Every Year).

CSCI 4541. Network Security. 3 Credits.

Security protocols and applications in local, global, and wireless networks; IPsec and packet-level communication security systems; network authentication and key-exchange protocols; intrusion detection systems and firewalls; secure network applications; network worms and denial-of-service attacks. Students cannot receive credit for both CSCI 4541 taken while an undergraduate and CSCI 6541 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4541 and CSCI 6541. Prerequisite: CSCI 4531. (Spring, Every Year).

CSCI 4551. Concepts and Applications of Computer Graphics. 3 Credits.

Introduction to computer graphics without programming; building 3-D geometry and rendering; computer animation; virtual reality and computer games; hands-on projects in modeling, rendering, and animation using commercial software; hands-on projects in photo and video manipulation.

CSCI 4552. Design of Computer Animation I. 3 Credits.

Use of commercial 3-D computer animation packages to create digital artistic works. Principles of animation, including timing, exaggeration of motion, and anticipation; use of a storyboard; modeling; motion; rendering and editing. (Fall, Every Year).

CSCI 4553. Design of Computer Animation II. 3 Credits.

Use of commercial 3-D animation packages to create artistic works and visualizations. Process-spanning concepts of development through pre-production, production, and post-production. Emphasis on developing original content and attaining high production values. Prerequisite: CSCI 4552.

CSCI 4554. Computer Graphics I. 3 Credits.

Graphics primitives; 2D, 3D, and viewing transformations; hierarchical modeling and animation; illumination and shading; texture mapping; shaders; visibility and collision detection; sampling and anti-aliasing; global illumination; projects using OpenGL graphics API. May be taken for graduate credit. Prerequisites: CSCI 2113 or CSCI 6221. (Spring, Every Year).

CSCI 4561. Design of User-Interface Programs. 3 Credits.

Structure of interactive programs. Widgets, windows, and input devices. Client-server model, event-driven programming, and callbacks. Window systems (e.g., Xwindows) and dialog control. May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4572. Computational Biology. 3 Credits.

Pairwise alignment and scoring. Multiple sequence alignment. Fragment assembly, physical mapping of DNA. Phylogenetic trees. Molecular structure prediction and protein folding. Microarrays and microarray data, image comparison. Clustering. Overview of biological databases, PDB, MMDB, GenBank. Draft genomes and genome browsers. Pathway databases. May be taken for graduate credit. Prerequisite: CSCI 3571 and CSCI 3212 or CSCI 6212.

CSCI 4576. Introduction to Biomedical Computing. 3 Credits.

A survey of the problems and solutions in biomedical computing. Application of computers in medicine. Patient care and monitoring systems, electronic medical records, digital imaging and analysis. Telemedicine, medical ethics, health care regulations and organizations.

CSCI 4577. Biomedical Computing. 3 Credits.

Computing issues in epidemiology and biosurveillance, decision support, medical imaging and visualization, image-guided surgery; medical databases, issues in system integration, mobile medical computing. May be taken for graduate credit. Corequisite: CSCI 2441. Restricted to graduate students. Prerequisites: CSCI 2113 and CSCI 4576. (Spring, Every Year).

CSCI 5099. Variable Topics. 1-99 Credits.**CSCI 6001. Introduction to Computer Programming and Software Development. 3 Credits.**

Introduction to concepts and skill development in programming and software development, including problem solving on a digital computer and writing, debugging, and executing programs. Restricted to students in select programs; departmental permission is required. (Fall, spring, and summer, Every Year).

CSCI 6002. Introduction to Data Structures and Their Applications. 3 Credits.

Introduction to core computer science data structures including: arrays, lists, linked structures, stacks, queues, and trees. Sorting, searching, and comparison of algorithmic performance. Restricted to students in select programs; departmental permission is required. (Fall, spring, and summer, Every Year).

CSCI 6003. Introduction to Software Design and Engineering. 3 Credits.

Introduction to objects and object-oriented programming. Software development for applications including development with GUIs, database access, threads, web programming. Restricted to students in select programs; departmental permission is required. (Fall, spring, and summer, Every Year).

CSCI 6010. Introduction to Computer Science Fundamentals. 3 Credits.

Review of programming in a high-level language using Java or C++ Introduction to objects and object-oriented programming: static and dynamic objects, inheritance, dynamic method invocation. Data structures: 2D-arrays, linked-lists, stacks, queues, trees, hashing. Discrete structures: sets, graphs, permutations and combinations. Restricted to students whose letter of admission stated that the course is required. (Fall and spring, Every Year).

CSCI 6011. Introduction to Computer Systems. 3 Credits.

Introduction to basic concepts underlying all computer systems; processor operation, hierarchical memory systems, elementary logic circuits, and systems software such as compilers, linkers, and operating systems from the programmer's perspective. Students must have completed one year of coursework in programming in C, C++, or Java prior to registration. Restricted to students whose letter of admission stated that the course is required. (Fall and spring, Every Year).

CSCI 6012. Cybersecurity and Privacy. 3 Credits.

Overview of cybersecurity and privacy, including cryptography, authentication, malware, viruses, network security, anonymity, privacy and online privacy, risk management; common cyberattacks and techniques for detection and defense; policy and legal perspectives for managing cybersecurity missions supporting private sector and government; cyber technologies as applied to the stability of global information and communications infrastructure; government cybersecurity policies. (Fall, spring, and summer).

CSCI 6013. Security in Mobile Computing. 3 Credits.

Relationship between security strategic plan and business strategic plan; mobile device solutions (MDS) to access enterprise corporate data; bring your own device (BYOD) paradigm; mobile device management (MDM) best practices, policies, network controls to identify countermeasures, and risk mitigation strategies against common threats. Overview of mobile security solutions for classified processing and communications. Prerequisites: CSCI 6012. (Fall, spring, and summer).

CSCI 6015. Cyber Forensics. 3 Credits.

Acquiring, preserving and analyzing digitally stored information while ensuring that this information is admissible as evidence in a court of law. Principles and techniques for cyber forensics investigations using industry-standard forensic process. Restricted to SEAS online students. (As arranged, Every Year).

CSCI 6016. Applied Network Defense. 3 Credits.

Computer security: protection aspects of the Internet. Cryptographic tools to provide security, such as shared key encryption (DES, 3DES, RC and more), public key encryption, key exchange, and digital signature. Internet protocols and applications. Restricted to SEAS online students. (As arranged, Every Year).

CSCI 6018. Cloud Application Architecture. 3 Credits.

Cloud application design guidelines and software patterns. Survey of cloud services for scalable secure cloud applications. Trade-offs in cloud application design, container vs virtual machine deployments, and monolithic vs microservice. Restricted to SEAS online students. (As arranged, Every Year).

CSCI 6114. Introduction to Computer Systems and Systems Programming. 3 Credits.

Introduction to basic concepts underlying all computer systems; processor operation, hierarchical memory systems, elementary logic circuits, and systems software such as compilers, linkers, and operating systems from the programmer's perspective. Software development with the C programming language. Students cannot receive credit for this course and CSCI 6011. Restricted to students in select programs; departmental permission is required. Prerequisites: CSCI 2113 or CSCI 6003. (Fall, spring, and summer, Every Year).

CSCI 6115. Application Development I. 3 Credits.

Client-server programming, web development, front end design, back-end server development, introduction to databases. Front and back-end languages, server administration and tools. Students cannot get credit for this course and CSCI 2441, CSCI 2441W, CSCI 2541, or CSCI 2541W. Restricted to students in select programs; departmental permission is required. Prerequisites: CSCI 2113 or CSCI 6003. (Fall, spring, and summer, Every Year).

CSCI 6116. Advanced Application Development. 3 Credits.

Design of large software systems and installable applications, development frameworks, integration of components and services, cloud and web programming, and mobile device development; software specification and testing. Prerequisites: CSCI 6115, CSCI 6431 and CSCI 6441. (Fall, spring, and summer, Every Year).

CSCI 6212. Design and Analysis of Algorithms. 3 Credits.

Design and analysis of algorithms; Turing machines; NP-complete theory; algorithmic techniques: divide-and-conquer, greedy, dynamic programming, graph traversal, backtracking, and branch-and-bound; applications include sorting and searching, graph algorithms, and optimization. Students are expected to know data structures and possess general programming skills in one or more procedural/OOP language such as C/C++/Java, and to have a good mathematical background such as discrete math and some calculus, prior to registration. (Fall, spring, and summer, Every Year).

CSCI 6221. Advanced Software Paradigms. 3 Credits.

Object-oriented, procedural, functional, and concurrent software design paradigms; design patterns; software life cycle concepts; tradeoffs between compiled and interpreted languages; examples from Java, C, C++ and Perl. Restricted to graduate students. (Fall, spring, and summer, Every Year).

CSCI 6223. Principles of Programming Languages. 3 Credits.

Fundamental concepts underlying design of programming languages; detailed study of functional and object-oriented computational models; types, evaluation, abstraction, control flow, modules, mutation, laziness, polymorphism, subtyping, inheritance. Students cannot receive credit for both CSCI 6223 taken while a graduate and CSCI 4223 taken while an undergraduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4223 and CSCI 6223. (Spring, odd years).

CSCI 6231. Software Engineering. 3 Credits.

The life-cycle model. Requirements and specifications. Design models, structured and object-oriented design. Program development, PDL's tools, configuration control. Program, unit, and integration testing. Program verification. Other development models. Development metrics. Computer-aided software engineering (CASE). Prerequisites: CSCI 6221 and CSCI 6212. (Fall and spring, Every Year).

CSCI 6232. Software Engineering Development. 3 Credits.

Formal methods in software engineering. First-order logic, basic specification elements, rigorous proofs, formal development process, concurrency. Prerequisites: CSCI 6461 and CSCI 6212. (Fall and spring, Every Year).

CSCI 6233. Software Testing and Quality. 3 Credits.

Flow graphs and path testing, transaction flow testing, data flow testing, software metrics, system testing, test planning and documentation, reliability, statistical testing. Prerequisite: CSCI 6231. (Fall and spring, Every Year).

CSCI 6234. Object-Oriented Design. 3 Credits.

Object-oriented systems, software reusability, software modularity, top-down and bottom-up approaches, object classification, genericity, metaprogramming, concurrent object-oriented programming languages. Prerequisite: CSCI 6221.

CSCI 6235. Component-Based Enterprise Software Development. 3 Credits.

Component-based software development for enterprise applications. Component models, multi-tier architecture. Specific case studies may include topics such as Enterprise Java Beans, DCOM, and COBRA. Prerequisite: CSCI 6221.

CSCI 6311. Theory of Computation. 3 Credits.

Theoretical foundations of computer science. Formal languages and automata; regular expressions, context-free languages, parsing; Turing machines and complexity; partial recursive functions; undecidability; program correctness; fixed-point theory; formal specifications of software. Prerequisite: CSCI 6212.

CSCI 6312. Graph Theory and Applications. 3 Credits.

Undirected and directed graphs. Connectivity, partitions, cycles and matchings. Edge and vertex coloring, chromatic polynomials, and the four-coloring problem. Planar graphs and Kuratowski's theorem. Properties of random graphs. Applications to a variety of problems. Prerequisite: CSCI 6212. (Fall and spring, Every Year).

CSCI 6318. Complex Systems. 3 Credits.

The edge-of-chaos phenomenon, phase transitions, power laws, small-world networks, Boolean networks, cellular automata, and complex dynamics. Applications to networks and biological systems. Prerequisite: CSCI 6212.

CSCI 6331. Cryptography. 3 Credits.

Review of mathematical theory for cryptography; classical ciphers; modern block and stream ciphers; symmetric and asymmetric systems; digital signatures; public key infrastructure; authentication. Students cannot receive credit for both CSCI 4331 taken while an undergraduate and CSCI 6331 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4331 and CSCI 6331. Prerequisite: CSCI 6212. (Spring, Every Year).

CSCI 6341. Continuous Algorithms. 3 Credits.

Structures in continuous mathematics from a computational viewpoint; continuous system simulation, computational modeling, probability, statistical techniques, next-event simulation, algorithms for continuous optimization, machine learning, neural networks, statistical language processing, robot control algorithms. Students cannot receive credit for both CSCI 4341 taken while an undergraduate and CSCI 6341 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4341 and CSCI 6341. (Spring, Every Year).

CSCI 6342. Computational Linear Algebra and Applications. 3 Credits.

Linear algebra applied to computational problems in computer science and engineering; points, vectors, matrices, and their programming abstractions; 3D transformations, pose and viewpoint estimation; linear equations; algorithms for matrix decompositions, dimension reduction, computation with large matrices, under- and over-determined systems; applications to big data, computer vision, text processing. Students cannot receive credit for both CSCI 4342 taken while an undergraduate and CSCI 6342 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4342 and CSCI 6342. (Spring, Every Year).

CSCI 6351. Data Compression. 3 Credits.

Background on signals, information theory, transforms, human vision, and metrics. Lossless and lossy compression techniques. Video compression. Compression standards. Progressive transmission. Prerequisite: CSCI 6212.

CSCI 6362. Probability for Computer Science. 3 Credits.

Concepts of probability and statistics used in computer science; random variables; conditional probability, independence, correlation; law of large numbers, central limit theorem; applications to computer science, including entropy, information theory, data compression, coding, inference, Markov chains, randomized algorithms. Students cannot receive credit for both CSCI 3362 taken while an undergraduate and CSCI 6362 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 3362 and CSCI 6362. (Spring, Every Year).

CSCI 6364. Machine Learning. 3 Credits.

Machine learning algorithms: nearest-neighbor, regression, classification, perceptron, kernel methods, support vector machine (SVM), logistic regression, ensemble methods, boosting, graphical models, hidden Markov models (HMM), non-parametrics, online learning, active learning, clustering, feature selection, parameter tuning, and cross-validation. Students cannot receive credit for both CSCI 4364 taken while an undergraduate and CSCI 6364 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4364 and CSCI 6364. Prerequisites: CSCI 6212 and CSCI 6362. (Fall, Every Year).

CSCI 6365. Advanced Machine Learning. 3 Credits.

Theory and algorithms for machine learning research; in-depth focus on advanced machine learning topics such as clustering, learning from data streams, and climate informatics. Prerequisite: CSCI 6364. (Spring, Every Year).

CSCI 6411. Advanced Operating Systems. 3 Credits.

Fundamentals of operating system design and structure, resource management, and system support for multi-core. Topics include scheduling, synchronization, system structure, virtual address spaces, memory management, I/O management, and systems abstractions for modern multi-core architectures. The course involves an implementation component and requires substantial programming experience. This course can be taken for credit by undergraduates who have taken CSCI 3411. Prerequisite: CSCI 6461 or CSCI 2461.

CSCI 6412. OS Design and Implementation. 3 Credits.

Builds on CSCI 6411 to provide students with the knowledge to build parts of modern operating systems, which is studied and motivated from the viewpoint of practical design and implementation. Students learn how operating system's components for resource management and abstraction are built from the ground up and integrated into working systems considering the challenges of reliability, multi-core, and security. The course has a significant implementation component; substantial low-level programming experience is required. Prerequisite: CSCI 6411. (Fall and spring, Every Year).

CSCI 6418. Unix Systems Administration. 3 Credits.

System administration for the stand-alone system or small networks; installation of two or more UNIX variants (Linux, FreeBSD, Solaris) hardware platforms; configuration of mail, name services, and other network utilities; backup and recovery, security and ethics. Students cannot receive credit for both CSCI 4418 taken while an undergraduate and CSCI 6418 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4418 and CSCI 6418. Prerequisites: CSCI 6114; or CSCI 6010 and CSCI 6011. (Fall, spring, and summer, Every Year).

CSCI 6419. Advanced Systems Administration. 3 Credits.

Administration of large systems, non-Unix platforms, web document systems, website administration, cloud and web services, user and IT personnel components, and economics of IT support. Prerequisite: CSCI 6418. (Fall, spring, and summer, Every Year).

CSCI 6421. Distributed and Cluster Computing. 3 Credits.

Algorithmic and implementation challenges in building large scale distributed applications; distributed coordination, scheduling, consistency issues, and fault tolerance algorithms; fundamental distributed systems concepts applied to both high performance computing and cloud computing environments. Prerequisite: CSCI 6212. Recommended background: Substantial programming experience. (Fall, Every Year).

CSCI 6431. Computer Networks. 3 Credits.

Fundamental concepts in the design and implementation of computer communication networks and internet, their protocols, and applications; layered network architectures, applications, network programming interfaces, transport, routing, data link protocols, local area networks, network management, and network security. Students cannot receive credit for both CSCI 4431/CSCI 4431W taken while an undergraduate and CSCI 6431 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4431/CSCI 4431W and CSCI 6431. Prerequisite: CSCI 6461. (Fall, Every Year).

CSCI 6433. Internet Protocols. 3 Credits.

Understanding of the layered protocols for the Internet. Interconnection of networks. The IP protocol and routing algorithms, switches, bridges, and routers. The transmission control protocol (TCP). Addressing and names. Application-specific protocols, FTP, TELNET, SMTP, SNMP, HTTP. Domain name services. Prerequisites: CSCI 6221 and CSCI 6431. (Fall and spring, Every Year).

CSCI 6434. Design of Internet Protocols. 3 Credits.

Protocol specifications and formal description methods. Finite-state descriptions of Internet protocols. Specification and Description Language. Implementation of protocol specifications. Prerequisites: CSCI 6212 and CSCI 6433. (Fall and spring, Every Year).

CSCI 6441. Database Management Systems. 3 Credits.

Design and architecture of relational database management systems; query languages, data models, index structures, database application design. Students cannot receive credit for CSCI 2441W or 2541W taken while an undergraduate and CSCI 6441 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for CSCI 2441W or CSCI 2541W and CSCI 6441. Prerequisites: CSCI 6221 and CSCI 6461. (Spring, Every Year).

CSCI 6442. Database Systems II. 3 Credits.

Concepts in database systems. Relational database design. Editing, report generation, updating, schema refinement, tuning. Construction of database management systems. Conceptual and logical design of a database. Prerequisite: CSCI 6441.

CSCI 6443. Data Mining. 3 Credits.

Fundamental concepts of data mining. Algorithm techniques for data mining, including classification, clustering, association rules mining. Prerequisites: CSCI 6441 or permission of the instructor. (Fall and spring, Every Year).

CSCI 6444. Introduction to Big Data and Analytics. 3 Credits.

Big data, its properties, technology, and the types and classes of analytics that can be applied to it; associated storage and programming systems. Students gain practical experience through focused projects to apply different analytics to a data set. Prerequisite: CSCI 2113 or CSCI 6221. (Fall, spring, and summer).

CSCI 6451. Information Retrieval Systems. 3 Credits.

Information organization and retrieval of natural language data by digital computer systems; statistical, syntactic, and logical analysis of natural language; dictionary and thesaurus systems; searching strategies and cataloging. Large-scale file structures. Prerequisites: CSCI 6221 and CSCI 6461. (Fall and spring, Every Year).

CSCI 6461. Computer System Architecture. 3 Credits.

Concepts in processor, system, and network architectures; architecture of pipeline, superscalar, and VLIW/EPIC processors; multiprocessors and interconnection networks; cache coherence and memory subsystem design for multiprocessor architectures; parallel and distributed system architecture; internetworking. Restricted to graduate students. (Fall, spring, and summer, Every Year).

CSCI 6511. Artificial Intelligence. 3 Credits.

Representation and space search; heuristic search; predicate calculus; knowledge representation and knowledge engineering for expert systems; rule-based, hybrid, and O-O systems; semantic nets, frames, and natural language; theorem provers; planning, learning, neural nets; use of AI languages. Prerequisite: CSCI 6212. (Spring, Every Year).

CSCI 6515. Natural Language Understanding. 3 Credits.

The state of the art of natural language parsing and semantic understanding by computer systems. Review of formal, context-free, and transformational grammars and parsing. Augmented transition networks: problems of complexity, semantics, and context. Deterministic parsing and semantic parsing. Prerequisite: CSCI 6511.

CSCI 6521. Introduction to Mobile Robotics. 3 Credits.

Concepts of autonomous mobile robotics with emphasis on algorithmic aspects. Sensing, sensor fusion, localization, calibration, mapping, perception, decision making, planning, behavior-based control, world modeling, and navigation. Development of algorithms that can operate autonomous mobile platforms in complex, real-world environments. Prerequisites: MATH 1232 and MATH 2184; and CSCI 6362 or CSCI 4341. (Fall and spring, Every Year).

CSCI 6525. Autonomous Robotics: Manipulation. 3 Credits.

Manipulation and autonomous operation in dynamic, human-centric environments. Reinforcement learning, perception, optimization algorithms, kinematics, dynamics, control theory. Prerequisites: CSCI 6362 and MATH 2184; or permission of the instructor. (Fall and spring, Every Year).

CSCI 6527. Introduction to Computer Vision. 3 Credits.

Image signal processing and filtering. Saliency, features and feature extraction, tracking, stereo disparity estimation, structure from motion, photogrammetry, optic flow, homography estimation and warping, scene segmentation, place recognition, object recognition, robust estimation, and camera calibration. Current research topics. Prerequisites: MATH 1232 and MATH 2184; and CSCI 6362 or CSCI 6341. (Fall and spring, Every Year).

CSCI 6531. Computer Security. 3 Credits.

Functional description of cryptographic primitives; risk analysis; policy models; design principles; assurance; malicious logic. Students cannot receive credit for both CSCI 4531 taken while an undergraduate and CSCI 6531 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4531 and CSCI 6531. Prerequisite: CSCI 6461. (Spring, Every Year).

CSCI 6532. Information Policy. 3 Credits.

Roles, issues, and impacts of computer-based information systems in national and international arenas, focusing on privacy, equity, freedom of speech, intellectual property, and access to personal and governmental information. Professional responsibilities, ethics, and common and best practices in information use. Students cannot receive credit for both CSCI 4532 taken while an undergraduate and CSCI 6532 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4532 and CSCI 6532. (Fall, Every Year).

CSCI 6534. Information Security in Government. 3 Credits.**CSCI 6541. Network Security. 3 Credits.**

Security protocols and applications in local, global, and wireless networks; IPsec and packet-level communication security systems; network authentication and key-exchange protocols; intrusion detection systems and firewalls; secure network applications; network worms and denial-of-service attacks. Students cannot receive credit for both CSCI 4541 taken while an undergraduate and CSCI 6541 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4541 and CSCI 6541.

Prerequisite: CSCI 6531. (Spring, Every Year).

CSCI 6542. Computer Network Defense. 3 Credits.

Offensive and defensive information warfare operations. Simulation of various attacks on and defenses of computer systems. Laws related to information warfare. History and literature related to information warfare attacks. Prerequisite: CSCI 6541.

CSCI 6545. Software Security. 3 Credits.

Security for software systems. Theory and practice of designing and implementing secure software. Security in the context of software engineering. Practical experience with building a software system and securing it, with emphasis on correctness and robustness. Requires substantial prior programming experience. Prerequisites: CSCI 6461 or CSCI 6411; and CSCI 6531 or EMSE 6540; or permission of the instructor. (Fall and spring, Every Year).

CSCI 6547. Wireless and Mobile Security. 3 Credits.

Mobile agents, wireless Web, WAP, WEP, peer-to-peer computing; secure routing; intrusion detection and authentication on wireless networks; security for handheld devices; encryption and cryptographic measures for wireless; real-time wireless security; security measures for embedded devices. Prerequisites: CSCI 6431 and CSCI 6531. (Spring, Every Year).

CSCI 6548. E-Commerce Security. 3 Credits.

Advanced technical topics in e-commerce security. Key security threats. Authentication and authorization models, directory services, cloud based IAM, federated identity. Public key cryptography and PKI. Mobile payment methods, digital currencies, blockchain. Technologies and applications for securing web commerce. Web service security standards. Prerequisites: CS 4531 or CS 6531. (Fall and spring, Every Year).

CSCI 6554. Computer Graphics II. 3 Credits.

Algorithmic aspects of computer graphics; 3D viewing transformation; shape modeling; shading and illumination models; visible-surface determination; curves and surfaces; sampling and aliasing; global illumination, ray tracing and radiosity; shadows; image manipulation and texture mapping; procedural models. (Spring, Every Year).

CSCI 6555. Computer Animation. 3 Credits.

Euler angles and quaternions; articulated figure motion; forward and inverse kinematics; kinematic, physics based, and behavioral motion control; character animation; motion capture; temporal aliasing; sound synthesis and synchronization. (Fall, Every Year).

CSCI 6561. Design of Human-Computer Interface. 3 Credits.

Design of dialogues for interactive systems. Psychological, physiological, linguistic, and perceptual factors. Advantages and disadvantages of various interaction techniques, command language syntaxes, and data presentations. Design methodology and guidelines. Case studies, research readings, and projects. Prerequisite: CSCI 6221.

CSCI 6562. Design of Interactive Multimedia. 3 Credits.

History, theory, and development of multimedia concepts. Hardware components, platforms, and authoring tools. Scientific, technical, and cognitive foundations of various media including text, sound, graphics, and video. Interface design. Use of a media taxonomy as a design and evaluation tool. Completion of a multimedia portfolio required. Prerequisite: CSCI 6221.

CSCI 6572. Computational Biology Algorithms. 3 Credits.

Algorithms and models for DNA and protein sequence alignments, gene finding, identification of gene regulatory regions, sequence evolution and phylogenetics, RNA and protein structure, microarray and/or proteomics data analysis. Prerequisites: CSCI 6212; and programming experience in C/C++ or Java. (Spring, Every Year).

CSCI 6900. Colloquium. 0 Credits.

Lectures by outstanding authorities in computer science. Topics to be announced each semester. (Fall and spring).

CSCI 6907. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit if the topic differs. See department for details. (Fall and spring, Every Year).

CSCI 6908. Research. 1-12 Credits.

Applied research and experimentation projects, as arranged. May be repeated for credit.

CSCI 6998. Thesis Research. 3 Credits.**CSCI 6999. Thesis Research. 3 Credits.****CSCI 8211. Advanced Topics in Algorithms. 3 Credits.**

Graph algorithms, strongly connected components, biconnected components, dominators in acyclic graphs, ordered trees, network flow, planarity testing, bipartite matching, theory of NP completeness, NP-complete problems. Design and analysis of approximation algorithms for NP-complete problems. Prerequisite: CSCI 6212.

CSCI 8231. Advanced Topics in Software Engineering. 3 Credits.

Seminar on current research and developments in software engineering. Students develop a software package with the aid of available software tools such as requirement tool, design tool, code generators, testing tools, measurement tools, cost estimation tools. Prerequisites: CSCI 6232 and CSCI 6233. (Fall and spring, Every Year).

CSCI 8331. Advanced Cryptography. 3 Credits.

Linear and differential cryptanalysis. Cryptanalysis of AES. Factorization and primality. Computational and information-theoretic secrecy. Theory of secrecy. Zero-knowledge proofs. Secret sharing. Cooperative distributed cryptography. Provable security. Prerequisite: CSCI 6331.

CSCI 8401. Advanced Topics in Systems. 3 Credits.

Seminar on current research and developments in computer operating systems. May be repeated for credit. (Spring, even years).

CSCI 8431. Advanced Topics in Computer Networks and Networked Computing. 3 Credits.

Seminar on current research and developments in computer networks, Internet, networked computing, mobile computing and pervasive computing. May be repeated for credit. Prerequisites: CSCI 6461, CSCI 6212 and CSCI 6433. (Fall and spring, Every Year).

CSCI 8440. Advanced Topics in Data Management. 3 Credits.

Seminar on current research and developments in computer database systems and information retrieval. May be repeated for credit. Prerequisite: CSCI 6442 or CSCI 6451.

CSCI 8531. Advanced Topics in Security. 3 Credits.

Seminar on current research and developments in information assurance. May be repeated for credit. Prerequisite: CSCI 6531.

CSCI 8554. Advanced Topics in Computer Graphics. 3 Credits.

Seminar on current research and developments in computer graphics. Spatial and temporal anti-aliasing; hidden-surface algorithms; illumination models, radiosity, textural mapping. May be repeated for credit. Prerequisite: CSCI 6554.

CSCI 8900. Advanced Selected Topics. 3 Credits.

Topics announced in the Schedule of Classes.

CSCI 8901. Research and Evaluation Methods. 3 Credits.

Required for all computer science doctoral candidates. The scientific method; research/design requirements and objectives: qualitative, quantitative, and case studies; performance metrics; design procedures and control; sources of error and bias; evaluation tools; formal validation methods; documentation standards. Prerequisite: APSC 3115.

CSCI 8998. Computer Science Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the qualifying examination. (Fall and spring, Every Year).

CSCI 8999. Dissertation Research. 1-12 Credits.

Doctoral candidates performing dissertation research. Restricted to doctoral candidates. (Fall and spring, Every Year).

ELECTRICAL AND COMPUTER ENGINEERING

OVERVIEW

Mission Statement

The mission of the Department of Electrical and Computer Engineering is to inspire our diverse students by providing rigorous and comprehensive programs in electrical engineering and computer engineering in order to provide leadership in a rapidly developing technological society and to advance the state of knowledge in our disciplines by actively pursuing scholarly research.

Computer Engineering Program Educational Objectives

The computer engineering program in GW's Department of Electrical and Computer Engineering prepare graduates who, in the years following graduation, will achieve:

- Employment in industry, government or other organizations using skills and knowledge learned while an undergraduate student at GW as evidenced by:
 - Employment history and/or career advancements.
 - Professional visibility (e.g., patents, invention disclosures, honors or awards, refereed journal articles, conference papers & other publications, involvement in professional associations).
 - Entrepreneurial activities.

and/or

- Engagement in lifelong learning using skills and knowledge learned while an undergraduate student at GWU as evidenced by:
 - Enrollment in graduate or professional programs.
 - Advanced degree earned.
 - Professional visibility (e.g., patents, invention disclosures, honors or awards, refereed journal articles, conference papers & other publications, involvement in professional associations).

Computer Engineering Program Student Outcomes

The computer engineering program at the GW's Department of Electrical and Computer Engineering aims to produce graduates who will have an:

1. Ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

2. Ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. Ability to communicate effectively with a range of audiences.
4. Ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. Ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. Ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. Ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

7. Ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in computer engineering (p. 753)
- Bachelor of Science with a major in electrical engineering (p. 759)
- Bachelor of Science with a major in electrical engineering, energy option (p. 760)
- Bachelor of Science with a major in electrical engineering, medical preparation option (p. 762)

Minors

- Minor in computer engineering (p. 786)
- Minor in electrical engineering (p. 787)

Combined programs

- Dual Bachelor of Science with a major in computer engineering and Master of Science in the field of computer engineering (p. 781)
- Dual Bachelor of Science with a major in computer engineering and Master of Science in the field of electrical engineering (p. 781)
- Dual Bachelor of Science with a major in computer engineering and Master of Science in the field of telecommunications engineering (p. 782)
- Dual Bachelor of Science with a major in electrical engineering and Master of Science in the field of computer engineering (p. 782)

- Dual Bachelor of Science with a major in electrical engineering and Master of Science in the field of electrical engineering (p. 782)
- Dual Bachelor of Science with a major in electrical engineering and Master of Science in the field of telecommunications engineering (p. 784)

GRADUATE

Master's programs

- Master of Science in the field of computer engineering (p. 794)
- Master of Science in the field of electrical engineering (p. 799) (on-campus or online)
- Master of Science in the field of telecommunications engineering (p. 807)

Professional programs

See the School of Engineering and Applied Science (<https://www.seas.gwu.edu/>) for programs leading to the professional degree.

Doctoral programs

- Doctor of Philosophy in the field of computer engineering (p. 810)
- Doctor of Philosophy in the field of electrical engineering (p. 813)

CERTIFICATES

- Graduate certificate in high-performance computing (p. 825)

FACULTY

Professors S. Ahmadi (*Teaching*), T. El-Ghazawi, K.B. Eom, R.J. Harrington, H.J. Helgert, H. Huang, C.E. Korman, R.H. Lang, A. Louri, D. Nagel (*Research*), S. Subramaniam (*Chair*), G.P. Venkataramani, M.E. Zaghloul

Associate Professors M. Doroslovacki, T. Lan, V. Sorger

Assistant Professors G. Adam, A. Aslani (*Practice*), P. Dehghanian, M. Imani, M. Miscuglio (*Research*), O. Ozel

Professorial Lecturers A. Dragonova, A. Gadkar, L. Ippolito, O. Kavaklioglu, Y. Kim, N. Kyriakopoulos, O. Mazzoni, T. Ramesh, R. Rao, S. Torrico, S. Weiss, J. Wu, S. Yun, A. Zamani

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work

- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ECE 1010. Introduction to Electrical and Computer Engineering I. 1 Credit.

Basic and emerging concepts in electrical and computer engineering; professional literature and resources; technical writing, speaking, and presentation skills. Practical experiments and projects. (Fall, Every Year).

ECE 1020. Introduction to Electrical and Computer Engineering II. 1 Credit.

Continuation of ECE 1010. Basic and emerging concepts in electrical and computer engineering; professional literature and resources; technical writing, speaking, and presentation skills. Practical experiments and projects. (Spring, Every Year).

ECE 1099. Variable Topics. 1 Credit.

ECE 1120. C Programming for Electrical and Computer Engineering. 3 Credits.

Basic programming concepts including algorithmic thinking and structured programming, control flow, data types, pointers, functions, algorithms, I/Os, threads, and performance evaluation and optimization; concurrency and multicore programming using threads, processes as well as parallel C programming paradigms; controlling hardware devices and fine control via interfacing with assembly language. Credit cannot be earned for both this course and CSCI 1121. (Spring, Every Year) Credit cannot be earned for this course and CSCI 1121.

ECE 1125. Data Structures and Algorithms for ECE. 3 Credits.

Fundamentals of algorithms and data structures for electrical and computer engineering; techniques to solve problems through programming in C/C++ languages, linked lists, stacks, queues and trees; searching methods such as binary trees, hashing, and multi-way trees; design and analysis of algorithms and their space and time complexity. Prerequisite: ECE 1120. (Fall, Every Year).

ECE 2110. Circuit Theory. 4 Credits.

Circuit elements, techniques of circuit analysis; circuit theorems; operational amplifiers; RLC circuits; natural and step responses; series, parallel and resonant circuits; sinusoidal steady-state analysis; phasors; power calculations; transformers; two-port circuits. CAD tools used in circuit projects. Corequisites: APSC 2113; and PHYS 1022 or PHYS 1026. (Fall and spring, Every Year).

ECE 2115. Engineering Electronics. 4 Credits.

Solid state devices used in electronic engineering; physics of their operation; application to electronic circuits. Application of these elements in power supplies and in linear amplifiers. Design concepts through use of SPICE and graphical techniques. Prerequisite: ECE 2110. (Spring, Every Year).

ECE 2120. Engineering Seminar. 1 Credit.

A detailed view of the electrical and computer engineering professions. Departmental and other speakers discuss facets of ECE, engineering education, and other department, college, or university topics of interest. (Fall, Every Year).

ECE 2140. Design of Logic Systems. 4 Credits.

Boolean algebra; combinational and sequential circuits; minimization techniques; design and build logic subsystems, such as decoders, multiplexers, adders, and multipliers. Use of CAD tools. Prerequisites: ECE 2110. Corequisites: ECE 2115. (Spring, Every Year).

ECE 2210. Circuits, Signals, and Systems. 3 Credits.

Circuit analysis using Laplace transforms; transfer functions; poles and zeroes; Bode diagrams; effects of feedback on circuits; convolution; Fourier series and Fourier transforms; design of filters. CAD tools used in design of projects. Prerequisites: ECE 2110. (Spring, Every Year).

ECE 3125. Analog Electronics Design. 4 Credits.

Design, testing, and measurement of analog electronic circuits. Differential and multistage amplifiers; output stages and power amplifiers; frequency response of amplifiers, high-frequency models of FETs and BJTs; introduction to feedback circuit topologies; use of electronic CAD tools, such as P-SPICE. Prerequisite: ECE 2115. (Fall, Every Year).

ECE 3130. Digital Electronics and Design. 4 Credits.

Design and testing of logic gates, regenerative logic circuits, and semiconductor memory circuits. Implementation of such circuits with NMOS, CMOS, TTL, and other integrated circuit technologies. Use of electronic CAD tools, such as SPICE. Students must have completed a course in logic systems, such as ECE 2140 or equivalent, prior to enrollment. Consult the instructor if uncertain whether this requirement has been met. Prerequisite: ECE 2140. (Fall, Every Year).

ECE 3135. Digital Design with FPGAs. 4 Credits.

Lecture (3 hours), laboratory (3 hours). Introduction of ASIC design techniques; design and programming of FPGAs using CAD tools; timing in sequential circuits; essential hazards; races in sequential circuits; design-and-build FPGA project. Prerequisite: ECE 2140. (Spring, Every Year).

ECE 3220. Introduction to Digital Signal Processing. 3 Credits.

Signal representation, sampling, discrete-time signals, z-transforms and spectra, difference equations; Fourier analysis; discrete Fourier transform, IIR and FIR filter design. Prerequisite: ECE 2210. (Fall, Every Year).

ECE 3225. Signal and Image Analysis. 3 Credits.

Introduction to digital filters and digital image processing, time- and frequency-domain techniques for signal feature analysis; spectral estimation and analysis; autoregressive modeling; detection and estimation of periodicity; digital images as two-dimensional signals; 2-D Fourier transform. Prerequisites: APSC 3115 and ECE 2110. (As arranged, Every Year).

ECE 3310. Introduction to Electromagnetics. 3 Credits.

Maxwell's equations, pulse propagation in one dimension, transmission line equations, reflection coefficient, capacitance and inductance calculations, Smith chart, plane waves, reflection from a dielectric of fiber and integrated optics. Prerequisites: APSC 2113; and PHYS 1022 or PHYS 1026. (Spring, Every Year).

ECE 3315. Fields and Waves I. 3 Credits.

Complex phasor notation, uniform transmission lines, standing wave ratio, power, reflection coefficient, impedance matching; review of vector analysis and numerical methods; electrostatics, generalizations of Coulomb's law, Gauss's law, potential, conductors, dielectrics, capacitance, energy; Magnetostatics, Biot-Savart Law, Maxwell's equations, vector magnetic potential, inductance, magnetic energy, boundary conditions. Prerequisites: APSC 2113; and PHYS 1022 or PHYS 1026. (Fall, Every Year).

ECE 3410. Communications Engineering. 3 Credits.

Fourier series and Fourier transform in relation to signal analysis. Convolution and linear filtering. Signal bandwidth and sampling theorem. Analog modulation. Random variables and stochastic processes; power spectrum. Digital modulation: BPSK, QPSK, MSK. Pulse code modulation, DPCM and delta modulation. Prerequisites: APSC 3115; and ECE 2210. Recommended background: Students in this course should have taken APSC 3115 (Engineering Analysis III) and ECE 2210 (Circuits, Signals, and Systems) or an equivalent course; If unsure, please contact the instructor, and discuss the pre-requisite requirements. (Spring, Every Year).

ECE 3515. Computer Organization. 3 Credits.

Structure and operation of a digital computer. Design of computer arithmetic units, data and instruction paths. Microprogramming; memory technology; virtual memory; caches; pipelined computer organization; characteristics of secondary storage; I/O interfacing. Prerequisites: ECE 2140. (Fall, Every Year).

ECE 3520. Microprocessors: Software, Hardware, and Interfacing. 3 Credits.

Microprocessor architecture, address decoding, hardware interrupt, parallel and serial interfacing with various circuits, timer/counters, direct memory access, microprocessor-based system. Hands-on laboratory experience using laboratory facilities is an integral part of this course. Prerequisites: ECE 1120 and ECE 2140. (Fall, Every Year).

ECE 3525. Introduction to Embedded Systems. 3 Credits.

Microcontrollers and their application in embedded systems. Topics include assembly and C for microcontroller programming, serial and parallel I/O interfacing, and multimedia interfacing. Students perform laboratory experiments and a final project to develop a microcontroller-based embedded system. Prerequisites: ECE 1120 and ECE 3520. (Spring, Every Year).

ECE 3530. Introduction to Parallel and Distributed Computer Systems. 3 Credits.

Parallel Computing versus Distributed Computing Systems. Applications of Parallel Computing and Distributed Computing in Science and Engineering. Computer networks versus interconnection networks of parallel systems; high throughput versus low latency computing systems. Data Centers, Clouds, Grids, Edge, Fog and Cluster Computing. Performance analyses and evaluation of parallel and distributed systems. Shared memory and distributed systems programming with introduction to OpenMP, pthreads, message passing, Hadoop and MapReduce. Synchronization issues and methods. Introduction to the design and analyses of parallel algorithms. Performance Analysis and Program Optimizations. Introduction to GPUs and Heterogeneous systems and programming. Offered as arranged. Prerequisites: ECE 1120 and ECE 1125. (Summer, Every Year).

ECE 3915W. Electrical and Computer Engineering Capstone Project Lab I. 1 Credit.

Program majors take ECE 3915, ECE 4920, and ECE 4925 in sequence beginning in the second semester of their junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Spring, Every Year).

ECE 4140. VLSI Design and Simulation. 3 Credits.

Study of VLSI circuit design including PMOS and NMOS transistor analysis, switch and gate logic design, understanding of semiconductor fabrication processes and design rules, CAD system, speed and power considerations, scaling of transistors to the nano-scale, and designing with highly variable process parameters. Each student designs a VLSI chip, simulates the design and submits a GDS II file for Chip fabrication. Prerequisites: ECE 3130 and ECE 3135. (Same as ECE 6240) (Fall, Every Year).

ECE 4145. Micro- and Nanofabrication Techniques. 3 Credits.

Introduction to the basic fabrication principles at the micro and nano scale; students practice and fabricate simple devices. Prerequisite: ECE 2110. (Fall, Every Year) Same As: ECE 6245.

ECE 4150. ASIC Design and Testing of VLSI Circuits. 3 Credits.

ASIC and mixed-signal design methodology, use of ASIC design CAD tools. Logic synthesis, styles of synthesis, power/area/speed constraints. MIPS CPU HDL implementation/verification/testing. VLSI testing, fault models, design for testability techniques, scan path, built-in self-test. Testing of chips designed and fabricated in ECE 4140 or equivalent chips. Prerequisite: ECE 4140. (Same as ECE 6250) (Spring, Every Year).

ECE 4155. Sensors, Networks, and Applications. 3 Credits.

Sensor technologies for measurement of mechanical, optical, magnetic, electromagnetic, thermal, and acoustic signals; interface electronic components, calibration, noise, and nonlinearity in addition to main modern sensors and sensor networks. Prerequisites: ECE 3125 or permission of instructor. (Spring, Every Year) Credit cannot be earned for this course and ECE 6255.

ECE 4160. Introduction to Nanoelectronics. 3 Credits.

Nanoscience and technology and nanoelectronics. Basic nanofabrication steps, and techniques to build devices such as carbon nanotubes, Graphene device, and other 2D nanoelectronic devices. Tools for performing design and characterizations of nanodevices, including scanning electron microscopy (SEM), atomic force microscopy (AFM), and transmission electron microscope (TEM). Prerequisite: ECE 2115. (Same as ECE 6260) (Fall, Every Year).

ECE 4320. Fields and Waves II. 3 Credits.

Magnetostatic fields, Lorentz force torques, Biot-Savart law, Ampere's law, magnetic materials, inductance, magnetic energy; Maxwell's equations, Faraday's law, charge-current continuity, vector potential; time-harmonic fields, plane waves, polarization, skin effect, dielectric boundaries, and fiber optics; radiation, dipole, gain, effective area. Prerequisites: APSC 2114; and ECE 3315. (Spring, Every Year).

ECE 4415. Introduction to Computer Networks. 3 Credits.

Layered protocol architectures; digital transmission and fundamental limits; error detection and ARQ protocols; data link layer and control; multiple access protocols; circuit and packet switching; multiplexing; routing; flow and congestion control and queue management; LAN standards; TCP/IP; Next-generation Internet. Prerequisites: APSC 3115. (Spring, Every Year).

ECE 4425. Data Communications Laboratory. 1 Credit.

Experiments in support of the analysis and design of communications systems with emphasis on network protocols. Time and frequency division multiplexing, flow control, automatic repeat request, interfacing, token ring, token bus, multiple access for Ethernet, routing, packet switching. Prerequisite: ECE 4415. (Spring, Every Year).

ECE 4435. Photonics and Fiber Optics. 3 Credits.

Concepts of opto-electronic devices; light-matter-interaction; absorption; device details and applications: laser, photodetector, modulators, optical cavity, waveguides and optical fibers; device and link considerations, including energy-per-bit, modulation speed, and nano fabrication; plasmonics and nanophotonics; industry perspective. Prerequisites: APSC 2114; ECE 3310 or ECE 4320. Recommended background: Prior completion of at least one undergraduate-level course in electromagnetism and semiconductors. (Spring, even years) Credit cannot be earned for this course and ECE 6765.

ECE 4535. Computer Architecture and Design. 3 Credits.

Advanced topics in computer architecture and design; instruction-level parallelism, thread-level parallelism, memory, multithreading, and storage systems. Prerequisite: ECE 3515. (Fall, Every Year) Credit cannot be earned for this course and ECE 6005.

ECE 4610. Electrical Energy Conversion. 3 Credits.

Three-phase and single-phase AC rotating machines and transformers, DC machines, rotating machines as circuit elements, power semiconductor converters. Renewable generation, utility grid integration, smart grid applications. Prerequisites: ECE 2210 and ECE 3315. (Same as ECE 6610) (Spring, Every Year).

ECE 4620. Electrical Power Systems. 3 Credits.

AC power grids, transmission line parameters, load flow, economic dispatch voltage, frequency and power flow control. Voltage, current and power limitations. Fault analysis and stability considerations. Effect of independent power producers and variable energy sources and energy storage. (Same as ECE 6620) (Fall, Every Year).

ECE 4662. Power Electronics. 3 Credits.

The application of electronics to energy conversion; principles of operation, analysis, and control of circuits; methods of solving power electronic circuits and finding the steady-state values of important quantities; deriving the linear model of the studied power electronic circuits and designing controllers for these devices. A general knowledge of electric circuits and linear control theory is required. Restricted to undergraduate students. (Same as ECE 6662) (Spring, Every Year).

ECE 4710. Control Systems Design. 3 Credits.

Mathematical models of linear systems; steady-state and transient analyses; root locus and frequency response methods; synthesis of linear feedback control systems. Prerequisites: APSC 2114; and ECE 2210 or MAE 3134. (Fall, Every Year).

ECE 4730. Robotic Systems. 3 Credits.

Modeling and analysis of robot designs. Kinematics of mechanical linkages, structures, actuators, transmissions, and sensors. Design of robot control systems, computer programming, and vision systems. Use of artificial intelligence. Current industrial applications and limitations of robotic systems. Same as MAE 3197. Prerequisite: computer programming, APSC 2058, ECE 4710.

ECE 4920W. Electrical and Computer Engineering Capstone Project Lab II. 3 Credits.

Program majors take ECE 3915, ECE 4920, and ECE 4925 in sequence beginning in the second semester of their junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Fall, Every Year).

ECE 4925W. Electrical and Computer Engineering Capstone Project Lab III. 3 Credits.

Program majors take ECE 3915, ECE 4920, and ECE 4925 in sequence beginning in the second semester of their junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: ECE 4920W. (Spring, Every Year).

ECE 4980. Special Topics. 1-3 Credits.

Topic to be announced in the Schedule of Classes. (Fall and spring).

ECE 4990. Research. 1-3 Credits.

Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status.

ECE 6005. Computer Architecture and Design. 3 Credits.

Advanced topics in computer architecture and design; instruction-level parallelism, thread-level parallelism, memory, multithreading, and storage systems. (Fall, Every Year).

ECE 6010. Linear Systems Theory. 3 Credits.

Introduction to linear systems theory. Topics include linear vector spaces and linear operators, mathematical representation of dynamic linear systems, concept of state and solution of the state equation, controllability and observability, canonical forms of the state equation, state feedback, and state estimation. (Fall, Spring, Every Year).

ECE 6015. Stochastic Processes in Engineering. 3 Credits.

Axioms of probability; conditional probability; independent events; sequential experiments. Single and multiple random variables. Discrete-valued and continuous-valued stochastic processes; discrete-time and continuous-time stochastic processes; mean, auto-correlation and autocovariance functions; multiple random processes; stationary stochastic processes and linear time-invariant systems; ergodicity; Markov chains. Examples from engineering applications. (Fall, spring, and summer, Every Year).

ECE 6020. Applied Electromagnetics. 3 Credits.

Vector algebra and calculus, Divergence and Stokes theorems, Maxwell's equations, Boundary conditions, Poynting vector theorem, Time harmonic waves, Wave equation, Propagation in lossy media, Skin depth, Plane waves in an arbitrary direction, Polarization, Snell's law, Transmission line equations, Propagation constant, Characteristic impedance, Average power, Waveguides, TEM, TM and TE modes, cutoff frequencies, Vector and scalar potentials, scalar Green's function, Near and far fields from a dipole, radiated power and Antenna fundamentals Recommended background: ECE 4320 or similar course. (Fall, Every Year).

ECE 6025. Signals and Transforms in Engineering. 3 Credits.

Signal spaces and approximation. Orthogonal functions. Fourier series and transform. Bandpass signals and modulation. Hilbert transform and analytic signals. Time frequency analysis. Short-time Fourier transform. Linear systems properties. Laplace transform. Sampling and discrete-time signals. Discrete-time Fourier transform and z-transform. Wavelets. (Fall and spring, Every Year).

ECE 6030. Device Electronics. 3 Credits.

Semiconductor device concepts; doping, drift diffusion, recombination. Analysis of Schottky and Ohmic contacts, pn junctions, MOS systems. Modeling and analysis of semiconductor devices such as MOSFET and bipolar transistors. Hot electron and short and narrow channel effects. (Spring, Every Year).

ECE 6035. Introduction to Computer Networks. 3 Credits.

Layered protocol architectures. Digital transmission, fundamental limits. Error detection and ARQ protocols. Data link layer and control. Multiple access protocols. Circuit and packet switching. Multiplexing. Routing. Flow and congestion control, queue management. LAN standards. TCP/IP. Next-generation Internet. (Fall and spring, Every Year) Same As: ECE 4415.

ECE 6045. Special Topics. 3 Credits.

Topics vary by semester. May be repeated provided topic differs. See department for details. (Fall and spring, Every Year).

ECE 6050. Research. 1-12 Credits.

Applied research and experimentation projects, as arranged. May be repeated for credit.

ECE 6060. Electric Power Generation. 3 Credits.

Primary traditional/conventional and alternative/renewable energy sources and energy storage applications. Large generation plants and distributed small generation units and impact on transmission and distribution systems operation and infrastructure. Review of applicable schemes of hybrid generation. Evaluate smart grid objectives on long and short term stability of large power networks. (Fall, Every Year).

ECE 6105. Introduction to High-Performance Computing. 3 Credits.

Taxonomy and classifications of computers and parallel computers. Parallel thinking and parallel algorithms. Domain decomposition and load balancing. Programming parallel computers using the message passing, global address space, and partitioned global address space paradigms. Restricted to graduate students in science or engineering or permission of the instructor. (Fall, Every Year).

ECE 6120. Advanced Microarchitecture. 3 Credits.

Review of computer architecture fundamentals performance and power; pipeline design and hazards; superscalar pipelines, speculation and recovery; fetch logic and instruction caches; branch prediction; decoder logic for CISC and RISC; scheduling and instruction issue; ALUs and register files; memory optimizations; commit logic. Prerequisite: ECE 6005. Recommended background: Students should have taken at least one course in computer architecture, such as ECE 6005 or equivalent, prior to enrollment. (Spring, Every Year).

ECE 6125. Parallel Computer Architecture. 3 Credits.

Architectural classifications and taxonomies of parallel computers; enabling technologies, including advanced processor concepts, interconnection networks, high-speed memory architectures and protocols; parallel performance and scalability; and introduction to parallel algorithms and parallel programming. Prerequisites: ECE 6005 or ECE 6105. (Spring, Every Year).

ECE 6130. Big Data and Cloud Computing. 3 Credits.

This course covers a wide range of research topics related to big data and cloud computing, including data centers, virtualization, hardware and software architecture, as well as system-level issues on performance, energy efficiency, reliability, scalability and security. Prerequisites: ECE 6005 or ECE 6105. (Spring, Every Year).

ECE 6132. Secure Cloud Computing. 3 Credits.

The course provides a comprehensive guide to security concerns and best practices for cloud computing and cloud services. Topics discussed include cloud computing architectures, risk issues and legal topics, data security, internal and external clouds, information security frameworks and operational guidelines. Offered as arranged. Restricted to students in the MEng in cybersecurity policy and compliance program. (Summer, Every Year).

ECE 6140. Embedded Systems. 3 Credits.

Architectural advances and instruction sets for embedded microprocessors. Real-time operating systems and real-time scheduling, use of pre-designed software and hardware cores. Sensors, actuators, and data acquisition. System-on-chip (SoC). Design case studies. Prerequisite: ECE 6005. (Fall, Every Year).

ECE 6150. Design of Interconnection Networks for Parallel Computer Architectures. 3 Credits.

In-depth study and fundamental design principles of interconnection networks for parallel computing architectures including network-on-chips for multicores and chip multiprocessors (CMPs), interconnection networks for multiprocessors, multi-computers, and datacenters; interconnect topologies, routing protocols and algorithms, switching techniques, flow control protocols, router design, modeling and simulation tools, interconnect reliability, scalability, security, emerging technologies for interconnects (optical, wireless, radio frequency), emerging applications (neuromorphic, quantum, and approximate computing), case studies covering modern commercial examples. Restricted to SEAS graduate students. Prerequisites: ECE 6005 or equivalent. Recommended background: Prior completion of a course in computer organization or computer architecture, which may be ECE 3515 or ECE 6005 or an equivalent. (Spring, Every Year).

ECE 6160. Secure Computer Architecture. 3 Credits.

Building blocks of secure hardware and systems: trusted execution environment, security engines; side and covert channels in computing systems; hardware trojans; physically unclonable functions and challenges; obfuscation strategies. Prerequisites: ECE 6005 or equivalent with permission of the instructor. (As arranged, Every Year).

ECE 6213. Design of VLSI Circuits. 3 Credits.

This class covers top-down ASIC/FPGA design methodology; Modeling of VLSI circuits using HDL; Behavioral, Structural, and RTL modeling techniques; Logic synthesis techniques; Design verification plan and techniques; Students design and verify a final project using state-of-the-art commercial VLSI CAD tools for ASIC and FPGA (Altera). (Fall, Every Year).

ECE 6214. High-Level VLSI Design Methodology. 3 Credits.

This class covers advanced ASIC-FPGA design methodology including: synthesis methodology for both ASIC and FPGA design flow, DSP design for mobile device and implementation to ASIC and FPGA, low-power SOC design, CPF implementation, area/delay/power optimization and trade-offs, DFT, DFM, Low-Power design for mobile device, and Hardware/Software co-design. Advanced low power design for multi-core CPU architecture, LP top-down design flow with CPF implementation/verification. Students design and verify a final project using ASIC CAD tools and FPGA demo board with built-in LA. Prerequisite: ECE 6213. (Spring, Every Year).

ECE 6215. Introduction to MEMS. 3 Credits.

Introduction to microelectromechanical and nanoelectromechanical systems (MEMS/NEMS). Basic principles of simulating, designing, and fabricating MEMS/NEMS. Prerequisite: ECE 6240. Recommended background: Students in this course should have taken at least one prior course in ECE 6240; If unsure, contact the instructor, and discuss the pre-requisite requirements. (Spring, Every Year).

ECE 6216. RF/VLSI Circuit Design. 3 Credits.

Introduction to radio frequency systems: RF design, specifications, S-parameters, gain, noise, stability, matching concepts, small signal amplifiers, low noise amplifiers, power amplifiers, system-level design. In this course students use CAD tools such as ADS and other industrial tools to design class project. Prerequisite: ECE 6240. (Spring, odd years).

ECE 6218. Advanced Analog VLSI Circuit Design. 3 Credits.

CMOS technology, CMOS analog building blocks, current sinks, current sources, current mirrors, voltage references, CMOS amplifier design, feedback circuits, frequency response, compensation. Analysis of circuit variants: cascoding, active replacement elements – non-linear circuits. A/D converter design, examples of CMOS A/Ds. Mixed-signal layout techniques. Students are required to design CMOS Analog Circuit project, and submit final design Layout together with simulation using CAD (CADENCE analog design) simulation tools. Final report is required. Prerequisite: ECE 6240. (Spring, even years).

ECE 6221. Introduction to Physical Electronics. 3 Credits.

Theoretical principles underlying the operation of electronic devices; postulates of quantum mechanics: wave-particle duality, uncertainty relations, electronic band structure; free-carrier statistics; electron-photon interaction; physical principles of semiconductor and optoelectronic devices. (Fall, Every Year).

ECE 6240. VLSI Design and Simulation. 3 Credits.

Study of VLSI circuit design including PMOS and NMOS transistor analysis, switch and gate logic design, understanding of semiconductor fabrication processes and design rules, CAD system, speed and power considerations, scaling of transistors to the nano-scale, and designing with highly variable process parameters. Each student designs a VLSI chip, simulates the design and submits a GDS II file for Chip fabrication. (Same as ECE 4140) (Fall, Every Year).

ECE 6245. Micro- and Nanofabrication Technology. 3 Credits.

Introduction to the basic fabrication principles at the micro- and nanoscale; practical experience and fabrication of simple devices. Restricted to graduate students. Prerequisite: ECE 2150. (Fall, Every Year) Same As: ECE 4145.

ECE 6250. ASIC Design and Testing of VLSI Circuits. 3 Credits.

ASIC and mixed-signal design methodology, use of ASIC design CAD tools. Logic synthesis, styles of synthesis, power/area/speed constraints. MIPS CPU HDL implementation/verification/testing. VLSI testing, fault models, design for testability techniques, scan path, built-in self-test. Testing of chips designed and fabricated in ECE 4140/6240 or equivalent chips. Prerequisite: ECE 6240. (Spring, Every Year) Same As: ECE 4150.

ECE 6255. Sensors, Networks, and Applications. 3 Credits.

Sensor technologies for measurement of mechanical, optical, magnetic, electromagnetic, thermal, and acoustic signals; interface electronic components, calibration, noise, and nonlinearity in addition to main modern sensors and sensor networks. Restricted to graduate students. Prerequisites: permission of the instructor. (Spring, Every Year) Credit cannot be earned for this course and ECE 4155.

ECE 6260. Introduction to Nanoelectronics. 3 Credits.

Nanoscience and technology and nanoelectronics. Basic nanofabrication steps; techniques to build devices such as carbon nanotubes, graphene device, and other 2D nanoelectronic devices. Tools for performing design and characterizations of nanodevices, including scanning electron microscopy (SEM), atomic force microscopy (AFM), and transmission electron microscope (TEM). (Same as ECE 4160) (Fall, Every Year).

ECE 6500. Information Theory. 3 Credits.

Introduction to the mathematical representation of information, including the concepts of entropy, mutual information and information transfer over noisy media; mathematical representation of information sources; entropy and mutual information; noiseless and noisy coding theorems; data compression; communication channels and their capacity to convey information; and rate distortion theory. Prerequisite: ECE 6015. (Spring, odd years).

ECE 6505. Error Control Coding. 3 Credits.

Introduction to the principles governing the mathematical theory of error detecting and correcting errors occurring in the transfer of information over digital communication channels. Prerequisite: ECE 6015. (Spring, Every Year).

ECE 6510. Communication Theory. 3 Credits.

Principles of digital communications. Channels, digital modulation; optimum receivers and algorithms in the AWGN; coherent, non-coherent, and fading channels. Correlation detectors, matched filters; diversity. Bounds on performance of communications, comparison of communications systems and implementation issues. Prerequisite: ECE 6015. (Spring, Every Year).

ECE 6520. Mobile and Wireless Communication Systems. 3 Credits.

Characterization of mobile and wireless channels. Indoor and outdoor path loss models. Multipath propagation. Fading and fading countermeasures: coding, equalization. Power control. Cellular design and frequency reuse. Modulation and coding techniques. Spread Spectrum and OFDM. Random access methods. Code and Space Division Multiple Access, MIMO. Prerequisite: ECE 6510. (Fall, odd years).

ECE 6525. Satellite Communication Systems. 3 Credits.

Low earth orbit and geostationary satellite systems; transmission systems; RF link budgets; modulation and multiplexing; multiple access techniques, including FDMA, TDMA, and CDMA; satellite transponders, antennas, and earth stations. Prerequisite: ECE 6510. (Fall, Every Year).

ECE 6530. Electronic Warfare. 3 Credits.

Electronic attack and protection of information; countermeasures and counter-countermeasures; attacks on ranging and tracking radar systems; jamming and jamming defense; attacks on communications systems; defensive techniques, signal design, spread spectrum; attack and defense of optical and high-energy systems. Offered as arranged. Prerequisite: ECE 6510. (Summer, Every Year).

ECE 6550. Network Architectures and Protocols. 3 Credits.

The course covers network topologies and control structures; Switching and routing of information streams; Internet transmission protocols; Data representations and codes; Application protocols; Mail and file transfer protocols; and Network management systems. Prerequisite: ECE 6035. (Spring, Every Year).

ECE 6560. Network Performance Analysis. 3 Credits.

Telecommunications traffic models: arrival and service time distributions, Poisson and Erlang formulas. Topological design algorithms. Delay and blocking models and probabilities for packet switched networks. Routing, relaying, and flow control algorithms: delay and cost minimization, throughput optimization. Prerequisites: ECE 6015 and ECE 6035. (Fall, Every Year).

ECE 6565. Telecommunications Security. 3 Credits.

Speech and data scrambling. Linear and nonlinear transformations. Cryptographic techniques. Block and stream ciphers. The Data Encryption Standard (DES). Key management, digital signatures, message authentication, hash functions. Public key algorithms. Restricted to Students with graduate standing in science or engineering or with the permission of the instructor. (Fall, Every Year).

ECE 6570. Telecommunications Security Protocols. 3 Credits.

The OSI security architecture: services and mechanisms; risk analysis; Internet protocol security mechanisms; Ipv4 and Ipv6 security; security associations, authentication, MD5; encapsulating security payload (ESP); e-mail security: PGP, S/MIME, PEM, MSP; secure voice communications algorithms; security in Internet commerce: SSL, SET. Offered as arranged. Prerequisites: ECE 6035 and ECE 6565. (Fall and spring, Every Year).

ECE 6575. Optical Communication Networks. 3 Credits.

Wave propagation through fiber, dispersion, polarization. Multiplexing techniques, WDM. Optical networking components. Optical transmission systems design. All-optical networking, broadcast star and wavelength routing networks. Performance analysis, survivability, control and management. Optical access networks. (Fall, Every Year).

ECE 6580. Wireless Networks. 3 Credits.

The course introduces students to the principles governing the design and implementation of various types of wireless networks; mathematical analysis of telecommunications traffic; technology of wireless information transmission systems; first, second and third generation cellular networks based on circuit and packet switching principles; capacity sharing and duplex transmission; Time Division and Code Division Multiplex system; fourth and fifth generation cellular networks; wireless local and personal area networks; performance evaluation of wireless cellular and local area networks. Prerequisite: ECE 6035. (Spring, Every Year).

ECE 6610. Electrical Energy Conversion. 3 Credits.

Three-phase and single-phase AC rotating machines and transformers, DC machines, rotating machines as circuit elements, power semiconductor converters. Renewable generation, utility grid integration, smart grid applications. May be taken for graduate credit by students in fields other than electrical engineering. (Spring, Every Year) Same As: ECE 4610.

ECE 6620. Electrical Power Systems. 3 Credits.

AC power grids, transmission line parameters, load flow, economic dispatch voltage, frequency, and power flow control. Voltage, current, and power limitations. Fault analysis and stability considerations. Effect of independent power producers and variable energy sources and energy storage. (Same as ECE 4620) (Fall, Every Year).

ECE 6662. Power Electronics. 3 Credits.

The application of electronics to energy conversion. Principles of operation, analysis, and control of circuits including solid-state electronic switches. Methods of solving power electronic circuits and finding the steady-state values of important quantities. Deriving the linear model of the studied power electronic circuits and designing controllers for these devices. A general knowledge of electric circuits and linear control theory is required. (Spring, Every Year).

ECE 6666. Power System Transmission, Control, and Security. 3 Credits.

Analysis of AC networks, load flow, transient stability, economic dispatch, reactive compensation, FACTS, effects of alternative generation, voltage and frequency control, N-1 contingency, restoration techniques. Offered as arranged. Prerequisite: ECE 6620. (Fall and spring, Every Year).

ECE 6667. Nuclear Power Generation. 3 Credits.

Review of nuclear reactor engineering, traditional and developing reactor design, issues regarding the safe operation of nuclear plant, and control and regulatory aspects of nuclear power generation. Prerequisite: ECE 6620. (Fall, even years).

ECE 6668. Power Distribution Grids. 3 Credits.

Equipment for power distribution for industrial, commercial and residential applications. Switching and safety at the distribution voltage level. Bulk Insulation Level and Insulation coordination principles. Applications of 'smart-grid' innovations to short and long-term development of remote metering and customer communications. Selection and Application of Protective Relays, Fuses, Ground-Fault Protection. Prerequisite: ECE 6060. (Fall, odd years).

ECE 6669. Smart Power Grids. 3 Credits.

Overview of probability theory. Overview of basic power market reliability modeling and evaluation. Generation supply reliability techniques, modeling and evaluation. Reliability of transmission system and delivery of supply. Loss of load probability evaluation. Forced and maintenance outages and impact on system reliability. Load forecasting and probability of interconnected systems. Risk evaluation in power system operation. Operating reserve techniques and indices. Distribution system reliability including substations. Composite system reliability modeling. Reliability worth and value. (Spring, odd years).

ECE 6670. Power System Protection. 3 Credits.

Main philosophy for protection of power systems. Protection systems and approaches. Reliability and security of protection systems. Protection of Generators, Transformers, Motors and Transmission Lines. Requirements for Distributed Source Generation (DSG's). Requirements for system protection, to prevent grid blackouts and to enhance power system security. Prerequisite: ECE 6620. (Spring, even years).

ECE 6690. Power Systems Economics. 3 Credits.

Overview of electrical power market economics and market participants. Production pricing and market clearing pricing. Market ancillary service pricing. Location marginal pricing and zonal pricing schemes. New electrical generation entrant impact. Investing in generation and in transmission. Independent power producers and independent transmission owners. Offered as Arranged. (Fall and spring, Every Year).

ECE 6691. Power Systems Reliability. 3 Credits.

Overview of probability theory. Overview of basic power market reliability modeling and evaluation. Generation supply reliability techniques, modeling and evaluation. Reliability of transmission system and delivery of supply. Loss of load probability evaluation. Forced and maintenance outages and impact on system reliability. Load forecasting and probability of interconnected systems. Risk evaluation in power system operation. Operating reserve techniques and indices. Distribution system reliability including substations. Composite system reliability modeling. Reliability worth and value. (Spring, even years).

ECE 6699. Energy and Sustainability. 3 Credits.

Energy sources; consumptions; societal and environmental impacts; energy generation and harvesting technology; thermodynamics and efficiency limits; nanotechnology for sustainability; emission and pollution; growth models; learning curves; life-cycle-analysis; energy in an international perspective. Offered as arranged. Recommended background: A basic understanding of energy and thermodynamics such as material covered in ECE 4620 and MAE 2131. (Fall and spring, Every Year).

ECE 6710. Microwave Engineering. 3 Credits.

Graduate level elective course open to Electrical Engineering graduate students. Topics include transmission line theory, transmission lines and waveguides, waveguide discontinuities, microwave networks, impedance matching and tuning, microwave resonators, power dividers and directional couplers, and microwave filters and active microwave circuits. Prerequisite: ECE 6020. (Fall, even years).

ECE 6715. Antennas. 3 Credits.

Graduate level elective course open to Electrical Engineering graduate students. Topics include antenna circuits, radiation pattern, reciprocity, gain, receiving cross-section, scattering by antennas, mutual coupling, arrays; polarization; radiation from current distributions, equivalent aperture currents, dipoles, patch antennas, large phased arrays. Restricted to graduate students in electrical engineering. Prerequisite: ECE 6020. (Spring, odd years).

ECE 6720. Remote Sensing. 3 Credits.

Active and passive remote-sensing systems: scatterometers, real-aperture imaging, and synthetic-aperture radars. Sensing of surface, subsurface, and atmospheric parameters at microwave, infrared, and optical frequencies. Analysis of radiometric techniques using radiative transport theory, inverse scattering methods, profile inversion. The course is intended to provide graduate students and engineers with an in-depth understanding of the fundamentals of remote sensing at microwave, infrared and optical frequencies with emphasis on recent research innovations in these areas. Prerequisite: ECE 6020. (Spring, even years).

ECE 6725. Electromagnetic Radiation and Scattering. 3 Credits.

Alternative representations of solutions to Maxwell equations, Fourier transforms and spherical mode representations, field equivalence principle, dyadic Green's functions, radiation and scattering by simple shapes, geometrical theory of diffraction, integral equations and the moment method. Offered as arranged. Prerequisite: ECE 6020. (Fall and spring, Every Year).

ECE 6730. Waves in Random Media. 3 Credits.

Propagation and scattering of electromagnetic, optical, and acoustic waves in random media, scattering from rough surfaces and randomly distributed particles, turbulence. Applications to propagation through rain and fog. Laser beam scintillations, remote sensing, and communications channel modeling. Monte Carlo simulation. The course is intended to provide graduate students and engineers with an in-depth understanding of the fundamentals of wave propagation in complex media at microwave, infrared and optical frequencies with emphasis on recent research innovations in these areas. Offered As Arranged. Prerequisite: ECE 6725. (Summer, Every Year).

ECE 6735. Numerical Electromagnetics. 3 Credits.

Systematic discussion of useful numerical methods in computational electromagnetics including integral equation techniques and differential equation techniques, both in the frequency and time domains. Hands-on experience with numerical techniques, including the method of moments, finite element and finite difference time-domain methods, and spectral integral methods. Related numerical issues such as accuracy, stability and dispersion are discussed. Examples are drawn from various electromagnetic applications such as nanowires, waveguides, and antenna radiation. Prerequisites: ECE 6020, ECE 6025, and ECE 6800. (Fall, odd years).

ECE 6745. Analysis of Nonlinear and Multivalued Devices. 3 Credits.

Numerical techniques for modeling semiconductor and magnetic devices; modeling multivalued behavior of memory materials; optimization of geometry. Offered as arranged. Prerequisite: ECE 6020. (Fall and spring, Every Year).

ECE 6750. Modern Radar Systems. 3 Credits.

The radar range equation. Radar cross section of targets, target detection and parameter estimation, detection in clutter. Resolution, ambiguities, and signal design. Moving-target indicators. Pulse Doppler radar. Radar antennas, phased arrays. Synthetic aperture and space-based radar. The course is intended to provide graduate students and engineers with an in-depth understanding of the fundamentals of wave propagation in complex media at microwave, infrared and optical frequencies with emphasis on recent research innovations in these areas. Offered as arranged. Prerequisite: ECE 6015. (Fall and spring, Every Year).

ECE 6760. Propagation Modeling in Wireless Communications. 3 Credits.

Wireless communication channel modeling, propagation mechanisms, terrestrial fixed links, mobile satellite systems, macrocells, fading models, microcells, picocells, diversity, equalizers. Specific applications to 3G, 4G and 5G mobile systems. Prerequisite: ECE 6020. (Spring, odd years).

ECE 6765. Photonics and Fiber Optics. 3 Credits.

Concepts of opto-electronic devices; light-matter-interaction; absorption; device details and applications discussed: laser, photodetector, modulators, optical cavity, waveguides and optical fibers; device and link considerations include: energy-per-bit, modulation speed, and nano fabrication; plasmonics and nanophotonics; industry perspective. Recommended background: Students should have taken at least one prior course in electromagnetism and semiconductors at the undergraduate level. (Spring, even years).

ECE 6770. Applied Magnetism. 3 Credits.

Classification of magnetic materials. Magnetic measurements. Soft and hard magnetic materials. Applications to microwave, magnetic recording, permanent magnets, magneto-optics, magnetic refrigeration, sensors, magnetostrictive devices. Electric power. Superconducting devices. Offered as arranged. Prerequisite: ECE 6020. (Summer, Every Year).

ECE 6800. Computational Techniques in Electrical Engineering. 3 Credits.

Introduction to linear algebra and vector spaces as applied to networks and electrical systems. Orthogonal bases, projections, and least squares. Fast Fourier transforms. Eigenvalues and eigenvectors with applications. Computations with matrices. Constrained optimization in electrical systems. Network models and applications. Special relativity. (Fall, Every Year).

ECE 6810. Speech and Audio Processing by Computer. 3 Credits.

The objective of this course is to introduce computer processing of speech and audio. Topics include: acoustic sensor technologies and characteristics, direction finding, speech analysis and synthesis, audio formats and compression standards, time-varying autoregressive models, speech recognition, automatic target recognition. Restricted to graduate students. (Fall, Every Year).

ECE 6815. Multimedia Processing. 3 Credits.

Introduction to multimedia. Formats, conversion and combinations; delivery and trends; servers and networks; hardware and architecture; enduser devices; digital libraries, video conferencing and collaboration; and educational and health applications. Case studies and trials. Offered as arranged. Restricted to graduate students with programming experience in C, C++ or Java. Prerequisite: ECE 6005. (Fall and spring, Every Year).

ECE 6820. Real-Time Digital Signal Processing. 3 Credits.

Digital signals, binary number representation, fixed-point and floating-point DSP architectures. Q-format for data representation, bit allocation and arithmetic. Portability of arithmetic expressions: floating point vs. fixed point. Development of real-time signal processing software. Applications to signal parameter estimation, signal generation, filtering, signal correlation, spectral estimation (FFT). Offered as arranged. Prerequisite: ECE 6005. Recommended background: Students in this course should have taken at least one prior course in ECE 6005 Computer Architecture and Design and have a basic knowledge of computer architecture and DSP algorithms; Knowledge of C programming language, assembly language and MATLAB is desirable; If unsure, contact the instructor, and discuss the pre-requisite requirements. (Fall and spring, Every Year).

ECE 6825. Computer Control Systems. 3 Credits.

Analysis of automatic control systems in which the control procedure uses on-line digital computation. Topics include single- and multi-rate sampling, z-transforms, responses of discrete systems, stability criteria, and discrete control design. Prerequisite: ECE 6010. (Fall, odd years).

ECE 6830. System Optimization. 3 Credits.

Parameter optimization problems, theory of minima and maxima. Optimization problems for dynamic systems, calculus of variations, the maximum principle and the Hamilton-Jacobi equation. Optimization problems with constraints, optimal feedback systems. Numerical solution of optimal problems. Prerequisite: ECE 6010. (Spring, Every Year).

ECE 6835. Nonlinear Systems. 3 Credits.

Definition of linear and nonlinear systems; introduction to approximate analysis of nonlinear systems: describing functions, Krylov and Bogoliubov asymptotical method, and Tsytkin locus. Forced oscillations: jump resonance. Stability analysis: Liapunov criterion. Luré problem and Popov's method. Prerequisite: ECE 6010. (Fall, even years).

ECE 6840. Digital Image Processing. 3 Credits.

Properties of images and visual systems; image acquisition, sampling, quantization; one- and two-dimensional image transform techniques; enhancement and restoration; image coding and data compression; segmentation, representation, boundary and shape, texture, matching. Image understanding. Students should have completed at least one prior course in computational methods or signal processing, such as ECE 6800 or equivalent, prior to enrollment. Contact the instructor if uncertain as to whether this requirement has been met. Prerequisite: ECE 6800. (Spring, odd years).

ECE 6842. Image Engineering. 3 Credits.

Solid-state imaging devices and image engineering; basic understanding of the detection and noise processes underlying the sensing of optical radiation and the engineering and physics of image formation; radiometry, optics and image formation, and imaging devices; image quality metrics and system design trades. Students should have completed at least one course in linear systems and stochastic processes prior to enrollment. Contact the instructor if uncertain as to whether this requirement has been met. (Fall, even years).

ECE 6845. Image Synthesis. 3 Credits.

The objective of this course is to introduce techniques for synthesizing images using mathematical models and other reconstruction techniques. The course starts with introduction to image formation process, then other techniques for synthesizing color textures and three-dimensional scenes are covered. Prerequisite: ECE 6015. (Spring, Every Year).

ECE 6850. Pattern Recognition. 3 Credits.

Random vectors, transformations; hypothesis testing, error probability, sequential methods. Bayes, other linear classifiers; discriminant functions, parameter estimation, learning, and dimensionality reduction; nonparametric methods; clustering; feature selection and ordering; computer applications and projects. Students should have completed at least one prior course in probability and statistics, such as ECE 6015 or equivalent, prior to enrollment. Contact the instructor if uncertain as to whether this requirement has been met. Prerequisite: ECE 6015. (Fall, odd years).

ECE 6855. Digital Signal Processing Techniques. 3 Credits.

Signal and system representation, sampling and quantization, transform techniques. Recursive and nonrecursive digital filter design, recursive estimation, linear predictive filtering. Fast algorithms for signal processing. Current topics. Prerequisite: ECE 6015. (Fall, Every Year).

ECE 6860. Compression Techniques for Data, Speech, and Video. 3 Credits.

Lossless and lossy coding theorems, rate distortion bound. Data compression algorithms: Huffman coding, run-length coding. Differential coding. Transform coding. Voice, audio, image and video coding techniques: CELP, JPEG, MPEG, MP3. Data coding standards: G.722, G.726, G.728, H.261, H.323. Offered as arranged. Prerequisites: ECE 6015 and ECE 6025. (Fall and spring, Every Year).

ECE 6865. Statistical Signal Estimation. 3 Credits.

Minimum variance unbiased estimation. Cramer-Rao bound, statistical modeling, sufficient statistics, maximum likelihood estimation, efficient estimators, least squares. Bayesian estimators. Wiener and Kalman filters, complex data and parameters. Applications to radar, speech, image, biomedicine, communications, controls. Prerequisite: ECE 6015. (Fall, odd years).

ECE 6875. Wavelets and Their Applications. 3 Credits.

Time-frequency analysis. Multiresolution analysis. Continuous, discrete, and discrete-time wavelet transform. Multirate filter banks. Multiband wavelets, two-dimensional wavelets. Wavelet packets and matching pursuit. Wavelets in noise filtering, compression, modeling of fractals, communications, detection, adaptive systems, and fast computation. Prerequisites: ECE 6025 and ECE 6855. (Spring, odd years).

ECE 6880. Adaptive Signal Processing. 3 Credits.

Adaptation criteria. Least mean square and recursive least square. Convergence of adaptive algorithms and tracking. Linear and nonlinear Kalman filters. Blind source separation. Iterative (turbo) decoding and equalization. Nonlinear/non-Gaussian models: particle filtering. Machine learning: back propagation, support vector machines. Applications in system identification, adaptive channel equalization, interference cancellation and suppression, and adaptive antenna arrays. Prerequisite: ECE 6865. (Spring, even years).

ECE 6882. Reinforcement Learning. 3 Credits.

Semi-supervised learning, sequential and automated decision making, dynamic programming, Monte Carlo learning, temporal difference learning, off-policy and on-policy learning, deep reinforcement learning, inverse reinforcement learning. (Spring, Every Year).

ECE 6885. Computer Vision. 3 Credits.

Image processing; edge detection, segmentation, local features, shape and region description in 2D and 3D. Insights from human vision studies. Representation for vision: object models, synthetic images, matching, gaps, algorithms. Interference, production system, syntactic networks. Planning spatial reasoning for robot vision. Prerequisites: CSCI 6511; and ECE 6850. Recommended background: Students in this course should have taken at least one prior course in artificial intelligence and/or pattern recognition; Acceptable courses include ECE 6850 (Pattern Recognition), or an equivalent course; If unsure, contact the instructor, and discuss the prerequisite requirements. (Spring, even years) Same As: BME 6885.

ECE 6998. Thesis Research I. 3 Credits.

N/A.

ECE 6999. Thesis Research II. 3 Credits.

Thesis research.

ECE 8150. Advanced Topics in Computer Architecture. 3 Credits.

Examples of topics are interconnection networks, fault tolerance, load balancing, workload characterization, and performance modeling of advanced computer systems. Prerequisite: ECE 6120, ECE 6125.

ECE 8999. Dissertation Research. 12 Credits.

May be repeated for credit. Restricted to doctoral candidates. (Fall and spring, Every Year).

ENGINEERING MANAGEMENT AND SYSTEMS ENGINEERING

Mission Statement

The mission of the Department of Engineering Management and Systems Engineering is to deliver an integrated program of research, teaching, and public service to the technology community. The department develops creative leadership to bridge dynamic, complex technologies, and societal needs. This includes delivering instruction in the management of technology and in systems engineering, operations research, and allied fields to undergraduate and graduate students who are preparing to assume leadership roles as technology professionals. The department's programs provide an understanding of the managerial role, analysis of the diverse functions of technology-based organizations, and instruction in modern management and mathematical analysis and modeling tools as they apply to formulating and executing decisions in engineering and scientific organizations. In addition, research programs feature the study of the management of technology; fundamental and applied research in systems engineering and operations, with a particularly strong interest in stochastic analysis and system optimization; sponsorship from government, industry, and the technology community; and a strong presence in refereed professional journals and leadership in professional societies.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in applied science and technology (p. 738)
- Bachelor of Science with a major in systems engineering* (p. 773)

Combined program

- Dual Bachelor of Arts with a major in applied science and technology and master of science in the field of computer science (p. 775)
- Dual Bachelor of Arts with a major in applied science and technology and Master of Science in the field of cybersecurity in computer science (p. 776)
- Dual Bachelor of Arts with a major in applied science and technology and Master of Science in the field of data analytics (p. 776)

Minors

- Minor in operations research (p. 788)
 - Minor in systems engineering (p. 788)
-

*The bachelor of science with a major in systems engineering is accredited by the ABET Engineering Accreditation Commission (EAC)

GRADUATE

Master's programs

- Master of Engineering in the field of cloud computing management (<http://bulletin.gwu.edu/engineering-applied-science/cloud-computing-management-meng/>) (online)
- Master of Engineering in the field of cybersecurity policy and compliance (p. 790) (online)
- Master of Engineering in the field of cybersecurity analytics (p. 791) (online)
- Master of Science in the field of data analytics (p. 798) (on-campus or online)
- Master of Science in the field of engineering management (p. 802) (on-campus or online)
- Master of Science in the field of systems engineering (p. 805) (on-campus or online)

Doctoral program

- Doctor of Engineering in the field of engineering management (p. 807) (on-campus or online)
- Doctor of Philosophy in the field of engineering management (p. 814)
- Doctor of Philosophy in the field of systems engineering (p. 818) (on-campus or online)

CERTIFICATES

- Graduate certificate in emergency management and public health (p. 821)
- Graduate certificate in energy engineering and management (p. 822)
- Graduate certificate in engineering and technology management (p. 822)
- Graduate certificate in environmental and energy systems management (p. 824)
- Graduate certificate in homeland security emergency preparedness and response (p. 827)
- Graduate certificate in systems engineering (p. 827)
- Graduate certificate in systems management (p. 827)

FACULTY

Professors J.P. Deason, J.R. van Dorp, T.A. Mazzuchi, B. Narahari, S. Sarkani

Associate Professors H. Abeledo, J.A. Barbera, J.R. Santos, R.A. Francis, Z. Szajnarfarber (*Chair*)

Assistant Professors D. Broniatowski, E. Gralla, J.P. Helveston, E. Shittu,

Professorial Lecturers R.M. Andersen, M.J. Armstrong, J.H. Chang, T.H. Holzer Jr., J.V. Shah, J.S. Wasek, R.C. West

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Applied Sciences (APSC) (p. 1417)
- Engineering Management and Systems Engineering (p. 1567)EMSE (p. 1567))

MECHANICAL AND AEROSPACE ENGINEERING

Mission Statement

The mission of the Department of Mechanical and Aerospace Engineering is to educate students to become professional mechanical and aerospace engineers who are confident in their understanding of science and technology and creative in the face of new challenges. Graduates of the program have the analytical skill and thirst for lifelong learning that will expand career horizons. The program prepares students to conduct relevant research at the forefront of mechanical and aerospace engineering knowledge. Students learn through faculty mentoring and go on to practice mechanical engineering as skilled, responsible, and ethical professionals.

Educational Objectives

GW's undergraduate mechanical engineering program provides an integrated curriculum aimed at producing graduates who develop successful careers in mechanical engineering practice or in science and technology. Graduates are expected to accomplish the following within a few years after graduation:

- Be productive and effective members of teams that complete engineering projects of increasing complexity, and gain advancement in responsibility while pursuing successful engineering careers in industry, government, or the non-profit sector; and/or
- Successfully pursue advanced degree(s) and/or publish, patent, or market the results of research and development, or pursue other creative efforts in science, technology or engineering; and/or

- Utilize engineering knowledge and skills to successfully pursue careers in other professions, such as law, medicine, business, education, or public policy; and
- Provide service to their community and profession, such as leadership, outreach, mentoring, reviewing/editorship, organizing professional meetings/events, etc.

Student Outcomes

Attainment of the following outcomes prepares graduates of the program to enter the professional practice of engineering.

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

For more information contact the Department of Mechanical and Aerospace Engineering. (<http://www.mae.seas.gwu.edu/>)

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in mechanical engineering (p. 764)
- Bachelor of Science with a major in mechanical engineering, aerospace option (p. 765)
- Bachelor of Science with a major in mechanical engineering, biomechanical option (p. 767)
- Bachelor of Science with a major in mechanical engineering, medical preparation option (p. 768)
- Bachelor of Science with a major in mechanical engineering, patent law option (p. 770)
- Bachelor of Science with a major in mechanical engineering, robotics option (p. 771)

Combined program

- Dual Bachelor of Science with a major in mechanical engineering and Master of Science in the field mechanical engineering (p. 783)

Minor

- Minor in mechanical engineering (p. 787)

GRADUATE

Master's program

- Master of Science in the field of mechanical and aerospace engineering (p. 804)

Doctoral program

- Doctor of Philosophy in the field of mechanical and aerospace engineering (p. 816)

CERTIFICATE

- Graduate certificate in energy engineering and management (p. 822)
- Graduate certificate in computer-integrated design in mechanical and aerospace engineering (p. 820)

FACULTY

Professors E. Balaras, L.A. Barba, P.M. Bardet, A.D. Cutler, D.S. Dolling, C.A. Garriss, S.M. Hsu, M. Keidar, J.D. Lee, T. Lee, Y. Leng, M.W. Plesniak (*Chair*), K. Sarkar, Y.-L. Shen, S. Shooter, M. Snyder, S. Solares, L.G. Zhang

Associate Professors M.C. Leftwich, S. LeBlanc

Assistant Professors P. Wei

Associate Research Professors K. Bulusu

Research Professors K.P. Chong, M.H. Friedman, M.A. Imam

Professorial Lecturers M. Bailey, D.S. Dodbele, J.M. Fleming, D.R. Gerk, J.H. Milgram, M. Naderi, E. Naranji, N. Nigam, B.-M. Paik, J.K. Soldner

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

MAE 1001. Introduction to Mechanical and Aerospace Engineering. 1 Credit.

Careers in mechanical and aerospace engineering and the necessary academic program. Teamworking and problem-solving skills for solution of design problems. Analytical and design problems and correlations between academic skills and the mechanical and aerospace engineering professions. Basic aspects of engineering ethics. (Fall).

MAE 1004. Engineering Drawing and Computer Graphics. 3 Credits.

Introduction to technical drawing, including use of instruments, lettering, geometric construction, sketching, orthographic projection, section view, dimensioning, tolerancing, and pictorial drawing. Introduction to computer graphics, including topics covered in manual drawing and computer-aided drafting. (Fall and spring).

MAE 1099. Variable Topics. 1-36 Credits.

MAE 1117. Introduction to Engineering Computations. 3 Credits.

Foundations of computational thinking focusing on data practices and computational problem-solving; handling data programmatically, variables and their type, logical operations; reading data from files and cleaning and organizing text data; handling multi-dimensional arrays; basic plotting; linear regression; exploratory data analysis, handling labeled data, and data visualization. (Spring, Every Year).

MAE 2117. Engineering Computations. 3 Credits.

Computational thinking: modeling and simulation practices. Numerical derivatives. Initial-value problems. Solving differential equations, direction fields, the phase plane. Geometry of linear algebra; eigenvalues and eigenvectors. Fourier analysis. Prerequisites: MAE 1117 and MATH 1232. (Fall, Every Year).

MAE 2131. Thermodynamics. 3 Credits.

Fundamentals of equilibrium thermodynamics; Zeroth, First, and Second Laws. Work, heat, internal energy, enthalpy, thermodynamic potential functions; heat transfer mechanisms, phase diagrams, equations of state and property tables, power systems, refrigeration, heat pump systems. Reversible and irreversible processes, Carnot cycle, entropy, exergy. Prerequisite: PHYS 1021. (Spring, Every Year).

MAE 2170. History and Impact of the U.S. Patent System. 3 Credits.

Economic systems and emergence of the free market; role of the patent system in the industrial development of the United States; constitutional foundations; evolution of the U.S. patent system; landmark litigation; impact on future innovation; international aspects; the likely future of the patent system.

MAE 3120. Methods of Engineering Experimentation. 3 Credits.

Acquisition and analysis of experimental data. Laws of modeling and simulation. Report formulation and presentation. Basic principles of measuring instruments and sensors. Fundamentals of digital data acquisition and use of computer-based data systems. Strain gages, oscilloscopes, transducers, and computerized data systems. Prerequisite: MAE 2117.

MAE 3126. Fluid Mechanics I. 3 Credits.

Fluid properties, fluid statics, integral and differential formulations of conservation of mass, momentum, and energy. Bernoulli's equation. Dimensional analysis and similitude. Inviscid flow. Viscous flow. Experimental and computational methods in fluid mechanics. Prerequisite: APSC 2058. (Fall, Every Year).

MAE 3127. Fluid Mechanics Lab. 1 Credit.

Measurement and analysis of the behavior of fluids. Hydrostatic pressure, Bernoulli equation, conservation of momentum, pipe flow and open channel flow. Comparison of experimental data with computational simulations. Prerequisites: APSC 2058. Corequisites: MAE 3126. (Fall, Every Year).

MAE 3128. Biomechanics I. 3 Credits.

Mechanical analysis of biological systems. Characterization of living tissue. Applications of statics, solid mechanics, kinematics, and elementary dynamics to the human musculoskeletal system. May be taken for graduate credit with permission of the department. Prerequisites: APSC 2057 and CE 2220. (Spring, Every Year).

MAE 3134. Linear System Dynamics. 3 Credits.

Modeling of linear mechanical, electrical, and fluid systems as transfer functions and in state space. Linearization, discretization. Laplace and z-transforms. Natural frequencies and damping, free vibration, forced vibration. Measurement techniques, parameter estimation, and computer simulation. Time and frequency domain analysis. Corequisite: APSC 2058. Prerequisite: APSC 2113. (Spring, Every Year).

MAE 3145. Orbital Mechanics and Spacecraft Dynamics. 3 Credits.

Coordinate systems and transformations, rocket equation, two-body problem, orbit transfers, orbit perturbations, attitude dynamics and stability of symmetric spacecraft, environmental and control torques. Prerequisite: APSC 2058. (Fall).

MAE 3155. Aerodynamics. 3 Credits.

Subsonic and supersonic aerodynamics: potential flow, lift and form drag, viscous effects, compressible flow. Prerequisite: MAE 3126.

MAE 3162. Aerospace Structures. 3 Credits.

Basic structural theory of lightweight aerospace structures; analysis of typical monocoque structures; load transfer in stiffened panel structures; virtual work and energy methods of structural analysis, bending of open and closed, thin walled beams, shear and torsion of beams, and structural idealization. Restricted to juniors and seniors; permission of the instructor may be substituted. Prerequisites: APSC 2057 and CE 2220. (Fall, Every Year).

MAE 3166W. Materials Science and Engineering. 3 Credits.

Mechanical properties, plastic deformation, dislocation, yielding, strengthening mechanisms, microstructure and properties, heat treatment steel, composites, amorphous materials, viscoelastic deformation, creep, fracture, fatigue, crack propagation. Prerequisites: CHEM 1111 and PHYS 1022. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

MAE 3167W. Mechanics of Materials Lab. 1 Credit.

Measurement of strains and study of failure resulting from applied forces in ductile, brittle, anisotropic, elastomeric, plastic, and composite materials. Tension, compression, bending, impact, and shear failures. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. MAE 3166W may be taken as a corequisite. Prerequisite: MAE 3166W. (Spring, Every Year).

MAE 3171. Patent Law for Engineers. 3 Credits.

Types of patents; international patents; inventorship; prosecution process; basic references for patents; detailed structure of a patent; patentability requirements; reexamination and reissue; litigation; infringement and invalidity; copyrights, trademarks, and trade dress. May be taken for graduate credit with approval of department. (Spring).

MAE 3184. Robotics Lab. 1 Credit.

Forward and inverse kinematics modeling of robots, control design, trajectory planning, and force rendering. Corequisite: MAE 3197.

MAE 3187. Heat Transfer. 3 Credits.

Steady- and unsteady-state heat conduction problems. Analytical and numerical solution methods. Convective heat transfer, boundary-layer approach, analogy between heat and momentum transfer. Thermal radiation; fundamental concepts and laws. Heat-exchanger design. Prerequisites: MAE 2131 and MAE 3126. (Spring, Every Year).

MAE 3191. Mechanical Design of Machine Elements. 3 Credits.

Strength of materials in a design context; stresses and deflections in engineering structures; theories of failure; design of mechanical components, such as fasteners, shafts, and springs; the use of computers in mechanical engineering design. Prerequisite: CE 2220. (Fall, Every Year).

MAE 3192. Manufacturing Processes and Systems. 3 Credits.

Introduction to manufacturing techniques for metals, polymers, ceramics, and composites. Relationships between properties of materials and techniques for processing them. Process selection, design, control, and integration. Computer-integrated manufacturing, robotics and assembly automation. MAE 1004 may be taken as a corequisite. Prerequisites: MAE 1004. (Fall, Every Year).

MAE 3193. Mechanical Systems Design. 3 Credits.

Creative engineering design, problem definition, and concept generation; design of mechanisms and mechanical systems; safety, reliability, manufacturability, material selections, cost, and integration in the design process; finite element analysis of mechanical systems, computer-aided design, and optimization. Prerequisite: MAE 3191. (Spring, Every Year).

MAE 3197. Robotic Systems Design and Applications. 3 Credits.

Modeling and analysis of robot designs. Kinematics, statics, and dynamics of linkages. Design and selection of mechanical structures, actuators, transmissions, and sensors. Design of robotic control systems. Relevant computer hardware and software. Industrial applications and limitations of robot systems. Lab experiments. Same as ECE 4730. Prerequisite: MAE 3134.

MAE 4129. Biomechanics II. 3 Credits.

Mechanical analysis of physiological fluid dynamics. Application of fluid flow analysis techniques to cardiovascular, pulmonary, respiratory, and phonatory flows. Introduction to biomedical devices that manipulate physiological flows. May be taken for graduate credit with approval of department. Prerequisite: MAE 3128.

MAE 4149. Thermal Systems Design. 3 Credits.

Completion of a thermal systems design project that requires integration of engineering science, economics, reliability, safety, ethics, professional responsibility, and social considerations. Development and use of design methodology, optimization, feasibility considerations, detailed system descriptions, and presentation of results. Prerequisites: MAE 3187. (Fall, Every Year).

MAE 4151. Capstone Design Project I. 1 Credit.

First in a two-course sequence. Students define objectives and an approach for a mechanical engineering project involving experimentation and apply mechanical engineering design, engineering, and laboratory skills in team project implementation. Prerequisites: MAE 3193. (Fall, Every Year).

MAE 4152W. Capstone Design Project II. 3 Credits.

Continuation of MAE 4151. Students define objectives and an approach for a mechanical engineering project involving experimentation and apply mechanical engineering design, engineering, and laboratory skills in team project implementation. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Spring, Every Year).

MAE 4157. Aerodynamics Laboratory. 1 Credit.

Subsonic and supersonic wind tunnel experiments and simulations. Prerequisite: MAE 3155. (Fall).

MAE 4163. Airplane Performance. 3 Credits.

Lift and drag estimation methods. Airplane performance measures, such as range and endurance, turning flight, specific excess power and acceleration, takeoff and landing performance. Longitudinal and lateral-direction static and dynamic stability. Control surface effectiveness. Prerequisites: MAE 3126. (Fall, Every Year).

MAE 4168. Introduction to Biomaterials. 3 Credits.

Fundamentals of materials science and engineering applied to artificial materials in the human body. Biocompatibility, techniques to minimize corrosion or other degradation of implant materials, use of artificial materials in tissues and organs. Restricted to students who are not enrolled in the mechanical engineering program. Prerequisites: departmental permission. (Fall, Every Year).

MAE 4172. Engineering Design and the Patent System. 3 Credits.

Design experience in group projects involving following precisely the teachings of a licensed patent; or avoiding infringement of a provided patent while offering a competitive alternative; or evaluating a provided patent in light of prior art or by attempting to design a competitive product. May be taken for graduate credit with approval of department. Prerequisites: MAE 3171 and senior status. (Spring, Every Year).

MAE 4182. Electromechanical Control System Design. 3 Credits.

Application of control theory to the design of electromechanical systems. Transducers, valves, and other control components. Mathematical models of open- and closed-loop electromechanical systems. Root locus and frequency response methods; application to the synthesis of feedback systems by both manual and computer-aided techniques. Prerequisites: MAE 2117 and MAE 3134. (Fall and spring, Every Year).

MAE 4183. Controls Lab. 1 Credit.

Modeling, control design, simulation, implementation, tuning, and operation of a control system. Corequisite: MAE 4182.

MAE 4194. Mechatronics Design. 3 Credits.

Data acquisition and digital signal processing. Sensors and their characteristics—displacement, position/velocity, force/pressure, piezoelectric. Actuators—mechanical, electrical, pneumatic, hydraulic. Modeling and simulation of dynamic systems. Mechanism design. Digital control systems. Microprocessors, digital logic/circuits, motor drives. Lab experiments. Prerequisite: MAE 4182.

MAE 4195. Mechatronics Lab. 0 Credits.

Designing and building a mechatronic system based around a programmable microcontroller; using sensors and actuators to create devices capable of sensing their surrounding environment and reacting to stimuli from that environment. Corequisites: MAE 6194 for students enrolled in MAE 6195, MAE 4194 for student enrolled in MAE 4195. (Spring, Every Year) Same As: MAE 6195.

MAE 4198. Research. 1-3 Credits.

Applied research and experimentation projects, as arranged. Restricted to juniors and seniors. (Fall and spring, Every Year).

MAE 4199. Student Design Project. 1-3 Credits.

Student projects involving extensive design of various mechanical engineering systems. May be taken for graduate credit with the expectation that additional work is required. Prerequisites: seniors. (Fall and spring, Every Year).

MAE 5099. Variable Topics. 1-99 Credits.**MAE 6194. Mechatronics Design. 3 Credits.**

Review of data acquisition and digital signal processing; mathematical models, design, and applications of sensors and actuators in mechatronic systems; theory and applications of mechanism design; microprocessor-based design integration, motor drives, and digital logic/circuits. Corequisite: MAE 6195. Restricted to graduate students. (Same as MAE 4194) (Spring, Every Year).

MAE 6195. Mechatronics Lab. 0 Credits.

Designing and building a mechatronic system based around a programmable microcontroller; using sensors and actuators to create devices capable of sensing their surrounding environment and reacting to stimuli from that environment. Corequisites: MAE 6194 for students enrolled in MAE 6195, MAE 4194 for student enrolled in MAE 4195. (Spring, Every Year) Same As: MAE 4195.

MAE 6204. Tissue Engineering. 3 Credits.**MAE 6207. Theory of Elasticity I. 3 Credits.**

Introduction to Cartesian tensors; deformation, stress, constitutive relations for linear elasticity; formulation of boundary value problems, variational principles, torsion and bending of prismatic rods, plane problems. Permission of the department required prior to enrollment. (Fall, Every Year) Same As: CE 6207.

MAE 6210. Continuum Mechanics. 3 Credits.

Tensor analysis; fundamental concepts of continuum mechanics; kinematics of continuum; derivation of balance laws of mass, linear momentum, angular momentum, energy and entropy; axioms of constitutive theory; formulation of constitutive theories; Onsager's principle; objectivity; representation theorem for isotropic functions; plasticity, including concepts of internal variables, yield surface, return mapping algorithm. Permission of the department required prior to enrollment. (Fall, Every Year).

MAE 6220. Applied Computational Fluid Dynamics. 3 Credits.

Basic principles of fluid dynamics and aerodynamics. Finite difference and finite volume methods. Fluid flow and heat transfer analysis of thermo-fluid mechanical systems. Computational aerodynamics codes. Individual hands-on experience with a commercial CFD code such as FLUENT. Permission of the department required prior to enrollment. (Fall and spring, Every Year).

MAE 6221. Fluid Mechanics. 3 Credits.

Continuum, kinematics of fluids; stress and strain rate tensors; fundamental equations of viscous compressible flows. Irrotational flows; sources, sinks, doublets, and vortices. Laminar flow of viscous incompressible fluids; boundary-layer concept. Permission of the department required prior to enrollment. (Fall, Every Year).

MAE 6223. Turbomachinery. 3 Credits.

Turbine, compressor, and pump types and uses; dimensional analysis of turbomachines; cycle analysis of gas and steam turbines; energy interchange in fluid machinery; design, characteristics, and performance of turbines, compressors, and pumps; comparison of types of turbines, compressors, and pumps. Prerequisite: MAE 6221.

MAE 6224. Viscous Flow. 3 Credits.

Exact solutions of Navier-Stokes equations; the laminar boundary-layer theory. Reynolds stresses and turbulence; internal, boundary-layer, and mixing flows. Applications to heat and mass transfer and to reacting flows. Prerequisites: APSC 6213 and MAE 6221. (Fall and spring, Every Year).

MAE 6225. Computational Fluid Dynamics. 3 Credits.

Theory of discrete methods for solving the governing equations of fluid dynamics. Potential flow, Euler equations, Navier-Stokes equations. Emphasis on algorithm development appropriate to modern supercomputers. Prerequisites: MAE 6221 and MAE 6286. (Fall and spring, Every Year).

MAE 6226. Aero- and Hydrodynamics. 3 Credits.

Inviscid flows in two and three dimensions and irrotational flow theory; conformal mapping and applications. Helmholtz theorems and vorticity dynamics. Applications such as airfoil theory, finite wing theory, panel methods, instabilities, free surface flow. Prerequisite: MAE 6221. (Fall and spring, Every Year).

MAE 6228. Compressible Flow. 3 Credits.

Thermodynamics and equations of compressible inviscid flow. One-dimensional flow. Isentropic flow. Normal and oblique shock waves. Quasi-one-dimensional flow. Unsteady one-dimensional and steady two-dimensional flow. Introduction to transonic flow. Prerequisites: APSC 6213 and MAE 6221. (As arranged, odd years).

MAE 6229. Propulsion. 3 Credits.

Basic concepts of propulsion: energy transformations in propulsive flows, gas dynamics of combustion. Thermal and propulsive efficiencies. Cycle and engine component analysis. Intake, nozzle performance. Drag and thrust generation. Augmentation. Propellers, turbojets, turbofans, ramjets, and rockets. Prerequisites: Graduate standing; or MAE 2131 and MAE 3126. (Spring, Every Year).

MAE 6230. Space Propulsion. 3 Credits.

Advanced chemical propulsion: dynamic combustion and instabilities in solid propellants. Injection, atomization, mixing in liquid propellant engine performance. Plasma propulsion: electrostatic, electromagnetic, and electrothermal instabilities (laser and microwave). Nuclear propulsion. Prerequisite: MAE 6229.

MAE 6232. Fracture Mechanics. 3 Credits.

Concepts, history, and recent developments of fracture mechanics. Singularity at the crack tip; solutions around crack tip; stress intensity factors; energy release rate; J-integral; direction of crack extension; Plasticity and slow crack growth; dynamic crack propagation; molecular dynamics simulation of fracture. Prerequisite: approval of department.

MAE 6234. Composite Materials. 3 Credits.

Principles of composites and composite reinforcement. Micromechanics and failure, interface reactions in various composites, reinforcing materials. Structure of composites: fiber-reinforced polymers, filler-reinforced polymers, fiber-reinforced metals, directionally solidified alloys, dispersion-strengthened metals. Permission of the department required prior to enrollment. (Fall and spring, Every Year).

MAE 6235. Deformation and Failure of Materials. 3 Credits.

Elastic and plastic deformation, yield, dislocation theory, strengthening mechanisms, creep, polymers, fracture, transition temperature, microstructure, fatigue. (Spring, odd years).

MAE 6238. Biomaterials. 3 Credits.

Applications of materials science and engineering to artificial materials in the human body with the objective of detailed understanding of synthetic materials and biopolymers. Biocompatibility and its consequences on tissue-implant interfaces. Design and development of new implant materials, drug delivery systems, and biosensors. Prerequisite: MAE 3166 or MAE 4168.

MAE 6239. Computational Nanosciences. 3 Credits.

Introduction to surface force measurements in nanosciences; continuum contact mechanics in nanoscience research; intermolecular forces; empirical potentials for transition metals; surface forces in liquids; large-scale atomic/molecular massively parallel simulator; force field development from quantum mechanical density-functional theory for organic/metal molecular systems. Prerequisites: departmental permission. (Fall, Every Year).

MAE 6243. Advanced Mechanical Engineering Design. 3 Credits.

Design of mechanical engineering components and systems emphasizing computer-aided engineering (CAE), including interactive computer graphics, finite element analysis, and design optimization. Creation of a complete design on an engineering workstation. Prerequisites: departmental permission. (Fall, Every Year).

MAE 6245. Robotic Systems. 3 Credits.

Classification, features, and applications of industrial robots. Spatial descriptions and transformations, forward and inverse kinematics. Jacobian matrix, velocities and static forces, manipulator dynamics and controls. Robot actuators, transmissions, sensors, end effectors, and programming. Prerequisite: MAE 4182 .

MAE 6246. Electromechanical Control Systems. 3 Credits.

State-space representations of dynamic systems; dynamics of linear systems; controllability and observability; linear observers; compensator design by separation principle; linear-quadratic optimal control; Riccati equations; random processes; Kalman filter; applications of optimal stochastic control theory to robotics and earthquake engineering. Prerequisites: departmental permission. (Fall, Every Year).

MAE 6247. Aircraft Design I. 3 Credits.

Conceptual design methods used in response to prescribed mission and performance requirements, alternate configuration concepts. Configuration general arrangement and empennage sizing. Estimation of aircraft size, weight, and balance; lift, thrust and drag; system level tradeoff and sensitivity studies. Prerequisites: Graduate standing or MAE 4163. (Spring, Every Year).

MAE 6249. Spacecraft Design. 3 Credits.

Computer-aided design of spacecraft and satellites to meet specific mission requirements. Environment, propulsion, structure, heat transfer, orbital mechanics, control considerations. Use of modern computer codes for design studies. Prerequisites: MAE 3145 or graduate standing. (Spring, Every Year).

MAE 6251. Computer-Integrated Manufacturing. 3 Credits.

Automation techniques for processing metals, polymers, and composites. Use of sensing and process modeling in process control. Numerical control and robot applications and limitations. Integration, scheduling, and tool management in the computer-integrated factory. Quality control. Social and economic considerations in CIM. Prerequisite: MAE 3192 .

MAE 6254. Applied Nonlinear Control. 3 Credits.

Dynamic characteristics of nonlinear systems. State stability and input-output stability. Lyapunov stability theory and invariance principle. Nonlinear control systems, including feedback linearization, back-stepping, sliding mode control, and passivity-based design. Applications to robotics, aircraft, and spacecraft control systems. Geometric controls and hybrid systems. Prerequisites: departmental permission. (As arranged, Every Year).

MAE 6255. Plasma Engineering in Aerospace and Nanotechnology. 3 Credits.

Plasma fundamentals, electromagnetic waves in plasma, plasma-wall interactions, modeling and experimental techniques in plasmas, electrical discharge, plasma propulsion, plasma-based nanotechnology. Prerequisite: MAE 3126. (Fall, Every Year).

MAE 6257. Theory of Vibration. 3 Credits.

Damped and undamped natural vibration, response of single- and multiple-degrees-of-freedom systems to steady-state and transient excitations, modal analysis, nonproportional damping and complex modes, variation formulation of equations of motion, discretization of structural systems for vibrational analysis. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6258. Advanced Vibration Analysis and Control. 3 Credits.

Passive and active vibration control of discrete and continuous systems, dynamic vibration absorbers, random vibrations, failure analysis, modal analysis, nonlinear vibrations. Prerequisites: MAE 3134 and MAE 4182 or graduate standing. (Spring).

MAE 6260. Nanomechanics. 3 Credits.

Introduction to crystallography; interatomic potentials; phonon dispersion relations; molecular dynamics simulation; Nose-Hoover thermostat; coarse grained non-equilibrium molecular dynamics; multiple length/time scale theory of multi-physics; microcontinuum field theories; applications to nano materials/structures. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6261. Air Pollution. 3 Credits.

Introductory course on the generation, monitoring, and control of air pollution. Atmospheric pollutants; current levels and health problems. Combustion chemistry and mixing. Photochemical processes; smog and measurements. Atmospheric dispersion; inversion and acid rain. Permission of the department required prior to enrollment. (Fall and spring, Every Year).

MAE 6262. Energy Systems Analysis. 3 Credits.

Analysis of energy resources and conversion devices. Statistical data analysis, forecasting, I/O, and net energy analyses, mathematical modeling. Prerequisites: departmental permission. (Fall, Every Year).

MAE 6263. Energy and Sustainability. 3 Credits.

Review of thermodynamics, heat transfer, fluid dynamics, and materials technology used in the energy industries. New energy-efficient technologies in transportation and buildings; renewable energy (wind, solar, and biomass). Climate change and sustainability issues, such as carbon capture, cap and trade, carbon sequestration. (Spring, Every Year).

MAE 6270. Theoretical Acoustics. 3 Credits.

Basic acoustic theory in stationary and uniformly moving media; waves in infinite space; sound transmission through interfaces; sound radiation from simple solid boundaries, source and dipole fields; propagation in ducts and enclosures; elements of classical absorption of sound. Prerequisites: APSC 6213 and MAE 6221. (Fall and spring, Every Year).

MAE 6274. Dynamics and Control of Spacecraft. 3 Credits.

Fundamentals of satellite attitude dynamics and passive stabilization. Spacecraft attitude representation, rotational kinematics and kinetics. External torques. Dynamics of gyroscopes. Gravity gradient stabilization. Effect of internal energy dissipation on stability of spinning bodies and methods of despin. Dual spin satellites. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6275. Dynamics and Control of Aircraft. 3 Credits.

Derivation of equations of motion, Euler transformations and direction cosines, stability derivatives and linearization of equations of motion, stability of linear systems with application to longitudinal and lateral dynamics, Laplace transform techniques, and frequency-response analysis. Permission of the department required prior to enrollment. (Fall, even years).

MAE 6277. Spacecraft Attitude Control. 3 Credits.

Control of spinning and three-axis stabilized spacecraft. Elements of linear control theory for single-input, single-output systems and basic feedback control laws. Momentum management and actuator desaturation. Sensors for attitude determination. Application of modern control for multi-input, multi-output systems. Control system simulations using MatLab. (As arranged).

MAE 6280. Thermodynamics. 3 Credits.

Review of first and second laws of thermodynamics and combining the two through exergy; entropy generation minimization and applications. Single phase systems, exergy analyses, multiphase systems, phase diagrams and the corresponding states principle. Permission of the department is required prior to enrollment. (Fall, Every Year).

MAE 6282. Convective Heat/Mass Transfer. 3 Credits.

Heat and momentum transfer in laminar and turbulent flow. The laminar boundary-layer solution. Similarity and nondimensional parameters. Mass-momentum heat transfer analogy. Convective heat transfer at high velocity. Stability, transition, and turbulence. Free convection. Prerequisite: MAE 6221.

MAE 6284. Combustion. 3 Credits.

Basic combustion phenomena. Rate processes and chemical kinetics. Chain reaction theory. Detonation, deflagration, diffusion flames, heterogeneous combustion. Experimental measurements. Impact of pollution regulations and alternate fuels. Permission of the department required prior to enrollment. (Fall, odd years).

MAE 6286. Numerical Solution Techniques in Mechanical and Aerospace Engineering. 3 Credits.

Development of finite difference and finite element techniques for solving elliptic, parabolic, and hyperbolic partial differential equations. (Fall, Every Year).

MAE 6287. Applied Finite Element Methods. 3 Credits.

Review of theory of elasticity. Basic aspects of theory and application of finite element methods. Utilization of MSC/NASTRAN for static, dynamic, linear, and nonlinear analyses of problems in mechanical, aeronautical, and astronautical engineering. Course emphasizes individual hands-on experience with the MSC/NASTRAN code. Permission of the department required prior to enrollment. (Fall and spring, Every Year).

MAE 6288. Advanced Finite Element Analysis. 3 Credits.

Review of variational formulation of the finite element method. Finite element analysis of large-strain thermomechanics. Applications to static and dynamic problems in finite elasticity, Fung elasticity (biomechanics), nonlocal theory, active stress in living biological tissues, biological growth, and large-strain plasticity. Recent developments in finite element methods. Permission of the department required prior to enrollment. (Fall and spring, Every Year) Credit cannot be earned for this course and CE 8330.

MAE 6291. Special Topics in Mechanical Engineering. 3 Credits.

Selected subjects of current interest. Arranged by consultation between department faculty and students. Typical topics include tribology, power systems design, solar heating systems, HVAC, and plasticity theory. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6292. Special Topics in Aerospace Engineering. 3 Credits.

Selected subjects of current interest. Arranged by consultation between department faculty and students. Typical topics include environmental noise control, aeroacoustics, hypersonic flow, and flight vehicle aerodynamics. May be repeated for credit. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6298. Research. 1-6 Credits.

Basic research projects as arranged. May be repeated for credit.

MAE 6998. MS Thesis Research. 3 Credits.

. (Fall and spring, Every Year).

MAE 6999. MS Thesis Research. 3 Credits.

. (Fall and spring, Every Year).

MAE 8350. Advanced Topics in Materials Science. 3 Credits.

Topics such as surface science that are of current research interest. Selected after consultation between department faculty and students. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 8351. Advanced Topics in Mechanical Engineering. 3 Credits.

Topics such as advanced analytical mechanics, advanced mechanics of continua, and advanced theory of elasticity that are of current research interest. Selected after consultation between department faculty and students. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 8352. Advanced Topics in Aerospace Engineering. 3 Credits.

Topics such as nonsteady flow, physical gas dynamics, turbulence, and nonlinear wave propagation that are of current research interest. Selected after consultation between department faculty and students. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 8998. Advanced Reading and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination. (Fall and spring, Every Year).

MAE 8999. Dissertation Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates. (Fall and spring, Every Year).

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS WITH A MAJOR IN APPLIED SCIENCE AND TECHNOLOGY

The bachelor of arts with a major in applied science and technology is a broad-based, engineering-oriented degree program that includes significant exposure to the liberal arts. It is designed for students who intend to make their careers in fields allied to science and technology and/or continue their education toward professional careers in law, medicine, business, teaching, or the media.

The program can be enhanced with a second major in the Columbian College of Arts and Sciences (p. 77), Elliott School of International Affairs (p. 830), or GW School of Business (p. 517). The Department of Engineering Management and Systems Engineering does not offer a second major in applied science and technology.

Bachelor of Arts with a Second Major in Applied Science and Technology

The Department of Engineering Management and Systems Engineering does not offer a second major in applied science and technology.

Visit the program website (<http://www.emse.seas.gwu.edu/bachelor-arts-applied-science-technology/>) for additional informational.

REQUIREMENTS

The following requirements must be fulfilled:

A total of 128 credits taken as outlined below.

A minimum technical GPA of 2.20 and SEAS GPA of 2.00. All technical courses taken during the fifth through eighth semesters as outlined by the four-year curriculum sheet respective to each major and approved by the student's faculty advisor are counted towards the student's technical GPA.

Plan of Study

The plan of study lists in sequence all course requirements for the degree. Students should review this information carefully and speak to their advisor before changing the sequence of any of these courses.

Code	Title	Credits
First semester		
CHEM 1111	General Chemistry I ¹	
EMSE 1001	Introduction to Systems Engineering	
SEAS 1001	Engineering Orientation	
MATH 1231	Single-Variable Calculus I ¹	
UW 1020	University Writing ²	
Humanities or social sciences elective ³		
Second semester		
CHEM 1112	General Chemistry II ¹	
CSCI 1121	Introduction to C Programming	
or CSCI 1111	Introduction to Software Development	
MATH 1232	Single-Variable Calculus II ¹	
Humanities or social sciences elective ³		
Arts elective ⁴		
Third semester		
CSCI 1132	Data Structures and Software Design	
or CSCI 1112	Algorithms and Data Structures	
PHYS 1011	General Physics I ¹	
or PHYS 1021	University Physics I	
Literature elective ⁵		
Two unrestricted electives ⁶		
Fourth semester		

APSC 3115	Engineering Analysis III
EMSE 4410	Engineering Economic Analysis
PHYS 1012	General Physics II ¹
or PHYS 1022	University Physics II
Literature elective ⁵	
Unrestricted elective ⁶	
Fifth semester	
BISC 1111	Introductory Biology: Cells and Molecules
EMSE 3850	Quantitative Models in Systems Engineering
COMM 1040	Public Communication ¹
or COMM 1041	Interpersonal Communication
or COMM 1042	Business and Professional Speaking
MAE 1004	Engineering Drawing and Computer Graphics
Allied minor elective ⁸	
Sixth semester	
BISC 1112	Introductory Biology: The Biology of Organisms
ISTM 4121	Database Principles and Applications
Humanities or social sciences elective ³	
Two allied minor electives ⁸	
Seventh semester	
MAE 3192	Manufacturing Processes and Systems
EMSE 3740W	Systems Thinking and Policy Modeling
EMSE 6005	Organizational Behavior for the Engineering Manager
Allied minor elective ⁸	
SEAS elective ⁹	
Eighth semester	
CE 4330W	Contracts and Specifications
Allied minor elective ⁸	
Humanities or social sciences elective ³	

Electives

Students choose electives in specified categories from lists of courses available from the advisor. Allied minor electives are selected, with the approval of the advisor, to form a coherent and meaningful program of 15 credits. Popular selections include biology, communication, computer science, design, economics, engineering, environmental studies, finance, international business, management, mathematics, medical preparation, psychology, statistics, and operations research.

¹Course satisfies the University General Education Requirement (<http://bulletin.gwu.edu/university-regulations/general-education/>) in either mathematics or statistics, natural or physical laboratory sciences, or writing.

²Writing (10 credits). UW 1020 (a required freshman writing course) and COMM 1040, COMM 1041, or COMM 1042. In addition to UW 1020, the student's academic program must include two writing-intensive courses to satisfy the GW Writing in the Disciplines (WID) requirement; two such courses are CE 4330W and EMSE 3740W.

³Humanities (6 credits) and Social Sciences (6 credits). Two two-course sequences selected from the SEAS list of electives in the humanities and social sciences.

⁴Creative and performing arts (3 credits). One of the following: ENGL 1210; FA 1014, FA 1017, FA 1021, or FA 1041; MUS 1103, MUS 1104, MUS 1107, MUS 1108, or performance study course; PHIL 3162; TRDA 1015, TRDA 1017, TRDA 1025, TRDA 1150, TRDA 1151, TRDA 1152, TRDA 1153, TRDA 1214, or an advanced performance course. Other choices are possible.

⁵Literature (6 credits). One two-course sequence selected from among CHIN 3111 and CHIN 3112; ENGL 1410 and ENGL 1411, ENGL 1510 and ENGL 1511, ENGL 1710 and ENGL 1711, or ENGL 1830 and ENGL 1840; FREN 3210 and FREN 3220; GER 2091 and GER 2092; JAPN 3111 and JAPN 3112; REL 1009 and REL 1010; SLAV 1391 and SLAV 1392; SPAN 3210 and SPAN 3220. Other choices are possible.

⁶Unrestricted (or "free") electives (18 credit). The academic advisor must approve the student's selection of unrestricted electives. If necessary, unrestricted electives may be used to satisfy prerequisite requirements for the allied minor. Such electives also may be used to convert the allied minor into an official minor or second major. Exercise and sport activities courses may not be used as unrestricted electives.

⁷Allied minor (15 credits). The student constructs a coherent program with the assistance of the academic advisor. Popular selections include biology, chemistry, business, communication, design, economics, engineering, environmental studies, finance, international business, management, mathematics, media, medical preparation, physics, psychology, public health, statistics, and operations

research. The allied minor may be part of a second major in CCAS, ESIA, or SEAS, part of the concentration in general business, or part of an official minor.

⁸See the advisor for details.

Humanities and Social Sciences 4 courses (12 credits)

All APSC majors must take the following two humanities and two social science. Social and behavioral sciences courses must be selected from the University General Education Requirement list (<http://bulletin.gwu.edu/university-regulations/general-education/>); At least one humanities course must be selected from the University General Education Requirement list; the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (<https://www.seas.gwu.edu/humanities-and-social-science-requirement/>).

(A) Art Elective 1 course (3 credits)

All Applied Science and Technology majors must choose one of the following: ENGL 1210, FA 1014, MUS 1103, MUS 1104, MUS 1107 Music of the World, MUS 1108, or performance study course; PHIL 3162; TRDA 1015, TRDA 1025, TRDA 1151, TRDA 1152, TRDA 1153, TRDA 1214, or an advanced performance course. Other options may be approved in advance by the Faculty Advisor.

(B) Literature Elective 2 course (6 credits)

All applied science and technology majors must choose one two-course sequence selected from among CHIN 3111 and CHIN 3112; or ENGL 2410 and ENGL 2411; or ENGL 2510 and ENGL 2511; or ENGL 2710 and ENGL 2711; or FREN 3210 and FREN 3220; GER 2091 and GER 2092; or JAPN 3111 and JAPN 3112; or REL 1009 and REL 1010; or SLAV 1391 and SLAV 1392; Other options may be approved in advance by the Faculty Advisor.

BACHELOR OF ARTS WITH A MAJOR IN COMPUTER SCIENCE

Bachelor of Arts Degree Program

The bachelor of arts with a major in computer science degree program provides a broad-based liberal arts curriculum for students who wish to augment technical computer knowledge with humanities, social sciences, business, communication, or management skills. Foundation courses focus on mathematics, science, software design and programming, computer systems and architecture, and algorithm design. Additional breadth or depth is afforded by selection of technical track courses that build on the foundations to provide in-depth exposure to a specific field in computer science. The program is designed for those with interests in two or more disciplines, as students must complete a second major or two minors in another academic department. The program also offers a medical preparation

option for students interested in pursuing a computer science major with preparation for application to medical school.

Visit the program website (<http://www.cs.seas.gwu.edu/bachelor-arts-program/>) for additional information.

Second Major in Computer Science

Students who are not enrolled in the School of Engineering and Applied Science (SEAS), who are enrolled in a bachelor of arts program and wish to declare a second major in computer science, must apply and be admitted to the computer science program. See the department website (<http://www.seas.gwu.edu/department-computer-science/>) for more information about curriculum requirements for the second major in computer science.

Admission criteria for a second major in computer science

To be considered for admission to the second major in computer science, a student must satisfy the following criteria:

- Prior completion of CSCI 1011, CSCI 1111, CSCI 1121, or CSCI 1112 with a minimum grade of B.
- Prior completion of MATH 1220 and MATH 1221, or MATH 1231 with a minimum grade of B-.
- A minimum overall grade-point average of 3.0 at the time of application to the major.

Application deadline

The application is due no later than the start of the fifth semester of study at GW or completion of the sixtieth credit, whichever comes first. Contact the School of Engineering and Applied Science Undergraduate Advising Office (<https://www.seas.gwu.edu/undergraduate-student-services-advising/>) for specific application deadlines.

Credits in residence requirement

- For a second major, at least 24 credits in computer science courses must be completed in SEAS.

Graduation grade-point average criteria

- To satisfactorily complete a second major in computer science, a student must have a minimum grade-point average of 2.2 in all the computer science courses.

REQUIREMENTS

Residency Requirement

As part of a residency requirement, all computer science majors must take a minimum of 30 credits in computer science courses at GW. Should a student pursue an approved study abroad program, credits earned in that program count toward this requirement. For a second major, at least 24 credits in computer science courses must be completed in SEAS.

Recommended program of study

Code	Title	Credits
First semester		15
CSCI 1010	Computer Science Orientation	1
CSCI 1111	Introduction to Software Development	3
SEAS 1001	Engineering Orientation	1
UW 1020	University Writing ¹	4
Mathematics requirement ¹		3
Social sciences elective ²		3
Second semester		15
CSCI 1112	Algorithms and Data Structures	3
CSCI 1311	Discrete Structures I	3
Mathematics requirement ¹		3
Natural or physical sciences with a lab elective ¹		3
Social sciences elective ²		3
Third semester		15
CSCI 2113	Software Engineering	3
CSCI 2460	Introduction to Computer Systems	2,1
Natural or physical sciences with a lab elective ¹		3
Humanities elective ²		3
Statistics/linear algebra requirement ³		3
Fourth semester		15
CSCI 2441W	Database Systems and Team Projects	0,3
Humanities elective ²		3
Second major elective		3
Natural or physical sciences with a lab elective ¹		3
Unrestricted elective ⁴		3
Fifth semester		15
One of the following computer science restricted electives:		3
CSCI 3212	Algorithms	4
CSCI 3313	Foundations of Computing	4
CSCI 3410	Systems Programming	3

CSCI 3411	Operating Systems	4
Arts elective		3
Second major elective		3
Second major elective		3
Second major elective		3
Sixth semester		15
CS technical track elective ⁵		3
Humanities elective ²		3
Global or cross-cultural elective ²		3
Second major elective		3
Second major elective		3
Seventh semester		15
One of the following computer science restricted electives: (different from the CS restricted elective already taken in fifth semester)		3
CSCI 3212	Algorithms	4
CSCI 3313	Foundations of Computing	4
CSCI 3410	Systems Programming	3
CSCI 3411	Operating Systems	4
CS technical track elective ⁵		3
Global or cross-cultural elective ²		3
Second major elective		3
Second major elective		3
Eighth semester		15
CS technical track elective ⁵		3
Humanities elective ²		3
Unrestricted elective ⁴		3
Second major elective		3
Second major elective		3
Significant independent project ⁶		

¹Course satisfies the University General Education Requirement (<http://bulletin.gwu.edu/university-regulations/general-education/>) in science and writing. UW 1020 must be completed prior to any writing course in the major, including CSCI 2441W or CSCI 2541W. The mathematics requirement

can be met by taking MATH 1220 and MATH 1221 or MATH 1231 and MATH 1232.

²This course should be selected from the Columbian College General Education Curriculum (G-PAC) (<https://advising.columbian.gwu.edu/general-education-curriculum/>). From the G-PAC webpage, select the corresponding types of classes. For example, choose "G-PAC: Global or Cross-cultural" to find the courses that satisfy the "Global and cross-cultural elective". Two of the natural or physical sciences with lab electives must have a laboratory section.

³Statistics or linear algebra requirement—The statistics requirement can be met by choosing APSC 3115, CSCI 3362, CSCI 6362, CSCI 4341, or STAT 4157. The linear algebra requirement can be met by taking one of MATH 2184, CSCI 4342, or EMSE 2705. Students who were admitted prior to fall 2014 may count STAT 1051 and STAT 1053 toward the statistics requirement, if they took the course prior to the spring 2015 semester. Students doing a premedical concentration may substitute the linear algebra requirement with a science course required by the premedical requirements.

⁴Unrestricted electives—All students in the BA in computer science program are required to complete four unrestricted elective courses. All courses used to fulfill this requirement must have the explicit, documented approval from the faculty advisor, even when such courses are required for a minor or have transferred to the University as Advanced Placement (AP) credit. Guidance for unrestricted electives is available on the Department of Computer Science website (<https://www.cs.seas.gwu.edu/>).

The following guidelines and/or restrictions apply to selecting courses to satisfy this requirement:

1. Additional CSCI courses numbered above 2461 may count toward this requirement. Students may take a maximum of two research and independent study courses, for which the student must provide documentation of output, such as papers, presentations, or software. For courses from other departments, the student must obtain the approval of the faculty advisor.
2. Approved courses from the SEAS Humanities and Social Science Electives lists may count toward this requirement.
3. Approved courses listed in non-technical track lists may count toward this requirement. However, such courses cannot count toward both the non-technical track requirement and as an unrestricted elective.
4. Computer science courses taught by another department generally do not count toward this requirement. Courses that significantly overlap with, or are not as advanced as, the required content for the computer science degree program do not count toward this requirement. Such courses include, but are not limited to, the following: BADM 2301, EMSE 4197, ISTM 3119, ISTM 4120, ISTM 4121, ISTM 4123, STAT 1051, STAT 1053, and STAT 1129.

5. Courses that significantly overlap with any other course(s) used toward the computer science degree, regardless of the department(s) in which they are taken, may not count toward this requirement.

Because of content overlap among courses in general, some courses may be approved for one student and not for another, based on other courses the student has taken. For example, if a student uses PHYS 1021 toward either the science, math/science, or unrestricted electives requirement, PHYS 1011 may not be used to fulfill this requirement, but PHYS 1011 would count for a student who has not taken PHYS 1021.

⁵Technical Track Requirement. All students in the BA in computer science program are required to take three technical courses (for a minimum of 9 credits) of computer science coursework for their technical track. These courses must have CSCI 2113 as a prerequisite or within their prerequisite chain. The faculty advisor's documented approval is required before these courses may be applied towards degree completion.

⁶Significant Independent Project. Students pursuing a second major must complete a significant independent project. This requires completion of either (1) a course in the second major that includes a thesis or significant project, or (2) completion of CSCI 4243 and CSCI 4244. The student's selection is subject to approval of the advisor.

BACHELOR OF SCIENCE WITH A MAJOR IN BIOMEDICAL ENGINEERING

The Department of Biomedical Engineering offers a bachelor's degree in biomedical engineering that is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>). The curriculum provides students the opportunity to select a subset of courses to suit their interests and needs through a variety of technical electives. These electives include courses in leading-edge biomedical engineering topics, as well as advanced courses in computer science, electrical engineering, mechanical engineering, cell biology, physiology, the physical sciences, and mathematics.

Visit the program website (<http://www.bme.seas.gwu.edu/programs-degrees/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
First semester		
BISC 1111	Introductory Biology: Cells and Molecules	

BME 1010	Introduction to Biomedical Engineering
CHEM 1111	General Chemistry I ¹
MATH 1231	Single-Variable Calculus I ¹
SEAS 1001	Engineering Orientation
UW 1020	University Writing ¹

Second semester

BISC 1112	Introductory Biology: The Biology of Organisms
BME 1020	Introduction to Biomedical Engineering
CHEM 1112	General Chemistry II ¹
MATH 1232	Single-Variable Calculus II ¹
PHYS 1025	University Physics I with Biological Applications ¹

Third semester

APSC 2113	Engineering Analysis I
BME 2810	Biomedical Engineering Seminar I
ECE 2110	Circuit Theory
MATH 2233	Multivariable Calculus ¹
PHYS 1026	University Physics II with Biological Applications ¹

Fourth semester

BME 2815	Biomedical Engineering Seminar II
ECE 2210	Circuits, Signals, and Systems
Programming Elective I ²	
Restricted Engineering Elective ³	
Restricted Engineering Elective ³	
Humanities or social sciences elective ⁴	

Fifth semester

BME 3820	Principles and Practice of Biomedical Engineering
BME 4820	Anatomy and Physiology for Engineers
ECE 3220	Introduction to Digital Signal Processing
Programming Elective II ²	
Technical elective ⁵	

BME 3910 Capstone Design Preparation

Sixth semester

APSC 3115 Engineering Analysis III

BME 3915W Biomedical Engineering Capstone Project Lab I

Two humanities or social sciences electives ⁴

Two technical electives ⁵

Seventh semester

BME 4920W Biomedical Engineering Capstone Project Lab II

MAE 4168 Introduction to Biomaterials

PHYS 3127 Biophysics: Macroscopic Physics in the Life Sciences

Humanities or social sciences elective ⁴

Technical elective ⁵

Eighth semester

BME 4925W Biomedical Engineering Capstone Project Lab III

PHIL 2135 Ethics in Business and the Professions

Humanities or social sciences elective ⁴

Technical elective ⁵

Science Elective ⁶

¹Course satisfies the University General Education Requirement (p. 42) in math, science, and writing.

²Programming elective pairs (take one pair):

a) MAE 1117 Introduction to Engineering Computations.
& MAE 2117 Engineering Computations

b) CSCI 1111 Introduction to Software Development
& CSCI 1112 Algorithms and Data Structures

c) ECE 1120 C Programming for Electrical and Computer Engineering
& ECE 1125 Data Structures and Algorithms for ECE

³Potential restricted engineering electives (take 2):

MAE 2131 Thermodynamics

APSC 2057 Analytical Mechanics I

APSC 2058 Analytical Mechanics II

CE 2220 Introduction to the Mechanics of Solids

ECE 2115 Engineering Electronics

ECE 2140 Design of Logic Systems

ECE 3310 Introduction to Electromagnetics

⁴At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 42); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (<https://www.seas.gwu.edu/humanities-and-social-science-requirement/>). At least one humanities course must be selected from the University General Education Requirement list; the remaining two courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list.

⁵All technical electives must be approved by the academic advisor and must include at least three courses approved by the advisor as having engineering content.

⁶Science electives (take one):

PHYS 3128 Biophysics: Microscopic Physics in the Life Sciences

CHEM 3165 Biochemistry I

BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING

Civil engineering encompasses those branches of engineering most closely related to the control and improvement of our environment and of the physical conditions of life. Civil engineers apply many technical specialties in order to plan, design, and construct projects that range from buildings and transportation systems to space stations and space habitats.

Visit the program website (<http://www.cee.seas.gwu.edu/programs-degrees/>) for additional information.

Bachelor of Science With a Second Major in Civil Engineering

Any undergraduate student who is enrolled at GW, may declare a second major in civil engineering only if their primary degree is a bachelor of science and the student must follow all the same degree requirements as those receiving a bachelor of science in civil engineering which include SEAS general, major, engineering electives, humanities/social science, and SEAS/technical GPA requirements. See the University Bulletin for more information on BS in Civil Engineering curriculum requirements for all the courses needed to complete the second major.

All other scenarios (BA, BBA, BFA, etc.) require the student to complete a double degree (p.).

Graduation grade-point average criteria:

To satisfactorily complete a second major in civil engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

*Course satisfies the university general education requirement in math, science, and writing.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list; (p. 42) the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (<https://www.seas.gwu.edu/humanities-and-social-science-requirement/>). At least one humanities course must be selected from the University General Education Requirement list; (p. 42) the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (<https://www.seas.gwu.edu/humanities-and-social-science-requirement/>)

BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING, ENVIRONMENTAL ENGINEERING OPTION

Graduates with the degree of bachelor of science in civil engineering, environmental engineering option, can identify, formulate, and solve problems involving design, experimentation, and analysis of a wide variety of civil engineering applications. The program of study prepares students to understand the impact of engineering solutions in a global economic, environmental, and social context. The well-structured curriculum enables students to design systems, components, or processes to meet desired needs within realistic constraints such as economic, environmental, social, political, health and safety, manufacturability, and sustainability.

Visit the program website (<http://www.cee.seas.gwu.edu/programs-degrees/>) for additional information.

Bachelor of Science With a Second Major in Civil Engineering

Any undergraduate student who is enrolled at GW, may declare a second major in civil engineering only if their primary degree is a bachelor of science and the student must follow all the same degree requirements as those receiving a bachelor of science in civil engineering which include SEAS general, major, engineering electives, humanities/social science, and SEAS/technical GPA requirements. *Course satisfies the university general education requirement in math, science, and writing.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 42); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (<https://www.seas.gwu.edu/humanities-and-social-science-requirement/>). At least one humanities course must be selected from the University General Education Requirement list (p. 42); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement

list (<https://www.seas.gwu.edu/humanities-and-social-science-requirement/>).

BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING, MEDICAL PREPARATION OPTION

The degree program for the bachelor of science in civil engineering, medical preparation option, focuses on proficiency in mathematics through differential equations, probability and statistics, calculus-based physics, and general chemistry; and the ability to conduct laboratory experiments and to critically analyze and interpret data. The curriculum prepares students to use their technical knowledge and expertise in mathematics, science, and engineering to identify, formulate, and solve problems involving design, experimentation, and analysis of a wide variety of civil engineering applications with special emphasis on the medical field.

Visit the program website (<http://www.cee.seas.gwu.edu/programs-degrees/>) for additional information.

Bachelor of Science With a Second Major in Civil Engineering

Any undergraduate student who is enrolled at GW, may declare a second major in civil engineering only if their primary degree is a bachelor of science and the student must follow all the same degree requirements as those receiving a bachelor of science in civil engineering which include SEAS general, major, engineering electives, humanities/social science, and SEAS/technical GPA requirements. See the University Bulletin for more information on BS in Civil Engineering curriculum requirements for all the courses needed to complete the second major.

All other scenarios (BA, BBA, BFA, etc.) require the student to complete a double degree (p.).

Graduation grade-point average criteria:

To satisfactorily complete a second major in civil engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

CE 4342	Senior Design Project II
CE 6403	Foundation Engineering
Two humanities or social sciences electives ²	

¹ Course satisfies the university general education requirement in math, science, and writing.

² At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 42); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (<https://www.seas.gwu.edu/humanities-and-social-science-requirement/>) At least one humanities course

must be selected from the University General Education Requirement list (p. 42); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (<https://www.seas.gwu.edu/humanities-and-social-science-requirement/>)

BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING, TRANSPORTATION AND SUSTAINABILITY ENGINEERING OPTION

Graduates with the degree of bachelor of science in civil engineering, transportation and sustainability engineering option, have an in-depth understanding of traffic engineering concepts, analysis and design methods related to traffic flow, highway capacity, and measurement and control. Students gain basic understanding of human processes and interactions dictating urban demand for space and modes of movements of passengers and goods and how to plan urban transportation infrastructure to answer such demand in a sustainable manner.

Visit the program website (<http://www.cee.seas.gwu.edu/programs-degrees/>) for additional information.

Bachelor of Science With a Second Major in Civil Engineering

Any undergraduate student who is enrolled at GW, may declare a second major in civil engineering only if their primary degree is a bachelor of science and the student must follow all the same degree requirements as those receiving a bachelor of science in civil engineering which include SEAS general, major, engineering electives, humanities/social science, and SEAS/technical GPA requirements. See the University Bulletin for more information on BS in Civil Engineering curriculum requirements for all the courses needed to complete the second major.

All other scenarios (BA, BBA, BFA, etc.) require the student to complete a double degree (p.).

Graduation grade-point average criteria:

To satisfactorily complete a second major in civil engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

STAT 6215	Applied Multivariate Analysis I

*Satisfies the University General Education Requirement (p. 42) in math, science, and writing.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list; the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (<https://www.seas.gwu.edu/humanities-and-social-science-requirement/>) At least one humanities course must be selected from the University General Education Requirement list; the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list.

BACHELOR OF SCIENCE WITH A MAJOR IN COMPUTER ENGINEERING

Computer engineering combines electronic design, computer architecture, programming of computing systems, computer networks, and applied mathematics. The bachelor of science with a major in computer engineering degree program prepares students in the theory and application of hardware and software design, computer networks, embedded systems, and very large scale integrated (VLSI) circuit design and applications. Students may take electives in advanced topics such as optical networks, broadband wireless networks, and technologies for the next generation of information systems.

The computer engineering program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

Bachelor of Science With a Second Major in Computer Engineering

An undergraduate student enrolled at GW whose primary degree is a bachelor of science may declare a second major in computer engineering. The student must meet all degree requirements for the bachelor of science in computer engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students receiving other bachelor's degrees (e.g., BBA, BFA, BA) must meet the requirements for a double degree (p.).

Graduation grade-point average criteria:

To satisfactorily complete a second major in computer engineering, a student must have a minimum grade-point

average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum. Visit the program website (<http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering/>) for additional information.

REQUIREMENTS

All computer engineering majors must fulfill the following requirements:

A total of 133 credits hours as outlined below.

A minimum technical GPA of 2.20 and SEAS GPA of 2.00. A student's technical GPA is calculated using all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semester of curriculum.

Recommended program of study

The plan of study lists all course requirements in sequence for the degree. Students should review this information carefully and consult their advisor before changing the sequence of any courses.

ECE 4925W	Electrical and Computer Engineering Capstone Project Lab III

2 Humanities or social sciences electives ²

1 Technical elective ³

¹ Course satisfies the university general education requirement in math, science, and writing.

² To satisfy the ECE humanities and social science/non-technical requirement, all electrical and computer engineering students must take five courses. Three of these five courses (one in humanities and two in social sciences) must be on the University General Education Requirement list. One of these five courses must be PHIL 2135 Ethics in Business and the Professions (or NSC 4176 Leadership and Ethics for students in the NROTC Program). The one remaining course can be a humanities/social science course, or a non-technical course related to public health, safety, and welfare; global cultural, social, environmental, and economic factors; innovation, entrepreneurship, and creativity. The non-technical course cannot focus on scientific/mathematical approaches, or on technology. All courses selected to satisfy this requirement must be taken for a minimum of 3 credits and be approved by the academic advisors.

³ Four 3-credit technical elective courses must be chosen with the approval of the advisor from upper division undergraduate (2000 to 4000 level) or graduate courses in engineering, computer science, mathematics, physical sciences, or biological sciences. At least one of the technical electives must be math or science course at the 2000-level or above. Exceptions from the rule must be approved by the advisor.

BACHELOR OF SCIENCE WITH A MAJOR IN COMPUTER SCIENCE

The bachelor of science (BS) in computer science program combines software development, computer systems and architecture, algorithms, project design, science, and mathematics to provide a strong foundation in computer science. Students are prepared to design and implement software needed for Internet operations, computer graphics and animation, secure systems, and applications for small, large, and embedded systems. In consultation with the advisor, students choose a technical track and a non-technical track. The technical track provides depth in a particular area of computer science, while the non-technical track enables students to stay current with the rapidly evolving field and to establish

the relevance of their studies in the ever-changing global environment. The program is accredited by ABET.

Visit the program website (<http://www.cs.seas.gwu.edu/bachelor-science-program/>) for additional information.

Bachelor of Science With a Second Major in Computer Science

Students enrolled in a BS program outside of the School of Engineering and Applied Sciences (SEAS) who wish to declare a second major in computer science must apply and be admitted to the second major program in computer science. Students in this program must follow the same degree requirements as those receiving a BS in computer science as their primary major. See the department web page (<http://www.seas.gwu.edu/department-computer-science/>) for additional information.

Criteria for admission:

To be considered for admission to the second major in computer science, a student must satisfy the following criteria:

- Prior completion of CSCI 1011, CSCI 1012, CSCI 1111, CSCI 1121, or CSCI 1112 with a minimum grade of B.
- Prior completion of MATH 1220 (<https://current.bulletin.gwu.edu/search/?P=MATH%201220>) and MATH 1221 (<https://current.bulletin.gwu.edu/search/?P=MATH%201221>), or MATH 1231 (<https://current.bulletin.gwu.edu/search/?P=MATH%201231>), with a minimum grade of B-.
- A minimum overall grade-point average of 3.0 at the time of application to the major.

Application Deadline

The application is due no later than the start of the 5th semester of study at GW or completion of the 60th credit, whichever comes first. Contact the School of Engineering and Applied Science Undergraduate Advising Office (<https://www.seas.gwu.edu/undergraduate-student-services-advising/>) for specific application deadlines.

Credits in residence requirement:

- For a second major, at least 24 credits in computer science courses must be completed in SEAS.

Graduation grade-point average criteria:

- To satisfactorily complete a second major in computer science, a student must have a minimum grade-point average of 2.2 in all courses taken that count towards the degree.

REQUIREMENTS

Residency Requirement

As part of a residency requirement, all computer science majors must take a minimum of 30 credits in computer science

courses at GW. Should a student pursue an approved study abroad program, credits earned in that program count toward this requirement. For a second major (p. 755), at least 24 credits in computer science courses must be completed in SEAS.

*Course satisfies the University General Education Requirement (<http://bulletin.gwu.edu/university-regulations/general-education/>) in mathematics, science, or writing. UW 1020 (<http://bulletin.gwu.edu/search/?P=UW%201020>) must be completed prior to enrolling in any writing course in the major, including CSCI 2441W (<http://bulletin.gwu.edu/search/?P=CSCI%202441W>) and CSCI 2541W (<http://bulletin.gwu.edu/search/?P=CSCI%202541W>).

Humanities and social science requirements: All BS in computer science students must take one humanities course and two social science courses from the Columbian College G-PAC Requirement (<https://advising.columbian.gwu.edu/general-education-courses/>) list and three additional humanities, social science, and/or non-technical courses from the SEAS General Education Requirement list (<https://www.seas.gwu.edu/humanities-and-social-science->

requirement/). All courses selected to satisfy this requirement must be at least 3 credits and approved by the faculty advisor.

Mathematics requirement: Can be met by taking MATH 1220 (<http://bulletin.gwu.edu/search/?P=MATH%201220>) and MATH 1221 (<http://bulletin.gwu.edu/search/?P=MATH%201221>) and MATH 1232 (<http://bulletin.gwu.edu/search/?P=MATH%201232>) or by taking MATH 1231 (<http://bulletin.gwu.edu/search/?P=MATH%201231>) and MATH 1232 (<http://bulletin.gwu.edu/search/?P=MATH%201232>). All students must take two MATH courses not counting MATH 1220 (<http://bulletin.gwu.edu/search/?P=MATH%201220>); students who take MATH 1220 (<http://bulletin.gwu.edu/search/?P=MATH%201220>) must take it as one of their unrestricted electives.

Science requirement: Can be met by choosing from BISC 1111 and BISC 1112; CHEM 1111 (<http://bulletin.gwu.edu/search/?P=CHEM%201111>) and CHEM 1112 (<http://bulletin.gwu.edu/search/?P=CHEM%201112>); and PHYS 1021 (<http://bulletin.gwu.edu/search/?P=PHYS%201021>) and PHYS 1022 (<http://bulletin.gwu.edu/search/?P=PHYS%201022>). The three science requirement courses must include a two-course sequence.

Statistics or linear algebra requirement: Students must take both a statistics class, and a linear algebra class. The Statistics requirement can be met by choosing from APSC 3115, CSCI 3362 (<http://bulletin.gwu.edu/search/?P=CSCI%203362>) or CSCI 6362 (<http://bulletin.gwu.edu/search/?P=CSCI%206362>), CSCI 4341 (<http://bulletin.gwu.edu/search/?P=CSCI%204341>), or STAT 4157 (<http://bulletin.gwu.edu/search/?P=STAT%204157>). The Linear algebra requirement can be met by taking one of MATH 2184, CSCI 4342, or EMSE 2705. Students who were admitted prior to fall 2014 may count STAT 1051 (<http://bulletin.gwu.edu/search/?P=STAT%201051>) and STAT 1053 (<http://bulletin.gwu.edu/search/?P=STAT%201053>) toward the statistics requirement, if they took the course prior to the spring 2015 semester. Students pursuing a pre-medical concentration may substitute the linear algebra requirement with a science course required by the pre-medical requirements.

Non-technical track requirement

All BS in computer science students must complete a non-technical track (<https://www.cs.seas.gwu.edu/non-technical-tracks/>) that consists of at least three non-technical courses (for a minimum of 9 credits) with prior approval of the faculty advisor. To satisfy this requirement, students may choose one of the following:

- Technology and law—three pre-law related courses, for a minimum total of 9 credits, from the following: CSCI 4532 (<http://bulletin.gwu.edu/search/?P=CSCI%204532>), EMSE 6018 (<http://bulletin.gwu.edu/search/?P=EMSE%206018>), MAE 3171 (<http://bulletin.gwu.edu/search/?P=MAE%203171>), and MAE 4172 (<http://bulletin.gwu.edu/search/?P=MAE%204172>). Additional courses may be included with prior approval of the faculty advisor.

- Business—three courses, for a minimum total of 9 credits, in Business Administration (BADM) coursework. Courses that may be taken as part of this track include ACCY 2001 (<http://bulletin.gwu.edu/search/?P=ACCY%202001>), ACCY 2002 (<http://bulletin.gwu.edu/search/?P=ACCY%202002>), BADM 3401 (<http://bulletin.gwu.edu/search/?P=BADM%203401>), and BADM 3501 (<http://bulletin.gwu.edu/search/?P=BADM%203501>). Other BADM courses may be included with prior approval of the faculty advisor.
- Premedical—three courses, for a minimum total of 9 credits, from the following: BISC 1111 (<http://bulletin.gwu.edu/search/?P=BISC%201111>) and BISC 1112 (<http://bulletin.gwu.edu/search/?P=BISC%201112>); CHEM 1111 (<http://bulletin.gwu.edu/search/?P=CHEM%201111>) and CHEM 1112 (<http://bulletin.gwu.edu/search/?P=CHEM%201112>), CHEM 2151 (<http://bulletin.gwu.edu/search/?P=CHEM%202151>), CHEM 2152 (<http://bulletin.gwu.edu/search/?P=CHEM%202152>), CHEM 2153 (<http://bulletin.gwu.edu/search/?P=CHEM%202153>), CHEM 2154 (<http://bulletin.gwu.edu/search/?P=CHEM%202154>), PHYS 1011 (<http://bulletin.gwu.edu/search/?P=PHYS%201011>) and PHYS 1012 (<http://bulletin.gwu.edu/search/?P=PHYS%201012>), or PHYS 1021 (<http://bulletin.gwu.edu/search/?P=PHYS%201021>) and PHYS 1022 (<http://bulletin.gwu.edu/search/?P=PHYS%201022>). Additional courses may be included with prior approval of the faculty advisor.
- Project management and leadership—three courses, for a minimum total of 9 credits, of project management, communication, leadership, or engineering management coursework, including COMM 1041 (<http://bulletin.gwu.edu/search/?P=COMM%201041>), COMM 1042 (<http://bulletin.gwu.edu/search/?P=COMM%201042>), COMM 3174 (<http://bulletin.gwu.edu/search/?P=COMM%203174>), EMSE 4410 (<http://bulletin.gwu.edu/search/?P=EMSE%204410>), EMSE 6001 (<http://bulletin.gwu.edu/search/?P=EMSE%206001>), EMSE 6005 (<http://bulletin.gwu.edu/search/?P=EMSE%206005>), MGT 3201 (<http://bulletin.gwu.edu/search/?P=MGT%203201>), NSC 2175 (<http://bulletin.gwu.edu/search/?P=NSC%202175>), NSC 4176 (<http://bulletin.gwu.edu/search/?P=NSC%204176>), ORSC 1109 (<http://bulletin.gwu.edu/search/?P=ORSC%201109>), and ORSC 2116 (<http://bulletin.gwu.edu/search/?P=ORSC%202116>). Additional courses may be included with prior approval of the faculty advisor.
- Global engineering—three non-technical courses, for a minimum total of 9 credits, in one of the following options with prior approval the faculty advisor: (1) while studying abroad; (2) in a single foreign language; (3) in International Affairs; or, (4) in aspects of non-English speaking cultures from the fields of anthropology, history, literatures, geography, political science, or religion.
- Environment and climate change—three courses, for a minimum total of 9 credits, related to the environment and climate change which may include BISC 2454 (<http://bulletin.gwu.edu/search/?P=BISC%202454>), BISC 3460

(<http://bulletin.gwu.edu/search/?P=BISC%203460>), CE 6503 (<http://bulletin.gwu.edu/search/?P=CE%206503>), CHEM 2085 (<http://bulletin.gwu.edu/search/?P=CHEM%202085>), ECON 2136 (<http://bulletin.gwu.edu/search/?P=ECON%202136>), EMSE 6200 (<http://bulletin.gwu.edu/search/?P=EMSE%206200>), EMSE 6220 (<http://bulletin.gwu.edu/search/?P=EMSE%206220>), EMSE 6260 (<http://bulletin.gwu.edu/search/?P=EMSE%206260>), EMSE 6225 (<http://bulletin.gwu.edu/search/?P=EMSE%206225>), EMSE 6235 (<http://bulletin.gwu.edu/search/?P=EMSE%206235>), EMSE 6230 (<http://bulletin.gwu.edu/search/?P=EMSE%206230>), GEOG 2108 (<http://bulletin.gwu.edu/search/?P=GEOG%202108>), GEOG 2110 (<http://bulletin.gwu.edu/search/?P=GEOG%202110>), GEOG 2134 (<http://bulletin.gwu.edu/search/?P=GEOG%202134>), GEOG 2136 (<http://bulletin.gwu.edu/search/?P=GEOG%202136>), and GEOG 3132 (<http://bulletin.gwu.edu/search/?P=GEOG%203132>). Additional courses may be included with prior approval of the faculty advisor.

- Public health—three courses, for a minimum total of 9 credits, in public health coursework that may include PUBH 1101 (<http://bulletin.gwu.edu/search/?P=PUBH%201101>), PUBH 1102 (<http://bulletin.gwu.edu/search/?P=PUBH%201102>), PUBH 2114 (<http://bulletin.gwu.edu/search/?P=PUBH%202114>), PUBH 2115 (<http://bulletin.gwu.edu/search/?P=PUBH%202115>), and PUBH 3133 (<http://bulletin.gwu.edu/search/?P=PUBH%203133>). Additional courses may be included with prior approval of the faculty advisor.
- Individually designed—student select a series of related three non-technical courses (for a minimum of 9 credits). Any course completed for this track must be approved by the faculty advisor prior to completing the course.
- Special option: minor or second major—students can combine at least three non-technical courses (for a minimum total of 9 credits), not closely related to the discipline of computing allotted to their non-technical track with their unrestricted electives to complete a non-technical minor or second major.

Computer science technical track requirements

All students in the BS in computer science program are required to take four technical courses (for a minimum of 12 credits) of computer science coursework for their technical track. All courses must have CSCI 2113 (<http://bulletin.gwu.edu/search/?P=CSCI%202113>) as a prerequisite or within the prerequisite chain. Two of these technical classes must be taken from within core technical areas. Guidance on these areas is available on the Department of Computer Science website (<https://www.cs.seas.gwu.edu/>). The faculty advisor's documented approval is required before courses may be applied towards degree completion.

Unrestricted electives

All students in the BS in Computer Science are required to complete four unrestricted elective courses. All courses used

to fulfill this requirement must have the explicit, documented approval from the faculty adviser, even when such courses are required for a minor or have transferred to the University as Advanced Placement (AP) credit. Guidance concerning unrestricted electives is available on the Department of Computer Science website (<https://www.cs.seas.gwu.edu/>).

The following guidelines and/or restrictions apply to selecting courses to satisfy this requirement:

1. Additional CSCI courses numbered above 2461 may count toward this requirement. Students may take a maximum of two research and independent study courses, for which the student must provide documentation of output, such as papers, presentations, or software. For courses from other departments, the student must obtain the approval of the faculty advisor.
2. Approved courses from the SEAS Humanities and Social Science Electives (<https://www.seas.gwu.edu/humanities-and-social-science-requirement/>) lists may count toward this requirement.
3. Approved courses listed in non-technical track lists may count toward this requirement, but not both. Such a course cannot count towards both the non-technical track requirement and as an unrestricted elective.
4. Computer science courses taught by another department generally do not count toward this requirement. Courses that significantly overlap with, or are not as advanced as, the required content for the computer science degree program do not count toward this requirement. Such courses include, but are not limited to, the following: BADM 2301 (<http://bulletin.gwu.edu/search/?P=BADM%202301>), EMSE 4197 (<http://bulletin.gwu.edu/search/?P=EMSE%204197>), ISTM 3119 (<http://bulletin.gwu.edu/search/?P=ISTM%203119>), ISTM 4120 (<http://bulletin.gwu.edu/search/?P=ISTM%204120>), ISTM 4121 (<http://bulletin.gwu.edu/search/?P=ISTM%204121>), ISTM 4123 (<http://bulletin.gwu.edu/search/?P=ISTM%204123>), STAT 1051 (<http://bulletin.gwu.edu/search/?P=STAT%201051>), STAT 1053 (<http://bulletin.gwu.edu/search/?P=STAT%201053>), and STAT 1129 (<http://bulletin.gwu.edu/search/?P=STAT%201129>).
5. Courses that significantly overlap with any other course(s) used towards the computer science degree, regardless of the department(s) in which they are taken, may not count toward this requirement.
6. Because of content overlap among courses in general, some courses may be approved for one student and not for another, based on other courses the student has taken. For example, if a student uses PHYS 1021 (<http://bulletin.gwu.edu/search/?P=PHYS%201021>) towards either the science, math/science, or unrestricted elective requirement, PHYS 1011 (<http://bulletin.gwu.edu/search/?P=PHYS%201011>) may not be used to fulfill this

requirement, but PHYS1011 would count for a student who has not taken PHYS 1021 (<http://bulletin.gwu.edu/search/?P=PHYS%201021>).

BACHELOR OF SCIENCE WITH A MAJOR IN ELECTRICAL ENGINEERING

Electrical engineers design the enabling technology for all applications of electricity; examples include energy, telecommunications, the Internet, biomedical instrumentation, and electromagnetic applications. The bachelor of science with a major in electrical engineering degree program focuses on signal processing; communication theory and practice; voice, data, video and multimedia communication networks; very large scale integrated (VLSI) circuit design and applications; and control and power systems. Students can take electives in advanced topics, such as optical networks, broadband wireless networks, and technologies for the next generation of information systems.

The electrical engineering program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

Bachelor of Science With a Second Major in Electrical Engineering

Any undergraduate student who is enrolled at GW may declare a second major in electrical engineering only if their primary degree is a Bachelor of Science. The student must meet the degree requirements for Bachelor of Science in electrical engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students in other bachelor's degree programs (e.g., BA, BBA, BFA) are required to complete a double degree (p.).

Graduation grade-point average criteria:

To satisfactorily complete a second major in electrical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

Visit the program website (<http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering/>) for additional information.

REQUIREMENTS

All electrical engineering majors must fulfill the following requirements:

A total of 132 credits hours outlined below.

A minimum technical GPA of 2.20 and SEAS GPA of 2.00.

A student's technical GPA is calculated using all technical

engineering courses outlined in the fifth, sixth, seventh, and eighth semester of curriculum.

Recommended program of study

The plan of study lists all course requirements in sequence for the degree. Students should review this information carefully and consult their advisor before changing the sequence of any courses.

¹ Course satisfies the University General Education Requirement (p. 42) in math, science, and writing.

² To satisfy the ECE humanities and social science/non-technical requirement, all electrical and computer engineering

students must take five courses. Three of these five courses (one in humanities and two in social sciences) must be on the University General Education Requirement list. One of these five courses must be PHIL 2135 Ethics in Business and the Professions (or NSC 4176 Leadership and Ethics for students in the NROTC Program). The one remaining course can be a humanities/social science course, or a non-technical course related to public health, safety, and welfare; global cultural, social, environmental, and economic factors; innovation, entrepreneurship, and creativity. The non-technical course cannot focus on scientific/mathematical approaches, or on technology. All courses selected to satisfy this requirement must be taken for a minimum of 3 credits and be approved by the academic advisors.

³ Three 3-credit technical elective courses must be selected with the approval of the advisor from upper-division undergraduate (2000 to 4000 level) or graduate courses in engineering, computer science, mathematics, physical sciences, or biological sciences. Exceptions must be approved by the advisor.

⁴ The two ECE restricted electives must be selected with the approval of the advisor from ECE courses at the 3000 level or above. Exceptions must be approved by the advisor.

*Course satisfies the university general education requirement in math, science, and writing.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 42); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (<https://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering/>). At least one humanities course must be selected from the University General Education Requirement list; the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list.

The two ECE-restricted electives must be selected from upper level ECE courses with approval of the advisor. Three 3-credit technical elective courses must be chosen with the approval of the advisor from advanced undergraduate or graduate courses in engineering, computer science, mathematics, physical sciences, or biological sciences.

Visit the program website (<http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering/>) for additional information.

BACHELOR OF SCIENCE WITH A MAJOR IN ELECTRICAL ENGINEERING, ENERGY OPTION

The bachelor of science with a major in electrical engineering, energy option prepares students to work in technical energy fields such as electric utility companies and in research

into improved methods of generation, transmission, and distribution of electrical energy.

The electrical engineering program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

Bachelor of Science With a Second Major in Electrical Engineering

Any undergraduate student who is enrolled at GW may declare a second major in electrical engineering only if their primary degree is a bachelor of science. The student must meet the degree requirements for bachelor of science in electrical engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students earning other bachelor degrees (e.g., BA, BBA, BFA) must complete a double degree (p.).

Graduation grade-point average criteria:

To satisfactorily complete a second major in electrical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

Visit the program website (<http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering/>) for additional information.

REQUIREMENTS

Additional graduation requirements that all electrical engineering–energy option majors must fulfill:

A total of 131 credits hours outlined below.

A minimum technical GPA of 2.20 and SEAS GPA of 2.00. A student’s technical GPA is calculated using all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semester of curriculum.

Recommended program of study

The plan of study lists all course requirements in sequence for the degree. Students should review this information carefully and consult their advisor before changing the sequence of any courses.

Three of these five courses (one in humanities and two in social sciences) must be on the University General Education Requirement list. One of these five courses must be PHIL 2135 Ethics in Business and the Professions (or NSC 4176 Leadership and Ethics for students in the NROTC Program). The one remaining course can be a humanities/social science course, or a non-technical course related to public health, safety, and welfare; global cultural, social, environmental, and economic factors; innovation, entrepreneurship, and creativity. The non-technical course cannot focus on scientific/mathematical approaches, or on technology. All courses selected to satisfy this requirement must be taken for a minimum of 3 credits and be approved by the academic advisors.

³ One 3-credit technical elective course must be selected with the approval of the advisor from upper-division undergraduate (2000 to 4000 level) or graduate courses in engineering, computer science, mathematics, physical sciences, or

biological sciences. Exceptions must be approved by the advisor.

BACHELOR OF SCIENCE WITH A MAJOR IN ELECTRICAL ENGINEERING, MEDICAL PREPARATION OPTION

The bachelor of science with a major in electrical engineering, medical option degree program prepares students for application to medical school. Students are prepared to work in various health sciences fields, to conduct research toward development of electronic equipment to assist in diagnosing and treating disease, or to continue as a graduate student in engineering with exceptional qualifications for biomedical engineering.

The electrical engineering program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

Bachelor of Science With a Second Major in Electrical Engineering

Any undergraduate student who is enrolled at GW may declare a second major in electrical engineering only if their primary degree is a Bachelor of Science. The student must meet the degree requirements for bachelor of science in electrical engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students earning other bachelor degrees (e.g., BA, BBA, BFA) must complete a double degree (p.).

Graduation grade-point average criteria:

To satisfactorily complete a second major in electrical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

Visit the program website (<http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering/>) for additional information.

REQUIREMENTS

Electrical engineering–medical prep option majors must fulfill the following requirements:

A total of 134 credits hours as outlined below.

A minimum technical GPA of 2.20 and SEAS GPA of 2.00. A student's technical GPA is calculated using all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semester of curriculum.

Recommended program of study

The plan of study lists all course requirements in sequence for the degree. Students should review this information carefully

and consult their advisor before changing the sequence of any courses.

Exceptions must be approved by the advisor.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The Department of Mechanical and Aerospace Engineering offers the bachelor of science with a major in mechanical engineering degree program to prepare students for work in these fields. The mechanical engineering (ME) program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

Visit the program website (<http://www.mae.seas.gwu.edu/programs-degrees/>) for additional information.

Bachelor of Sciences with a Second Major in Mechanical Engineering

Any undergraduate student who is enrolled at GW may declare a second major in mechanical engineering only if their primary degree is a bachelor of science. The student must meet the degree requirements for a bachelor of science in mechanical engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students earning other bachelor's degrees (e.g., BA, BBA, BFA) must meet the requirements for a double degree (p.).

¹Course satisfies the University General Education Requirement (p. 42) in math, science, and writing.

²To satisfy the SEAS Humanities and Social Science requirement, all mechanical engineering students must take one humanities course and two social Sciences courses from University General Education requirement; PHIL 2135, and two additional humanities or social science or non-technical courses from the MAE Department's pre-approved list of electives. All courses selected to satisfy this requirement must be at least 3-credits each. NOTE: Students in the patent law concentration must take MAE 2170 in lieu of one of the additional humanities or social science or non-technical course.

³All technical electives must be approved by the undergraduate advisor. On a case-by-case basis, technical electives may be chosen from other departments if approved by both the undergraduate advisor and the department chair.

Code	Title	Credits
Technical electives are chosen from MAE courses in the 3000, 4000, and 6000 series, excluding:		
MAE 3171	Patent Law for Engineers	
MAE 4172	Engineering Design and the Patent System	
MAE 6298	Research	
MAE 6998 & MAE 6999	MS Thesis Research and MS Thesis Research	

Visit the program website (<http://www.mae.seas.gwu.edu/programs-degrees/>) for additional information.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, AEROSPACE OPTION

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The bachelor of science with a major in mechanical engineering, aerospace option degree program prepares students to work in the aerospace industry or to pursue graduate study in aerospace engineering. It provides a strong foundation in aerodynamics, airplane performance, propulsion, aerospace structures, orbital mechanics, spacecraft dynamics, and aircraft and spacecraft design. The mechanical engineering (ME) program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

Visit the program website (<https://www.mae.seas.gwu.edu/programs-degrees/>) for more information.

Bachelor of Sciences with a Second Major in Mechanical Engineering, Aerospace Option

Any undergraduate student who is enrolled at GW may declare a second major in mechanical engineering only if his or her primary degree is a BS. The student must meet the degree requirements for a bachelor of science in mechanical engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students earning other degrees (e.g., BA, BBA, BFA) must meet the requirements for a double degree (p.).

Graduation grade-point average criteria:

To satisfactorily complete a second major in biomedical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

¹ Course satisfies the University General Education Requirement (p. 42) in math, science, and writing.

² To satisfy the SEAS humanities and social science requirement, all mechanical engineering students must take one (1) humanities course and two (2) social sciences courses from the University General Education Requirement (p. 42); PHIL 2135 Ethics in Business and the Professions; and two (2) additional humanities or social science or non-technical courses from the MAE Department's pre-approved list of electives. Each course selected to satisfy this requirement must be taken for at least 3 credits. NOTE: Students in the patent law concentration must take MAE 2170 History and Impact of the U.S. Patent System in lieu of one of the additional humanities or social science or non-technical course.

³ Space: Students take MAE 3145 Orbital Mechanics and Spacecraft Dynamics in the fifth semester and MAE 6249 Spacecraft Design in the eighth semester.

Aero: Students take MAE 4163 Airplane Performance in the seventh semester and MAE 6247 Aircraft Design I in the eighth semester.

⁴ All technical electives must be approved by the undergraduate advisor. On a case-by-case basis, technical electives may be chosen from other departments if approved by both the undergraduate advisor and the department chair. Technical electives are chosen from MAE courses in the 3000, 4000, and 6000 series, excluding: MAE 3171 Patent Law for Engineers, MAE 4172 Engineering Design and the Patent System, MAE 6298 Research, MAE 6998 MS Thesis Research, and MAE 6999 MS Thesis Research. Visit the program website (<http://www.mae.seas.gwu.edu/programs-degrees/>) for additional information.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, BIOMECHANICAL OPTION

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing,

power and propulsion systems, robotics, and control systems. The bachelor of science with a major in mechanical engineering, biomechanical option degree program prepares students to work in the biomedical industry or to pursue graduate study in biomedical engineering. It provides a strong foundation in human anatomy and physiology, biomechanics, biomaterials, and design of biomedical devices. The mechanical engineering (ME) program is accredited by the Accreditation Commission of ABET (<https://www.abet.org/>).

Visit the program website (<http://www.mae.seas.gwu.edu/programs-degrees/>) for additional information.

Bachelor of Sciences with a Second Major in Mechanical Engineering, Biomedical Option

Any undergraduate student who is enrolled at GW may declare a second major in mechanical engineering only if his or her primary degree is a BS. The student must meet the degree requirements for a bachelor of science in mechanical engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students earning other degrees (e.g., BA, BBA, BFA) must meet the requirements for a double degree (p.).

Graduation grade-point average criteria:

To satisfactorily complete a second major in biomedical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

¹ Course satisfies the university general education requirement in math, science, and writing.

² To satisfy the SEAS humanities and social science requirement, all mechanical engineering students must take one humanities course and two social science courses from the University General Education Requirement (p. 42); PHIL 2135, and two additional humanities or social science or non-technical courses from the MAE Department's pre-approved list of electives. Each course selected to satisfy this requirement must be taken for at least 3 credits. NOTE: Students in the patent law concentration must take MAE 2170 in lieu of one of the additional humanities or social science or non-technical course.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, PATENT LAW OPTION

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The bachelor of science with a major in mechanical engineering, patent law option degree program provides a strong foundation in fundamental principles of patent law and the influences of the U.S. patent system on modern engineering design. Students in this option obtain skills and knowledge that can lead to work as a technical specialist in a patent law firm or in the patent department of an industrial employer. The option provides excellent preparation for pursuit of a law degree that may focus on intellectual

property law. The mechanical engineering (ME) program is accredited by the Accreditation Commission of ABET (<https://www.abet.org/>).

Visit the program website (<http://www.mae.seas.gwu.edu/programs-degrees/>) for additional information.

Bachelor of Sciences with a Second Major in Mechanical Engineering, Patent Law Option

Any undergraduate student who is enrolled at GW may declare a second major in mechanical engineering only if his or her primary degree is a BS. The student must meet the degree requirements for a bachelor of science in mechanical engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students earning other degrees (e.g., BA, BBA, BFA) must meet the requirements for a double degree (p.).

Graduation grade-point average criteria:

To satisfactorily complete a second major in biomedical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

Visit the program website (<http://www.mae.seas.gwu.edu/programs-degrees/>) for additional information.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, ROBOTICS OPTION

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The bachelor of science with a major in mechanical

engineering, robotics option degree program prepares students to work in the robotics industry or to pursue graduate study in robotics engineering. It provides a strong foundation in robotic mechanisms design, analysis, and integration; kinematics, dynamics, and control of robots; mechatronics design; sensing, actuation, and measurement; microprocessors for robotic systems; robotic haptics; and topics on artificial intelligence. The mechanical engineering (ME) program is accredited by the Accreditation Commission of ABET (<https://www.abet.org/>).

Visit the program website (<http://www.mae.seas.gwu.edu/programs-degrees/>) for additional information.

Bachelor of Sciences with a Second Major in Mechanical Engineering, Robotics Option

Any undergraduate student who is enrolled at GW may declare a second major in mechanical engineering only if his or her primary degree is a BS. The student must meet the degree requirements for a bachelor of science in mechanical engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students earning other degrees (e.g., BA, BBA, BFA) must meet the requirements for a double degree (p.).

Graduation grade-point average criteria:

To satisfactorily complete a second major in biomedical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

NOTE: Students in the patent law concentration must take MAE 2170 History and Impact of the U.S. Patent System in lieu of one of the additional humanities or social sciences or non-technical course.

³Robotics option students must take two technical electives. All technical electives must be approved by the undergraduate advisor. On a case-by-case basis, technical electives may be chosen from other departments if approved by both the undergraduate advisor and the department chair. Technical electives are chosen from MAE courses in the 3000, 4000, and 6000 series, excluding: MAE 3171 Patent Law for Engineers, MAE 4172 Engineering Design and the Patent System, MAE 6298 Research, MAE 6998 MS Thesis Research, and MAE 6999 MS Thesis Research.

⁴Robotics option students must take one 3-credit robotics elective, which must be selected from the following: MAE 6246 Electromechanical Control Systems, MAE 6254 Applied Nonlinear Control, BME 4835 Introduction to Assistive Robotics, BME 4489 Socially Assistive Robotics and Interactive Learning, or a technical elective course relevant to robotics with

the approval of the undergraduate advisor and department chair.

Visit the program website (<https://www.mae.seas.gwu.edu/programs-degrees/>) for additional information.

BACHELOR OF SCIENCE WITH A MAJOR IN SYSTEMS ENGINEERING

The bachelor of science with a major in systems engineering degree program provides students with a broad and solid education in the basics of mathematical modeling, software and information systems, and the treatment of uncertainty. Systems engineering can be applied in many areas, including communications, energy, environment, finance, health care, information technology, marketing, national defense, project management, software development, and transportation. The program emphasizes analytical thinking and fosters communication skills and awareness of the current professional world in order to prepare students for graduate education or productive professional employment.

Bachelor of Science with a Second Major in Systems Engineering

Any undergraduate student who is enrolled at GW may declare a second major in systems engineering only if their primary degree is a Bachelor of Science. The student must complete all degree requirements for the Bachelor of Science in systems engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students enrolled in other bachelor's degree programs (e.g., BA, BBA, BFA) are required to complete the major as a double degree (p.).

Graduation grade-point average criteria:

To satisfactorily complete a second major in electrical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

Visit the program website (<http://www.emse.seas.gwu.edu/bachelor-science-systems-engineering/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

- Completion of a total of 129 credits as outlined below.
- Completion of an appropriate internship/co-op experience during the last two years of the program. This requirement may be satisfied by an approved full-time summer position after the second or third year, or by one or two approved part-time positions requiring 15 to 20 hours of work per week during two of the final four semesters. The position may be paid or unpaid. A position obtained through the GW Center for Career Services (<https://>

careerservices.gwu.edu/) usually is acceptable. Consult the faculty advisor for approval.

- A minimum technical GPA of 2.2 and SEAS GPA of 2.0. All technical courses taken during the fifth through eighth semesters, as outlined by the 4-year curriculum sheet respective to each major and approved by the student's faculty advisor, are counted towards the student's technical GPA.
- Completion of an approved technical minor that uses the five professional electives courses built into the curriculum.

Plan of Study

The plan of study lists in sequence all course requirements for the degree. Students should review this information carefully and speak to their advisor before changing the sequence of any of these courses.

¹Course satisfies the university general education requirement in math, science, and writing.

² One course, or pair of courses, from the following for a total of 4 credits: BISC 111 or BISC 1115 and BISC 1125; or BISC 1112 or BISC 1116 and BISC 1126; or CHEM 1111; or CHEM 1112. Note that Honors Program students and those who have been invited to join the Scholars in Quantitative and Natural Sciences (SQNS) Program take BISC 1120 instead of BISC 1125 for the lab component.

³ Computing track elective requirements may be met with the courses in either option in the list directly above.

⁴ One social and behavioral sciences course and one humanities course must be selected from the University General Education Requirement (p. 42) list.

⁵ In consultation with the faculty advisor, the student selects two approved courses with engineering topics, both offered by the same SEAS department.

⁶ Professional electives: Each systems engineering major will gain specific expertise in a chosen technical area by taking a five-course sequence leading to a minor from another

department of the University. Technical electives are selected with the approval of the student's academic advisor. Areas frequently chosen are computer science, economics, finance, management, mathematics, naval science, statistics, or specific fields of engineering. Consult the advisor for other approved areas and requirements.

Internship requirement—All EMSE majors are required to complete an appropriate internship/co-op experience during the last two years of the program. This requirement may be satisfied by an approved full-time summer position after the second or third year, or by one or two approved part-time positions requiring 15 to 20 hours per week during two of the final four semesters. A position obtained through the GW Career Center (<http://gwired.gwu.edu/career/>) will usually be acceptable; the position may be either paid or unpaid. Consult the advisor for approval.

DUAL BACHELOR OF ARTS WITH A MAJOR IN APPLIED SCIENCE AND TECHNOLOGY AND MASTER OF SCIENCE IN THE FIELD OF COMPUTER SCIENCE

The School of Engineering and Applied Science offers a dual bachelor of arts with a major in applied science and technology (p. 738) (with a minor in computer science (p. 788)) and master of science in the field of computer science (p. 795) degree program. All requirements for both degrees and the minor program must be fulfilled.

6 graduate credits (two courses) may be shared between the two degrees, 3 credits of which should be in CSCI 6011. Students may substitute comparable undergraduate coursework in systems/architecture for CSCI 6011, in which case another 6000-level course must be taken in its place. Students must select two of the following courses as electives for the minor program: CSCI 3212, CSCI 3410, or CSCI 3411. CSCI 6212 may be substituted for CSCI 3212. However, CSCI 6212 cannot be counted as one of the two graduate courses taken during the undergraduate program.

Students must have a minimum 3.4 technical GPA at the time of graduation from the undergraduate program to continue to the master's program as part of a dual degree.

DUAL BACHELOR OF ARTS WITH A MAJOR IN APPLIED SCIENCE AND TECHNOLOGY AND MASTER OF SCIENCE IN THE FIELD OF CYBERSECURITY IN COMPUTER SCIENCE

The School of Engineering and Applied Science offers a dual bachelor of arts with a major in applied science and technology (p. 738) (with a minor in computer science (p. 788)) and master of science in the field of cybersecurity in computer science (p. 796) degree program. All requirements for both degrees and the minor program must be fulfilled.

6 graduate credits (two courses) may be shared between the two degrees, 3 credits of which should be in CSCI 6011. Students may substitute comparable undergraduate coursework in systems/architecture for CSCI 6011, in which case another 6000-level course must be taken in its place. Students must select two of the following courses as electives for the minor program: CSCI 3212, CSCI 3410, or CSCI 3411. CSCI 6212 may be substituted for CSCI 3212. However, CSCI 6212 cannot be counted as one of the two graduate courses taken during the undergraduate program.

Students must have a minimum 3.4 technical GPA at the time of graduation from the undergraduate program to continue to the master's program as part of a dual degree.

DUAL BACHELOR OF ARTS WITH A MAJOR IN APPLIED SCIENCE AND TECHNOLOGY AND MASTER OF SCIENCE IN THE FIELD OF DATA ANALYTICS

The School of Engineering and Applied Science offers a dual bachelor of arts with a major in applied science and technology (p. 738) and master of science in the field of data analytics (p. 798) degree program. All requirements for both degrees must be fulfilled.

6 graduate credits (two courses) may be shared between the two degrees, 3 credits of which should be in CSCI 6011. Students may substitute comparable undergraduate coursework in systems/architecture for CSCI 6011, in which case another 6000-level course must be taken in its place. Students must select two of the following courses as electives for the minor program: CSCI 3212, CSCI 3410, or CSCI 3411. CSCI 6212 may be substituted for CSCI 3212. However, CSCI 6212 cannot be counted as one of the two graduate courses taken during the undergraduate program.

Students must have a minimum 3.4 technical GPA at the time of graduation from the undergraduate program to continue to the master's program as part of a dual degree.

DUAL BACHELOR OF ARTS WITH A MAJOR IN COMPUTER SCIENCE AND MASTER OF SCIENCE IN THE FIELD OF COMPUTER SCIENCE

The School of Engineering and Applied Science offers a dual bachelor of arts with a major in computer science (p. 740) and master of science in the field of computer science (p. 795) degree program. The program allows students to take 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year. Visit the program website (<https://www.seas.gwu.edu/bams-or-bsms-computer-science/>) for additional information.

DUAL BACHELOR OF ARTS WITH A MAJOR IN COMPUTER SCIENCE AND MASTER OF SCIENCE IN THE FIELD OF CYBERSECURITY IN COMPUTER SCIENCE

The School of Engineering and Applied Science offers a dual bachelor of arts with a major in computer science (p. 740) and master of science in the field of cybersecurity in computer science (p. 796) degree program. The program allows students to take 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year. Visit the program website (<https://www.seas.gwu.edu/babs-computer-sciencems-cybersecurity-computer-science/>) for additional information.

DUAL BACHELOR OF SCIENCE WITH A MAJOR IN BIOMEDICAL ENGINEERING AND MASTER OF ENGINEERING IN THE FIELD OF REGULATORY BIOMEDICAL ENGINEERING

The School of Engineering and Applied Science offers a dual bachelor of science with a major in biomedical engineering (p. 743) and master of engineering in the field of regulatory biomedical engineering (p. 791) degree program. The program allows students to take up to 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year. Visit the program website (<https://graduate.seas.gwu.edu/five-year-program/>) for additional information.

DUAL BACHELOR OF SCIENCE WITH A MAJOR IN BIOMEDICAL ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF BIOMEDICAL ENGINEERING

The School of Engineering and Applied Science offers a dual bachelor of science with a major in biomedical engineering (<http://bulletin.gwu.edu/engineering-applied-science/biomedical-engineering/bs/>) and master of engineering in the field of regulatory biomedical engineering (<http://bulletin.gwu.edu/engineering-applied-science/biomedical-engineering/ms/>) degree program. The program allows students to take up to 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year. Visit the program website (<https://graduate.seas.gwu.edu/bs-ms-biomedical-engineering/>) for additional information.

DUAL BACHELOR OF SCIENCE WITH A MAJOR IN BIOMEDICAL ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF COMPUTER SCIENCE

The School of Engineering and Applied Science offers a dual bachelor of science with a major in biomedical engineering and masters of science in the field of computer science degree program. 6 credits are shared between degrees. Students are expected to complete the minor program in computer science while enrolled in their undergraduate program. All requirements for both the bachelor's and master's programs must be fulfilled.

DUAL BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF ENVIRONMENTAL ENGINEERING

The School of Engineering and Applied Science offers a dual bachelor of science with a major in civil engineering (p. 744) and master of science in the field of environmental engineering (p. 793) degree program. The program allows students to take 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year. Visit the program website (<https://www.cee.seas.gwu.edu/five-year-dual-degree-program-bs-and-ms-civil-engineering/>) for additional information.

DUAL BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF STRUCTURAL ENGINEERING

The School of Engineering and Applied Science offers a dual bachelor of science with a major in civil engineering (p. 744) and master of science in the field of structural engineering (<https://www.programs.gwu.edu/graduate/structural-engineering/>) degree program. The program allows students to take up to 9 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year. Visit the program website (<https://www.cee.seas.gwu.edu/five-year-dual-degree-program-bs-and-ms-civil-engineering/>) for additional information.

REQUIREMENTS

Recommended program of study

Code	Title	Credits
First semester		
CE 1010	Introduction to Civil and Environmental Engineering	
CHEM 1111	General Chemistry I *	
MATH 1231	Single-Variable Calculus I *	
SEAS 1001	Engineering Orientation	
UW 1020	University Writing *	
One humanities or social sciences elective **		
Second semester		
CSCI 1121	Introduction to C Programming	
MAE 1004	Engineering Drawing and Computer Graphics	
MATH 1232	Single-Variable Calculus II *	
PHYS 1021	University Physics I *	
One humanities or social sciences elective **		
Third semester		
APSC 2057	Analytical Mechanics I	
APSC 2113	Engineering Analysis I	
MATH 2233	Multivariable Calculus *	
PHYS 1022	University Physics II *	
One humanities or social sciences elective **		
Fourth semester		
APSC 2058	Analytical Mechanics II	
CE 2210	Engineering Computations	
CE 2220	Introduction to the Mechanics of Solids	
CE 2710	Introduction to Transportation Engineering	

GEOL 1001 Physical Geology

One humanities or social sciences elective **

Fifth semester

APSC 3115	Engineering Analysis III
CE 3110W	Civil Engineering Materials
CE 3111W	Civil Engineering Materials Lab
CE 3230	Structural Theory I
CE 3720	Highway Engineering and Design
MAE 3126	Fluid Mechanics I

One humanities or social sciences course **

Sixth semester

CE 3240	Structural Theory II
CE 3310	Reinforced Concrete Structures
Civil engineering elective	
CE 3520	Environmental Engineering I: Water Resources and Water Quality
CE 3521	Environmental Engineering Laboratory
CE 3610	Hydraulics
CE 3611	Hydraulics Laboratory (One humanities or social sciences elective)

One humanities or social sciences elective **

Seventh semester

CE 4320	Metal Structures
CE 4341	Senior Design Project I
CE 4410	Introduction to Geotechnical Engineering
CE 4411	Geotechnical Engineering Laboratory
CE 4530	Environmental Engineering II: Water Supply and Pollution Control
CE 4620	Hydrology and Hydraulic Design

One engineering elective

Eighth semester

CE 4330W	Contracts and Specifications
CE 4342	Senior Design Project II

Two engineering electives

One CE master of science course

Ninth semester

Four CE master of science courses

Tenth semester

Four CE master of science courses

*Course satisfies the university general education requirement in math, science, and writing.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list; (p. 42) the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (<https://www.seas.gwu.edu/humanities-and-social-science-requirement/>) At least one humanities course must be selected from the University General Education Requirement list; (p. 42) the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (<https://www.seas.gwu.edu/humanities-and-social-science-requirement/>)

A complete list of engineering electives can be found on the department's website (<http://www.cee.seas.gwu.edu/programs-degrees/>).

DUAL BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF TRANSPORTATION ENGINEERING

The School of Engineering and Applied Science offers a dual bachelor of science with a major in civil engineering (p. 744) and master of science in the field of transportation engineering (<https://www.programs.gwu.edu/graduate/transportation-engineering/>) degree program. The program allows students to take up to 9 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year. Visit the program website (<https://www.cee.seas.gwu.edu/five-year-dual-degree-program-bs-and-ms-civil-engineering/>) for additional information.

(<https://www.seas.gwu.edu/humanities-and-social-science-requirement/>)

DUAL BACHELOR OF SCIENCE WITH A MAJOR IN COMPUTER ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF COMPUTER ENGINEERING

The School of Engineering and Applied Science offers a dual bachelor of science with a major in computer engineering (p. 753) and master of science in the field of computer engineering (p. 794) degree program. The program allows students to take 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year. Visit the program website (<https://www.ece.seas.gwu.edu/>) for additional information.

DUAL BACHELOR OF SCIENCE WITH A MAJOR IN COMPUTER ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF ELECTRICAL ENGINEERING

The School of Engineering and Applied Science offers a dual bachelor of science with a major in computer engineering (p. 753) and master of science in the field of electrical engineering (p. 799) degree program. The program allows students to take 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year. Visit the program website (<https://www.ece.seas.gwu.edu/>) for additional information.

graduate.seas.gwu.edu/five-year-program/) for additional information.

DUAL BACHELOR OF SCIENCE WITH A MAJOR IN COMPUTER ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF TELECOMMUNICATIONS ENGINEERING

The School of Engineering and Applied Science offers a dual bachelor of science with a major in computer engineering (p. 753) and master of science in the field of telecommunications engineering (p. 807) degree program. The program allows students to take 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year. Visit the program website (<https://graduate.seas.gwu.edu/five-year-program/>) for additional information.

DUAL BACHELOR OF SCIENCE WITH A MAJOR IN COMPUTER SCIENCE AND MASTER OF SCIENCE IN THE FIELD OF COMPUTER SCIENCE

The School of Engineering and Applied Science offers a dual bachelor of science with a major in computer science (p. 740) and master of science in the field of computer science (p. 755) degree program. The program allows students to take 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year. Visit the program website (<https://www.seas.gwu.edu/bams-or-bsms-computer-science/>) for additional information.

DUAL BACHELOR OF SCIENCE WITH A MAJOR IN COMPUTER SCIENCE AND MASTER OF SCIENCE IN THE FIELD OF CYBERSECURITY IN COMPUTER SCIENCE

The School of Engineering and Applied Science offers a dual bachelor of science with a major in computer science (p. 755) and master of science in the field of cybersecurity in computer science (p. 796) degree program. The program allows students to take 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year. Visit the program website (<https://www.seas.gwu.edu/babs-computer-sciencems-cybersecurity-computer-science/>) for additional information.

DUAL BACHELOR OF SCIENCE WITH A MAJOR IN ELECTRICAL ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF COMPUTER ENGINEERING

The School of Engineering and Applied Science offers a dual bachelor of science with a major in electrical engineering (p. 759) and master of science in the field of computer engineering (p. 794) degree program. The program allows students to take 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year. Visit the program website (<https://graduate.seas.gwu.edu/five-year-program/>) for additional information.

DUAL BS WITH A MAJOR IN ELECTRICAL ENGINEERING AND MS IN THE FIELD OF ELECTRICAL ENGINEERING

The School of Engineering and Applied Science offers a dual bachelor of science with a major in electrical engineering (p. 759) and master of science in the field of electrical engineering (p. 799) degree program. The

program allows students to take 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year. Visit the program website (<https://graduate.seas.gwu.edu/bs-ms-electrical-engineering/>) for additional information.

DUAL BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF MECHANICAL ENGINEERING

The School of Engineering and Applied Science offers a dual bachelor of science with a major in mechanical engineering (p. 764) and master of science in the field of mechanical engineering (p. 804) degree program. The program allows students to take 9 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year. Visit the program website (<https://www.mae.seas.gwu.edu/5-year-dual-degree-program/>) for additional information.

REQUIREMENTS

Code	Title	Credits
First semester		
CHEM 1111	General Chemistry I (or CHEM 1113) ¹

Seventh semester	

DUAL BACHELOR OF SCIENCE WITH A MAJOR IN ELECTRICAL ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF TELECOMMUNICATIONS ENGINEERING

The School of Engineering and Applied Science offers a dual bachelor of science with a major in electrical engineering (p. 759) and master of science in the field of telecommunications engineering (p. 807) degree program. The program allows students to take 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Visit the program website (<https://graduate.seas.gwu.edu/five-year-program/>) for additional information.

DUAL SEAS BACHELOR OF SCIENCE AND MASTER OF SCIENCE IN THE FIELD OF COMPUTER SCIENCE

The School of Engineering and Applied Science (SEAS) offers a dual degree program that includes a bachelor of science in one of the SEAS majors listed below (p. 688) (with a minor in computer science (p. 788)) and master of science in the field of computer science (p. 795). All requirements for both degrees and the minor program must be fulfilled.

The following bachelor of science majors are eligible for this program:

- Biomedical engineering
- Civil engineering
- Civil engineering, option in environment engineering, medical preparation, civil engineering, or transportation and sustainability
- Computer engineering
- Electrical engineering
- Electrical engineering, option in energy or medical preparation
- Systems engineering
- Mechanical engineering
- Mechanical engineering, option in aerospace, biomechanical, medical preparation, patent law, or robotics

6 graduate credits (two courses) may be shared between the two degrees, 3 credits of which should be in CSCI 6011. Students may substitute comparable undergraduate coursework in systems/architecture for CSCI

MAE 4149	Thermal Systems Design
MAE 4151	Capstone Design Project I
MAE 4182	Electromechanical Control System Design
Technical elective ³	
Technical elective	
Humanities or social sciences elective ²	
Eighth semester	
MAE 4152W	Capstone Design Project II
Technical elective ³	
Technical elective	
Technical elective	
Humanities or social sciences elective ²	

¹Course satisfies the University General Education Requirement (p. 42) in math, science, and writing.

²To satisfy the SEAS Humanities and Social Science requirement, all mechanical engineering students must take one humanities course and two social Sciences courses from University General Education requirement; PHIL 2135, and two additional humanities or social science or non-technical courses from the MAE Department's pre-approved list of electives. All courses selected to satisfy this requirement must be at least 3-credits each. NOTE: Students in the patent law concentration must take MAE 2170 in lieu of one of the additional humanities or social science or non-technical course.

³All technical electives must be approved by the undergraduate advisor. On a case-by-case basis, technical electives may be chosen from other departments if approved by both the undergraduate advisor and the department chair.

Code	Title	Credits
Technical electives are chosen from MAE courses in the 3000, 4000, and 6000 series, excluding:		
MAE 3171	Patent Law for Engineers	
MAE 4172	Engineering Design and the Patent System	
MAE 6298	Research	
MAE 6998 & MAE 6999	MS Thesis Research and MS Thesis Research	

6011, in which case another 6000-level course must be taken in its place. Students must select two of the following courses as electives for the minor program: CSCI 3410, CSCI 3212, or CSCI 3411. CSCI 6212 may be substituted for CSCI 3212. However, CSCI 6212 cannot be counted as one of the two graduate courses taken during the undergraduate program.

Students must have a minimum 3.4 technical GPA at the time of graduation from the undergraduate program to continue to the master's program as part of a dual degree.

DUAL SEAS BACHELOR OF SCIENCE AND MASTER OF SCIENCE IN THE FIELD OF CYBERSECURITY IN COMPUTER SCIENCE

The School of Engineering and Applied Science (SEAS) offers a dual degree program that includes a bachelor of science in one of the SEAS majors listed below (p. 688) (with a minor in computer science (p. 788)) and master of science in the field of cybersecurity in computer science (p. 796). All requirements for both degrees and the minor program must be fulfilled.

The following bachelor of science majors are eligible for this program:

- Biomedical engineering
- Civil engineering
- Civil engineering, option in environment engineering, medical preparation, civil engineering, or transportation and sustainability
- Computer engineering
- Electrical engineering
- Electrical engineering, option in energy or medical preparation
- Systems engineering
- Mechanical engineering
- Mechanical engineering, option in aerospace, biomechanical, medical preparation, patent law, or robotics

6 graduate credits (two courses) may be shared between the two degrees, 3 credits of which should be in CSCI 6011. Students may substitute comparable undergraduate coursework in systems/architecture for CSCI 6011, in which case another 6000-level course must be taken in its place. Students must select two of the following courses as electives for the minor program: CSCI 3212, CSCI 3410, or CSCI 3411. CSCI 6212 may be substituted for CSCI 3212. However, CSCI 6212 cannot be counted as one of

the two graduate courses taken during the undergraduate program.

Students must have a minimum 3.4 technical GPA at the time of graduation from the undergraduate program to continue to the master's program as part of a dual degree.

DUAL SEAS BACHELOR OF SCIENCE AND MASTER OF SCIENCE IN THE FIELD OF DATA ANALYTICS

The School of Engineering and Applied Science (SEAS) offers a dual degree program that includes a bachelor of science in one of the SEAS majors listed below (p. 688) (with a minor in computer science (p. 788)) and master of science in the field of data analytics (p. 798). All requirements for both degrees and the minor program must be fulfilled.

The following bachelor of science majors are eligible for this program:

- Biomedical engineering
- Civil engineering
- Civil engineering, option in environment engineering, medical preparation, civil engineering, or transportation and sustainability
- Computer engineering
- Electrical engineering
- Electrical engineering, option in energy or medical preparation
- Systems engineering
- Mechanical engineering
- Mechanical engineering, option in aerospace, biomechanical, medical preparation, patent law, or robotics

6 graduate credits (two courses) may be shared between the two degrees, 3 credits of which should be in CSCI 6011. Students may substitute comparable undergraduate coursework in systems/architecture for CSCI 6011, in which case another 6000-level course must be taken in its place. Students must select two of the following courses as electives for the minor program: CSCI 3212, CSCI 3410, or CSCI 3411. CSCI 6212 may be substituted for CSCI 3212. However, CSCI 6212 cannot be counted as one of the two graduate courses taken during the undergraduate program.

Students must have a minimum 3.4 technical GPA at the time of graduation from the undergraduate program to continue to the master's program as part of a dual degree.

MINOR IN BIOMEDICAL ENGINEERING

REQUIREMENTS

Code	Title	Credits
Prerequisites		
The following courses must be completed before beginning the minor program:		
APSC 2113	Engineering Analysis I	
PHYS 1022	University Physics II	
Required		
BME 3820	Principles and Practice of Biomedical Engineering	
ECE 2110	Circuit Theory	
ECE 2210	Circuits, Signals, and Systems	
Electives		
Two of the following:		
BME 4830	Introduction to Medical Imaging Methods	
ECE 3220	Introduction to Digital Signal Processing	
MAE 3128	Biomechanics I	
MAE 4168	Introduction to Biomaterials	
PHYS 3127	Biophysics: Macroscopic Physics in the Life Sciences	
PHYS 3128	Biophysics: Microscopic Physics in the Life Sciences	

Visit the program website (<https://www.seas.gwu.edu/undergraduate-programs/>) for additional information.

MINOR IN COMPUTER ENGINEERING

REQUIREMENTS

The curriculum consists of prerequisite, core, and elective courses. Excluding prerequisite courses, 18 credits are required for the minor; at least 9 of those credits must be in courses not required, but could be taken as electives, for the major.

Students must have a grade-point average of 2.2 or above and elective ECE courses taken for the minor in order to fulfill minor requirements.

Code	Title	Credits
Prerequisites		
The following courses must be completed before beginning the minor program.		
APSC 2113	Engineering Analysis I ¹	
ECE 1120	C Programming for Electrical and Computer Engineering	
PHYS 1022	University Physics II ¹	
or PHYS 1026	University Physics II with Biological Applications	
Core		
ECE 2110	Circuit Theory	
ECE 2115	Engineering Electronics	
ECE 2140	Design of Logic Systems	
Electives		
Two of the following:		
ECE 3130	Digital Electronics and Design	
ECE 3135	Digital Design with FPGAs	
ECE 3220	Introduction to Digital Signal Processing ¹	
ECE 3310	Introduction to Electromagnetics	
ECE 3515	Computer Organization	
ECE 3520	Microprocessors: Software, Hardware, and Interfacing	
ECE 3525	Introduction to Embedded Systems ¹	
ECE 4140	VLSI Design and Simulation ¹	
ECE 4535	Computer Architecture and Design ¹	
ECE 4415	Introduction to Computer Networks ²	
ECE 4425	Data Communications Laboratory ²	

¹ Requires additional prerequisites.

² ECE 4415 Introduction to Computer Networks and ECE 4425 Data Communications Laboratory must be taken concurrently.

To earn a minor in computer engineering, a student must have a GPA of 2.20 or higher in the ECE courses defining the minor.

Visit the program website (<https://www.ece.seas.gwu.edu/minor-computer-engineering/>) for additional information.

MINOR IN ELECTRICAL ENGINEERING REQUIREMENTS

The curriculum consists of prerequisite, core, and elective courses. Excluding prerequisite courses, 17 credits are required for the minor; at least 9 of those credits must be in courses not required, but could be taken as electives, for the major.

Students must have a 2.2 GPA or above in required and elective ECE courses taken for the minor in order to fulfill minor requirements.

Code	Title	Credits
Prerequisites		
The following courses must be completed before beginning the minor:		
APSC 2113	Engineering Analysis I *	
PHYS 1022	University Physics II *	
or PHYS 1026	University Physics II with Biological Applications	
Required core		
ECE 2110	Circuit Theory	
ECE 2115	Engineering Electronics	
ECE 2210	Circuits, Signals, and Systems	
Electives		
Two of the following:		
ECE 3125	Analog Electronics Design	
ECE 3130	Digital Electronics and Design *	
ECE 3220	Introduction to Digital Signal Processing	
ECE 3315	Fields and Waves I *	
ECE 3410	Communications Engineering *	
ECE 3520	Microprocessors: Software, Hardware, and Interfacing *	
ECE 4415	Introduction to Computer Networks **	

ECE 4425	Data Communications Laboratory **
ECE 4610	Electrical Energy Conversion
ECE 4620	Electrical Power Systems
ECE 4710	Control Systems Design *

*Requires additional prerequisites.

**ECE 4415 Introduction to Computer Networks and ECE 4425 Data Communications Laboratory must be taken concurrently.

MINOR IN MECHANICAL ENGINEERING REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses for the minor and successful completion of all prerequisite courses.

Code	Title	Credits
Required		
Prerequisites		
The following courses must be completed before beginning the minor:		
APSC 2113	Engineering Analysis I	
MATH 1231	Single-Variable Calculus I	
MATH 1232	Single-Variable Calculus II	
MATH 2233	Multivariable Calculus	
PHYS 1021	University Physics I	
Minor courses		
APSC 2057	Analytical Mechanics I	
APSC 2058	Analytical Mechanics II	
CE 2220	Introduction to the Mechanics of Solids	
MAE 2131	Thermodynamics	
MAE 3126	Fluid Mechanics I (taken for 3 credits)	
MAE 3187	Heat Transfer	
or MAE 3191	Mechanical Design of Machine Elements	

MINOR IN OPERATIONS RESEARCH

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 12 credits in required courses and 6 credits in elective courses, and successful completion of all prerequisite courses.

Code	Title	Credits
Prerequisites		
The following courses must be completed before beginning the minor program:		
APSC 3115	Engineering Analysis III	
MATH 1231	Single-Variable Calculus I	
MATH 1232	Single-Variable Calculus II	
MATH 2233	Multivariable Calculus	
Minor courses		
Required		
EMSE 2705	Mathematics of Operations Research	
EMSE 3701		
EMSE 3740W	Systems Thinking and Policy Modeling	
EMSE 4755	Quality Control and Acceptance Sampling	
Electives		
6 credits (two courses) selected in consultation with the minor advisor.		

MINOR IN SYSTEMS ENGINEERING

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in courses for the minor, including 15 credits in required courses and one 3-credit elective course, and satisfactory completion of all prerequisite courses.

Code	Title	Credits
Prerequisites		
The following courses must be completed before beginning the minor program:		

APSC 3115	Engineering Analysis III
COMM 1040	Public Communication
or COMM 1041	Interpersonal Communication
or COMM 1042	Business and Professional Speaking
MATH 1231	Single-Variable Calculus I
MATH 1232	Single-Variable Calculus II
MATH 2233	Multivariable Calculus
MATH 2184	Linear Algebra I
or EMSE 2705	Mathematics of Operations Research
UW 1020	University Writing
Required	
EMSE 2801	Fundamentals of Systems Engineering
EMSE 3815	Requirements Analysis and Elicitation
EMSE 3820	Project Management for Engineering Systems
EMSE 3850	Quantitative Models in Systems Engineering
EMSE 4765	Data Analysis for Engineers and Scientists

Elective

One additional EMSE course selected in consultation with the advisor.

MINOR IN COMPUTER SCIENCE

This minor, offered by the Department of Computer Science, is for students in other GW schools as well as other majors within the School of Engineering and Applied Science. The curriculum consists of two segments: core courses and electives whose purpose is to provide the student with depth in an area of computer science. The total number of credits for the minor is 18.

Criteria for admission

To be considered for admission to the second major in computer science, a student must satisfy the following criteria:

- Prior completion of CSCI 1011 CSCI 1111, CSCI 1121 CSCI 1121, or CSCI 1112 with a minimum grade of B.
- Prior completion of MATH 1220 and MATH 1221, or MATH 1231, with a minimum grade of B-.

- A minimum overall grade-point average of 3.0 at the time of application to the major.

Application deadline

The application is due no later than the start of the 5th semester of study at GW or completion of the 60th credit, whichever comes first. Contact the School of Engineering and Applied Science Undergraduate Advising Office (<https://www.seas.gwu.edu/academic-advising/>) for specific application deadlines.

Credits in residence requirement

- For students pursuing a minor, at least 15 credits in computer science courses must be completed at GW.

Graduation grade-point average criteria

- To satisfactorily complete a minor in computer science, a student must have a minimum grade-point average of 2.2 in all the computer science courses.

Visit the program website (<https://www.cs.seas.gwu.edu/minor-computer-science/>) for additional information.

REQUIREMENTS

Code	Title	Credits
Required		
CSCI 1111	Introduction to Software Development	
CSCI 1112	Algorithms and Data Structures	
CSCI 1311	Discrete Structures I	
CSCI 2113	Software Engineering	
Electives		
A minimum of two CSCI elective courses requiring CSCI 2113 or above as a prerequisite (excluding CSCI 2312 and equivalent courses). Possible courses include:		
CSCI 2441	Database Systems and Team Projects	
CSCI 2461	Computer Architecture I	
CSCI 3212	Algorithms	
CSCI 3313	Foundations of Computing	
CSCI 3410	Systems Programming	
CSCI 3411	Operating Systems	
CSCI 4237	Software Design for Handheld Devices	
CSCI 4331	Cryptography	
CSCI 4341	Continuous Algorithms	

CSCI 4342 Computational Linear Algebra and Applications

CSCI 4364 Machine Learning

CSCI 4431 Computer Networks I

CSCI 4527 Introduction to Computer Vision

CSCI 4531 Computer Security

CSCI 4541 Network Security

CSCI 4554 Computer Graphics I

CSCI 4561 Design of User-Interface Programs

Other electives may be substituted with the approval of the program advisor.

MASTER'S PROGRAMS

MASTER OF ENGINEERING IN THE FIELD OF CLOUD COMPUTING MANAGEMENT

The master of engineering (MEng) in the field of cloud computing management is an interdisciplinary program that draws courses from three departments across SEAS: computer science, electrical and computer engineering, and engineering management and systems engineering. The purpose of the MEng in cloud computing management is to address the broad scope of business and technical issues associated with managing an IT infrastructure in a cloud-based environment. Students study issues of strategy, security, data analytics, and delivery of microservices across multiple cloud computing models. The program is designed for students with technical degrees or nontechnical degrees who wish to study the evolving issues of transforming critical business operations to thrive in the dynamic cloud computing environment.

Visit the SEAS online programs website (<https://onlinecybersecurity.seas.gwu.edu/me-cloud-computing-management/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits in required courses.

Code	Title	Credits
Required		
CSCI 6012	Cybersecurity and Privacy	
CSCI 6018	Cloud Application Architecture	
ECE 6005	Computer Architecture and Design	

ECE 6130	Big Data and Cloud Computing (Prerequisite: ECE 6005 or ECE 6015)
ECE 6132	Secure Cloud Computing
EMSE 6767	Applied Data Analytics
EMSE 6769	Applied Machine Learning for Engineers
EMSE 6820	Program and Project Management
SEAS 6411	Management and Compliance in Cloud Computing (Prerequisite: ECE 6132)
SEAS 6412	Cloud Migration Strategy (Prerequisite: ECE 6132)

MASTER OF ENGINEERING IN THE FIELD OF CONSTRUCTION ENGINEERING

GW's Department of Civil and Environmental Engineering offers the master of engineering (MEng) in construction engineering. The program helps students approach, evaluate and devise solutions to some of the largest problems facing modern infrastructure and the environment today. This program provides students with the knowledge of main trends and technological innovations in the modern construction industry through coursework and interaction with prominent industry leaders. The curriculum is designed to reflect the most up-to-date knowledge in the areas of planning, financing, procuring, constructing, and managing constructed facilities. Upon completion of the program, graduates can expect to have the knowledge and skills needed to be construction engineering experts, locally and nationally.

See the School of Engineering and Applied Science (<https://www.seas.gwu.edu/graduate-programs/>) website for additional information.

REQUIREMENTS

Code	Title	Credits
Required		
Eight courses (24 credits) from the following:		
CE 6111	Project Management For Construction	
CE 6112	Construction Project Acquisition	
CE 6113	Construction Contracts, Insurance, and Bonds	
CE 6114	Construction Methods, Materials, Equipment, and Systems	

CE 6115	Project Planning and Scheduling
CE 6116	Green Building Design and Construction
CE 6117	Construction Finance and Engineering Economics
CE 6118	Advanced Construction and Computer-Aided Design
CE 6119	Construction Safety And Quality Control
CE 6121	Construction Project Control

Electives

6 credits in elective courses, which may be in other SEAS departments with the advisor's approval.

MASTER OF ENGINEERING IN THE FIELD OF CYBERSECURITY POLICY AND COMPLIANCE

The online master's in cybersecurity policy and compliance offers an engineering management-focused course of study, providing an overview of cryptography, security systems, algorithms, and software paradigms, a perfect choice for those interested in exploring the complex intersections between policy, business, and technology. Students of the program will become familiar with industry-recognized frameworks and methodologies, training them to take charge in the fast-paced world of information security.

Upon graduating, master's in cybersecurity students will be better prepared to implement appropriate forensic analyses of cyber incidents and use predictive analytics modeling to forecast cyberattacks. They will be able to devise and implement solutions that go beyond traditional IT practices to delineate specific and actionable cyber intelligence. In addition, they will be adept at formulating short- and long-term cybersecurity strategies and policies for their enterprises by identifying compliance laws and applying the industry's best practices. Students will be able to design an organization's mobility solution while integrating mobile device management with these practices.

Finally, graduates of our online cybersecurity master's degree will be able to manage threat vulnerabilities and exploits, designing and implementing cybersecurity situational awareness procedures for an organization to safeguard its sensitive data and sustain its fundamental operations. They will be ready to face the future of information assurance with the creative, technical, and managerial skills that employers are seeking in government, intelligence, and security analysts and executives.

Visit the SEAS online programs website (<https://onlinecybersecurity.seas.gwu.edu/me-cybersecurity-policy-compliance/>) for additional information.

REQUIREMENTS

Credit Requirements

The following requirements must be fulfilled: 30 credits in required courses.

Code	Title	Credits
Required		
CSCI 6012	Cybersecurity and Privacy	
CSCI 6532	Information Policy	
EMSE 6540	Management of Information and Systems Security	
CSCI 6013	Security in Mobile Computing	
CSCI 6534	Information Security in Government	
ECE 6132	Secure Cloud Computing	
EMSE 6542	Cybersecurity Risk Management and Compliance	
EMSE 6543	Managing the Protection of Information Assets and Systems	
EMSE 6544	Auditing, Monitoring, and Intrusion Detection for Information Security Managers	
EMSE 6546	Cybercrime for Information Security Managers	

MASTER OF ENGINEERING IN THE FIELD OF CYBERSECURITY ANALYTICS

The master of engineering (MEng) in the field of cybersecurity analytics is an interdisciplinary program that draws courses from departments across SEAS: computer science, electrical and computer engineering, and engineering management and systems engineering. The purpose of the MEng in cybersecurity analytics is to address technical challenges in the rapidly changing field of cybersecurity. In this program, students will explore topics related to protecting critical infrastructure including secure systems and hardware design, cyber resilience, intrusion detection, and defensive cybersecurity operations. The program is designed for students with a technical background but is accessible to those with relevant nontechnical degrees as well.

Visit the SEAS online program website (<https://onlinecybersecurity.seas.gwu.edu/me-cybersecurity-analytics/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits in required courses.

Code	Title	Credits
Required		
SEAS 6014	Introduction to Software and Hardware Security	
CSCI 6016	Applied Network Defense (Prerequisite: SEAS 6014)	
CSCI 6015	Cyber Forensics	
ECE 6132	Secure Cloud Computing	
EMSE 6540	Management of Information and Systems Security	
EMSE 6544	Auditing, Monitoring, and Intrusion Detection for Information Security Managers (Prerequisite: EMSE 6540)	
EMSE 6547	Cyber Resilience	
EMSE 6560	Open-source Intelligence Analysis	
EMSE 6767	Applied Data Analytics	
SEAS 6410	Security Data Visualization (Prerequisite: EMSE 6767)	

MASTER OF ENGINEERING IN THE FIELD OF REGULATORY BIOMEDICAL ENGINEERING

The master of engineering in regulatory biomedical engineering is an interdisciplinary program offered through the Department of Biomedical Engineering in partnership with GW's School of Medicine and Health Sciences. The program addresses an unmet need for a graduate program to train engineers in the specific set of skills of regulatory science, biomedical innovation, and entrepreneurship. Students with training in engineering or physics and/or relevant industry/government experience study the fundamentals of biomedical engineering, global regulatory affairs, regulatory strategy in the development of devices and diagnostics, regulatory compliance, engineering patent law, medical measurements, and instrument design.

In addition to coursework, students gain experience in SBIR/STTR grant applications and/or FDA Premarket Notification (510(k)) submissions for medical devices. The program is

30 credit hours distributed across four areas: Biomedical engineering coursework and practicum (12 credits) Regulatory issues (9 credits) Patent law for engineers (3 credits) Targeted electives from various disciplines (6 credits) Students will require 12-24 months or 3 semesters for completion.

Students who complete the program acquire skill sets comparable to those of an engineer with five to seven years of experience, making them competitive in the medical device or imaging industries. Graduates are equipped to provide in-house regulatory expertise to device companies, or join government regulatory and compliance institutions.

Visit the program website (<https://www.bme.seas.gwu.edu/master-engineering-regulatory-biomedical-engineering-rbme/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 24 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
BME 6481	Regulatory Law for Medical Devices	
BME 6482	Medical Measurements	
BME 6483	Medical Instrumentation Design	
BME 6994	Biomedical Engineering Regulatory Practicum I	
BME 6995	Biomedical Engineering Regulatory Practicum II	
RAFF 6201	Introduction to Global Regulatory Affairs	
RAFF 6203	Regulatory Device Diagnostics	
RAFF 6205	Regulatory Affairs Compliance	
Elective		
6 credits from the following:		
BME 6486	Clinical Medicine for Engineers	
BME 6820	Anatomy and Physiology for Engineers	
BME 6830	Introduction to Medical Imaging Methods	
BME 6487	Rehabilitation Medicine Engineering	
CSCI 4531	Computer Security	
CSCI 4532	Information Policy	

ECE 6565	Telecommunications Security
EMSE 6020	Decision Making with Uncertainty
EMSE 6765	Data Analysis for Engineers and Scientists
EMSE 6770	Techniques of Risk Analysis and Management
MAE 6204	Tissue Engineering
MAE 6238	Biomaterials

MASTER OF SCIENCE IN THE FIELD OF BIOMEDICAL ENGINEERING

The School of Engineering and Applied Science offers the MS degrees in biomedical engineering through the Department of Biomedical Engineering. The MS program in biomedical engineering at GW is a 30-credit-hour graduate program, which can include a 6-credit master's thesis.

The program is strongly interdisciplinary and prepares students to apply engineering principles to problems in medicine and biology, to understand and model multiple attributes of living systems, and to use this knowledge to develop novel biomedical systems and devices. Graduate students can choose from among a large array of areas of study, mentored by both core Departmental faculty and external faculty from SEAS and elsewhere in GW, who qualify, on the basis of their expertise and teaching abilities, for joint or secondary appointments in the Biomedical Engineering Department. The core faculty expertise includes cancer therapy, cardiac electrophysiology, biosensors, microfluidics, ultrasound applications in medicine, and medical imaging and image analysis.

The program is offered on the main campus in Foggy Bottom, and take full advantage of the close proximity of the Department's home in the new Science and Engineering Hall to the GW School of Medicine, the Milken Institute School of Public Health at GW, and the GW Hospital. These interactions are supplemented by collaborations that take advantage of nearby clinical and research facilities, including Children's National Health System and Federal agencies such as the FDA and NIH.

Visit the program website (<http://www.bme.seas.gwu.edu/master-science-biomedical-engineering/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 15 credits in required courses and 15 credits in elective courses (non-thesis option) or 6 credits in thesis and

6 credits in elective courses (thesis option). Students are required to attend a minimum of 8 engineering colloquia during their MS studies, at least five of these must be BME Department events.

Code	Title	Credits
Required		
Five 6000-level BME courses (15 credits) excluding BME 6050.		
Required of students who have selected the thesis option		
BME 6998	Thesis Research	
BME 6999	Thesis Research	
Electives		
For non-thesis option, five elective courses (15 credits). For thesis option, three elective courses (9 credits). All electives must be approved by the advisor. Some possible electives listed below.		
ANAT 8120	Graduate Human Gross Anatomy	
APSC 6212	Analytical Methods in Engineering II	
APSC 6213	Analytical Methods in Engineering III	
BME 6481	Regulatory Law for Medical Devices	
ECE 6030	Device Electronics	
ECE 6035	Introduction to Computer Networks	
ECE 6215	Introduction to MEMS	
ECE 6800	Computational Techniques in Electrical Engineering	
EHS 6227	Introduction to Human Health in Space	
EMSE 6765	Data Analysis for Engineers and Scientists	
EXNS 6202	Advanced Exercise Physiology I	
EXNS 6223	Biomechanical Analysis	
MAE 6204	Tissue Engineering	
MAE 6238	Biomaterials	
MATH 6522	Introduction to Numerical Analysis	
MATH 6540	Topics in Numerical Analysis	
PUBH 6002	Biostatistical Applications for Public Health	

MASTER OF SCIENCE IN THE FIELD OF CIVIL AND ENVIRONMENTAL ENGINEERING

Civil and environmental engineering graduate students have extraordinary opportunities to learn about the state-of-the-art in their studies. Environmental engineering students use one of the world’s largest wastewater treatment plants as a real-world laboratory to improve the water quality of the Potomac River and the Chesapeake Bay watershed. Structural engineering students study earthquake engineering, extreme event design of structures and bridge design on a state-of-the-art, six-degrees-of-freedom earthquake simulator.

The master of science program in civil and environmental engineering at GW is a 33-credit-hour graduate program without a thesis, or 30 credits with a thesis.

The master’s program emphasizes the professional development of our graduate students and the mastery of technical and applied aspects of the chosen specialty. Evening classes are scheduled to suit working professionals, and students may choose the thesis or non-thesis option.

Visit the program website (<https://www.cee.seas.gwu.edu/degree-programs/>)for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: Non-thesis option –33 credits; thesis option–30 credits, including 6 credits of thesis. In either option, the student must select one focus area from below and complete the required 9 credits of courses in that area. The remaining credits are selected by the student in consultation with a faculty advisor.

Code	Title	Credits
Required		
All courses in one of the following concentrations:		
Engineering Mechanics		
APSC 6213	Analytical Methods in Engineering III	
CE 6206	Continuum Mechanics	
CE 6210	Introduction to Finite Element Analysis	
Environmental engineering		
CE 6501	Environmental Chemistry	
CE 6503	Principles of Environmental Engineering	
CE 6609	Numerical Methods in Environmental and Water Resources	

Geotechnical engineering

CE 6210	Introduction to Finite Element Analysis
CE 6402	Theoretical Geomechanics
CE 6605	Ground Water and Seepage

Structural engineering

CE 6201	Advanced Strength of Materials
CE 6202	Methods of Structural Analysis
CE 6301	Design of Reinforced Concrete Structures
or CE 6320	Design of Metal Structures

Transportation safety engineering

CE 6102	Application of Probability Methods in Civil Engineering
CE 6721	Traffic Engineering and Highway Safety
CE 6722	Intelligent Transportation Systems

Water resources engineering

CE 6601	Open Channel Flow
CE 6604	Advanced Hydrology
CE 6609	Numerical Methods in Environmental and Water Resources

Thesis

Required of students who have selected the thesis option:

CE 6998	Thesis Research
CE 6999	Thesis Research

Students should consult with the advisor concerning their program of study.

MASTER OF SCIENCE IN THE FIELD OF COMPUTER ENGINEERING

Students in the computer engineering master's program learn sophisticated computer architecture and integrated circuit design techniques using industry-standard computer-aided design tools. The master's program offers a flexible schedule that includes late afternoon and evening classes as well as the ability to choose a thesis or non-thesis degree option

Students acquire up-to-date knowledge and skills in the advances of computer systems architecture and networking,

and in the rapidly growing use of superscalar microprocessors, real-time embedded systems, VLSI and ASIC design modules, digital signal processors and networked computing platforms.

More information is available on the departmental website (<https://www.ece.seas.gwu.edu/master-science-computer-engineering/>).

REQUIREMENTS

The following requirements must be fulfilled:

30 credits are required for the degree. Non-thesis and thesis options are available. For the thesis option, 6 of these credits are taken in ECE 6998 and ECE 6999. For either option, the student must select one focus area from the chart below and complete the specified number of credits for that area.

Colloquium requirement: In addition to required coursework, students must attend five non-credit bearing colloquia as part of their program of study. Each colloquium attended is verified by a faculty member also in attendance. After attending five colloquia, the student must submit to the department prior to applying for graduation a colloquium attendance form signed by the faculty advisor.

Computer Architecture and high-performance computing

Code	Title	Credits
Required		
ECE 6005	Computer Architecture and Design	
At least five of the following courses:		
ECE 6105	Introduction to High-Performance Computing	
ECE 6120	Advanced Microarchitecture	
ECE 6125	Parallel Computer Architecture	
ECE 6130	Big Data and Cloud Computing	
ECE 6140	Embedded Systems	
ECE 6150	Design of Interconnection Networks for Parallel Computer Architectures	
ECE 8150	Advanced Topics in Computer Architecture	
For thesis option		
ECE 6998	Thesis Research I	
ECE 6999	Thesis Research II	
Electives*		

Non-thesis option—12 credits in elective courses; thesis option—6 credits in elective courses. For either option, at least 3 credits must come from outside of the area of focus list.

MEMS, electronics, and photonics

Code	Title	Credits
Required		
ECE 6030	Device Electronics	
4 of the following:		
ECE 6213	Design of VLSI Circuits	
ECE 6214	High-Level VLSI Design Methodology	
ECE 6215	Introduction to MEMS	
ECE 6216	RF/VLSI Circuit Design	
ECE 6218	Advanced Analog VLSI Circuit Design	
ECE 6221	Introduction to Physical Electronics	
ECE 6240	VLSI Design and Simulation	
ECE 6245	Micro- and Nanofabrication Technology	
ECE 6250	ASIC Design and Testing of VLSI Circuits	
ECE 6255	Sensors, Networks, and Applications	
ECE 6260	Introduction to Nanoelectronics	
ECE 6765	Photonics and Fiber Optics	
For thesis option		
ECE 6998	Thesis Research I	
ECE 6999	Thesis Research II	
Electives*		
Non-thesis option—15 credits in elective courses; thesis option—9 credits in elective courses. For either option, at least 3 credits must come from outside of the area of focus list.		

*Normally, no more than two courses taken outside the Department of Electrical and Computer Engineering may be counted toward the requirements for the degree. Courses taken outside the department must have prior approval from the student's faculty advisor. In addition, no more than three 3000- or 4000-level ECE courses that have been approved for graduate credit may be counted toward the requirements for the degree.

Educational Planner

In consultation with an academic advisor, each student must develop an Educational Planner through DegreeMAP that governs the student's plan of study. The Educational Planner should be established soon after matriculation and must be completed before the end of the student's first semester. The Educational Planner must be approved by the advisor.

Additional program requirements can found on the Department of Electrical and Computer Engineering Master's Degree requirements (<https://www.ece.seas.gwu.edu/graduate-programs/>) webpage.

MASTER OF SCIENCE IN THE FIELD OF COMPUTER SCIENCE

Students in the master of science program in computer science learn excellent skills at the forefront of computing, get individualized attention from world-class faculty, and benefit from evening classes that accommodate the schedules of those who are working professionals. Students may choose a thesis or non-thesis option.

Our graduate students choose from among numerous focus areas, including: Algorithms and Theory; Computer Architecture, Networks, Parallel and Distributed Computing; Computer Security and Information Assurance; Database and Information Retrieval Systems; Machine Intelligence and Cognition; Multimedia, Animation, Graphics and User Interface; and Software Engineering and Systems.

Visit the program website (<http://www.cs.seas.gwu.edu/master-science-computer-science/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: Thesis option—30 credits, including 9 credits in required courses and 15 credits in elective courses, and 6 credits in thesis; non-thesis option—30 credits, including 9 credits in required courses and 21 credits in elective courses.

At least 24 of the 30 credits required for the degree must be taken at the 6000 level or above. As a general rule, any course taken below the 6000 level must be a CSCI course and must be eligible to be taken for graduate credit according to the course description in this Bulletin. Any course below the 6000 level must receive the prior written approval of the student's faculty advisor.

Code	Title	Credits
Required Courses		
CSCI 6212	Design and Analysis of Algorithms	
CSCI 6221	Advanced Software Paradigms	
CSCI 6461	Computer System Architecture	

Electives

Students pursuing the thesis option take 15 credits and students pursuing the non-thesis option take 21 credits in elective computer science (CSCI) courses offered for graduate credit. Unless a student's admission letter states that they are required to take CSCI 6010 and CSCI 6011, students may take up to 6 of these credits in non-CSCI courses with the prior written approval of their advisor. Students who are required to take CSCI 6010 and CSCI 6011 cannot take any non-CSCI courses as part of their program requirements. Such students are strongly encouraged to take these two courses in their first semester.

Thesis

Students pursuing the thesis option take the following:*

CSCI 6998	Thesis Research
-----------	-----------------

CSCI 6999	Thesis Research
-----------	-----------------

* See additional information regarding regulations for the master thesis (p.).

Dual MS in the field of computer science and MS in the field of cybersecurity in computer science degree:

Students who complete the master of science in the field of computer science or the master of science in the field of cybersecurity in computer science and who subsequently wish to pursue the other degree as part of a dual degree program may count the following core courses towards both degrees.

Code	Title	Credits
CSCI 6212	Design and Analysis of Algorithms	
CSCI 6221	Advanced Software Paradigms	
CSCI 6461	Computer System Architecture	

MASTER OF SCIENCE IN THE FIELD OF CYBERSECURITY IN COMPUTER SCIENCE

This MS program in cybersecurity in computer science is offered by GW's Department of Computer Science. The program was created to respond to the large and fast-growing need for technical cybersecurity experts nationally and internationally. Students in the program acquire up-to-date knowledge and skills in cybersecurity, a field of ever-increasing importance to national security, the economy, and individual users. They also receive a firm grounding in requisite core knowledge in computer science, as well as the ability to take courses in related disciplines.

In this program, students receive individualized attention from world-class faculty, are able to take advanced topics courses

along with Ph.D. students, and benefit from evening classes that accommodate the schedules of those who are working professionals. Students may choose a thesis or non-thesis option.

REQUIREMENTS

Credit Requirements:

- Thesis option: 30 credits are required for graduation; 6 of these credits are thesis credits
- Non-thesis option: 30 credits are required for graduation
- With department approval, students who complete the MS in the field of computer science and then enroll in the MS in the field of cybersecurity in computer science degree or vice versa can count the following core courses towards both degrees: CSCI 6212 Design and Analysis of Algorithms, CSCI 6221 Advanced Software Paradigms, and CSCI 6461 Computer System Architecture.

Graduation and Scholarship Requirements:

Students are responsible for knowing the university's minimum GPA requirement for graduation and scholarships.

Please visit the Graduation and Scholarship Requirements (http://bulletin.gwu.edu/engineering-applied-science/#graduation_requirements_ms) section on this site to read the requirements.

Students should contact the department for additional information and requirements.

Program Restrictions:

- Student's whose admission letters state that they are required to take CSCI 6010 and CSCI 6011 are limited to EMSE 6540 Management of Information Systems and Security as their only non-CS course.
- Students required to take CSCI 6010 and CSCI 6011 must take these courses in their first semester.
- Students not required to take CSCI 6010 and CSCI 6011 may take up to three non-CS courses (9 credits) towards their degree with prior written approval from their faculty advisor.
- At least 24 of the 30 credits required for the degree must be at the 6000 level or above. As a general rule, any course taken below the 6000 level must be a Computer Science course and must be eligible to be taken for graduate credit according to the course description. Exceptions may be chosen to enhance an aspect of the student's degree program. Any course taken that is below the 6000 level must receive prior written approval from the student's faculty advisor.

Code	Title	Credits
Required		
CSCI 6212	Design and Analysis of Algorithms	
CSCI 6221	Advanced Software Paradigms	
CSCI 6461	Computer System Architecture	
EMSE 6540	Management of Information and Systems Security	
One of the following applied cryptography courses:		
CSCI 6331	Cryptography	
CSCI 6541	Network Security	
CSCI 6545	Software Security	
One of the following computer science security courses, which may not be used to fulfill applied cryptography course requirement.		
CSCI 6331	Cryptography	
CSCI 6541	Network Security	
CSCI 6545	Software Security	
CSCI 6531	Computer Security	
CSCI 6532	Information Policy	
CSCI 6542	Computer Network Defense	
CSCI 6547	Wireless and Mobile Security	
CSCI 6548	E-Commerce Security	
CSCI 8331	Advanced Cryptography	
CSCI 8531	Advanced Topics in Security *	
CSCI 6907	Special Topics *	
Any special topics course taken for credit towards the degree must focus on security or cryptography and be approved by the faculty advisor.		
Two additional security courses (6 credits) from across the university*.		
All computer science security courses listed above not used to meet the applied cryptography or computer science security course requirements as well as the following courses may be used:		
EMSE 6537	Information Operations	

EMSE 6543	Managing the Protection of Information Assets and Systems
-----------	---

EMSE 6545	Internet and Online Law for Security Managers
-----------	---

Any other cybersecurity-related course from across the university must be reviewed and approved by the student's advisor to ensure that it is sufficiently advanced and rigorous before it can be taken for credit towards the degree.

Electives

Students who are not taking the thesis option and are not required to take CSCI 6010 or CSCI 6011 can choose any two additional courses (6 credits) numbered 6000 or higher.

Students who choose the thesis option must obtain the written approval of their thesis advisor before registering for the following courses:

CSCI 6998	Thesis Research
-----------	-----------------

CSCI 6999	Thesis Research
-----------	-----------------

If the admissions letter states that students are required to take CSCI 6010 and CSCI 6011, they will be limited to EMSE 6540 Management of Information Systems and Security as their only non-computer science course. Students required to take CSCI 6010 and CSCI 6011 are required to take these courses in their first semester. Students not required to take CSCI 6010 and CSCI 6011 may take up to three non-computer science courses (9 credits) towards their degree with prior written approval from their advisor.

At least 24 of the 30 credits required for the degree must be at the 6000 level or above. As a general rule, any course taken below the 6000 level must be a computer science course and must be eligible to be taken for graduate credit according to the course description. Exceptions may be chosen to enhance an aspect of the student's degree program. Any course taken that is below the 6000 level must receive prior written approval from the student's advisor.

With department approval, students who complete the Master of Science in Computer Science and then enroll in the Master of Science in the field of Cybersecurity in Computer Science or vice versa can count the following core courses towards both degrees:

CSCI 6212	Design and Analysis of Algorithms
-----------	-----------------------------------

CSCI 6221	Advanced Software Paradigms
-----------	-----------------------------

CSCI 6461	Computer System Architecture
-----------	------------------------------

*Any special topics course taken for credit toward the degree must be approved by the faculty advisor and it must focus on security or cryptography.

**Any cybersecurity-related course not specifically listed here must be approved in advance by the student's advisor to

ensure it is sufficiently advanced and rigorous to count toward credit for the degree.

MASTER OF SCIENCE IN THE FIELD OF DATA ANALYTICS

Administered jointly through the Department of Computer Science and the Department of Engineering Management and Systems Engineering, the master of science in data analytics aims to address the growing demand for professionals skilled in big data and data analytics in government, industry and research organizations.

Through courses led by top faculty members at the School of Engineering and Applied Science and the School of Business, this program is conducted in small cohorts and covers topics in computer science, business analytics and systems engineering while focusing on the foundations of analytics from a technical engineering perspective.

As part of their program requirements, students choose either the computer science or the engineering management and systems engineering track.

Students in the program should expect the following program outcomes:

- Apply data science and analytics techniques in the decision-making process of a wide range of organizations.
- Demonstrate the ability to store, clean and transform data.
- Demonstrate improvements in the decision-making process by using and applying analytics techniques to interpret results
- Design and implement computing infrastructure and algorithmic techniques for big data analytics.
- Explore the engineering foundations that propel the fields of data science and analytics.
- Gain hands-on experience with analytical tools for big data.
- Pursue or enhance careers as data analysts or data scientists.

REQUIREMENTS

Credit Requirements

The following requirements must be fulfilled: 33 credits, including 18 credits in required courses and 15 credits in elective courses.

Code	Title	Credits
Required		
CSCI 6362	Probability for Computer Science	
or EMSE 6765	Data Analysis for Engineers and Scientists	

CSCI 6441	Database Management Systems
or EMSE 6586	Data Management Systems for Data Analytics
CSCI 6444	Introduction to Big Data and Analytics
EMSE 6574	Programming for Analytics
SEAS 6401	Data Analytics Foundations and Practicum
SEAS 6402	Data Analytics Capstone

Additional coursework

Five additional courses are required. At least three of these courses (two required and one elective) must be in either the computer science track or in the engineering management and systems engineering track, effectively constituting a concentration in one of the two tracks. With the advisor's approval, the remaining elective course may be taken outside of the selected track and may include courses outside SEAS.

Computer science track

If the computer science track is selected, students must take CSCI 6212 and CSCI 6364 and one elective course from the list below.

Required	
CSCI 6212	Design and Analysis of Algorithms
CSCI 6364	Machine Learning
Electives	
CSCI 6312	Graph Theory and Applications
CSCI 6341	Continuous Algorithms
CSCI 6342	Computational Linear Algebra and Applications
CSCI 6351	Data Compression
CSCI 6365	Advanced Machine Learning
CSCI 6421	Distributed and Cluster Computing
CSCI 6442	Database Systems II
CSCI 6443	Data Mining
CSCI 6451	Information Retrieval Systems
CSCI 6515	Natural Language Understanding
CSCI 6527	Introduction to Computer Vision

Engineering management and systems engineering track

If the engineering management and systems engineering track is selected, students must take EMSE 6575 and EMSE 6577 and one elective course from the list below.

Required

EMSE 6575 Applied Machine Learning for Analytics

EMSE 6577 Data-Driven Policy

Electives

EMSE 6020 Decision Making with Uncertainty

EMSE 6035 Marketing Analytics for Design Decisions

EMSE 6510 Decision Support Systems and Models

EMSE 6579 Applied Data Mining in Engineering Management

EMSE 6740 Systems Thinking and Policy Modeling I

EMSE 6760 Discrete Systems Simulation

EMSE 6770 Techniques of Risk Analysis and Management

Graduation and Scholarship Requirements

Students are responsible for knowing the university's minimum GPA requirement for graduation and scholarships.

Please visit the Graduation and Scholarship Requirements (http://bulletin.gwu.edu/engineering-applied-science/#graduation_requirements_ms) section on this site to read the requirements.

Students should contact the department for additional information and requirements.

Program Restrictions

Normally, only 6000 level courses (or higher) may be counted toward the requirements for the graduate degree.

MASTER OF SCIENCE IN THE FIELD OF ELECTRICAL ENGINEERING

Students in the MS program in electrical engineering choose focus areas from the following: applied electromagnetics; communications and networks; electrical power and energy; electronic, photonics, and MEMS (VLSI systems and microelectronics); signal and image processing; systems and controls. Our location in Washington, D.C. – home to one of the nation's largest concentrations of high-technology enterprises – gives our students and faculty access to new advances in technology through government agencies, private industry and defense centers.

Students in our master's program benefit from a flexible schedule that includes both late afternoon and evening classes. Additionally, students may choose a thesis or non-thesis option.

For additional information on the on-campus program, visit the on-campus program website (<https://www.ece.seas.gwu.edu/master-science-electrical-engineering/>).

For additional information on the online program, visit the online program website (<https://engineering.gwu.edu/online-programs/ms-in-electrical-engineering/>).

REQUIREMENTS

The following requirements must be fulfilled:

30 credits are required for the degree. Non-thesis and thesis options are available. For the thesis option, 6 of these credits are taken in ECE 6998 and ECE 6999. For either option, the student must select one focus area from the chart below and complete the specified number of credits for that area.

Colloquium requirement: In addition to required coursework, students must attend five non-credit bearing colloquia as part of their program of study. Each colloquium attended is verified by a faculty member also in attendance. After attending five colloquia, the student must submit to the department prior to applying for graduation a colloquium attendance form signed by the faculty advisor.

Communications and networks

Code	Title	Credits
Required		
ECE 6015	Stochastic Processes in Engineering	
ECE 6035	Introduction to Computer Networks	
ECE 6510	Communication Theory	
At least two of the following:		
ECE 6500	Information Theory	
ECE 6505	Error Control Coding	
ECE 6520	Mobile and Wireless Communication Systems	
ECE 6525	Satellite Communication Systems	
ECE 6530	Electronic Warfare	
ECE 6550	Network Architectures and Protocols	
ECE 6560	Network Performance Analysis	
ECE 6565	Telecommunications Security	
ECE 6570	Telecommunications Security Protocols	

ECE 6575	Optical Communication Networks
ECE 6580	Wireless Networks
ECE 6760	Propagation Modeling in Wireless Communications

For thesis option

ECE 6998	Thesis Research I
ECE 6999	Thesis Research II

Electives*

Non-thesis option—15 credits in elective courses; thesis option—9 credits in elective courses. For either option, at least 3 credits must come from outside of the area of focus list.

Electrical power and energy

Code	Title	Credits
Required		
ECE 6060	Electric Power Generation	
At least two of the following:		
ECE 6010	Linear Systems Theory	
ECE 6020	Applied Electromagnetics	
ECE 6025	Signals and Transforms in Engineering	
At least three of the following:		
ECE 6610	Electrical Energy Conversion	
ECE 6620	Electrical Power Systems	
ECE 6662	Power Electronics	
ECE 6666	Power System Transmission, Control, and Security	
ECE 6667	Nuclear Power Generation	
ECE 6668	Power Distribution Grids	
ECE 6669	Smart Power Grids	
ECE 6670	Power System Protection	
ECE 6690	Power Systems Economics	
ECE 6691	Power Systems Reliability	
ECE 6699	Energy and Sustainability	

For thesis option

ECE 6998	Thesis Research I
----------	-------------------

ECE 6999	Thesis Research II
Electives*	

Non-thesis option—12 credits in elective courses; thesis option—6 credits in elective courses. For either option, at least 3 credits must come from outside of the area of focus list.

Applied electromagnetics

Code	Title	Credits
Required		
ECE 6020	Applied Electromagnetics	
At least four of the following:		
ECE 6710	Microwave Engineering	
ECE 6715	Antennas	
ECE 6720	Remote Sensing	
ECE 6725	Electromagnetic Radiation and Scattering	
ECE 6730	Waves in Random Media	
ECE 6735	Numerical Electromagnetics	
ECE 6745	Analysis of Nonlinear and Multivalued Devices	
ECE 6750	Modern Radar Systems	
ECE 6760	Propagation Modeling in Wireless Communications	
ECE 6765	Photonics and Fiber Optics	
ECE 6770	Applied Magnetism	

For thesis option

ECE 6998	Thesis Research I
ECE 6999	Thesis Research II

Electives*

Non-thesis option—15 credits in elective courses; thesis option—9 credits in elective courses. For either option, at least 3 credits must come from outside of the area of focus list.

MEMS, electronics, and photonics

Code	Title	Credits
Required		
ECE 6030	Device Electronics	

At least four of the following:

ECE 6213	Design of VLSI Circuits
ECE 6214	High-Level VLSI Design Methodology
ECE 6215	Introduction to MEMS
ECE 6216	RF/VLSI Circuit Design
ECE 6218	Advanced Analog VLSI Circuit Design
ECE 6221	Introduction to Physical Electronics
ECE 6240	VLSI Design and Simulation
ECE 6245	Micro- and Nanofabrication Technology
ECE 6250	ASIC Design and Testing of VLSI Circuits
ECE 6255	Sensors, Networks, and Applications
ECE 6260	Introduction to Nanoelectronics
ECE 6765	Photonics and Fiber Optics
For thesis option	
ECE 6998	Thesis Research I
ECE 6999	Thesis Research II

Electives*

Non-thesis option—15 credits in elective courses; thesis option—9 credits in elective courses. For either option, at least 3 credits must come from outside of the area of focus list.

Signal and image processing, systems, and controls

Code	Title	Credits
Required		
ECE 6015	Stochastic Processes in Engineering	
At least four of the following:		
ECE 6005	Computer Architecture and Design	
ECE 6010	Linear Systems Theory	
ECE 6025	Signals and Transforms in Engineering	
ECE 6666	Power System Transmission, Control, and Security	
ECE 6800	Computational Techniques in Electrical Engineering	
ECE 6810	Speech and Audio Processing by Computer	

ECE 6815	Multimedia Processing
ECE 6820	Real-Time Digital Signal Processing
ECE 6825	Computer Control Systems
ECE 6830	System Optimization
ECE 6835	Nonlinear Systems
ECE 6840	Digital Image Processing
ECE 6842	Image Engineering
ECE 6845	Image Synthesis
ECE 6850	Pattern Recognition
ECE 6855	Computer Vision
ECE 6860	Compression Techniques for Data, Speech, and Video
ECE 6865	Statistical Signal Estimation
ECE 6875	Wavelets and Their Applications
ECE 6880	Adaptive Signal Processing
ECE 6885	Computer Vision

For thesis option

ECE 6998	Thesis Research I
ECE 6999	Thesis Research II

Electives*

Non-thesis option—15 credits in elective courses; thesis option—9 credits in elective courses. For either option, at least 3 credits must come from outside of the area of focus list.

*Normally, no more than two courses taken outside the Department of Electrical and Computer Engineering may be counted toward the requirements for the degree. Courses taken outside the department must have prior approval from the student's faculty advisor. In addition, no more than three 3000- or 4000-level ECE courses that have been approved for graduate credit may be counted toward the requirements for the degree.

Educational Planner

In consultation with an academic advisor, each student must develop an Educational Planner through DegreeMAP that governs the student's plan of study. The Educational Planner should be established soon after matriculation and must be completed before the end of the student's first semester. The Educational Planner must be approved by the advisor.

Additional program requirements can found on the Department of Electrical and Computer Engineering Master's Degree requirements (<https://www.ece.seas.gwu.edu/graduate-programs/>) webpage.

MASTER OF SCIENCE IN THE FIELD OF ENGINEERING MANAGEMENT

Designed for the technical manager who needs a broad education to keep an organization operating efficiently and working ahead of its competitors, GW's engineering management program provides graduate education in the most current management techniques for technological and scientific organizations.

Graduate students can pursue their degrees in one of the following focus areas: crisis, emergency, and risk management; economics, finance, and cost engineering; engineering and technology management; environmental and energy management; and knowledge and information management.

Students pursuing a master's degree learn excellent skills at the cutting edge of engineering management. They also benefit from GW's many contacts with industry and governmental leaders. Students may choose from a thesis or non-thesis option for the master's degree.

For additional information on the on-campus program, visit the on-campus program website (<https://graduate.seas.gwu.edu/masters-engineering-management/>).

For additional information on the online program, visit the online program website (<https://engineering.gwu.edu/online-programs/ms-in-engineering-management/>).

REQUIREMENTS

Credit Requirements

Non-Thesis Option: The program of study consists of 12 graduate-level courses totaling 36 credits. Three types of course requirements are included in the curriculum: common course requirements, focus course requirements, and approved electives. Common course requirements are taken by all students in the MS program in engineering management. Focus course requirements are taken by all students within the area of focus. Approved elective requirements are courses that require the approval of the student's individual academic advisor.

Thesis Option: To register in the thesis option, students must submit their advisor-approved plan of study and thesis area to the department chair. In addition to the course requirements below, students should take the thesis course sequence: EMSE 6998 (Thesis Research) and EMSE 6999 (Thesis Research), ideally in the last two semesters prior to graduation. Note that such thesis credits may be used in lieu of the electives. Hence, the program of study requires a minimum of 36 credit

hours. While registered in the thesis course sequence, students shall work with the faculty member under whom the thesis is to be written. Students may consult with their advisors, but they have primary responsibility for their own thesis. Students defend their theses orally before a committee of SEAS faculty members. The course requirements for the program are detailed below.

Code	Title	Credits
Required		
EMSE 6001	The Management of Technical Organizations	
EMSE 6020	Decision Making with Uncertainty	
EMSE 6410	Survey of Finance and Engineering Economics	
EMSE 6801	Systems Engineering I	

Crisis, Emergency, and Risk Management

Code	Title	Credits
Required		
EMSE 6305	Crisis and Emergency Management	
EMSE 6310	Information Technology in Crisis and Emergency Management	
EMSE 6315	Management of Risk and Vulnerability for Hazards and Terrorism	
EMSE 6325	Medical and Public Health Emergency Management	
or EMSE 6330	Management of Terrorism Preparedness and Response	
Two of the following:		
EMSE 6240	Environmental Hazard Management	
EMSE 6300	Homeland Security: The National Challenge	
EMSE 6345	Disaster Recovery and Organizational Continuity	
EMSE 6350	Hazard Mitigation in Disaster Management	
EMSE 6540	Management of Information and Systems Security	
EMSE 6820	Program and Project Management	
EMSE 6992	Special Topics (with program advisor approval)	

Electives

Two additional Engineering Management and Systems Engineering (EMSE) courses with the advisor's approval.

Engineering and Technology Management

Code	Title	Credits
------	-------	---------

Required

EMSE 6005	Organizational Behavior for the Engineering Manager
-----------	---

EMSE 6820	Program and Project Management
-----------	--------------------------------

EMSE 6099	Problems in Engineering Management and Systems Engineering
-----------	--

Two of the following:

EMSE 6010

EMSE 6014	Management of Engineering Contracts
-----------	-------------------------------------

EMSE 6018	Engineering Law
-----------	-----------------

EMSE 6023	Technology Issue Analysis
-----------	---------------------------

EMSE 6026	Technical Enterprises
-----------	-----------------------

EMSE 6030	Technological Forecasting and Management
-----------	--

EMSE 6035	Marketing Analytics for Design Decisions
-----------	--

EMSE 6070	Management of Research and Development
-----------	--

EMSE 6430	Financial Management for Engineers
-----------	------------------------------------

EMSE 6505	Knowledge Management I
-----------	------------------------

EMSE 6760	Discrete Systems Simulation
-----------	-----------------------------

EMSE 6805	Systems Engineering II
-----------	------------------------

EMSE 6992	Special Topics (with program advisor approval)
-----------	--

Electives

Three additional Engineering Management and Systems Engineering (EMSE) courses with the advisor's approval.

Environmental and Energy Management

Code	Title	Credits
------	-------	---------

Required

EMSE 6220	Environmental Management
-----------	--------------------------

EMSE 6225	Air Quality Management
-----------	------------------------

EMSE 6235	Water Quality Management
-----------	--------------------------

EMSE 6260	Energy Management
-----------	-------------------

Two of the following:

EMSE 6200	Policy Factors in Environmental and Energy Management
-----------	---

EMSE 6230	Hazardous Waste Management and Cleanup
-----------	--

EMSE 6240	Environmental Hazard Management
-----------	---------------------------------

EMSE 6245	Analytical Tools for Environmental Management
-----------	---

EMSE 6285	Analytical Tools for Energy Management
-----------	--

EMSE 6290	Climate Change: Policy, Impacts, and Response
-----------	---

EMSE 6295	Environmental Security
-----------	------------------------

EMSE 6992	Special Topics (with program advisor approval)
-----------	--

Electives

Two additional Engineering Management and Systems Engineering (EMSE) courses with the advisor's approval.

Economics, Finance, and Cost Engineering

Code	Title	Credits
------	-------	---------

Required

EMSE 6420	Uncertainty Analysis in Cost Engineering
-----------	--

EMSE 6430	Financial Management for Engineers
-----------	------------------------------------

EMSE 6450	Quantitative Methods in Investment Engineering
-----------	--

EMSE 6820	Program and Project Management
-----------	--------------------------------

Two of the following:

EMSE 6014	Management of Engineering Contracts
-----------	-------------------------------------

EMSE 6018	Engineering Law
-----------	-----------------

EMSE 6026	Technical Enterprises
-----------	-----------------------

EMSE 6701	Operations Research Methods
-----------	-----------------------------

EMSE 6840	Applied Enterprise Systems Engineering
-----------	--

EMSE 6850	Quantitative Models in Systems Engineering
EMSE 6992	Special Topics (with program advisor approval)

Electives

Two additional Engineering Management and Systems Engineering (EMSE) courses with the advisor's approval.

Graduation and Scholarship Requirements

Students are responsible for knowing the university's minimum GPA requirement for graduation and scholarships.

Please visit the Graduation and Scholarship Requirements (http://bulletin.gwu.edu/engineering-applied-science/#graduation_requirements_ms) section on this site to read the requirements.

Students should contact the department for additional information and requirements.

Program Restrictions

Normally, only 6000 level courses (or higher) may be counted toward the requirements for the graduate degree.

MASTER OF SCIENCE IN THE FIELD OF MECHANICAL AND AEROSPACE ENGINEERING

GW's mechanical and aerospace engineering program boasts areas of excellence in nanotechnology, biomimetics, biomedical engineering, and energy, in addition to its strengths in the discipline's traditional fields. Graduate students can pursue the following focus areas: aerospace engineering; design of mechanical engineering systems; fluid mechanics, thermal sciences and energy; industrial engineering; robotics, mechatronics, and controls; solid mechanics and materials science; and structures and dynamics.

Master's degree students learn excellent skills at the cutting edge of mechanical and aerospace engineering and benefit from GW's breadth of research in the discipline. Students may choose a thesis or non-thesis option for the master's degree.

More information is available on the departmental website (<https://www.mae.seas.gwu.edu/>).

REQUIREMENTS

The following requirements must be fulfilled: Non-thesis option—33 credits; thesis option—30 credits, including 6 credits of thesis. In addition, students must select one focus area and complete the required 9 credits of courses in that area. The remaining credits are selected by the student in consultation with a faculty advisor.

Normally, no more than two courses taken outside the Department of Mechanical and Aerospace Engineering may be counted toward the requirements for the graduate degree. In special circumstances this may be changed with the approval of the advisor.

Aerospace engineering

Code	Title	Credits
Required		
APSC 6212	Analytical Methods in Engineering II	
APSC 6213	Analytical Methods in Engineering III	
MAE 6286	Numerical Solution Techniques in Mechanical and Aerospace Engineering	
One of the following:		
MAE 6207	Theory of Elasticity I	
MAE 6221	Fluid Mechanics	

Electives

Remaining credits are taken as elective courses in aeroacoustics, aeronautics, astronautics, propulsion, or space systems.

Design of mechanical engineering systems

Code	Title	Credits
Required		
MAE 6243	Advanced Mechanical Engineering Design	
MAE 6251	Computer-Integrated Manufacturing	
One of the following:		
APSC 6212	Analytical Methods in Engineering II	
APSC 6213	Analytical Methods in Engineering III	
MAE 6286	Numerical Solution Techniques in Mechanical and Aerospace Engineering	

Electives

Remaining credits are taken as elective courses in computer-aided design, computer-integrated design and manufacturing, mechanical engineering design, or robotics.

Fluid Mechanics, thermal sciences, and energy

Code	Title	Credits
Required		
APSC 6213	Analytical Methods in Engineering III	

MAE 6221	Fluid Mechanics
MAE 6286	Numerical Solution Techniques in Mechanical and Aerospace Engineering

Electives

Remaining credits are taken in elective courses, selected in consultation with the advisor.

Industrial engineering

Code	Title	Credits
Required		
EMSE 6755	Quality Control and Acceptance Sampling	

EMSE 6770	Techniques of Risk Analysis and Management
-----------	--

MAE 6251	Computer-Integrated Manufacturing
----------	-----------------------------------

One of the following:

APSC 6212	Analytical Methods in Engineering II
-----------	--------------------------------------

APSC 6213	Analytical Methods in Engineering III
-----------	---------------------------------------

Electives

Remaining credits are taken in elective courses, selected in consultation with the advisor.

Solid mechanics and materials science

Code	Title	Credits
Required		
APSC 6213	Analytical Methods in Engineering III	

Two of the following:

MAE 6210	Continuum Mechanics
----------	---------------------

MAE 6238	Biomaterials
----------	--------------

MAE 6239	Computational Nanosciences
----------	----------------------------

MAE 6291	Special Topics in Mechanical Engineering
----------	--

ECE 6221	Introduction to Physical Electronics
----------	--------------------------------------

Electives

Remaining credits are taken in elective courses, selected in consultation with the advisor.

Structures and dynamics

Code	Title	Credits
Required		
APSC 6213	Analytical Methods in Engineering III	
MAE 6207	Theory of Elasticity I	
MAE 6286	Numerical Solution Techniques in Mechanical and Aerospace Engineering	

Electives

Remaining credits are taken in elective courses, selected in consultation with the advisor.

Robotics, mechatronics, and controls

Code	Title	Credits
Required		
MAE 6243	Advanced Mechanical Engineering Design	
MAE 6245	Robotic Systems	
MAE 6246	Electromechanical Control Systems	

Electives

Remaining credits are taken in elective courses, selected in consultation with the advisor.

Graduation and Scholarship Requirements—Students are responsible for knowing the University's minimum GPA requirement for graduation and scholarships (p.). Students should contact the department for additional information and requirements.

MASTER OF SCIENCE IN THE FIELD OF SYSTEMS ENGINEERING

The systems engineering program provides broad knowledge of the "systems approach" for designing and managing large-scale engineering systems throughout the life cycle, with faculty and students exploring case studies and methodologies from NASA, the U.S. Department of Defense and U.S. corporations. Graduate students can pursue their degrees in one of two focus areas: operations research and management science or systems engineering and integration.

Students pursuing a master's degree acquire excellent skills at the cutting edge of systems engineering. They also benefit from GW's many contacts with industry and governmental leaders. Students may choose a thesis or non-thesis option for the degree. GW's graduate systems engineering programs are offered for the general public at GW's campus in Arlington,

Va. They are also offered on site at U.S. corporate offices and facilities.

For additional on-campus program information, visit the on-campus program website (<http://www.emse.seas.gwu.edu/master-science-systems-engineering/>).

For additional online program information, visit the online program website (<https://engineering.gwu.edu/online-programs/ms-in-systems-engineering/>).

REQUIREMENTS

Curriculum requirements

Non-thesis option—36 credits in coursework. Three types of course requirements are included in the curriculum: common course requirements, focus course requirements, and approved electives. Common course requirements are taken by all students in the MS program in systems engineering. Focus course requirements are taken by all students within the area of focus. Elective courses require the approval of the student's academic advisor.

Thesis option—36 credits, including the thesis. To register in the thesis option, students must submit their advisor-approved plan of study and thesis area to the department chair. In addition to the course requirements, students take the thesis course sequence, EMSE 6998 and EMSE 6999, ideally in the final two semesters of the program. Thesis credits may be used in lieu of electives. Hence, the program of study requires a minimum of 36 credits. While registered in the thesis course sequence, students work with the faculty member under whom the thesis is to be written. Students may consult with their advisors, but they have primary responsibility for their own thesis. Students defend their theses orally before a committee of SEAS faculty members.

Code	Title	Credits
Required		
EMSE 6001	The Management of Technical Organizations	
EMSE 6020	Decision Making with Uncertainty	
EMSE 6410	Survey of Finance and Engineering Economics	
EMSE 6801	Systems Engineering I	

Operations Research and Management Science

Code	Title	Credits
Required		
EMSE 6701	Operations Research Methods	

EMSE 6710 Optimization Models and Algorithms

EMSE 6760 Discrete Systems Simulation

EMSE 6765 Data Analysis for Engineers and Scientists

EMSE 6770 Techniques of Risk Analysis and Management

Three of the following:

EMSE 6705 Mathematics in Operations Research

EMSE 6715 Theory of Games

EMSE 6730 Integer and Network Programming

EMSE 6740 Systems Thinking and Policy Modeling I

EMSE 6750 Stochastic Foundations of Operations Research

EMSE 6755 Quality Control and Acceptance Sampling

EMSE 6992 Special Topics

Systems Engineering

Code	Title	Credits
Required		
EMSE 6805	Systems Engineering II	
EMSE 6810	Systems Analysis and Management	
EMSE 6820	Program and Project Management	
EMSE 6850	Quantitative Models in Systems Engineering	
Two of the following:		
EMSE 6540	Management of Information and Systems Security	
EMSE 6580	Information and Software Engineering	
EMSE 6815	Requirements Engineering	
EMSE 6992	Special Topics (in consultation with advisor)	

Plus two courses (6 credits) selected in consultation with the advisor

Graduation and Scholarship Requirements

Students are responsible for knowing the university's minimum GPA requirement for graduation and scholarships. Please visit the Graduation and Scholarship Requirements

(http://bulletin.gwu.edu/engineering-applied-science/#graduation_requirements_ms) section on this site to read the requirements.

Students should contact the department for additional information and requirements.

Program Restrictions

Normally, only 6000 level courses (or higher) may be counted toward the requirements for the graduate degree.

MASTER OF SCIENCE
IN THE FIELD OF
TELECOMMUNICATIONS
ENGINEERING

The master of science in telecommunications engineering, which is offered by the department of electrical and computer engineering, is designed to help students understand and apply the fundamentals of telecommunications engineering, including topics such as computer networking, network architectures and protocols, and telecommunications security. In addition, students have the option to take courses on optical networking, wireless networking, and big data and cloud computing.

More information is available on the departmental website (<https://www.ece.seas.gwu.edu/master-science-telecommunications-engineering/>).

REQUIREMENTS

The following requirements must be fulfilled:

30 credits are required for the degree. Non-thesis and thesis options are available. For the thesis option, 6 of these credits are taken in ECE 6998 and ECE 6999.

Colloquium requirement: In addition to required coursework, students must attend five non-credit bearing colloquia as part of their program of study. Each colloquium attended is verified by a faculty member also in attendance. After attending five colloquia, the student must submit to the department prior to applying for graduation a colloquium attendance form signed by the faculty advisor.

Code	Title	Credits
Required		
ECE 6035	Introduction to Computer Networks	
ECE 6550	Network Architectures and Protocols	
ECE 6565	Telecommunications Security	
ECE 6575	Optical Communication Networks	

ECE 6580	Wireless Networks
Two of the following:	
ECE 6005	Computer Architecture and Design
ECE 6015	Stochastic Processes in Engineering
ECE 6130	Big Data and Cloud Computing
ECE 6560	Network Performance Analysis
ECE 6570	Telecommunications Security Protocols

Required for thesis option

ECE 6998	Thesis Research I
ECE 6999	Thesis Research II

Electives*

Non-thesis option—9 credits in elective courses; thesis option —3 credits in elective courses.

*Normally, no more than two courses taken outside the Department of Electrical and Computer Engineering may be counted toward the requirements for the degree. Courses taken outside the department must have prior approval from the student’s faculty advisor. In addition, no more than three 3000- or 4000-level ECE courses that have been approved for graduate credit may be counted toward the requirements for the degree.

Educational Planner

In consultation with an academic advisor, each student must develop an Educational Planner through DegreeMAP that governs the student’s plan of study. The Educational Planner should be established soon after matriculation and must be completed before the end of the student’s first semester. The Educational Planner must be approved by the advisor.

Additional program requirements can found on the Department of Electrical and Computer Engineering Master's Degree requirements (<https://www.ece.seas.gwu.edu/graduate-programs/>) webpage.

DOCTORAL PROGRAMS

DOCTOR OF ENGINEERING IN
THE FIELD OF ENGINEERING
MANAGEMENT

Designed for the technical manager who needs a broad education to keep an organization operating efficiently and working ahead of its competitors, GW’s engineering management program provides graduate education in the

most current management techniques for technological and scientific organizations.

Graduate students can pursue their degrees in one of the following focus areas: crisis, emergency, and risk management; economics, finance, and cost engineering; engineering and technology management; environmental and energy management; and knowledge and information management.

The doctoral program, tailored for each student, is designed to provide the ability to perform substantive research in an area of the student's choice. Students benefit from working closely with faculty whose applications research has been successfully used by major organizations.

Visit the SEAS online programs website (<https://seasonline.gwu.edu/doctoral-degrees/doctor-of-engineering/>) for additional information.

REQUIREMENTS

Credit Requirements

The following requirements must be fulfilled: 45 credits, including 30 credits in required courses and 15 credits in research culminating in a practice-based case study.

Code	Title	Credits
Required		
EMSE 6115	Uncertainty Analysis for Engineers	
EMSE 6992	Special Topics (Quantitative Methods for Engineering Managers)	
EMSE 8100	The Praxis Proposal	
A minimum of 6 credits of EMSE analytical methods courses selected in consultation with the advisor.		
A minimum of 9 credits of EMSE engineering management courses selected in consultation with the advisor.		
Electives		
6 credits in courses selected in consultation with the advisor.		
Praxis		
EMSE 8199	Praxis Research (taken for a total of 15 credits)	

Students must complete the praxis proposal examination by preparing and defending their proposal before a committee of at least two full-time members of the SEAS and one outside advisor external to the faculty.

DOCTOR OF PHILOSOPHY IN THE FIELD OF BIOMEDICAL ENGINEERING

The PhD program in biomedical engineering is strongly interdisciplinary and is designed to prepare students to apply engineering principles to problems in medicine and biology, to understand and model multiple attributes of living systems, and to use this knowledge to develop novel biomedical systems and devices. Graduate students can choose from among a large array of areas of study, mentored by both core departmental faculty and external faculty from SEAS and elsewhere in GW, who qualify, on the basis of their expertise and teaching abilities, for joint or secondary appointments in the Biomedical Engineering Department. The core faculty expertise includes cancer therapy, cardiac electrophysiology, biosensors, microfluidics, ultrasound applications in medicine, and medical imaging and image analysis.

The PhD program is offered on the main campus in Foggy Bottom, and takes full advantage of the close proximity of the department's home in the new Science and Engineering Hall to the GW School of Medicine, the Milken Institute School of Public Health at GW, and the GW Hospital. These interactions are supplemented by collaborations that take advantage of nearby clinical and research facilities, including Children's National Health System and Federal agencies such as the FDA and NIH.

More information is available on the departmental website (<https://www.bme.seas.gwu.edu/>).

REQUIREMENTS

Credit Requirements

The following requirements must be fulfilled:

General requirements are stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#Doctor_of_Philosophy).

Credit requirements—For students with an MS degree, a minimum of 30 credits, of which at least 18 must be credits from courses available for graduate credit, and at least 12 must be in dissertation research is required. Course selections must be approved by the student's advisor.

For students with a BS degree, a minimum of 54 credits, of which at least 36 must be from courses available for graduate credit, and at least 12 must be in dissertation research is required. The remaining 6 credits may be in undergraduate courses, graduate courses, dissertation research credits, or a combination of all. Course selections must be approved by the student's advisor.

Preliminary/Qualifying Exams

All PhD in BME students are required to take a doctoral preliminary examination, which are held at the beginning of each semester. The goal of the exam is to determine the student's aptitude and ability to complete original and independent research at the doctoral level, to assess the student's ability to review previous work from the literature, and to determine the student's ability to understand and apply fundamental concepts in their technical area. A written proposal and an oral presentation of the predetermined question are required. All students should take the exam as early as possible after they complete at least 6 credits in core courses and 6 credits in elective courses and maintain a minimum average GPA of 3.4. The exam typically should be completed no later than the beginning of a student's fourth semester.

Dissertation

After successful completion of the preliminary examination the student is admitted to be a candidate for the PhD degree program and begins specialized research under the supervision of his/her dissertation advisor. Research direction may be shared by a full-time faculty member and an outstanding external scientist or engineer, but the final responsibility for the academic aspects of the dissertation work lies with the BME faculty advisor.

Dissertation research proposal

During the research phase, each doctoral candidate is required to give a research proposal presentation to the Dissertation Committee. The student's research progress is assessed by the committee and appropriate suggestions for continuing research directions are solicited from those in attendance. Scheduling of the research proposal presentation will be done at a minimum of one year before the final dissertation defense by the student's dissertation advisor. The committee helps the student to define the research topic, and ultimately approves the research proposal. The dissertation advisor should propose the membership of the dissertation research committee, which must be approved by the Associate Chair for Research and Graduate Affairs. At least four individuals should serve on the research proposal committee; the research advisor is the dissertation director (also called the advocate) and three others. Two of the committee members must be full-time BME faculty. Students are required to present the written dissertation proposal to the committee and to successfully defend the proposal in an oral defense subsequent to performing the bulk of their dissertation research. After the proposal defense, the student submits the revised proposal, complying with all suggestions, clarifications, and corrections, as required by the dissertation committee.

Dissertation Defense: The dissertation advisor may decide that the research achieved by the doctoral student is sufficient to satisfy the requirement of the degree. The advisor proposes an examining committee for the purpose of administering the final dissertation examination (dissertation defense). The

committee of examiners must consist of no fewer than five members, at least three of whom normally are full-time BME faculty members with scholarly specialties within the area of concentration; at least one member normally is from an academic specialty outside the area of concentration. An external examiner must be invited. The dissertation advisor serves on the examining committee both as advocate and as a non-voting committee member. As its first order of business, the committee elects its own chairman, who should not be the dissertation advisor or the student's faculty advisor. The dissertation examining committee must be approved by the Associate Chair for Research and Graduate Affairs prior to the date of the defense. Each member of the examination committee, no later than three weeks prior to the defense, should receive a copy of the dissertation document. At the same time, the candidate must provide a 350-word [JW1] (p. 809) abstract and other information to the department for the purpose of preparing an announcement of the defense. The dissertation defense is an oral examination, which is open to the public. When the dissertation is accepted as complete, it should be submitted electronically no later than the date specified by the Office of the Registrar.

Publication Requirements

Before the doctoral defense, the PhD student must publish at least one **first-author** manuscript in a peer-reviewed journal on original work related to the topic of the doctoral dissertation.

Graduation and Scholarship Requirements

Students are responsible for adhering to the university's minimum GPA requirement for graduation and scholarships. Consult SEAS Regulations (p. 679) section of this Bulletin. Students should contact the department for additional information and requirements.

DOCTOR OF PHILOSOPHY IN THE FIELD OF CIVIL AND ENVIRONMENTAL ENGINEERING

Environmental engineering students use one of the world's largest wastewater treatment plants as a real-world laboratory to improve the water quality of the Potomac River and the Chesapeake Bay watershed. Structural engineering students study earthquake engineering, extreme event design of structures and bridge design on a state-of-the-art, six-degrees-of-freedom earthquake simulator.

The PhD program requires a minimum of 30 credit hours in a formal program of study at the graduate level beyond master's study or, for students without a master's degree, a minimum of 54 credit hours in a formal program of study at the graduate level beyond the baccalaureate is required. Graduate students can pursue their degrees in one of the following focus areas: engineering mechanics, environmental

engineering, geotechnical engineering, structural engineering, transportation safety engineering and water resources engineering.

The doctoral program aims to educate highly qualified researchers who will enhance fundamental knowledge and produce technological innovations through original research and development. Our location and relationships with companies and government agencies in the Washington, D.C., area allow for collaborative research opportunities that greatly increase our graduates' job prospects.

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#Doctor_of_Philosophy).

Students with an MS degree must take a minimum of 30 credits, of which at least 18 must be from graduate courses, and at least 12 must be dissertation research credits. The courses to be taken by the student must be approved by the student's advisor. Students with a BS degree must take a minimum of 54 credits, of which at least 42 must be graduate course credits, and at least 12 must be dissertation research credits. The courses to be taken by the student must be approved by the student's advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits.

No specific courses are required; the student and advisor design the curriculum to meet the student's needs and goals.

Other requirements

- Qualifying examination—Administered twice a year, the examination covers subject matters at both the master's and doctoral levels. Students should prepare for comprehensive questioning on all subject matters regardless of any particular course included in the actual doctoral coursework load.

Student should contact the department for additional information and requirements

Visit the program website (<https://www.cee.seas.gwu.edu/doctor-philosophy-program/>) for additional program information.

DOCTOR OF PHILOSOPHY IN THE FIELD OF COMPUTER ENGINEERING

PhD students in the computer engineering program choose from among the following areas of focus: MEMS, electronics, and photonics (microelectronics and VLSI systems). The

program is designed to prepare the student for a career of creative scholarship by providing focused knowledge in the student's specialty area and guidance for research.

More information is available on the departmental website (<https://www.ece.seas.gwu.edu/doctor-philosophy-computer-engineering/>).

REQUIREMENTS

Credit Requirements

The following requirements must be fulfilled:

1. The general requirements stated in this Bulletin under School of Engineering and Applied Science Regulations, Doctoral Programs (p. 686).
2. Students with a master of science degree must take a minimum of 30 credits, of which at least 18 credits must be credits in courses available for graduate credit, and at least 12 credits must be in dissertation research. Students with a bachelor of science degree must take a minimum of 54 credits, of which at least 36 credits must be in courses available for graduate credit, and at least 12 credits must be in dissertation research. The courses to be taken by the student must be approved by the student's faculty advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study may exceed the minimum number of credits. No specific courses are required; the student and faculty advisor design the curriculum to meet the student's needs and goals.

Preliminary Examination *(revised October 23, 2020)*

The Department of Electrical and Computer Engineering requires doctoral students to pass a preliminary examination. Doctoral students who received their master of science degree prior to admission to the doctoral program must attempt their preliminary exam before completing 27 program credits or before completing three semesters after matriculation into the program, whichever is later. Direct entry PhD students, i.e., those with a bachelor of science degree, must attempt their preliminary examination before completing 36 program credits or before completing four semesters after matriculation into the program, whichever is later. The examination, which is offered every spring and fall semester, is guided by, but not limited to, the core material in the electrical and computer engineering master's programs. Specific details regarding the examination are available on the department's website. Normally, a student is allowed two attempts to pass the preliminary examination. The student selects a research advisor, also called dissertation director, by the end of the semester in which the student passes the preliminary examination.

Doctoral Qualifying Examination

After passing the preliminary examination, in consultation with the research advisor, a student prepares for the doctoral

qualifying examination (also known as proposal defense). The doctoral qualifying examination is the principal means of determining whether a student qualifies as a candidate for the doctoral degree and progress to the next stage of the program. For the doctoral qualifying examination, a written proposal of the doctoral dissertation research is presented to a committee which also conducts an oral examination of the student. Details on the structure of the proposal and the composition of the committee can be found on the departmental website (<https://www.ece.seas.gwu.edu/graduate-resources/>).

Publication Requirements

Every doctoral student is required to have a paper based on the student's dissertation research published or accepted in a scientific journal before the student's doctoral final examination.

Doctoral Final Examination

Once the dissertation has been completed, the student schedules the doctoral final examination (also known as dissertation defense) in consultation with the research advisor. The doctoral final examination Form must be filed and approved by the department chair at least three weeks prior to the doctoral final examination date. Approval is granted only when all required materials have been submitted to the department. The required materials include a completed form, a copy of the journal article or final acceptance letter, resumes of any outside examination committee members, and electronic and printed copies of the dissertation. Details on the structure of the dissertation and the composition of the examination committee can be found on the departmental website (<https://www.ece.seas.gwu.edu/graduate-resources/>).

The doctoral final examination is oral and open to the public. The candidate must demonstrate mastery of the special field of study and of the materials and techniques used in the research. The committee of examiners may include qualified experts brought to the University specially to participate in the examination. The research advisor usually serves as advocate for the candidate. The committee will assess the quality and originality of the candidate's contribution to knowledge as well as the student's mastery of the scholarship and research techniques of the field. Upon decision to pass the student, the committee recommends the candidate for the degree of doctor of philosophy. The decision to pass may be provisional based on committee recommendations for changes to the dissertation in terms of additional work, writing, or clarifications.

Seminar and Colloquium Requirements

- Seminar requirement—Students must present one departmental seminar, excluding the dissertation defense, prior to graduation.
- Colloquium requirement—Students are required to attend five colloquia during their time in the program. Each attended colloquium is verified by a faculty member in

attendance. Upon the attendance of five colloquia, the student must submit to the department the colloquium attendance form signed by the faculty advisor prior to applying for graduation.

Graduation and Scholarship Requirements

Students are responsible for knowing the university's minimum GPA requirement for graduation and scholarships. See School of Engineering and Applied Science Regulations, Graduation and Scholarship Requirements (p. 686).

Students should contact the department for additional information and requirements.

DOCTOR OF PHILOSOPHY IN THE FIELD OF COMPUTER SCIENCE

PhD students in the computer science program choose from among numerous focus areas, including: algorithms and theory; computer architecture, networks, parallel and distributed computing; computer security and information assurance; database and information retrieval systems; machine intelligence and cognition; multimedia, animation, graphics and user interface; and software engineering and systems.

Our doctoral students conduct cutting-edge research with world-class faculty, have access to collaborative opportunities unique to the Washington, D.C., area and benefit from the superb cultural and intellectual experience that the campus and program provide.

More information is available on the department website (<https://www.cs.seas.gwu.edu/phd-computer-science/>).

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#Doctor_of_Philosophy).

Students with an MS degree—A minimum of 30 credits, at least 18 of which must be in courses taken for graduate credit and at least 12 credits in dissertation research. Courses must be approved by the student's advisor.

Students with a BS degree—A minimum of 54 credits, at least 18 of which must be in courses taken for graduate credit and at least 12 credits in dissertation research. Courses must be approved by the advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits. No specific courses are required; the student and advisor design the curriculum to meet the student's needs and goals.

Preliminary Examination

Failure to pass the preliminary examination by the end of the fourth semester will lead to dismissal from the PhD program.

Students must demonstrate competency in two areas, one course per area:

- Algorithms and Theory: CSci 6212 Design and Analysis of Algorithms; CSci 6311 Theory of Computation
- Software and Systems: CSci 6221 Advanced Software Paradigms; CSci 6431 Computer Networks; CSci 6461 Computer Architectures

Students may demonstrate competency in a course in one of two ways:

- By completing the course with a minimum grade of A-.
- By taking only the written, in-class examinations in the course. With this option, students must pass all exams given during a semester, earning a minimum grade of A- in each.

Students who prove, via their official transcript that they earned the requisite grades as part of their master's degree may apply that result to the preliminary exam requirement.

Students must fill out and submit to the Department of Computer Science a Preliminary Examination Form (<https://www.cs.seas.gwu.edu/forms/>) after completing the requirements for the preliminary exam.

Publication Requirements

Students must have at least one peer-reviewed conference or journal paper accepted for publication at the time of the dissertation defense.

As a guideline, students are expected to have at least two or three conference or journal papers accepted for publication by the time of their dissertation defense, and the material from those papers should be the core of the dissertation.

Dissertation

Forming a dissertation committee:

- The dissertation committee must consist of at least three members including the major advisor (additional advisor(s) and co-advisors are optional and additional to the three members).
- The committee must have a presiding chair who must be a regular full-time faculty member in the Department of Computer Science. The committee chair may not be the student's research advisor or co-advisor.
- At least one member of the committee must be an external reviewer. The external reviewer can be any person who holds a Doctoral degree, and may not be a faculty member in the Computer Science department, but may be a researcher or faculty member from another GW department or from outside the University.

- The other members of the committee, not including advisor(s) and co-advisors, shall be regular full-time faculty of the Department of Computer Science or a doctorate-bearing researcher or faculty member from another GW department or from outside of the University..
- The dissertation committee must be approved by the chair of the Department of Computer Science.
- The committee membership is normally the same for the dissertation proposal exam and the dissertation defense. However, the membership may change with the approval of the advisor and department chair.

Dissertation proposal defense:

- The defense may not take place before the student has passed the preliminary examination.
- The student's advisor must approve the scheduling of the dissertation proposal defense.
- The student submits a written proposal, in the style of a dissertation, to the members of the dissertation committee. The proposal should contain preliminary results.
- The dissertation committee evaluates the proposal and conduct an oral examination of the student. The committee conveys its recommendation of pass/fail to the Department of Computer Science.

Dissertation defense:

- The dissertation defense may not be scheduled before the student has passed the dissertation proposal defense.
- The student's advisor must approve the scheduling of the dissertation defense.
- The student submits a written dissertation to the members of the dissertation committee, normally two or more weeks in advance of the defense. The writing should follow the dissertation writing guidelines (https://www.cs.seas.gwu.edu/sites/g/files/zaxdzs1421/f/downloads/New_DoctoralHandbook2016-2017.pdf).
- The committee evaluates the dissertation and conducts an oral examination of the student. The committee conveys its recommendation of pass/fail to the Department of Computer Science.

Colloquium Expectation

All full-time PhD students are expected to regularly attend department colloquiums.

Graduation and Scholarship Requirements

Students are responsible for knowing the University's requirements for graduation and scholarships. Consult the University Regulations (p.) section of this Bulletin. Students should consult the department for additional information and requirements.

DOCTOR OF PHILOSOPHY IN THE FIELD OF ELECTRICAL ENGINEERING

PhD students in the electrical engineering program choose focus areas from the following: applied electromagnetics; communications and networks; electrical power and energy; electronic, photonics, and MEMS (VLSI systems and microelectronics); signal and image processing; systems and controls. Our location in Washington, D.C – home to one of the nation's largest concentrations of high-technology enterprises – gives our students and faculty access to new advances in technology through government agencies, private industry and defense centers.

GW's doctoral program is designed to prepare students for careers of creative scholarship by providing focused knowledge in the students' chosen area of specialty and guidance for research.

More information is available on the departmental website (<https://www.ece.seas.gwu.edu/doctor-philosophy-electrical-engineering/>).

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#Doctor_of_Philosophy).

Students with a master of science (MS) degree must take a minimum of 30 credits, of which at least 18 credits must be in courses available for graduate credit, and at least 12 credits must be in dissertation research.

Students with a bachelor of science (BS) degree must take a minimum of 54 credits, of which at least 36 must be in courses available for graduate credit, and at least 12 must be in dissertation research. These courses must be approved by the student's faculty advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study may exceed the minimum number of credits. No specific courses are required; the student and faculty advisor design the curriculum to meet the student's needs and goals.

Preliminary Examination *(revised October 23, 2020)*

The Department of Electrical and Computer Engineering requires doctoral students to pass a preliminary examination. Doctoral students who received their master of science degree prior to admission to the doctoral program must attempt their preliminary exam before completing 27 program credits or before completing three semesters after matriculation into the program, whichever is later. Direct entry PhD students, i.e., those with a bachelor of science degree, must attempt their

preliminary examination before completing 36 program credits or before completing four semesters after matriculation into the program, whichever is later. The examination, which is offered every spring and fall semester, is guided by, but not limited to, the core material in the electrical and computer engineering master's programs. Specific details regarding the examination are available on the department's website. Normally, a student is allowed two attempts to pass the preliminary examination. The student selects a research advisor also called dissertation director, by the end of the semester in which the student passes the preliminary examination.

Doctoral Qualifying Examination

After passing the preliminary examination, in consultation with the research advisor, a student prepares for the doctoral qualifying examination (also known as proposal defense). The doctoral qualifying examination is the principal means of determining whether a student qualifies as a candidate for the doctoral degree and progress to the next stage of the program. For the doctoral qualifying examination, a written proposal of the doctoral dissertation research is presented to a committee which also conducts an oral examination of the student. Details on the structure of the proposal and the composition of the committee can be found on the departmental website (<https://www.ece.seas.gwu.edu/graduate-resources/>).

Publication Requirements

Every doctoral student is required to have a paper based on the student's dissertation research published or accepted in a scientific journal before the student's doctoral final examination.

Doctoral Final Examination

Once the dissertation has been completed, the student schedules the doctoral final examination (also known as dissertation defense) in consultation with the research advisor. A doctoral final examination form must be filed and approved by the department chair at least three weeks prior to the examination date. Approval is granted only when all required materials have been submitted to the department. The required materials include a completed form, a copy of the journal article or final acceptance letter, resumes of any outside examination committee members, and electronic and printed copies of the dissertation. Details on the structure of the dissertation and the composition of the examination committee can be found on the departmental website (<https://www.ece.seas.gwu.edu/graduate-resources/>).

The doctoral final examination is oral and open to the public. The candidate must demonstrate mastery of the special field of study and of the materials and techniques used in the research. The committee of examiners may include qualified experts brought to the University specially to participate in the examination. The research advisor usually serves as advocate for the candidate. The committee assesses the quality and originality of the candidate's contribution to knowledge as

well as the student's mastery of the scholarship and research techniques of the field. Upon decision to pass, the committee recommends the candidate for the degree of doctor of philosophy. The decision to pass may be provisional based on committee recommendations for changes to the dissertation in terms of additional work, writing, or clarifications.

Seminar and Colloquium Requirements

- Seminar requirement—Students must present one departmental seminar, excluding the dissertation defense, prior to graduation.
- Colloquium requirement—Students are required to attend five colloquia during their time in the program. Each attended colloquium is verified by a faculty member in attendance. Upon the attendance of five colloquia, the student must submit to the department the Colloquium Attendance Form signed by the faculty advisor prior to applying for graduation.

Graduation and Scholarship Requirements

Students are responsible for knowing the university's minimum GPA requirement for graduation and scholarships. See School of Engineering and Applied Science Regulations, Graduation and Scholarship Requirements (p. 686).

Contact the Department of Electrical and Computer Engineering for additional information and requirements.

DOCTOR OF PHILOSOPHY IN THE FIELD OF ENGINEERING MANAGEMENT

Designed for the technical manager who needs a broad education to keep an organization operating efficiently and working ahead of its competitors, GW's engineering management program provides graduate education in the most current management techniques for technological and scientific organizations.

Students can pursue their degrees in one of the following focus areas: crisis, emergency, and risk management; economics, finance, and cost engineering; engineering and technology management; environmental and energy management; and knowledge and information management.

The doctoral program, tailored for each student, is designed to provide the ability to perform substantive research in an area of the student's choice. Students benefit from working closely with faculty whose applications research has been successfully used by major organizations.

More information is available on the program website (<https://www.emse.seas.gwu.edu/doctor-philosophy/>).

REQUIREMENTS

Credit Requirements

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (<http://bulletin.gwu.edu/engineering-applied-science/#seasregulationstext>)

Students with an MS degree must take a minimum of 54 credits, of which at least 30 must be credits from courses available for graduate credit, and at least 24 must be dissertation research credits. The courses to be taken by the student must be approved by the student's advisor. Students with a BS degree must take a minimum of 78 credits, consisting of 54 credits of graduate coursework and at least 24 credits of dissertation research. The courses to be taken by the student must be approved by the student's advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits.

No specific courses are required beyond the preparatory courses. The student and advisor design the curriculum to meet the student's needs and goals.

Code	Title	Credits

MATH 1232	Single-Variable Calculus II	
APSC 3115	Engineering Analysis III	
Other requirements		
Qualifying examinations		
Proposal defense		
Final examination		
Post-graduate survey		

Preliminary/Qualifying Exams

The Qualifying Examination is the principal means of determining whether a student qualifies as a candidate for the doctoral degree and progress to the second stage of the program. Its purpose is to ascertain that the student's background and intellectual development are adequate to support doctoral research in the central field. The DQE will be offered in January (both parts) and September (only data analysis). Before taking the examination, students must have completed the core courses and 27 credits (nine courses) of their required coursework and have the DegreeMap

finalized. Students must also submit a Doctoral Qualifying Exam Checklist to the doctoral coordinator.

The Qualifying Examination consists of two parts: a two-part written examination and a focus area exam.

Written Exam (Part I)

This exam consists of a two-hour, in-class exam covering EMSE 6765 and an eight-hour, take-home exam covering EMSE 8000 and EMSE 8001. Both exams are offered during the last week in January. The EMSE 6765-based exam is also offered during the last week in January. Students should apply to take this exam before the end of the preceding semester.

Focus Area Exam (Part II)

The Focus Area Exam is both a written and oral exam. Students must take this exam by the end of the semester following the successful completion of DQE part I (i.e., student will nominally complete Part I in January, and must take Part II in the third week of May). Students should register for EMSE 8999 for the semester in which they are taking the exam.

Students have three options for the basis for their oral defense:

- A conference or journal paper, on which they are the lead author. If it is a conference paper, the full paper must have been peer-reviewed.
- A seminal journal paper in their focus area. Their advisor and examining committee must approve the paper.
- A 10-page literature review on a topic in their focus area. They have two weeks to complete the review.

In all cases, students are required to defend the work in front of a committee. The committee must consist of three faculty members, at least two of which are full-time in EMSE. Oral exams are approximately one hour long.

At the discretion of the committee a student who fails any part of the qualifying examination may be given a second opportunity to attempt qualification for candidacy. Usually, only the failed portion of the examination must be retaken. Students who fail to qualify for candidacy in a doctoral program of the School are considered to have failed on a school-wide basis and will not be admitted to further doctoral study within the School.

After successful completion of the DQE, the candidate's advisor will present the academic record of the candidate and request the formation of a research committee. The Department votes on (provisional) admission to candidacy and the research committee. The research committee must be formed before the proposal defense (described below) and must consist of the student's advisor and two other faculty members, at least one of which must be full-time. Once the student is admitted to candidacy for the degree, he/she begins specialized study and research under the supervision of their research committee. At this point the research committee remains fixed unless a

change is formally requested and approved by the department chair and advisor.

Publication Requirements

Students are given 18 months from completion of DQE Part II to be accepted into a pre-approved conference for presentation on a topic relevant to their research. This presentation must be co-authored by their adviser. Failure to do so will result in termination of their candidacy in the doctoral program.

Dissertation

- Proposal defense: After acceptance to a conference, students are required to present a written dissertation proposal to their research committee and to successfully defend the proposal in an oral defense. This proposal should consist of, at a minimum, an introductory chapter, a review of the literature chapter, a methodology chapter, and a chapter on potential results. The Request for Proposal Defense form must be filed and approved two weeks prior to the defense. The Form 5 Doctor of Science Dissertation form is present at the proposal defense and, after a successful defense, is signed by all committee members. After the defense, the advisor in collaboration with the student submits, in writing, a copy (signed by student and advisor) of all suggestions, clarifications, and corrections to the proposal along with the signed Form 5 to the doctoral coordinator within four weeks of the defense. Failure to do so will void the defense. The doctoral coordinator forwards the Form 5 to the department chair for signature. Students are given a maximum of two attempts and a maximum time limit of two years past the semester in which they pass their DQEs to successfully defend their proposal. Failure to do so will result in termination of their candidacy in the doctoral program.
- Final examination/doctoral defense: Once the dissertation has been completed and accepted by the faculty advisor and research committee, students may file a Request for Final Examination form with the Doctoral Coordinator. This form must be filed and approved by the department chair at least two weeks prior to the final examination date. Approval is granted only when all required materials have been presented to the doctoral coordinator. The required materials include a completely filed Request for Final Examination Form, a copy of the journal article with reviews, resumes of outside evaluators and electronic and written copies of the dissertation. The final examination is oral and open to the public. The candidate must demonstrate mastery of the special field of study and of the materials and techniques used in the research. The committee of examiners may include qualified experts brought to the University especially to participate in the examination. The director of research usually serves as advocate for the candidate. Students should consult department regulations concerning the formation of the committee. The committee votes on the quality and originality of the candidate's

contribution to knowledge as well as their mastery of the scholarship and research techniques of the field. Upon a majority vote for pass, the committee recommends the candidate for the degree of Doctor of Philosophy. The vote to pass may be provisional based on committee recommendations for changes to the dissertation in terms of additional analysis, writing or clarifications.

Seminar and Colloquia Requirements

- As described in the Publication Requirements section above, students are required to present in a pre-approved conference on a topic relevant to their research. In addition, students are also encouraged to present and participate in departmental research seminars.

Graduation and Scholarship Requirements

Students are responsible for knowing the university's minimum GPA requirement for graduation and scholarships.

Please visit the Graduation and Scholarship Requirements (http://bulletin.gwu.edu/engineering-applied-science/#graduation_requirements_phd) section on the GW Bulletin to read the requirements.

Students should contact the department for additional information and requirements.

DOCTOR OF PHILOSOPHY IN THE FIELD OF MECHANICAL AND AEROSPACE ENGINEERING

GW's mechanical and aerospace engineering program boasts areas of excellence in nanotechnology, biomimetics, biomedical engineering, and energy, in addition to its strengths in the discipline's traditional fields. PhD students can pursue the following focus areas: aerospace engineering; design of mechanical engineering systems; fluid mechanics, thermal sciences and energy; robotics, mechatronics, and controls; solid mechanics and materials science; and structures and dynamics. The PhD program is designed to provide students with the training to perform original research.

More information is available on the departmental website (<https://www.mae.seas.gwu.edu/>).

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering and Applied Science, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#Doctor_of_Philosophy).

Direct-to-PhD students should complete a minimum of 36 credits of coursework and 18 credits of research. Students who enter the program with an MS degree should complete a minimum of 12 credits of coursework and 18 credits of research. The student and advisor design the curriculum to

meet the student's needs and goals and can choose from the following areas of focus: aerospace engineering; design of mechanical engineering systems; fluid mechanics, thermal sciences, and energy; industrial engineering; solid mechanics and materials science; structures and dynamics; robotics, mechatronics, and controls.

Academic Procedures for MAE Doctoral Students

There are three distinct phases in the program of doctoral study in mechanical and aerospace engineering (MAE): 1) the period of preparation for the qualifying examination; 2) the qualifying examination; and, 3) the period after admission to candidacy for the PhD degree during which the student performs research leading to the doctoral dissertation. After admission to doctoral study, students in MAE are subject to specific procedures as outlined below in each of these program phases.

A. Period of preparation for the qualifying examination:

As early as possible after their admission students should identify the faculty member who will serve as their coursework and research advisor. For research assistants, the faculty member providing the financial support is also the advisor. At the beginning of each semester, the doctoral student meets with the MAE faculty advisor to evaluate the progress towards taking the qualifying examination. Coursework consists of core courses and electives that are specific to the major area of research. The qualifying examination is given twice each year, once during the first two weeks of the fall semester and once during the first two weeks of the spring semester. All students should take the examination as early as possible after they complete at least 6 credits of core courses and 6 credits of electives and maintain a minimum GPA of 3.4. Students are recommended to take the examination no later than the beginning of their third semester. In case a student does not fulfill the above requirements, they should develop a plan of action with the academic advisor, which needs to be approved by the department chair. The student should be advised of any additional coursework to be undertaken, or any additional preparation.

B. The doctoral qualifying examination:

All PhD students are required to take the doctoral qualifying examination (DQE) held in the first two weeks of each semester. They must submit the DQE notification form provided by the department by the end of the preceding semester. The examination is distributed electronically. A written proposal and an oral presentation of the chosen problem are required. The goals of the examination include the following:

1. To determine the student's aptitude and ability to do original and independent research at the doctoral level;
2. To assess the student's ability to review previous work from the literature; and,

3. To determine the student's ability to understand and apply fundamental concepts in their technical area.

Participation and subject areas—In consultation with their advisor (or faculty sponsor) the graduate student should notify the Graduate Curriculum Committee that they are taking the DQE before the end of the preceding semester by filling the DQE Notification form. The student also selects a major subject area that reflect their background and dissertation fields. The date/time of the examination will be announced by the end of the preceding semester.

Examination committee selection—The committee comprises the student's advisor (or faculty sponsor), an examination committee chair, and a third member. Co-advisors may participate as silent observers during the first attempt. The members of this committee are selected by the graduate curriculum committee in consultation with the student's advisor (or faculty sponsor). At least two out of three members of the committee should be regular faculty of the MAE department.

Topic selection—Ten calendar days before the date of the qualifying examination, each student will be assigned a research topic and one to two references related to one or more of the subject areas selected by the student. The topic is selected by the chair of the examination committee in consultation with both the student's advisor (or faculty sponsor) and the third committee member. The topic may be relevant to the student's future doctoral work but is different for each student. The topic cannot be directly related to or be part of the student's ongoing doctoral work.

Written proposal—The objective of the written proposal is to communicate how a specific research problem may be investigated. The proposal is not to exceed five pages using an 11pt Arial font, 1-inch margins, and 1.0 line spacing. The five-page limitation covers the proposal body text, as well as any figures and tables. The title page and cited references are the only sections that do not count toward the 5-page limitation. A typical written proposal has the following structure (the proposal format has been adapted from the required standard NSF proposal format):

Title page—The first page should include your name, title of your proposal, and signed academic integrity pledge (one page).

Motivation and objectives—Explain the importance of the problem, review the state of the art, and discuss critical barrier to progress in the field that the proposed project addresses. Outline the objectives of the proposed work.

Technical approach—This is the core of the proposal, where you describe the overall methodology and analyses to be used to accomplish the objectives of the project. Include how the data will be collected, analyzed.

Cited references—Cite sources for background information and technical plan (does not count towards the 5-page limit).

Oral examination—The student prepares a brief PowerPoint presentation describing their proposed approach. The examination begins with a 20-minute presentation by the student, which will be the starting point for the oral examination discussion. The presentation may lead to questions (based on the chosen subject areas and sometimes unrelated to the assigned topic and of a broader nature) related to the goals of the exam. The duration of the examination is two hours.

Exam outcome—Immediately after the end of the oral examination the committee deliberates and reach a decision on the examination outcome and convey it by email to the Graduate Curriculum Committee. All students are notified in writing of the outcome of the examination by the chair of the Graduate Curriculum Committee, one week after all exams have been completed. The notification may include conditions that the student must fulfill prior to attaining candidacy or suggestions on certain skills or areas that may need strengthening. Passing the examination requires a unanimous decision from all three committee members. Students who fail the examination in their first attempt may, upon recommendation of the examination committee and review by the Graduate Curriculum Committee, take it again later in the semester.

C. Period of Dissertation Research

After successful completion of the qualifying examination the student is admitted as a candidate for the PhD degree program and begins specialized research under the supervision of their thesis advisor. Research direction may be shared by a full-time faculty member and an outstanding external scientist or engineer, but the final responsibility for the academic aspects of the dissertation work lies with the MAE faculty thesis advisor.

Dissertation Research Proposal—During the research phase, each doctoral candidate is required to give a research proposal presentation to the Dissertation Committee. The student's research progress is assessed by the committee and appropriate suggestions for continuing research directions are solicited from those in attendance. Scheduling of the research proposal presentation is done at a minimum of one year before the final PhD defense by the student's director of research in consultation with the MAE chairman. Under no circumstances is a doctoral thesis defense allowed to proceed prior to one year after the research proposal presentation. The committee helps the student to define the research topic, and ultimately approves the research proposal. The dissertation advisor should propose the membership of the dissertation research committee, which must be approved by the department chair. Final approval rests with the Dean's office. At least three individuals should serve on the committee; the research advisor is the dissertation director (also called the advocate) and two others. Two of the committee members must be full-time faculty. Students are required to present the written dissertation proposal to the committee (two of the members must be full-time faculty) and to successfully defend the proposal in an oral defense after performing the

bulk of their dissertation research. The request for proposal defense form must be filed and approved two weeks prior to the defense. The Form 5 dissertation form is presented at the proposal defense and, after a successful defense, is signed by all committee members. After the proposal defense, the student submits the revised proposal, complying with all suggestions, clarifications, and corrections, as required by the dissertation committee, along with the signed Form 5 to the director of doctoral research, i.e. thesis advisor and to the departmental advanced degree program coordinator for the PhD program. They forward the Form 5 to the department chair for signature.

Dissertation Defense: The research advisor may decide that the research achieved by the doctoral student is sufficient to satisfy the requirement of the degree. They propose an examining committee for the purpose of administering the final dissertation examination (dissertation defense). The committee of examiners must consist of a minimum of five members, at least three of whom are normally full-time faculty members with scholarly specialties within the area of concentration; at least one member will normally be from an academic specialty outside the area of concentration. It is required that an external examiner be invited. The research advisor serves on the examining committee both as advocate and as a non-voting committee member. The committee elects its own chairman, who should not be the research advisor, or if different, the student's faculty advisor, as its first order of business. The dissertation examining committee must be approved by the department chairperson prior to the date of the defense. Each member of the examination committee, no later than 3 weeks prior to the defense, should receive a copy of the dissertation. At the same time, the candidate must provide a 350-word abstract and other information to the department office for the purpose of preparing an announcement of the defense.

The dissertation defense is an oral examination, which is open to the public. When the dissertation is accepted as complete, it should be submitted electronically no later than the date specified by the Office of the Registrar.

Seminar and Colloquia Requirements—Prior to graduation, doctoral students must complete the Department of Mechanical and Aerospace Engineering MAE seminar attendance requirement, whereby the student must attend at least 80 percent of the MAE seminars offered during any two semesters of the student's enrollment. For a seminar to count toward the requirement, the student must be present for the duration of the seminar. To track attendance, the student must obtain a certification signature on the MAE Seminar Attendance Form from an MAE faculty member present at the seminar and submit the completed form to the MAE departmental office at the end of the semester. The student may attempt to fulfill this requirement in as many semesters as needed. This requirement is applicable to doctoral students who matriculate during the 2016-2017 academic year or later.

Graduation and scholarship requirements—Students are responsible for knowing the University's minimum GPA requirement for graduation and scholarships available in the Graduation and Scholarship Requirements (http://bulletin.gwu.edu/engineering-applied-science/#graduation_requirements_phd) section of this Bulletin. Students should contact the department for additional information and requirements.

DOCTOR OF PHILOSOPHY IN THE FIELD OF SYSTEMS ENGINEERING

The systems engineering program provides broad knowledge of the "systems approach" for designing and managing large-scale engineering systems throughout the life cycle, with faculty and students exploring case studies and methodologies from NASA, the U.S. Department of Defense and U.S. corporations.

Graduate students can pursue their degrees in one of two focus areas: operations research and management science or systems engineering and integration.

The doctoral program is individually tailored for each student. It is designed to provide students with the ability to perform substantive research in their areas of choice. Students benefit from working closely with faculty members whose applications research has been successfully used by major organizations.

GW's graduate-level systems engineering programs are offered at the University's campus in Arlington, Va. They are also offered on site at U.S. corporate offices and facilities.

For additional on-campus program information, visit the on-campus program website (<https://www.emse.seas.gwu.edu/doctor-philosophy/>).

For additional online program information, visit the online program website (<https://seasonline.gwu.edu/doctoral-degrees/doctor-of-philosophy/>).

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (<http://bulletin.gwu.edu/engineering-applied-science/#seasregulationstext>)

Students with an MS degree must take a minimum of 54 credits, of which at least 30 must be credits from courses available for graduate credit, and at least 24 must be dissertation research credits. The courses to be taken by the student must be approved by the student's advisor. Students with a BS degree must take a minimum of 78 credits, including 54 credits of graduate coursework and at least 24 credits of dissertation research. The courses to be taken by the student must be approved by the student's advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was

earned, the program of study exceeds the minimum number of credits. Students in the online PhD in systems engineering program must have an MS degree. Online PhD students must take a minimum of 54 credits, of which at least 24 must be from courses available for graduate credit, and at least 30 must be dissertation research credits. The courses to be taken by the student must be approved by the student's advisor.

Curriculum

No specific courses are required beyond the preparatory courses. The student and advisor design the curriculum to meet the student's needs and goals.

Code	Title	Credits
Preparatory courses		
MATH 1231	Single-Variable Calculus I	
MATH 1232	Single-Variable Calculus II	
APSC 3115	Engineering Analysis III	

Preliminary/qualifying examinations

The qualifying examination is the principal means of determining whether a student qualifies as a candidate for the doctoral degree and progress to the second stage of the program. Its purpose is to ascertain that the student's background and intellectual development are adequate to support doctoral research in the central field. The DQE will be offered in January (both parts) and September (only data analysis). Before taking the examination, students must have completed the core courses and 27 credits (nine courses) of their required coursework and have the DegreeMap finalized. Students must also submit a doctoral qualifying examination checklist to the doctoral coordinator.

The qualifying examination consists of two parts: a two-part written examination and a focus area exam.

Written examination (Part I)

This examination consists of a two-hour, in-class examination covering EMSE 6765 and an eight-hour, take-home exam covering EMSE 8000 and EMSE 8001. Both examinations are offered during the last week in January. The EMSE 6765-based exam is also offered during the last week in January. Students should apply to take this examination before the end of the preceding semester.

Focus area exam (Part II)

The focus area examination is both written and oral. Students must take this examination by the end of the semester following the successful completion of DQE part I (i.e., student nominally completes Part I in January, and must take Part II in the third week of May). Students should register for EMSE 8999 for the semester in which they are taking the exam.

Students have three options for the basis for their oral defense:

- A conference or journal paper, on which they are the lead author. If it is a conference paper, the full paper must have been peer-reviewed.
- A seminal journal paper in their focus area. Their advisor and examining committee must approve the paper.
- A ten-page literature review on a topic in their focus area. They have two weeks to complete the review.

In all cases, students are required to defend the work in front of a committee. The committee must consist of three faculty members, at least two of which are full-time in EMSE. Oral exams are approximately one hour long.

At the discretion of the committee a student who fails any part of the qualifying examination may be given a second opportunity to attempt qualification for candidacy. Usually, only the failed portion of the examination must be retaken. Students who fail to qualify for candidacy in a doctoral program of the School are considered to have failed on a school-wide basis and will not be admitted to further doctoral study within the School.

After successful completion of the DQE, the candidate's advisor presents the academic record of the candidate and request the formation of a research committee. The Department votes on (provisional) admission to candidacy and the research committee. The research committee must be formed before the proposal defense (described below) and must consist of the student's advisor and two other faculty members, at least one of whom must be full-time. Once the student is admitted to candidacy for the degree, they begin specialized study and research under the supervision of their research committee. At this point the research committee remains fixed unless a change is formally requested and approved by the department chair and advisor.

Publication Requirements

Students are given 18 months from completion of DQE Part II to be accepted into a pre-approved conference for presentation on a topic relevant to their research. This presentation must be co-authored by their adviser. Failure to do so will result in termination of their candidacy in the doctoral program.

Dissertation

Proposal defense—After acceptance to a conference, students are required to present a written dissertation proposal to their research committee and to successfully defend the proposal in an oral defense. This proposal should consist of, at a minimum, an introductory chapter, a review of the literature chapter, a methodology chapter, and a chapter on potential results. The Request for Proposal Defense form must be filed and approved two weeks prior to the defense. The Form 5 Doctor of Science Dissertation form is present at the proposal defense and, after a successful defense, is signed by all committee members. After the defense, the advisor in collaboration with the student submits, in writing, a copy (signed by student and adviser) of

all suggestions, clarifications, and corrections to the proposal along with the signed Form 5 to the doctoral coordinator within four weeks of the defense. Failure to do so will void the defense. The doctoral coordinator forwards the Form 5 to the department chair for signature. Students are given a maximum of two attempts and a maximum time limit of two years past the semester in which they pass their DQEs to successfully defend their proposal. Failure to do so will result in termination of their candidacy in the doctoral program.

Final examination/doctoral defense—Once the dissertation has been completed and accepted by the faculty advisor and research committee, students may file a Request for final examination form with the doctoral coordinator. This form must be filed and approved by the department chair at least two weeks prior to the final examination date. Approval is granted only when all required materials have been presented to the doctoral coordinator. The required materials include a completely filed Request for Final Examination Form, a copy of the journal article with reviews, resumes of outside evaluators and electronic and written copies of the dissertation. The final examination is oral and open to the public. The candidate must demonstrate mastery of the special field of study and of the materials and techniques used in the research. The committee of examiners may include qualified experts brought to the University specially to participate in the examination. The director of research usually serves as advocate for the candidate. Students should consult department regulations concerning the formation of the committee. The committee votes on the quality and originality of the candidate’s contribution to knowledge as well as their mastery of the scholarship and research techniques of the field. Upon a majority vote for pass, the committee recommends the candidate for the degree of doctor of philosophy. The vote to pass may be provisional based on committee recommendations for changes to the dissertation in terms of additional analysis, writing or clarifications.

Seminar and colloquia requirements
As described in the “Publication Requirements” section above, students are required to present in a pre-approved conference on a topic relevant to their research. In addition, students are also encouraged to present and participate in departmental research seminars.

Graduation and scholarship requirements
Students are responsible for knowing the university’s minimum GPA requirement for graduation and scholarships. Visit the Graduation and Scholarship Requirements (http://bulletin.gwu.edu/engineering-applied-science/#graduation_requirements_phd) section in this Bulletin to read the requirements. Students should contact the department for additional information and requirements.

CERTIFICATE PROGRAMS

GATEWAY TO COMPUTER SCIENCE GRADUATE CERTIFICATE

Offered online

The gateway to computer science graduate certificate program prepares students from any background to enter the field of computer science and information technology. The program is available to students with a bachelor’s degree in any major. Students who complete the program will gain knowledge and skills that enable them to apply computer science to their current careers and will prepare them for direct entry into the master’s in applied computer science program.

More information is available on the department website (<https://www.cs.seas.gwu.edu/>).

REQUIREMENTS

This program begins in fall 2021.

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
CSCI 6001	Introduction to Computer Programming and Software Development	
CSCI 6002	Introduction to Data Structures and Their Applications	
CSCI 6003	Introduction to Software Design and Engineering	
CSCI 6004	Introduction to Web Development	

GRADUATE CERTIFICATE IN COMPUTER-INTEGRATED DESIGN IN MECHANICAL AND AEROSPACE ENGINEERING

The computer-integrated design certificate program has been created to provide working engineers with a coordinated four-course sequence that emphasizes hands-on experience with current professional design methodologies, and software.

Analysis and design techniques utilizing industry-standard computer codes are beginning to be addressed in some of today’s undergraduate engineering programs, but many working engineers lack sufficient training in this area and are required to gain their expertise while on the job. The computer-integrated design certificate program has been created to provide such engineers with a coordinated four-

course sequence that emphasizes hands-on experience with current professional design methodologies, and software.

This certificate program offers an alternative to a master of science degree (MS) program for professionals who wish to expand their education beyond the bachelor's degree but might not have the time to commit to a full graduate degree program. The graduate certificate in computer-integrated design serves as a path towards the MS degree (since the MS program accepts all certificate courses) in mechanical and aerospace engineering at The George Washington University.

The program comprises four courses (12 credit hours) – three courses focus on numerical design and analysis tools, and the fourth course is the capstone course in which students apply these tools to individual projects in aircraft, mechanical, or spacecraft design. Each of the classes meets in the evening once per week.

Visit the program website (<https://www.mae.seas.gwu.edu/computer-integrated-design-graduate-certificate/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
MAE 6220	Applied Computational Fluid Dynamics	
MAE 6243	Advanced Mechanical Engineering Design	
MAE 6246	Electromechanical Control Systems	
MAE 6287	Applied Finite Element Methods	

GRADUATE CERTIFICATE IN COMPUTER SECURITY AND INFORMATION ASSURANCE

The graduate certificate program in computer security and information assurance provides a strong technical education in the security of computer systems and networks, as well as training in related policy issues.

The objective of the certificate program in computer security and information assurance is to provide a coordinated four-course sequence that emphasizes concepts in computer security, augmented with current industry standard techniques and challenges. It provides an alternative to the full MS program for practicing computer scientists and other information technology personnel who wish to extend their education beyond the B.S. level, and to those who wish to

acquire up-to-date knowledge in the burgeoning field of computer and network security.

Students will learn the essentials of computer and network security through two required courses, and will also have the opportunity to explore in further depth topics of specific interest through two electives. Electives are offered in topics such as information policy, wireless security, and cryptography, as well on advanced research topics in the various specialized areas of security.

GW has been recognized as a Center of Academic Excellence in Education-Research and by the National Security Agency (NSA) and the Department of Homeland Security (DHS).

Visit the program website (<https://www.cs.seas.gwu.edu/graduate-certificate-computer-security-and-information-assurance/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 6 credits in required courses and 6 credits in elective courses chosen from the list below.

Code	Title	Credits
Required		
CSCI 6531	Computer Security	
CSCI 6541	Network Security	
Elective		
Two of the following:		
CSCI 6331	Cryptography	
CSCI 6532	Information Policy	
CSCI 6542	Computer Network Defense	
CSCI 6547	Wireless and Mobile Security	
CSCI 6548	E-Commerce Security	
CSCI 8331	Advanced Cryptography	
CSCI 8531	Advanced Topics in Security	

GRADUATE CERTIFICATE IN EMERGENCY MANAGEMENT AND PUBLIC HEALTH

Offered through the Department of Engineering Management and Systems Engineering, the graduate certificate in Emergency Management and Public Health provides the skills needed to define emergencies and disasters as well as develop

incident management plans for responding to and managing environmental and public health emergencies.

In addition to coursework within the department, students may take courses at GW's Milken Institute School of Public Health. All courses are held in-person on GW's main campus in the Foggy Bottom neighborhood of Washington, D.C. Courses are typically held in the late afternoon or early evening to accommodate working professionals.

Visit the program website (<https://www.emse.seas.gwu.edu/graduate-certificates/#emph>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 12 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
EMSE 6305	Crisis and Emergency Management	
EMSE 6325	Medical and Public Health Emergency Management	
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
Electives		
Two of the following:		
EMSE 6240	Environmental Hazard Management	
EMSE 6300	Homeland Security: The National Challenge	
EMSE 6310	Information Technology in Crisis and Emergency Management	
EMSE 6315	Management of Risk and Vulnerability for Hazards and Terrorism	
EMSE 6320	International Disaster Management	
EMSE 6330	Management of Terrorism Preparedness and Response	
EMSE 6335		
EMSE 6345	Disaster Recovery and Organizational Continuity	
EMSE 6350	Hazard Mitigation in Disaster Management	

EMSE 6820 Program and Project Management

EMSE 6992 Special Topics (as approved by academic advisor)

Appropriate electives from other departments may be permitted with the advisor's approval.

GRADUATE CERTIFICATE IN ENERGY ENGINEERING AND MANAGEMENT

Students in the graduate certificate program in energy engineering and management learn about alternative energy generation and energy resources management, and open up new opportunities in a rapidly growing job sector as energy auditors, energy analysts, energy project managers and related positions. Students explore the latest information in energy efficient building design, microgrid, renewable energy development and advanced materials research while learning the economics of energy, the art of managing energy projects, and analytical methods of analyzing the viability and feasibility of energy projects.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
EMSE 6260	Energy Management	
EMSE 6285	Analytical Tools for Energy Management	
MAE 6262	Energy Systems Analysis	
MAE 6263	Energy and Sustainability	

GRADUATE CERTIFICATE IN ENGINEERING AND TECHNOLOGY MANAGEMENT

This graduate certificate in engineering and technology management provides an understanding of management theory and practice as applied to the management of engineering, science and technology. The program emphasizes study of general management problems as well as the use of specific knowledge and methods to solve problems and explore opportunities in engineering, science and technology.

Visit the program website (<https://graduate.seas.gwu.edu/engineering-and-technology-management/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
EMSE 6001	The Management of Technical Organizations	
EMSE 6020	Decision Making with Uncertainty	
EMSE 6410	Survey of Finance and Engineering Economics	
EMSE 6820	Program and Project Management	

GRADUATE CERTIFICATE IN ENVIRONMENTAL ENGINEERING

The certificate program in environmental engineering is particularly appropriate for individuals interested in the areas of hazardous waste remediation and water/wastewater treatment.

Upon completion of the certificate program in environmental engineering, students will be able to design, analyze, and evaluate systems for hazardous waste remediation and water/wastewater treatment. Students will learn basic concepts of water, air, and terrestrial environments and interrelationships among them, as well as the basic concepts of environment and health, water and wastewater systems, and legal and regulatory controls. Students will also learn to apply principles of environmental chemistry and microbiology and to perform assessments of environmental quality and impacts. Students will be able to apply their understanding of commonly used processes for water and wastewater treatment, such as sedimentation, coagulation, filtration, disinfection, gas transfer, activated sludge, trickling filters, oxidation ponds, sorption, and sludge stabilization and disposal. Finally, students will learn to perform engineering design in at least one of the following areas: hazardous waste remediation, advanced technologies in environmental engineering, and environmental impact assessment.

To obtain the certificate in environmental engineering, students must complete a total of four courses including three required courses and one elective course.

Visit the program website (<https://www.cee.seas.gwu.edu/environmental-engineering-graduate-certificate-program/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in one selected track, including 9 credits in required courses and a 3-credit elective course.

Hazardous Waste Remediation

Code	Title	Credits
Required		
CE 6503	Principles of Environmental Engineering	
CE 6504	Water and Wastewater Treatment Processes	
CE 6509	Introduction to Hazardous Wastes	
Elective		
One of the following:		
CE 6501	Environmental Chemistry	
CE 6502	Advanced Sanitary Engineering Design	
CE 6503	Principles of Environmental Engineering	
CE 6504	Water and Wastewater Treatment Processes	

Advanced Technologies in Environmental Engineering

Code	Title	Credits
Required		
CE 6503	Principles of Environmental Engineering	
CE 6504	Water and Wastewater Treatment Processes	
CE 6800	Special Topics (Environmental Application and Implications of Nanotechnology)	
Elective

CE 6502	Advanced Sanitary Engineering Design	
CE 6503	Principles of Environmental Engineering	
CE 6504	Water and Wastewater Treatment Processes	

GRADUATE CERTIFICATE IN ENVIRONMENTAL AND ENERGY SYSTEMS MANAGEMENT

Offered through the Department of Engineering Management and Systems Engineering, the graduate certificate in environmental and energy systems management is designed to help students understand and implement environmental and energy management standards, such as ISO 14000 and 50000 series, within organizations worldwide.

The program is especially suited for working professionals in need of specialized knowledge of the standards, techniques and testing of environmental and energy systems.

All courses are held in-person on GW's main campus in the Foggy Bottom neighborhood of Washington, D.C. Courses are typically held in the late afternoon or early evening to accommodate working professionals.

Visit the program website (<https://graduate.seas.gwu.edu/environmental-and-energy-systems-management/>) for more information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
EMSE 6220	Environmental Management	

EMSE 6245 Analytical Tools for Environmental Management

EMSE 6260 Energy Management

EMSE 6285 Analytical Tools for Energy Management

EMSE 6992 Special Topics (Beyond Compliance: Next Generation Environmental Self-governance)

EMSE 6992 Special Topics (Global Connections: Standards in Technology, Business & Public Policy)

GRADUATE CERTIFICATE IN GEOENVIRONMENTAL ENGINEERING

The certificate program in geoenvironmental engineering is designed to provide the necessary background for civil engineers to practice in the field of geoenvironmental engineering. The program will offer an in-depth understanding of the issues that a geoenvironmental engineer may encounter in practice.

Upon completion of the certificate program in geoenvironmental engineering, students will be able to design, analyze, and evaluate systems in geoenvironmental engineering. Students will learn to understand soil mineralogy, clay–water–electrolyte systems, soil composition, fabric, structure, volume change behavior, permeability, coupled phenomena, and in-situ evaluation of soil behavior. Students will also learn about hazardous waste regulations, including RCRA and Superfund. Students will be able to analyze sites for transport and fate of hazardous substances, including elements of environmental toxicology, risk assessment, and hazard ranking, as well as monitoring, data collection, and evaluation. Finally, students will learn to design engineered processes for waste minimization, and containment systems for waste disposal and remediation.

To obtain the certificate in geoenvironmental engineering, students must complete a total of four courses, including three required courses and one elective course.

Visit the program website (<https://www.cee.seas.gwu.edu/geoenvironmental-engineering-graduate-certificate-program/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and one 3-credit elective course.

Code	Title	Credits
Required		
CE 6401	Fundamentals of Soil Behavior	
CE 6509	Introduction to Hazardous Wastes	
CE 6800	Special Topics (Containment Systems for Waste Disposal and Remediation Systems for Subsurface Contamination)	
Elective		
One of the following:		
CE 6501	Environmental Chemistry	
CE 6504	Water and Wastewater Treatment Processes	
CE 6507	Advanced Treatment Processes	
CE 6605	Ground Water and Seepage	
CE 6610	Pollution Transport Systems	

GRADUATE CERTIFICATE IN HIGH-PERFORMANCE COMPUTING

The certificate in high-performance computing offers an alternative to a master of science degree program for professionals who wish to align their background with the rapid changes in computing technologies and to expand their education beyond the Bachelor's degree but might not have the time to commit to a full graduate degree program. With processor chips now having multi-cores and turning into multiprocessors, all computing is turning into high-performance computing. This program addresses the professional preparedness needs arising from these current transformative developments and draws upon our advanced research engagements and our cutting-edge facilities in high-performance computing.

The objective of this program is to provide a mechanism for interdisciplinary computational engineers and scientists, as well as for computer engineers and scientists, to acquire up-to-date knowledge in the advances of computer systems. The certificate in high-performance computing program addresses the rapid growth and applications of multicore processors, parallel computers, hardware accelerators, and networked computing as a tool for engineering and scientific modeling. It is carefully tailored to provide students with the necessary knowledge in the basic aspects of high performance computing, including programming, performance, architectures, systems, and applications.

Visit the program website (<https://www.ece.seas.gwu.edu/graduate-certificate-high-performance-computing/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 6 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
ECE 6105	Introduction to High-Performance Computing	
At least one of the following:		
ECE 6125	Parallel Computer Architecture	
ECE 6130	Big Data and Cloud Computing	
Electives		
Six additional credits from the following:		
CE 6210	Introduction to Finite Element Analysis	
CE 6705	Nonlinear Finite Element Modeling and Simulation	
CE 8330	Advanced Finite Element Analysis	
CSCI 3571	Introduction to Bioinformatics	
CSCI 4572	Computational Biology	
CSCI 6421	Distributed and Cluster Computing	
ECE 6005	Computer Architecture and Design	
ECE 6045	Special Topics	
ECE 6050	Research	
ECE 6120	Advanced Microarchitecture	
ECE 6140	Embedded Systems	
ECE 6213	Design of VLSI Circuits	
ECE 6214	High-Level VLSI Design Methodology	
ECE 6735	Numerical Electromagnetics	
ECE 6800	Computational Techniques in Electrical Engineering	
MAE 6225	Computational Fluid Dynamics	
MAE 6291	Special Topics in Mechanical Engineering	

PHYS 6130	Computational Physics I
PHYS 6230	Computational Physics II
PHYS 6330	Computational Physics III
PHYS 8110	Selected Topics in Theoretical Nuclear Physics

GRADUATE CERTIFICATE IN HOMELAND SECURITY, EMERGENCY PREPAREDNESS, AND RESPONSE

Offered through the Department of Engineering Management and Systems Engineering and supported by GW's Institute for Crisis, Disaster, and Risk Management (ICDRM), the graduate certificate program in homeland security emergency preparedness and response provides an interdisciplinary education for those engaged in or seeking careers in homeland security, crisis, disaster and/or emergency management in the public, private and not-for-profit sectors.

All courses are held in-person on GW's main campus in Washington, D.C. Courses are typically held in the late afternoon or early evening to accommodate working professionals.

Visit the program website (<https://graduate.seas.gwu.edu/homeland-security-emergency-preparedness-and-response/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 3 credits in required courses and 15 credits in elective courses.

Code	Title	Credits
Required		
EMSE 6300	Homeland Security: The National Challenge	
Electives		
Five of the following:		
EMSE 6240	Environmental Hazard Management	
EMSE 6305	Crisis and Emergency Management	
EMSE 6310	Information Technology in Crisis and Emergency Management	
EMSE 6315	Management of Risk and Vulnerability for Hazards and Terrorism	

EMSE 6320	International Disaster Management
EMSE 6325	Medical and Public Health Emergency Management
EMSE 6330	Management of Terrorism Preparedness and Response
EMSE 6335	
EMSE 6345	Disaster Recovery and Organizational Continuity
EMSE 6350	Hazard Mitigation in Disaster Management
EMSE 6820	Program and Project Management
EMSE 6992	Special Topics (as approved by academic advisor)

Appropriate electives from other departments may be permitted with advisor approval

GRADUATE CERTIFICATE IN STRUCTURAL ENGINEERING

The graduate certificate in structural engineering program is appropriate for those who wish to gain specialized knowledge in one of the following tracks: earthquake engineering design of bridges and buildings, extreme event design of structures to resist the effects of accidental explosions and vehicular collision, concrete bridge design using the LRFD approach, or building design using the LRFD approach.

Students who successfully complete the certificate program may opt to continue towards a master's degree in civil and environmental engineering department. All courses completed by the student in the graduate certificate program with a grade of B or better can be transferred to the master's degree program.

Visit the program website (<https://www.cee.seas.gwu.edu/structural-engineering-graduate-certificate-program/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses in one selected track.

Earthquake Engineering Design

Code	Title	Credits
Required		
CE 6202	Methods of Structural Analysis	

CE 6342	Structural Design to Resist Natural Hazards
CE 6404	Geotechnical Earthquake Engineering
CE 6800	Special Topics (Advanced Earthquake Engineering Topics)

Concrete Bridge Design

Code	Title	Credits
Required		
CE 6301	Design of Reinforced Concrete Structures	
CE 6302	Prestressed Concrete Structures	
CE 6310	Advanced Reinforced Concrete Structures	
CE 6800	Special Topics (Advanced Bridge Design Topics)	

Extreme Event Design of Structures

Code	Title	Credits
Required		
CE 6202	Methods of Structural Analysis	
CE 6342	Structural Design to Resist Natural Hazards	
CE 8330	Advanced Finite Element Analysis	
CE 6800	Special Topics ((Advanced Blast Resistant Topics)	

Building Design

Code	Title	Credits
Required		
CE 6310	Advanced Reinforced Concrete Structures	
CE 6342	Structural Design to Resist Natural Hazards	
CE 6320	Design of Metal Structures	
CE 6800	Special Topics (Advanced Building Design Topics)	

GRADUATE CERTIFICATE IN SYSTEMS ENGINEERING

Systems management combines the study of systems engineering with that of engineering management. Students in the program complement their technical knowledge with managerial skill and learn how to lead the process of change in technically-oriented organizations. The program also helps managers to apply the power of systems engineering to administering their enterprise. The combined study of systems and management affords engineers an understanding of managerial roles, and equips managers to formulate, analyze, and execute decisions in engineering, technical and other scientific organizations. If successfully completed, students may apply the 12 credits earned in this certificate program toward the 36-credit master of science in the field of systems engineering degree.

Visit the Department Engineering Management and Systems Engineering (<https://www.emse.seas.gwu.edu/graduate-certificates/>) website for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
EMSE 6001	The Management of Technical Organizations	
EMSE 6020	Decision Making with Uncertainty	
EMSE 6540	Management of Information and Systems Security	
EMSE 6801	Systems Engineering I	
EMSE 6805	Systems Engineering II	
EMSE 6820	Program and Project Management	

GRADUATE CERTIFICATE IN SYSTEMS MANAGEMENT

Systems management combines the study of systems engineering with that of engineering management. GRADUATE CERTIFICATE IN TRANSPORTATION ENGINEERING

The certificate program in transportation engineering is particularly appropriate for those who wish to gain specialized knowledge in one of the following tracks: Intelligent Transportation Systems & Congestion Mitigation or Transportation Safety.

Upon completion of the certificate program in transportation engineering, students will be able to design, analyze, and evaluate systems in transportation engineering.

For the intelligent transportation systems and congestion mitigation track, students will be able to apply commands, controls and communications in modern multimodal transportation; infrastructure/highway and vehicle automation, advanced traffic management, vehicle control and safety systems; information, data, and sensory requirements; practical applications and projects. Students will learn to apply roadway traffic capacity and network performance measures; steady and unsteady traffic flow phenomena; traffic control signalization theory and practical implementation; monitoring techniques, instruments, and data processing for highway safety; and traffic related highway safety design concepts.

For the transportation safety track, students will be able to explain the dynamic performance of an automotive vehicle

using engineering principles and analytical methods. Students will also learn about vehicle standards and crash test analysis, perform crash investigation and analysis, and apply dynamic nonlinear finite element methods with contact algorithms for modeling crash phenomena.

REQUIREMENTS

The following requirements must be fulfilled: 15 credits, including 9 credits in required courses and 6 credits in elective courses in one selected track.

Intelligent Transportation Systems and Congestion Mitigation Track

ELLIOTT SCHOOL OF INTERNATIONAL AFFAIRS

Dean I. Feldman (Interim)

Associate Deans P. Rollberg, L. Stephenson

Assistant Deans G. Cornwell, T. Greiff, J. Walker

The Elliott School of International Affairs offers undergraduate and graduate programs to prepare individuals to understand and work in an increasingly globalized world. The historical roots of the Elliott School extend back to the establishment of the School of Comparative Jurisprudence and Diplomacy in 1898. In 1966, the School separated from the School of Government, Business, and International Affairs to become an independent unit, the School of Public and International Affairs. In 1987, the name was changed to the School of International Affairs, and in 1988 the School was renamed in honor of Evelyn E. and Lloyd H. Elliott. Lloyd Elliott served as president of George Washington University from 1965 to 1988.

The Elliott School offers the bachelor of arts degree with majors in international affairs, Asian studies, Latin American and hemispheric studies, and Middle East studies; bachelor of science degree with a major in international affairs; the master of arts degree in the fields of international affairs, Asian studies, European and Eurasian studies, global communication, international development studies, international economic policy, international science and technology policy, Latin American and hemispheric studies, Middle East studies, and security policy studies; master of international policy and practice degree for mid-career professionals; and master of international studies degree for students enrolled in master's degree programs at international universities with which the Elliott School has a special partnership.

These programs provide advanced academic and professional training in international affairs as preparation for employment in public, private, and nonprofit sectors. Focusing on major historical and contemporary issues in international affairs, the programs are both interdisciplinary and multidisciplinary, combining courses offered through the School with courses offered by other schools and departments of the University.

REGULATIONS

Undergraduate Degree Requirements Graduation

To earn a bachelor's degree, students must complete 120 credits, meet the University General Education Requirement (p. 42), major requirements, and have a minimum cumulative grade-point average of 2.0. Courses in lifestyle, sport, and physical activity do not count toward the degree.

Scholarship Performance in the Major

All courses indicated as requirements for the major, including courses taken to fulfill the third-year language proficiency requirement, must be completed with a minimum grade of C-. If a student receives a grade of D+, D, or D- in any of these courses, the credit will count toward the degree, but the student must either repeat the course or, with approval of the academic advisor, substitute another course; in either case, the student must earn a minimum grade of C-. If the student must repeat the course, credit for the repetition does not count toward the degree, and grades for both the initial course and the repeated course are used to compute the GPA. If the Elliott School Office of Undergraduate Academic Advising (<http://elliott.gwu.edu/undergraduate-advising/>) allows another course to be substituted, the initial course is considered to be an elective. Students are expected to consult the Elliott School Office of Undergraduate Academic Advising allows another course to be substituted, the initial course is considered to be an elective. Students are expected to consult the Elliott School Office of Undergraduate Academic Advising in all matters affecting the program of study, such as changes, substitutions, withdrawals, or transfer of credit from other institutions.

Incompletes

Conditions under which the symbol I (Incomplete) may be assigned in a course are described under University Regulations (p. 27).

Pass/No Pass Option

A student who has a cumulative grade-point average of 2.5 or above may, with the approval of the Elliott School Office of Undergraduate Academic Advising (<http://elliott.gwu.edu/undergraduate-advising/>), take one course per semester and receive a grade of Pass (P) or No Pass (NP), which is recorded on the student's transcript, but is not reflected in the cumulative grade average. A student must sign up for this option at the Elliott School Office of Undergraduate Academic Advising (<http://elliott.gwu.edu/undergraduate-advising/>) within the first eight weeks of classes. Under no circumstances may a student change from P/NP status to graded status, or vice versa, after the end of the eighth week of the semester. Foreign language courses and required courses in the student's degree program (except those in which the grade of P or NP is normally assigned) may not be taken on a P/NP basis. First-year students may not elect to take a course on a P/NP basis. A transfer student may not elect to take a course on a P/NP basis until the second semester of enrollment in the University. No more than six courses in which the grade of P or NP is assigned will apply toward the degree, including courses in which the grade of P or NP is normally given.

Study Abroad

Students are encouraged to study abroad. Those wishing to study abroad must consult their academic advisor and the University's Office for Study Abroad (<http://studyabroad.gwu.edu/>). Students must secure prior approval

from the Elliott School Office of Undergraduate Academic Advising (<http://elliott.gwu.edu/undergraduate-advising/>) for any plan of study abroad in order for the credit to apply toward the student's degree requirements. Students must apply to a program from the University's list of approved study abroad programs (<https://studyabroad.gwu.edu/>).

Internships

Internships offer students the opportunity to make practical use of the knowledge they acquire in the classroom. Elliott School undergraduates students who have completed at least 24 credits in-residence, have a minimum cumulative grade-point average of 2.5, and have no more than one incomplete on their transcript, are eligible to arrange internships for credit or zero-credit, for a maximum total of 6 credits toward the degree. Academic work in the field of the internship is required. A zero-credit internship, which requires no additional academic work outside of the internship itself, is also available. Internships are available in the private, nonprofit, and public sectors. Students must register for internships (even if for zero-credit) through the Elliott School Office of Undergraduate Academic Advising (<http://elliott.gwu.edu/undergraduate-advising/>) but are responsible for locating their own internships.

Double Majors

Students who complete the requirements of two majors in the Elliott School (such as international affairs and Asian studies) may graduate with a double major. Consult the Elliott School Office of Undergraduate Academic Advising (<http://elliott.gwu.edu/undergraduate-advising/>) to officially declare both majors on the appropriate form.

Students in the Elliott School may declare a second major offered by Columbian College of Arts and Sciences, School of Engineering and Applied Science, Milken Institute School of Public Health, or School of Business (finance major only). Permission for the second major must be obtained from the appropriate administrative office of the other school.

Students in Columbian College of Arts and Sciences, School of Engineering and Applied Science, Milken Institute School of Public Health, and the School of Business may declare a second major in the Elliott School. Students wishing to pursue these options must request approval through the Elliott School Office of Undergraduate Academic Advising (<http://elliott.gwu.edu/undergraduate-advising/>). Students must complete all degree requirements for their major in their home school in order to graduate with a second major from the other school.

In all cases, double majors do not result in two degrees. See Double Majors and Double Degrees in the University Regulations (p. 27).

Special Honors

Students who complete a senior thesis or research seminar with a minimum grade of A-, earn a cumulative GPA of 3.7, and

complete 60 credits in residence at GW are awarded Special Honors.

Graduate Degree Requirements

Graduate Scholarship Requirements

Information on grades and computing the grade-point average can be found under University Regulations (<http://bulletin.gwu.edu/university-regulations/>). Courses taken to satisfy degree requirements cannot be taken on a Credit/No Credit (CR/NC) basis except for approved Law School courses. Graduate students are required to maintain a minimum cumulative GPA of 3.0.

Academic Probation

A graduate student whose GPA falls below 3.0, or who receives a grade of *F* in a course after having completed 9 credits, is placed on academic probation. While on academic probation a student:

- must earn a minimum semester GPA of 3.0 in the semester following that in which their cumulative GPA falls below 3.0 or the grade of *F* was earned;
- cannot receive an Incomplete (*I*) in any course;
- cannot receive a grade of *F* in any course; and,
- must meet with their academic advisor to discuss their progress.

A student's program may be restricted by the program director and/or academic dean if deemed necessary.

Academic Suspension

A student who fails to meet the conditions outlined above is subject to suspension. During the period of suspension, the student will not be permitted to enroll in any courses. A student who has remained on suspension from the University for a period of at least one semester may request reinstatement. The request for reinstatement must provide a clear explanation of the factors that prevented the student's success and outline a plan for successful completion of the program.

Academic Dismissal

A student is subject to dismissal under the following circumstances:

- They are reinstated after a period of suspension and fail to raise their cumulative GPA to a minimum of 3.0 by the end of the semester in which they are reinstated;
- They are subject to probation for a second time at any point during the academic program; or,
- Their cumulative GPA falls below 3.0 and they do not have enough required credits remaining in the program with which to raise their GPA to 3.0 or above. In such circumstances, the student may be permitted to take up to 6 credits of graduate-level coursework beyond those required for graduation to achieve the GPA requirement.

The academic dean in consultation with the program director will determine whether the student is dismissed. This decision is final and cannot be appealed.

Readmission

A graduate student who has not been continuously enrolled or on an approved leave of absence must file an application for readmission the semester before planning to return to school.

General Requirements for Master of Arts Degree Programs

Programs leading to the master of arts degree require a minimum of 40 credits of graduate coursework, which includes a capstone project. By the end of the first semester in residence, candidates for the degree are required to submit to the Office of Graduate Student Services for final approval a plan of study that includes concentrations, supporting coursework, and any other required information as endorsed by the program director. Degrees are awarded after the student has completed the required coursework, an acceptable capstone project, and satisfied the foreign language proficiency requirement (if relevant).

Students with sufficient academic backgrounds may waive a core course with approval of the program director and academic dean. A course waiver does not reduce the number of credits required for the degree. Under special circumstances, upper-level undergraduate courses taken while enrolled as a graduate student at the Elliott School may be counted toward the master's degree; registration for graduate credit must be approved at the beginning of the course by the program director, the instructor, and the Office of Graduate Student Services. The student who takes an undergraduate course for graduate credit is expected, by arrangement with the instructor, to do work at the graduate level in addition to the regular work of the course. Normally, no more than 9 credits of approved undergraduate coursework may be taken for credit toward a graduate degree.

All master's degree candidates must complete degree requirements within five years of matriculation in the program. Students who are temporarily unable to continue their studies may request a leave of absence not to exceed one year. Extensions beyond the five-year period may be granted in exceptional circumstances, but the student is required to register for a leave of absence each semester.

Students are encouraged, and in some cases required, to take the professional skills-based courses (IAFF 6502 Professional Skills I and IAFF 6503 Professional Skills II). The Elliott School allows a maximum of 4 credits to be taken in these courses, but program-specific limits may vary.

No more than 6 graduate credits may be transferred from accredited institutions or from non-degree status. Transfer credits may be accepted only under limited conditions, including length of time since the courses in question were completed, grades earned, and relevance to the student's

program. The sole exception to the transfer credit policy is made for MA students who attend one of the Elliott School's International Exchange Partner schools. Such students may transfer a maximum of 10 graduate credits, provided no prior transfer credit has been accepted. No student may transfer more than a total of 10 credits from all sources combined. Credit from foreign language courses is not eligible for transfer. Credit from a previously earned degree may not be counted toward the master's degree.

Capstone/Thesis Option

Every student must successfully complete a capstone near the conclusion of the master's program. For the capstone, the student must have completed 18 credits prior to the start of the capstone course work. If there is a lapse of time between completion of other coursework and the capstone, the student must be continuously enrolled during this period. The student will have one opportunity to retake a capstone if they fail the course. If the student fails a second time, their degree will not be conferred. Details concerning the capstone course vary across programs; students should consult their program guidelines for details.

For most programs, exceptional students may write a thesis, in addition to the capstone, if they qualify by having a minimum cumulative grade-point average 3.5 for a minimum of 18 credits of coursework in their program. Students also must develop a formal thesis proposal approved by their prospective thesis advisor, who must be a member of the full-time faculty, and the program director.

The thesis subject should be selected as early as possible to permit effective integration with the student's coursework. A student is not permitted to register for thesis courses (IAFF 6998 Thesis and IAFF 6999 Thesis) until the thesis subject has been formally submitted to the Office of Graduate Student Services. The subject must be approved by the thesis advisor, a second member of the faculty who serves as a reader, and the student's program director. The thesis in its final form must have the approval of the thesis director and one other reader. Thesis proposals must be submitted electronically by May 1 of the year preceding anticipated submission of the thesis in a fall-spring sequence. For a spring-fall sequence, thesis proposals must be submitted electronically by November 1 of the year preceding anticipated submission of the thesis. All theses must meet the formatting and other requirements set forth at GW's Electronic Theses and Dissertations Submission website (<http://library.gwu.edu/etds/>).

Payment of tuition for thesis research entitles the candidate, during the period of registration, to the advice and direction of the thesis director and the other reader. In case a thesis is unfinished, the student must maintain continuous enrollment and is allowed one calendar year to complete it. If the preparation of the thesis extends beyond the additional calendar year, the student must register for the entire 6 credits of thesis again and pay tuition as for a repeated course.

Foreign Language Requirements

In most degree programs, a candidate for the master of arts must demonstrate reading and speaking proficiency in a modern foreign language. All students in regional programs (including those who are not native speakers of English) must demonstrate proficiency in a language appropriate to the study of the specific region. Students should consult their program guidelines for specific requirements, including academic credit and options for demonstrating language proficiency.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in Asian studies (p. 841)
- Bachelor of Arts with a major in international affairs (p. 853)
- Bachelor of Arts with a major in Latin American and hemispheric studies (p. 895)
- Bachelor of Arts with a major in Middle East studies (p. 907)
- Bachelor of Science with a major in international affairs (p. 919)

Minor

- Minor in international affairs (p. 938)

Combined program

- Dual Bachelor of Science with a major in international affairs and Master of Science in the field of information systems technology (p. 938)
- Dual Bachelor of Science with a major in international affairs and Master in Management (p. 938)
- Dual Bachelor of Science with a major in international affairs and Master of Science in the field of business analytics (p. 938)

GRADUATE

Master's programs

- Master of Arts in the field of Asian studies (p. 943)
- Master of Arts in the field of European and Eurasian studies (p. 952)
- Master of Arts in the field of global communication (p. 960)
- Master of Arts in the field of international affairs (p. 970)
- Master of Arts in the field of international development studies (p. 986)
- Master of Arts in the field of international economic policy (p. 999)
- Master of Arts in the field of international economic policy, STEM Track (p. 1000)
- Master of Arts in the field of international science and technology policy (p. 1001)

- Master of Arts in the field of international trade and investment policy (p. 1004)
- Master of Arts in the field of Latin American and hemispheric studies (p. 1006)
- Master of Arts in the field of Middle East studies (p. 1012)
- Master of Arts in the field of security policy studies (p. 1027)
- Master of International Policy and Practice (p. 1032)
- Master of International Policy and Practice - Online (p. 1033)
- Master of International Studies (p. 1034)

Combined programs

- Dual Master of Arts in any Elliott School graduate program and Master of Public Health (p. 1036)
- Joint Master of Arts and Juris Doctor (p. 1036)
- Joint Master of Arts in Elliott School programs and Master of Business Administration (p. 1037)

CERTIFICATES

Graduate certificate programs

The Elliott School of International Affairs offers a series of graduate certificates covering topics of specialized interest. The certificate programs are open to all graduate students presently enrolled in the Elliott School, Columbian College of Arts and Sciences, Graduate School of Education and Human Development, School of Business, and Milken Institute School of Public Health. The programs also are open to graduate students from other universities, individuals who already have earned a graduate degree, and individuals with a bachelor's degree and a minimum of eight years of relevant professional work experience. Applicants who have less than eight years of work experience are eligible to apply but must submit the same application materials required of other MA degree programs. Transfer credit from non-GW institutions is not accepted into any graduate certificate program. No more than 6 credits of graduate coursework taken in any degree or non-degree status within the University, including the Elliott School, may be included in any graduate certificate program. Additional information is available in the Elliott School Graduate Admissions office (<http://elliott.gwu.edu/graduate-admissions/>).

- Graduate certificate in global gender policy (p. 1037)
- Graduate certificate in international science and technology policy (p. 1038)
- Graduate certificate in nuclear policy (p. 1039)

FACULTY

University Professors M. Barnett, A. Etzioni, M. Finnemore

Professors H. Agnew, G. Brazinsky, J. Brinkerhoff, M. Brown, N. Brown, M. Chen, B. Dickson, I. Feldman, J. Foster, C. Glaser,

H. Hale, H. Harrison, J. Hershberg, G. Kaminsky, M. Lynch, B. Miller, M. Moore, J. Pelzman, W. Reich, D. Shambaugh, J. Shambaugh, R. Thornton, N. Vonortas, P. Williams, S. Wolchik

Associate Professors P. Alonso-Gortari, C. Arrington, M. Atia, M. Deloffre, A. Downes, B. Hopkins, R. Jedwab, S. Kaplan, J. Kim, M. King, E. Kramon, S. McHale, M. Mochizuki, H. Mylonas, S. Robinson, A. Sotomayor, E. Teitelbaum, D. Yang

Assistant Professors F. Cunningham, M. Kansanga, N. Kelsey, R. Lopez Monti, I. Malone, D. Pardo Pedraza, L. Rafanelli, E. Schluessel, L. Sorurbakhsh, Y. Zhao

Professors of Practice C. Fink, E. Gnehm, C. Kojm, S. Pace, R. Sutter

Associate Professors of Practice J. Cooke, S. Graham, S. Roberts

Assistant Professors of Practice S. Ledermann

Specialized Faculty R. Lal, N. Lazarus

Research Professors S. Aaronson, M. Creedon, P. Ehrenfreund, M. Einhorn, M. Laruelle, M. Levinger, D. Ollapally, R. Orttung, S. Peyrouse, T. Rabgey, D. Shaw, L. Yarr

Associate Research Professors Y. Kim, E. Lagadec, S. Zhemukhov

Assistant Research Professors V. Ialenti, Y. Lee, S. Marshall

Visiting Professors D. Abente-Brun, I. Kaplan, E. Wane

Emeritus Professors C. Allen, H. Askari, M. East, D. Gow, D. Grier, C. Herber, P. Hill, W. Johnson, Y. Kim, Y. Kim-Renaud, P. Klaren, R. Krulfeld, D. Lee, J. Logsdon, G. Ludlow, E. McCord, D. Moore, H. Nau, J. Post, P. Reddaway, B. Reich, R. Rycroft, B. Sapin, R. Spector, J. Thibault, H. Wolman, R. Yin

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

IAFF 1001. First-Year Experience. 1 Credit.

First-Year Experience assists students in developing their personal, academic, and career goals. Restricted to students in the Elliott School.

IAFF 1005. Introduction to International Affairs. 3 Credits.

Introduction to the field of international affairs; the challenge of promoting cooperation and order in a world in which competition, conflict, and disorder are common; interstate relations, intrastate conflicts, regional problems, and old and new global challenges. Credit cannot be earned for this course and PSC 1003.

IAFF 1099. Variable Topics. 1-36 Credits.

IAFF 2040. Basic Topics in International Affairs. 3 Credits.

Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Primarily for Elliott School freshmen and sophomores.

IAFF 2090. Latin America: Problems and Promise. 3 Credits.

An interdisciplinary course in Latin American studies designed to introduce undergraduates to the diverse, rich, and complex history, politics, economy, culture, and society of Latin America.

IAFF 2091. East Asia-Past and Present. 3 Credits.

An interdisciplinary course offering a comprehensive and integrated introduction to the civilizations and present problems of East Asia.

IAFF 2092. Russia and Eastern Europe: An Introduction. 3 Credits.

A multidisciplinary introduction to the lands and cultures of the former Soviet Union and Central and Eastern Europe. The main emphasis is on history and politics, with attention also given to economics, trade, geography, military matters, literature, and the media.

IAFF 2093. Africa: Problems and Prospects. 3 Credits.

Aspects of the environment, culture, and politics as they affect the present and anticipated future of Africa.

IAFF 2094. Europe: International and Domestic Interactions. 3 Credits.

A multidisciplinary view of contemporary Europe, including the E.U. states, other states of Eastern Europe, and Turkey. The widening processes of political, judicial, economic, cultural, and security integration. Prerequisites: IAFF 1005 and PSC 1001.

IAFF 2095. The Middle East in International Affairs. 3 Credits.

Multidisciplinary survey of social, cultural, political, historical, and religious issues in the Middle East with a concentration on the modern period.

IAFF 2101. International Affairs Research Methods. 3 Credits.

Overview of the variety of research methods, both qualitative and quantitative, used in international affairs research; theoretical groundings and approaches to research methods; the research process.

IAFF 2190. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

IAFF 2190W. Special Topics. 3 Credits.

Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

IAFF 2444. International Law. 3 Credits.

Overview of public international law. How public international law is established, implemented, interpreted, changed, and enforced; the legal structure underpinning international society; and the relationship between domestic and international law. Credit cannot be earned for this course and PSC 2444.

IAFF 3171. U.S. Foreign Policy Summer Program. 3-4 Credits.

The institutions and ideas that shape U.S. foreign policy, including the U.S. Congress and administration, foreign embassies, international organizations, think tanks, interest groups, and media outlets. A separate section of the course covers issues of reporting on foreign policy issues. The program has special admission criteria.

IAFF 3172. Conflict and Conflict Resolution. 3 Credits.

Introduction to the field of conflict analysis and resolution. Analysis of conflicts and their resolutions; major theories and driving causes of conflict; barriers to and mechanisms for resolving conflict; and applications to real-world conflicts.

IAFF 3177. Political Economy of Latin America. 3 Credits.

The politics of economic policymaking in Latin America. Successes and failures with policymaking ideas, political reasons for adopting different development models, and political and economic obstacles to prosperity. Restricted to juniors and seniors. Prerequisites: ECON 1011 and ECON 1012; or PSC 2439.

IAFF 3179. Special Topics in Science and Technology Policy. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3180. Special Topics in Security Policy. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3180W. Special Topics in Security Policy. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3181. Special Topics in Conflict Resolution. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3182. Special Topics in Foreign Policy. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3183. Special Topics in Development Policy. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3184. Special Topics in Trade and International Economic Policy. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3185. Special Topics in European and Eurasian Studies. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3186. Special Topics in Asian Studies. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3186W. Special Topics in Asian Studies. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

IAFF 3187. Special Topics in Latin American and Hemispheric Studies. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3188. Special Topics in Middle East Studies. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3189. Special Topics in African Studies. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3190. Special Topics in International Affairs. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3190W. Special Topics. 3 Credits.

Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

IAFF 3191W. Latin American Populism in Global Context. 3 Credits.

Theoretical frameworks for thinking about classical and contemporary examples of Latin American populism in the twentieth and twenty-first centuries; examining these theories and interpretations as they pertain to the origins, process, and outcomes of selected cases. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to . Recommended background: Latin America, upper-level political science/ international affairs coursework, and writing experience.

IAFF 3192. ESIA Dean's Scholars Workshop. 1 Credit.

For Elliott School students who have applied and been accepted to the ESIA Dean's Scholars Program. Students fine-tune their research questions, conduct the bulk of their research, draft abstracts, and outline their papers. Visit the Elliott School website for more information.

IAFF 3193W. ESIA Dean's Scholars Seminar. 3 Credits.

For Elliott School students who have applied and been accepted to the ESIA Dean's Scholars Program. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Visit the Elliott School website for more information.

IAFF 3194W. Latin America's Violent Peace. 3 Credits.

The complex governability challenges facing Latin America; discussion of the historical evolution of conflict and contestation in Latin America through inquiry into patterns in state building, political violence, armed forces, insurgencies, and criminal gangs. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Recommended background: Latin America, upper-level political science/international affairs coursework, and writing experience.

IAFF 3195. Internship. 3 Credits.

Internships in public, private, and nonprofit organizations concerned with international affairs. Students must meet selection criteria, find a sponsoring faculty member, and receive approval from the Elliott School Office of Academic Advising and Student Services. May be repeated for up to 6 credits with permission.

IAFF 3198. Independent Study and Research. 1-3 Credits.

For juniors and seniors with a minimum grade-point average of 3.0. Students must find a sponsoring faculty member and receive approval from the Elliott School Office of Academic Advising and Student Services. May be repeated for credit with permission of the dean.

IAFF 3210W. Migration, Gender, and International Development. 3 Credits.

The relationship between migration and international development as an established feature of social and economic life. Gender as a framework for analyzing elements of the migration-development nexus. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

IAFF 3501. International Development Theory, Policy, and Practice. 3 Credits.

Historical overview of theoretical approaches, policies, and practices associated with international development. Possible thematic foci include state-directed development approaches, environmentalist-influenced green development, or similar topics. Prerequisites: ANTH 1002 or ANTH 1002W; or ANTH 1004 or ANTH 1004W.

IAFF 3513. Human Rights and Ethics. 3 Credits.

Theoretical and empirical basis of human rights from a multi-disciplinary perspective. How rights have been conceptualized, envisioned, imagined, promoted, and asserted by philosophers, political scientists, anthropologists, and other scholars. Prerequisites: ANTH 1002 or ANTH 1002W; or ANTH 1004 or ANTH 1004W. Credit cannot be earned for this course and ANTH 3513.

IAFF 4191. Research Seminar. 3 Credits.

Intensive readings, discussion, research, and writing. Students must meet selection criteria and receive advisor approval. Restricted to juniors and seniors in the Elliott School.

IAFF 4191W. Research Seminar. 3 Credits.

Intensive readings, discussion, research, and writing. Students must meet selection criteria and receive advisor approval. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to juniors and seniors in the Elliott School.

IAFF 4199. Senior Thesis. 3 Credits.

Students must meet selection criteria, find a sponsoring faculty member, and receive approval from the Elliott School Office of Academic Advising and Student Services. Restricted to seniors in the Elliott School.

IAFF 5099. Variable Topics. 1-99 Credits.**IAFF 6101. International Affairs Cornerstone. 3 Credits.**

Political, economic, and social theories of international relations and their applications to practice.

IAFF 6102. Global Gender Policy. 3 Credits.

An interdisciplinary and comparative approach to examination of policies targeted at achieving gender equality and of the costs of policies that are not gender-specific. Topics include poverty reduction, environmental sustainability, social justice, global and personal security, and prevention of and responses to extreme calamities and crises. How global gender policies are rationalized, adopted, implemented, and assessed. Focus on "what works" and why it works; gaps that remain in achieving global gender equality.

IAFF 6106. Nuclear Weapons. 3 Credits.

The technology and politics associated with nuclear weapons. Strategy and deterrence, force planning and operations, and the prospect of nuclear terrorism.

IAFF 6107. The Science of Nuclear Materials. 3 Credits.

Fundamental principles of nuclear materials, including the origins of radiation, manufacture and detection of nuclear materials, nuclear weapons and power issues, and medical uses and environmental issues related to nuclear materials.

IAFF 6108. International Development Policy. 3 Credits.

The changing scope and nature of international development and the challenges currently facing development agencies; how the mixed results of investment in development has brought methods and concepts into question and how agencies are responding to this challenge.

IAFF 6118. Special Topics in International Affairs. 3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6121. International Development Studies Cornerstone. 3 Credits.

Introduction to the concepts and methods of international development. Prerequisite: students in the MA in international development studies program.

IAFF 6122. Development Policy and Practice. 3 Credits.

An overview of economic development in developing countries; key challenges of economic growth, poverty alleviation, and development.

IAFF 6136. Gender and Development. 3 Credits.

Theoretical approaches to gender and development and debates over how to promote gender equity and rights across the gender spectrum. Key issues in gender and development and the range of actors who are involved in promoting gender equality. General patterns, lessons with broader applications, and challenges and differences within and between societies.

IAFF 6137. Development Studies Pre-Capstone Workshop. 1 Credit.

Students work in teams to find a suitable client and negotiate a project, with detailed terms of reference and a work plan to be carried out in the spring semester. Restricted to students in the MA in international development studies program.

IAFF 6138. Special Topics in International Development Studies. 3 Credits.

Topics announced in the Schedule of Classes.

IAFF 6139. International Development Studies Capstone. 3 Credits.

A project-oriented development course abroad, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Restricted to students in the MA in international development studies program.

IAFF 6141. International Science and Technology Policy Cornerstone. 3 Credits.

Introduction to the study of international science and technology policy; focus on policy issues that arise from interactions between scientific and technological developments and government activity.

IAFF 6142. Technology Creation/Diffusion. 3 Credits.

Examination of the relationship between invention (inception), innovation (first application), and dissemination (diffusion) of technological knowledge; focus on the technological environment prevailing in the major developed market economies.

IAFF 6143. Science and Technology Policy Analysis. 3 Credits.

The use of science by policy decision makers; the affects of policy on science and technology; issues of risk, uncertainty, regulation, democratization, and politics in science and technology policy.

IAFF 6145. U.S. Space Policy. 3 Credits.

Origins, evolution, current status, and future prospects of U.S. space policies and programs. U.S. civilian, military, and national security space programs and space activities of the U.S. private sector.

IAFF 6146. Space Law. 3 Credits.

The underlying principles of international space law, with emphasis on issues of particular concern as the uses of space increase for exploration, commerce, and security.

IAFF 6148. Space and National Security. 3 Credits.

Historic and current factors and emerging trends shaping the development and implementation of U.S. national security space policy and strategy, including the global security environment, domestic politics, and technology.

IAFF 6151. Environmental Policy. 3 Credits.

Examination of public policies designed to protect the human and physical environment; focus on the ways science and technology can simultaneously create new environmental problems and contribute to their mitigation and prevention.

IAFF 6153. Science, Technology, and National Security. 3 Credits.

The contributions of science and technology to U.S. security in military, intelligence, and homeland security activities.

IAFF 6157. International Science and Technology Policy Capstone Workshop. 1 Credit.

First course in a two-semester sequence. Second-year students in the MA in international science and technology policy program work in groups on a project addressing a policy problem or issue in international affairs. Restricted to students in the international science and technology policy program.

IAFF 6158. Special Topics in International Science and Technology Policy. 3 Credits.

Topics announced in the Schedule of Classes.

IAFF 6159. ISTP Capstone Project. 3 Credits.

A seminar designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to MA candidates in science and technology policy.

IAFF 6160. Defense Policy and Program Analysis. 3 Credits.

Examination of how national security policy is formulated and translated into a defense budget, program priorities, and force structure. Focus on nuclear forces.

IAFF 6161. International Security. 3 Credits.

Survey of the field of international security studies; overview of key concepts, theories, and approaches; inter-state, intra-state, and transnational security problems and the interrelated nature of these categories; analysis of security topics such as great-power relations, arms racing and arms control, crisis management, civil wars, terrorism, and gender, combined with a review of regional developments; non-military issues that have major security implications, including poverty, health, population movements, energy consumption, and climate change; the role of international organizations in promoting international security, and prospects for the future. Restricted to students in the MA in security policy studies program.

IAFF 6162. Security Policy Analysis. 3 Credits.

Key components of security policy and the decision making behind them. Restricted to students in the MA in security policy studies program.

IAFF 6163. Transnational Security. 3 Credits.

Overview of security concerns that transcend state borders, including terrorism, drug trafficking, organized crime, weapons proliferation, migration, and environmental degradation.

IAFF 6164. Environmental Security. 3 Credits.

The relationship between conflict, environmental degradation, and natural resources, including how the environment, climate change, and natural resources influence national security. Theoretical security concepts and use of multidisciplinary academic literature to consider how environmental security can be integrated into future U.S. defense and foreign policy strategies and decisions.

IAFF 6165. Fundamentals of Intelligence. 3 Credits.

The institutional structure of the intelligence community; the intelligence production cycle, including tasking, collection, analysis, covert action, and counterintelligence; and relations between the intelligence and policy communities.

IAFF 6167. Defense Policy and Program Analysis II. 3 Credits.

Analysis of the development of national security policy and analytic techniques to derive a defense program and force structure from it. Special attention to general-purpose forces.

IAFF 6169. Homeland Security. 3 Credits.

The central missions of a homeland security agency: domestic security, emergency preparedness, technology policy, timely intelligence, counterintelligence, and preemptive actions. How the U.S. has dealt historically with internal security matters; contemporary approaches to security problems.

IAFF 6171. Introduction to Conflict Resolution. 3 Credits.

Interstate disputes, contemporary civil wars, complex political emergencies, and other forms of organized violence.

IAFF 6173. Security and Development. 3 Credits.

Consideration of the relationship between security and development reflecting the growing interest from the security field in issues that have traditionally been the purview of development, and vice versa.

IAFF 6186. Special Topics in Security Policy Studies. 3 Credits.

Topics announced in the Schedule of Classes.

IAFF 6189. Security Policy Studies Capstone. 3 Credits.

A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Prerequisite: students in the MA in security policy studies program.

IAFF 6191. Financial Accounting. 3 Credits.

Basic concepts and methods used in financial reporting to understand content, context, and related processes. Income statement, balance sheet, and statement of cash flows. Detailed accounting procedures, calculations, and choices. Same As: ACCY 6101, MBAD 6211.

IAFF 6193. Finance. 3 Credits.

Financial management examined through financial analyses, fund sources, investing, capital planning/budgeting, dividend policy, and working capital management. Money and capital markets, primary and secondary markets, and cash and futures markets. Prerequisites: MBAD 6211, MBAD 6224 and MBAD 6242; or MBAD 6211, MBAD 6221, MBAD 6222 and MBAD 6242; or DNSC 6202, MBAD 6211 and MBAD 6242. Same As: MBAD 6235.

IAFF 6198. Special Topics in International Economic Policy. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more information.

IAFF 6199. International Trade and Investment Policy Capstone. 1 Credit.

A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Restricted to students in the MA in international trade and investment policy program.

IAFF 6208. Special Topics in Global Communication. 3 Credits.

Topics announced in the Schedule of Classes.

IAFF 6209. Global Communication Capstone. 3 Credits.

A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Restricted to students in the MA in global communication program.

IAFF 6211. Master of International Policy and Practice Leadership Practicum. 3 Credits.

Major issues in international affairs confronting policymakers in the United States and around the world; the evolving nature of international leadership; how diverse actors exercise power in the international realm. Restricted to MIPP degree candidates.

IAFF 6212. Strategy and Leadership. 3 Credits.

The evolving nature of international leadership in the twenty-first century; lateral leadership for managing expert, networked teams to address complex problems requiring adaptation and learning; strategic thinking and team leadership skills. Restricted to students in the MIPP program.

IAFF 6213. Leadership Capstone. 3 Credits.

Practical application of lateral leadership skills to researching and designing an individual leadership project addressing a critical issue in the student's professional field; qualitative research methods, program design and evaluation, coalition building, proposal writing, and oral presentation skills. Restricted to students in the MIPP program. Prerequisites: IAFF 6212.

IAFF 6216. Economic Tools for Global Policy. 3 Credits.

Analysis of economic issues and concrete policy problems related to globalization, trade, and technology.

IAFF 6222. Special Topics in International Policy and Practice. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See school for more details.

IAFF 6302. Taiwan: Internal Development and Foreign Policy. 3 Credits.

The social, political, and economic development in Taiwan since World War II; Taiwan's foreign affairs.

IAFF 6305. U.S.-South Asia Relations. 3 Credits.

The nature of challenges and opportunities facing the South Asia region and the U.S. policy response. The rise of India as a global actor; relations between India and Pakistan; political transformation in the countries of the region, including Nepal and Sri Lanka.

IAFF 6308. International Relations of South Asia. 3 Credits.

The foreign policy choices of South Asian countries and the domestic and international linkages that drive these decisions; the different patterns of state-society relationships and identity formations which determine a country's external alliances and partnerships; the changing nature of the Asian balance of power and roles of key Asian actors.

IAFF 6318. Special Topics in Asian Studies. 3 Credits.

Topics announced in Schedule of Classes.

IAFF 6321. European and Eurasian Studies Cornerstone. 3 Credits.

Survey of current research on Europe and Eurasia. Research paper required. Restricted to students in the MA in European and Eurasian studies program or with permission of the instructor.

IAFF 6338. Special Topics in European and Eurasian Studies. 3 Credits.

Topics announced in the Schedule of Classes.

IAFF 6339. European and Eurasian Studies Capstone. 3 Credits.

Survey of current research on Europe and Eurasia. Research paper required. Restricted to students in the MA in European and Eurasian studies program or with permission of the instructor.

IAFF 6341. Latin American and Hemispheric Studies Cornerstone. 3 Credits.

Multidisciplinary foundation course for the Latin American and hemispheric studies program.

IAFF 6342. Drug Trafficking in the Americas. 3 Credits.

A historical, comparative, and contemporary picture of drug trafficking in the Americas and the anti-narcotics policies to combat this trade.

IAFF 6357. Latin American and Hemispheric Studies Pre-Capstone Workshop. 2 Credits.

First in a two-course sequence with IAFF 6359. Planning and preparation to undertake field-based research related to a specific problem or issue of interest to a sponsoring organization. Restricted to students in the MA in Latin American and hemispheric studies program.

IAFF 6358. Special Topics in Latin American and Hemispheric Studies. 3 Credits.

Topics announced in the Schedule of Classes.

IAFF 6359. Latin American and Hemispheric Studies Capstone. 2 Credits.

Second in a two-course sequence with IAFF 6357. A project-oriented course, designed to apply the skills and synthesize the knowledge that students have acquired in their graduate study. Restricted to students in the MA in Latin American and hemispheric studies program.

IAFF 6361. Middle East Studies Cornerstone. 3 Credits.

Multidisciplinary foundation course for the Middle East studies program. Introduction to key issues.

IAFF 6362. Regional Security in Middle East. 3 Credits.

The nature, elements, and future of security in the Middle East region. Various analytical frameworks are examined to consider the interplay of national interests, ideology, and regionalism. Issues in regional security.

IAFF 6363. Political Economy of the Middle East. 3 Credits.

Current political economy of the Middle East, including an overview of Islamic economic concepts and political organizations.

IAFF 6364. Religion and Society in the Modern Middle East. 3 Credits.

Comparative overview, both historical and current, of religious and social trends in the Middle East.

IAFF 6377. Middle East Studies Program Capstone Workshop. 1 Credit.

First in a two-course sequence with IAFF 6379. Second-year students in the MA in the Middle East studies program work in groups on a project addressing a policy problem or issue in international affairs. Restricted to students in the MA in Middle East studies program.

IAFF 6378. Special Topics in Middle East Studies. 3 Credits.

Topics announced in the Schedule of Classes. Credit cannot be earned for this course and IBUS 4900, IBUS 6290.

IAFF 6379. Middle East Studies Capstone. 3 Credits.

Second in a two-course sequence with IAFF 6377. A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Restricted to students in the MA in Middle East studies program.

IAFF 6381. African Studies Cornerstone. 3 Credits.

Introduction to the broad historical and contemporary forces that have shaped and continue to affect Africa. Key concepts, theories, and analytic approaches that help deepen understanding of the region. Important challenges, as well as opportunities and innovations, shaping the region's future.

IAFF 6385. Special Topics in African Studies. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See the Schedule of Classes for more information.

IAFF 6501. Quantitative Analysis for International Affairs Practitioners. 3 Credits.

Overview of quantitative measurement, data summary, statistical inference, and elementary modeling such as linear regression.

IAFF 6502. Professional Skills I. 1 Credit.

Short courses that focus on developing specialized skills for international affairs professionals. Topics announced in the Schedule of Classes.

IAFF 6503. Professional Skills II. 1 Credit.

Continuation of IAFF 6502. Short courses that focus on developing specialized skills for international affairs professionals. Topics announced in the Schedule of Classes.

IAFF 6504. Intermediate Conversation. 1 Credit.

Short courses designed to develop professional language skills for international affairs students. Specific languages announced in the Schedule of Classes.

IAFF 6505. Elliott School Seminars. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See Schedule of Classes for more details.

IAFF 6515. Graduate Internship in International Affairs. 0 Credits.

Internship and research paper involving experience at an international organization or with international issues. Restricted to MA candidates in the Elliott School.

IAFF 6516. Independent Study and Research. 1-3 Credits.

Restricted to MA candidates in the Elliott School. Prerequisites: Written permission of the instructor.

IAFF 6517. Independent Study and Research. 1-3 Credits.

IAFF 6521. U.S. Foreign Policy Summer Program. 3-4 Credits.

The institutions and ideas that shape U.S. foreign policy, including the U.S. Congress and administration, foreign embassies, international organizations, think tanks, interest groups, and media outlets. A separate section of the course covers issues of reporting on foreign policy issues.

IAFF 6898. Capstone Workshop. 2 Credits.

First part of two-semester sequence that addresses a concrete policy problem or issue in international affairs. In small teams, students refine the policy question of the capstone project, develop a research strategy, select appropriate research methods, and begin research. Continued in IAFF 6899.

IAFF 6899. Capstone Course. 2 Credits.

Second part of a two-semester sequence. Completion of the capstone sequence by conduct of the group's research, completion of the capstone report, and oral presentation of research findings and recommendations. Prerequisite: IAFF 6898.

IAFF 6998. Thesis. 3 Credits.

Restricted to MA candidates in the Elliott School who have selected the thesis option.

IAFF 6999. Thesis. 3 Credits.

Open to Elliott School MA candidates who have selected the thesis option.

UNDERGRADUATE PROGRAMS

Bachelor's programs

- Bachelor of Arts with a major in Asian studies (p. 841)
- Bachelor of Arts with a major in international affairs (p. 853)
- Bachelor of Arts with a major in Latin American and hemispheric studies (p. 895)
- Bachelor of Arts with a major in Middle East studies (p. 907)
- Bachelor of Science with a major in international affairs (p. 919)

Minor

- Minor in international affairs (p. 938)

Combined program

- Dual Bachelor of Science with a major in international affairs and Master of Science in the field of information systems technology (p. 938)
- Dual Bachelor of Science with a major in international affairs and Master in Management (p. 938)

- Dual Bachelor of Science with a major in international affairs and Master of Science in the field of business analytics (p. 938)

BACHELOR OF ARTS WITH A MAJOR IN ASIAN STUDIES

GENERAL REQUIREMENTS

General requirements

Elliott School bachelor's degrees engage students with global issues through multidisciplinary and interdisciplinary approaches. Students begin their studies in the first year with foundational courses in political science, economics, history, and anthropology or geography. They supplement these courses with others in the traditional liberal arts categories of writing, natural or physical science, mathematics or statistics, and the humanities/creative arts, plus two writing in the disciplines courses. Foreign language study also is emphasized early in each program to enable students to satisfy the third-year language proficiency requirement of the bachelor's degree in a timely manner.

Introduction to the major

Code	Title	Credits
Prerequisite core (19 credits)		
Required		
The following courses must be taken in the first year. With the exception of IAFF 1001 (fall), ECON 1011 (fall) and ECON 1012 (spring), courses can be taken in fall or spring. IAFF 1001 is not required for internal or external transfer students.		
IAFF 1001	First-Year Experience	
IAFF 1005	Introduction to International Affairs	
ECON 1011	Principles of Economics I	
ECON 1012	Principles of Economics II	
HIST 1011	World History, 1500-Present	
PSC 1001	Introduction to Comparative Politics	
One of the following (not required in the first year):		
ANTH 1002	Sociocultural Anthropology	
ANTH 1004	Language in Culture and Society	
GEOG 1001	Introduction to Human Geography	

With advisor approval, a student may select another introductory social science course if s/he can demonstrate why it is relevant to the student's academic pursuits. An example of a course that might be accepted is GEOG 1003.

Supporting courses in the liberal arts

Code	Title	Credits
Writing (credits vary)		
Writing requirements are established by the University Writing Program. Students must complete UW 1020 in their first year before enrolling in a Writing in the Discipline (WID) course for WID credit. The two required WID courses should be taken in the student's major, minor, or a related field, and must be completed in separate semesters to receive WID credit. WID courses are designated in this Bulletin with a "W" appended to the course number, e.g., HIST 2340W.		
Required		
UW 1020	University Writing	
Two WID courses		
Mathematics or statistics (3 credits)		
MATH courses numbered 1051 and above require a placement test. Credit for only one of the following MATH courses may be applied toward a degree: MATH 1221, MATH 1231, or MATH 1252. Credit for only one of the following STAT courses may be applied toward a degree: STAT 1051, STAT 1053, STAT 1111, or STAT 1127. STAT courses may not be double-counted between the Mathematics requirement and the Research Methods requirement (see "Major Requirements.")		
One of the following:		
MATH 1007	Mathematics and Politics	
MATH 1008	History of Mathematics	
MATH 1009	Mathematical Ideas I	
MATH 1010	Mathematical Ideas II	
MATH 1051	Finite Mathematics for the Social and Management Sciences	
MATH 1221	Calculus with Precalculus II	
MATH 1231	Single-Variable Calculus I	
MATH 1232	Single-Variable Calculus II	
MATH 1252	Calculus for the Social and Management Sciences	
MATH 2233	Multivariable Calculus	

STAT 1051	Introduction to Business and Economic Statistics	PHYS 1007	Music and Physics
STAT 1053	Introduction to Statistics in Social Science	PHYS 1011	General Physics I
STAT 1111	Business and Economic Statistics I	PHYS 1012	General Physics II
STAT 1127	Statistics for the Biological Sciences	PHYS 1021	University Physics I
Science (3 to 4 credits), lab required		PHYS 1022	University Physics II
One of the following:		PHYS 1025	University Physics I with Biological Applications
ANTH 1001	Biological Anthropology	PHYS 1026	University Physics II with Biological Applications
ANTH 3412	Hominin Evolution	Humanities/creative arts (9 credits)*	
ASTR 1001	Stars, Planets, and Life in the Universe	This requirement can be satisfied by completing 9 credits in humanities courses, or 6 credits in humanities courses and 3 credits in creative arts courses.	
ASTR 1002	Origins of the Cosmos	Humanities—two or three of the following:	
BISC 1005	The Biology of Nutrition and Health	Any Art History (AH) course except AH 4199.	
BISC 1006	The Ecology and Evolution of Organisms	AMST 1160	Race, Gender, and Law
BISC 1007	Food, Nutrition, and Service	AMST 1200	The Sixties in America
BISC 1008	Understanding Organisms through Service Learning	AMST 2010	Early American Cultural History
BISC 1111	Introductory Biology: Cells and Molecules	or HIST 2010	Early American Cultural History
BISC 1112	Introductory Biology: The Biology of Organisms	AMST 2011	Modern American Cultural History
CHEM 1003	Contemporary Science for Nonscience Majors	or HIST 2011	Modern American Cultural History
CHEM 1004	Contemporary Science for Nonscience Majors	AMST 2020	Washington, DC: History, Culture, and Politics
CHEM 1111	General Chemistry I	or AMST 2020W	Washington, DC: History, Culture, and Politics
CHEM 1112	General Chemistry II	or HIST 2020	Washington, DC: History, Culture, and Politics
GEOG 1002	Introduction to Physical Geography	or HIST 2020W	Washington, DC: History, Culture, and Politics
GEOL 1001	Physical Geology	AMST 2120W	Freedom in American Thought and Popular Culture
GEOL 1002	Historical Geology	or PSC 2120W	Freedom in American Thought and Popular Culture
GEOL 1005	Environmental Geology	AMST 2210	The African American Experience
HONR 1033	Honors Seminar: Scientific Reasoning and Discovery	AMST 2320	U.S. Media and Cultural History
HONR 1034	Honors Seminar: Scientific Reasoning and Discovery	or HIST 2320	U.S. Media and Cultural History
PHYS 1003	Physics for Future Presidents	AMST 2350	U.S. Religion and Politics
		or HIST 2350	U.S. Religion and Politics

AMST 2380	Sexuality in U.S. History
or HIST 2380	Sexuality in U.S. History
or WGSS 2380	Sexuality in U.S. History
AMST 2385	Sex and Citizenship
or AMST 2385W	Sex and Citizenship
or WGSS 2385	Sex and Citizenship
or WGSS 2385W	Sex and Citizenship
AMST 2410	Twentieth Century U.S. Immigration
or HIST 2410	Twentieth Century U.S. Immigration
AMST 2430	Capitalism and Culture
AMST 2440	The American City
or AMST 2440W	The American City
or HIST 2440	The American City
or HIST 2440W	The American City
AMST 2520	American Architecture I
AMST 2521	American Architecture II
AMST 2600	U.S. Popular Music and Culture
AMST 2610	Science, Technology, and Politics in Modern America
or AMST 2610W	Science, Technology, and Politics in Modern America
or HIST 2610	Science, Technology, and Politics in Modern America
or HIST 2610W	Science, Technology, and Politics in Modern America
AMST 2620	Human Mind and Artificial Intelligence
AMST 2630	Discovering the Mind
AMST 2710	The United States in the World
or HIST 2710	The United States in the World
AMST 2730	World War II in History and Memory
or AMST 2730W	World War II in History and Memory
or HIST 2730	World War II in History and Memory
or HIST 2730W	World War II in History and Memory
AMST 2750W	Latinos in the United States

or ANTH 2750 Latinos in the United States

or ANTH 2750W Latinos in the United States

AMST 3352 U.S. Women's History to 1865

or AMST 3352W U.S. Women's History to 1865

or HIST 3352 U.S. Women's History to 1865

or HIST 3352W U.S. Women's History to 1865

or WGSS 3352 U.S. Women's History to 1865

or WGSS 3352W U.S. Women's History to 1865

AMST 3600 Popular Music and Politics

ANTH 2750 Latinos in the United States

or ANTH 2750W Latinos in the United States

or AMST 2750W Latinos in the United States

ARAB 3105 Special Topics (Arabic Literature: Arabia to America) -- or IAFF 3188 (Arabic Literature: Arabia to America)

ARAB 3105 Special Topics (Readings: Contemporary Arabic Literature)

CAH 1090 Art History I: Art Now, Contemporary Perspectives in the Visual Arts

Any non-language Classical Studies (CLAS) course.

EALL 3811 Confucian Literature in East Asia

or REL 2811 Confucian Literature in East Asia

EALL 3814 Religion and Philosophy in East Asia

or EALL 3814W Religion and Philosophy in East Asia

or REL 2814 Religion and Philosophy in East Asia

ENGL 1050 Introduction to Literary Studies

ENGL 1300 The Bible as Literature

ENGL 1315 Literature and the Financial Imagination

ENGL 1320 Literature of the Americas

or ENGL 1320W Literature of the Americas

ENGL 1330 Myths of Britain

or ENGL 1330W Myths of Britain

or AMST 2380	Sexuality in U.S. History
or HIST 2380	Sexuality in U.S. History
WGSS 2385	Sex and Citizenship
or WGSS 2385W	Sex and Citizenship

or AMST 2385	Sex and Citizenship
or AMST 2385W	Sex and Citizenship
WGSS 3352	U.S. Women's History to 1865
or WGSS 3352W	U.S. Women's History to 1865
or AMST 3352	U.S. Women's History to 1865
or AMST 3352W	U.S. Women's History to 1865
or HIST 3352	U.S. Women's History to 1865
or HIST 3352W	U.S. Women's History to 1865
WGSS 3353	U.S. Women's History II
WGSS 3981	Women in Western Religion
or REL 2981	Women in Western Religion

Literature and film classes in the Departments of Classical and Near Eastern Languages and Civilizations; East Asian Languages and Literatures; English; and Romance, German, Slavic Languages and Literatures also fulfill this requirement.

Creative Arts—a maximum of 3 credits from the following:

Any Corcoran Studio Arts (CSA) course.

ENGL 1210	Introduction to Creative Writing
ENGL 2460	Fiction Writing
ENGL 2470	Poetry Writing
ENGL 2560	Intermediate Fiction Writing
ENGL 3390	Topics in Creative Writing

Non-ensemble performance study (MUS) courses, including:

MUS 1101	Elements of Music Theory
MUS 1102	Comprehensive Musicianship I
MUS 1106	Introduction to Musical Performance and Experience
MUS 2102	Comprehensive Musicianship II
MUS 2134	Composition
MUS 2173	Comprehensive Musicianship for Jazz
MUS 4184	Advanced Composition

Performance Study Courses (TRDA), including:

TRDA 1035	Theatre Production
TRDA 1151	Beginning/Intermediate Ballet

TRDA 1152	Beginning Modern/Postmodern Dance
TRDA 1153	Beginning/Intermediate Modern/Postmodern Dance
TRDA 1170 & TRDA 1171	Intermediate Modern/Postmodern Dance I and Intermediate Modern/Postmodern Dance II
TRDA 1214	Beginning Acting
TRDA 1330	Basics of Production Design
TRDA 2160	Intermediate Ballet
TRDA 2172	Intermediate/Advanced Modern/Postmodern Dance I
TRDA 2173	Intermediate/Advanced Modern/Postmodern Dance II
TRDA 2179	Contact Improvisation
TRDA 2180	Movement Improvisation/Performance
TRDA 2192	Repertory/Performance
TRDA 2193 & TRDA 2194	Dance Styles I and Dance Styles II
TRDA 2215	Intermediate Acting
TRDA 2250	Dramatic Writing
TRDA 2339	Theatre Practicum
TRDA 3174	Advanced Modern/Postmodern Dance I
TRDA 3175	Advanced Modern/Postmodern Dance II
TRDA 3182 & TRDA 3183	Dance Composition I and Dance Composition II
TRDA 3186	Embodied Kinesis for Dance
TRDA 3222	Topics in Advanced Acting
TRDA 3240	Introduction to Dramaturgy
TRDA 3250	Intermediate Dramatic Writing
TRDA 3331	Introduction to Lighting
TRDA 3332	Theatrical Makeup Design
TRDA 3333	Stage Management
TRDA 3335	Introduction to Scene Design
TRDA 3336	Introduction to Costuming

TRDA 4184	Choreography and Performance
TRDA 4275	Directing for the Theatre
TRDA 4338	Scene Painting
*Some MUS and TRDA courses may be repeated for credit. Consult course descriptions in this Bulletin for additional information. All courses must be taken for a letter grade to fulfill this requirement. Courses taken Pass/No Pass are not accepted.	
**Note that MUS 2661 is a prerequisite to MUS 2662.	

MAJOR REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs, Undergraduate Degree Requirements (p. 830).

A minimum grade of C- must be earned in all major requirement courses, to include the last course used to prove third-year proficiency in a modern regional language .

Major Requirements

Code	Title	Credits
Foundation (3 credits)		
IAFF 2091	East Asia-Past and Present	
Foreign Language (credits vary)		
Students must demonstrate third-year proficiency in a modern foreign languages (Chinese, Japanese, or Korean) by examination or coursework. Additional information regarding the Elliott School foreign language examinations is available from the academic advisor.		
Chinese		
One of the following options for beginning Chinese:		
Option one:		
CHIN 1001 & CHIN 1002	Beginning Chinese I and Beginning Chinese II	
Option two:		
CHIN 1011	Intensive Beginning Chinese	
And the following courses:		
CHIN 2003	Intermediate Chinese I	
CHIN 2004	Intermediate Chinese II	
CHIN 3105	Intermediate Chinese III	

CHIN 3106	Intermediate Chinese IV
Japanese	
One of the following options for beginning Japanese:	
Option one:	
JAPN 1001 & JAPN 1002	Beginning Japanese I and Beginning Japanese II
Option two:	
JAPN 1005	Intensive Beginning Japanese
And the following courses:	
JAPN 2003	Intermediate Japanese I
JAPN 2004	Intermediate Japanese II
JAPN 3105	Intermediate Japanese III
JAPN 3106	Intermediate Japanese IV
Korean	
KOR 1001	Beginning Korean I
KOR 1002	Beginning Korean II
KOR 2003	Intermediate Korean I
KOR 2004	Intermediate Korean II
KOR 3105	Intermediate Korean III
KOR 3106	Intermediate Korean IV

Regional Foundations (3 credits)

One course from the following in any region other than Asia.

Code	Title	Credits
Africa		
ANTH 3708	Anthropology of Africa	
ECON 2198	Special Topics in Economics - Regional (Economics of Africa)	
GEOG 3164	The Geography of Africa	
HIST 3501	Topics: Africa (African History Since 1880)	
HIST 3530	Women in Africa	
HIST 3540	West Africa to Independence	
IAFF 2093	Africa: Problems and Prospects	

IAFF 2190W	Special Topics (North Africa and the World)*
IAFF 2190W	Special Topics (Rising Africa and the World)
IAFF 3189	Special Topics in African Studies (Ethnic and Religious Conflict in Africa)
IAFF 3189	Special Topics in African Studies (International Relations in Africa)
IAFF 3189	Special Topics in African Studies (New African Security Frontier)
IAFF 3189	Special Topics in African Studies (Religion in Africa)
IAFF 3189	Special Topics in African Studies (Security Challenges in Africa)
IAFF 3189	Special Topics in African Studies (Transnational Justice in Africa)
IAFF 3189	Special Topics in African Studies (Women and Leadership in Africa)
IAFF 3190	Special Topics in International Affairs (Africa: Declassified)
IAFF 3190	Special Topics in International Affairs (China and Africa)
PSC 2381	Comparative Politics of Sub-Saharan Africa
PSC 2482	African International Politics
PSC 3192W	Proseminar: Political Science (Comparative Politics of Africa)
PSC 3192W	Proseminar: Political Science (Development Challenges in Africa)
PSC 3192W	Proseminar: Political Science (Government and Politics of Africa)
Asia (Students in the BA in Asian studies program must fulfill the Regional Foundations requirement using a course focused in a world region other than Asia.)	
ANTH 3703	Cultures of the Pacific
ANTH 3704	Cultures of Southeast Asia
ANTH 3705	Anthropology of East Asia
ANTH 3791	Topics in Regional Anthropology (Anthropology of South Asia)
ECON 2198	Special Topics in Economics - Regional (East Asian Economies)

GEOG 3165	Geography of South Asia
HIST 3640	History of Southeast Asia
HIST 3650	Modern South Asia, 1750-Present
IAFF 2091	East Asia-Past and Present
IAFF 3186	Special Topics in Asian Studies (Asian Order and Community Building)
IAFF 3186	Special Topics in Asian Studies (Current Events in East Asia)
IAFF 3186	Special Topics in Asian Studies (Development Issues in Southeast Asia)
IAFF 3186	Special Topics in Asian Studies (East Asian Security)
IAFF 3186	Special Topics in Asian Studies (History and Politics of South Asia)
IAFF 3186	Special Topics in Asian Studies (Indo-Pacific Security Challenges)
IAFF 3186	Special Topics in Asian Studies (International Relations of South Asia)
IAFF 3186	Special Topics in Asian Studies (Memory and Reconciliation: Asia)
IAFF 3186	Special Topics in Asian Studies (Politics and Conflict of South Asia)
IAFF 3190	Special Topics in International Affairs (Human Rights and Democracy in Southeast Asia)
PSC 2369	Comparative Politics of South Asia
PSC 2373	Comparative Politics of Southeast Asia
PSC 2475	International Relations of East Asia
PSC 3192W	Proseminar: Political Science (Politics and Protest in East Asia)
PSC 3192W	Proseminar: Political Science (Protest and Participation in East Asia)
Europe and Eurasia	
ECON 2199	Special Topics in Economics (Economics of the EU)
HIST 1121	The War of Ideas in European and International History, 1750-Present
HIST 2125	Twentieth-Century Europe
HIST 3126	European Integration: A History

HIST 3178	The Making of the Modern Balkans
IAFF 2092	Russia and Eastern Europe: An Introduction
IAFF 2094	Europe: International and Domestic Interactions
IAFF 3185	Special Topics in European and Eurasian Studies (Nationalism in Russia and Eurasia)
IAFF 3185	Special Topics in European and Eurasian Studies (The European Union)
IAFF 3185	Special Topics in European and Eurasian Studies (The European Union and Russia)
IAFF 3190	Special Topics in International Affairs (European Economies and Crisis of Integration)
IAFF 4191W	Research Seminar (Europe)
PSC 2330	Comparative Politics of Western Europe
PSC 2331	Comparative Politics of Central and Eastern Europe
PSC 2332	European Integration
PSC 2994	Special Topics in International Relations (International Politics of Central and Eastern Europe)
Latin America (Students in the BA in Latin American and hemispheric studies program must fulfill the Regional Foundations requirement using a course focused in a world region other than Latin America.)	
ANTH 3702	Anthropology of Latin America
ECON 2185	Economic History and Problems of Latin America
GEOG 3161	Geography of Latin America
HIST 3701	Topics in Latin American History (Latin America and the World Since 1820)
HIST 3710	History of Latin America I
HIST 3711	History of Latin America II
IAFF 2090	Latin America: Problems and Promise
IAFF 3177	Political Economy of Latin America
IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Economic and Social Development of Latin America)

IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Latin American Migration)
IAFF 3194W	Latin America's Violent Peace
PSC 2383	Comparative Politics of Latin America
PSC 2484	International Relations of Latin America
Middle East (Students in the BA in Middle East studies program must fulfill the Regional Foundations requirement using a course focused in a world region other than the Middle East.)	
ANTH 3707	Anthropology of the Middle East
GEOG 3154	Geography of the Middle East and North Africa
HIST 3801	Topics in Middle Eastern History (Gender and the Middle East)
HIST 3810	History of the Middle East to 1800
HIST 3811	The Emergence of the Modern Middle East
IAFF 2095	The Middle East in International Affairs
IAFF 2190W	Special Topics (Arab Politics)
IAFF 2190W	Special Topics (Challenges and Change in the Middle East)
IAFF 2190W	Special Topics (North Africa and the World)
IAFF 2190W	Special Topics (Politics and Culture in the Middle East)
IAFF 3188	Special Topics in Middle East Studies (The Middle East Since WWII)
IAFF 3188	Special Topics in Middle East Studies (Militaries and Politics in the Middle East)
IAFF 3188	Special Topics in Middle East Studies (Political Islam)
IAFF 3188	Special Topics in Middle East Studies (Security Issues in the Greater Middle East)
IAFF 3188	Special Topics in Middle East Studies (U.S. Policy in the Persian Gulf)
IAFF 4191	Research Seminar (Political Islam)
PSC 2377	Comparative Politics of the Middle East

PSC 2478 International Relations of the Middle East

*IAFF 2190W (North Africa and the World) is not approved as a Regional Foundations course for students in the Middle East Studies program due to the degree of overlap between issues in North Africa and the Middle East.

Code	Title	Credits
------	-------	---------

Research Methods (3 credits)

One course pertaining to qualitative or quantitative social science research methods from the following:

ANTH 3531	Methods in Sociocultural Anthropology
-----------	---------------------------------------

ECON 2123	Introduction to Econometrics
-----------	------------------------------

GEOG 2104	Introduction to Cartography and GIS
-----------	-------------------------------------

IAFF 2101	International Affairs Research Methods
-----------	--

IAFF 2190	Special Topics (Political Risk Analysis)
-----------	--

IAFF 3190	Special Topics in International Affairs (Qualitative Research Methods)
-----------	--

PSC 2101	Scope and Methods of Political Science
----------	--

PSC 2102	Visualizing and Modeling Politics
----------	-----------------------------------

PSYC 2101	Research Methods in Psychology
-----------	--------------------------------

PUBH 3131	Epidemiology: Measuring Health and Disease
-----------	--

PUBH 3199	Topics in Public Health (Qualitative Research Methods)
-----------	--

SOC 2101	Social Research Methods
----------	-------------------------

SOC 2111	Field Research
----------	----------------

STAT 1051	Introduction to Business and Economic Statistics *
-----------	--

STAT 1053	Introduction to Statistics in Social Science *
-----------	--

STAT 1111	Business and Economic Statistics I *
-----------	--------------------------------------

STAT 1127	Statistics for the Biological Sciences
-----------	--

STAT 2112	Business and Economic Statistics II
-----------	-------------------------------------

STAT 2183	Intermediate Statistics Lab/Packages
-----------	--------------------------------------

or STAT 2183W	Intermediate Statistical Laboratory: Statistical Computing Packages
---------------	---

*Credit for only one of the following courses may be applied toward a degree: STAT 1051, STAT 1053, STAT 1111, or STAT 1127.

STAT courses may not be double-counted between the Math requirement and the research methods requirement.

Code	Title	Credits
------	-------	---------

In the categories below, additional Asia-related courses may be approved by the Program Director.

Asian Literature (3 credits)

One course from the following:

CHIN 3111	Chinese Literature in Translation I
-----------	-------------------------------------

CHIN 3112	Chinese Literature in Translation II
-----------	--------------------------------------

JAPN 3111	Japanese Literature in Translation I
-----------	--------------------------------------

JAPN 3112	Japanese Literature in Translation II
-----------	---------------------------------------

KOR 3111	Korean Literature in Translation
----------	----------------------------------

KOR 3112	Korean Literature in Translation
----------	----------------------------------

Multi-disciplinary Core (18 credits)

The following lists are not exhaustive, and new courses may be added at any time.

History and Culture—Three courses (9 credits) from the following:

AH 2190	East Asian Art
---------	----------------

AH 2191	South Asian Art
---------	-----------------

AH 2192	Art of Southeast Asia
---------	-----------------------

ANTH 3703	Cultures of the Pacific
-----------	-------------------------

ANTH 3704	Cultures of Southeast Asia
-----------	----------------------------

ANTH 3705	Anthropology of East Asia
-----------	---------------------------

ANTH 3709	Japanese Culture Through Film
-----------	-------------------------------

or JAPN 3162	Japanese Culture Through Film
--------------	-------------------------------

CHIN 3136W	Chinese Women in Myth, Literature, and Film (same as WGSS 3136 and WGSS 3136W)
------------	--

CHIN 3162	Chinese Culture Through Film
-----------	------------------------------

EALL 3831W	Introduction to Daoism
------------	------------------------

or REL 3831W	Introduction to Daoism
--------------	------------------------

ENGL 3965	Topics in Asian American Cultural Studies	REL 2562	Mythologies of India
FA 1075	East Asian Calligraphy	REL 2601	Buddhism
HIST 2305W	Majors' Introductory Seminar: United States (The Cold War in Asia)	REL 2811	Confucian Literature in East Asia
HIST 3001	Special Topics (Modern Southeast Asian History)	REL 2814	Religion and Philosophy in East Asia
HIST 3001	Special Topics (The Cold War in Asia)	REL 3405	Shi'ite Islam
HIST 3001	Special Topics (The Korean War)	REL 3481	Women in Islam

HIST 3611	History of Modern China	REL 3990	Selected Topics in Religion (Shamanism in Theory)
HIST 3614W	Writing Modern Chinese History	WGSS 3136	Chinese Women in Myth, Literature, and Film (same as CHIN 3136W)
HIST 3615	History of Chinese Communism	or WGSS 3136W	Chinese Women in Myth, Literature, and Film
HIST 3621	History of Modern Japan	Political Science and Geography—Two courses (6 credits) from the following:	
HIST 3640	History of Southeast Asia	GEOG 3165	Geography of South Asia
HIST 3650	Modern South Asia, 1750-Present	IAFF 2190W	Special Topics (U.S.-Asia: Critical Issues)
IAFF 3186	Special Topics in Asian Studies (Memory and Reconciliation Asia)	IAFF 3182	Special Topics in Foreign Policy (China's Rise and Implications)
IAFF 3186	Special Topics in Asian Studies (topic: North Korean Society and Culture. Same as KOR 4190)	IAFF 3186	Special Topics in Asian Studies (Indo-Pacific Security Challenges)
JAPN 3162	Japanese Culture Through Film	IAFF 3186	Special Topics in Asian Studies (Politics and Conflict South Asia)
or ANTH 3709	Japanese Culture Through Film	IAFF 3186	Special Topics in Asian Studies (Taiwan: Current Challenges and Future Directions)
KOR 3162	Korean Culture through Film	IAFF 3186	Special Topics in Asian Studies (U.S.-China Relations)
KOR 4190	North Korean Society and Culture (Same as IAFF 3186: North Korean Society and Culture)	IAFF 3190	Special Topics in International Affairs (China and Africa)
REL 2401	Islam	PSC 2368	Politics in the Two Koreas
REL 2501	Hinduism	PSC 2369	Comparative Politics of South Asia

PSC 2370	Comparative Politics of China and Northeast Asia
PSC 2371	Politics and Foreign Policy of China
PSC 2373	Comparative Politics of Southeast Asia
PSC 2374	Politics and Foreign Policy of Japan
PSC 2475	International Relations of East Asia
PSC 3192W	Proseminar: Political Science (Chinese Foreign Policy)
PSC 3192W	Proseminar: Political Science (Post-Conflict Vietnam)
Economics and Development—One course (3 credits) from the following:	
ECON 2151	Economic Development
or ECON 2151W	Economic Development
ECON 2169	Introduction to the Economy of China
ECON 2170	Introduction to the Economy of Japan
ECON 2198	Special Topics in Economics - Regional (East Asian Economies)
IAFF 3186	Special Topics in Asian Studies (Development Issues in SE Asia)

Related Coursework (9 credits)

Three courses related to Asia from any discipline, including International Affairs (IAFF), selected with the approval of the program director.

Study Abroad

Students are encouraged to study in Asia through one of GW's formal partnerships with a regional university or an approved self-designed study abroad program.

BACHELOR OF ARTS WITH A MAJOR IN INTERNATIONAL AFFAIRS

GENERAL REQUIREMENTS

General requirements

Elliott School bachelor's degrees engage students with global issues through multidisciplinary and interdisciplinary approaches. Students begin their studies in the first year with foundational courses in political science, economics, history, and anthropology or geography. They supplement these courses with others in the traditional liberal arts categories of writing, natural or physical science, mathematics or statistics,

and the humanities/creative arts, plus two writing in the disciplines courses. Foreign language study also is emphasized early in each program to enable students to satisfy the third-year language proficiency requirement of the bachelor's degree in a timely manner.

Introduction to the major

Code	Title	Credits
------	-------	---------

Prerequisite core (19 credits)

Required

The following courses must be taken in the first year. With the exception of IAFF 1001 (fall), ECON 1011 (fall) and ECON 1012 (spring), courses can be taken in fall or spring. IAFF 1001 is not required for internal or external transfer students.

IAFF 1001	First-Year Experience
IAFF 1005	Introduction to International Affairs
ECON 1011	Principles of Economics I
ECON 1012	Principles of Economics II
HIST 1011	World History, 1500-Present
PSC 1001	Introduction to Comparative Politics

One of the following (not required in the first year):

ANTH 1002	Sociocultural Anthropology
ANTH 1004	Language in Culture and Society
GEOG 1001	Introduction to Human Geography

With advisor approval, a student may select another introductory social science course if s/he can demonstrate why it is relevant to the student's academic pursuits. An example of a course that might be accepted is GEOG 1003.

Supporting courses in the liberal arts

Code	Title	Credits
------	-------	---------

Writing (credits vary)

Writing requirements are established by the University Writing Program. Students must complete UW 1020 in their first year before enrolling in a Writing in the Discipline (WID) course for WID credit. The two required WID courses should be taken in the student's major, minor, or a related field, and must be completed in separate semesters to receive WID credit. WID courses are designated in this Bulletin with a "W" appended to the course number, e.g., HIST 2340W.

Required

UW 1020	University Writing
---------	--------------------

Two WID courses

Mathematics or statistics (3 credits)

MATH courses numbered 1051 and above require a placement test. Credit for only one of the following MATH courses may be applied toward a degree: MATH 1221, MATH 1231, or MATH 1252. Credit for only one of the following STAT courses may be applied toward a degree: STAT 1051, STAT 1053, STAT 1111, or STAT 1127. STAT courses may not be double-counted between the Mathematics requirement and the Research Methods requirement (see "Major Requirements.")

One of the following:

MATH 1007 Mathematics and Politics

MATH 1008 History of Mathematics

MATH 1009 Mathematical Ideas I

MATH 1010 Mathematical Ideas II

MATH 1051 Finite Mathematics for the Social and Management Sciences

MATH 1221 Calculus with Precalculus II

MATH 1231 Single-Variable Calculus I

MATH 1232 Single-Variable Calculus II

MATH 1252 Calculus for the Social and Management Sciences

MATH 2233 Multivariable Calculus

STAT 1051 Introduction to Business and Economic Statistics

STAT 1053 Introduction to Statistics in Social Science

STAT 1111 Business and Economic Statistics I

STAT 1127 Statistics for the Biological Sciences

Science (3 to 4 credits), lab required

One of the following:

ANTH 1001 Biological Anthropology

ANTH 3412 Hominin Evolution

ASTR 1001 Stars, Planets, and Life in the Universe

ASTR 1002 Origins of the Cosmos

BISC 1005 The Biology of Nutrition and Health

BISC 1006 The Ecology and Evolution of Organisms

BISC 1007 Food, Nutrition, and Service

BISC 1008 Understanding Organisms through Service Learning

BISC 1111 Introductory Biology: Cells and Molecules

BISC 1112 Introductory Biology: The Biology of Organisms

CHEM 1003 Contemporary Science for Nonscience Majors

CHEM 1004 Contemporary Science for Nonscience Majors

CHEM 1111 General Chemistry I

CHEM 1112 General Chemistry II

GEOG 1002 Introduction to Physical Geography

GEOL 1001 Physical Geology

GEOL 1002 Historical Geology

GEOL 1005 Environmental Geology

HONR 1033 Honors Seminar: Scientific Reasoning and Discovery

HONR 1034 Honors Seminar: Scientific Reasoning and Discovery

PHYS 1003 Physics for Future Presidents

PHYS 1007 Music and Physics

PHYS 1011 General Physics I

PHYS 1012 General Physics II

PHYS 1021 University Physics I

PHYS 1022 University Physics II

PHYS 1025 University Physics I with Biological Applications

PHYS 1026 University Physics II with Biological Applications

Humanities/creative arts (9 credits)*

This requirement can be satisfied by completing 9 credits in humanities courses, or 6 credits in humanities courses and 3 credits in creative arts courses.

Humanities—two or three of the following:

Any Art History (AH) course except AH 4199.	
AMST 1160	Race, Gender, and Law

TRDA 3336	Introduction to Costuming
TRDA 4184	Choreography and Performance
TRDA 4275	Directing for the Theatre
TRDA 4338	Scene Painting

*Some MUS and TRDA courses may be repeated for credit. Consult course descriptions in this Bulletin for additional information. All courses must be taken for a letter grade to fulfill this requirement. Courses taken Pass/No Pass are not accepted.

**Note that MUS 2661 is a prerequisite to MUS 2662.

MAJOR REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs, Undergraduate Programs (p. 830).

Advanced Fundamentals

Advanced fundamentals build on the introduction to the major (p. 853) and continue the student's education in the basic skills of international affairs. Fundamentals focus on central disciplines, such as economics, history, and political science, and relevant disciplines, such as anthropology and geography. In addition, students gain a broader understanding of at least two regions of the world outside of the United States.

A minimum grade of C- must be earned in all international affairs major courses. This includes advanced fundamentals, regional foundations, concentrations, and foreign language (the last course used to prove third-year proficiency.)

With the exception of WID courses, courses may not be double-counted between any international affairs requirements.

Advanced fundamental courses are divided into the following areas. Course options for each are listed below.

Research methods (3 credits)

International economics (3 or 6 credits)

Historical analysis: U.S. foreign policy (3 credits)

International and comparative politics (3 credits)

Anthropology or geography (3 credits)

Code	Title	Credits
Research Methods (3 credits)		
One course pertaining to qualitative or quantitative social science research methods from the following:		
ANTH 3531	Methods in Sociocultural Anthropology	
ECON 2123	Introduction to Econometrics	
GEOG 2104	Introduction to Cartography and GIS	
IAFF 2101	International Affairs Research Methods	
IAFF 2190	Special Topics (Political Risk Analysis)	
IAFF 3190	Special Topics in International Affairs (Qualitative Research Methods)	
PSC 2101	Scope and Methods of Political Science	
PSC 2102	Visualizing and Modeling Politics	
PSYC 2101	Research Methods in Psychology	
PUBH 3131	Epidemiology: Measuring Health and Disease	
PUBH 3199	Topics in Public Health (Qualitative Research Methods)	
SOC 2101	Social Research Methods	
SOC 2111	Field Research	
STAT 1051	Introduction to Business and Economic Statistics *	
STAT 1053	Introduction to Statistics in Social Science *	
STAT 1111	Business and Economic Statistics I *	

STAT 1127	Statistics for the Biological Sciences
STAT 2112	Business and Economic Statistics II
STAT 2183	Intermediate Statistics Lab/Packages
or STAT 2183W	Intermediate Statistical Laboratory: Statistical Computing Packages
*Credit for only one of the following courses may be applied toward a degree: STAT 1051, STAT 1053, STAT 1111, or STAT 1127.	
STAT courses may not be double-counted between the Math requirement and the research methods requirement.	

International Economics (3 or 6 credits)

One or two of the following courses pertaining to the theory of international economics:

Code	Title	Credits
One or two courses pertaining to the theory of international economics, selected from one of the following three options:		
Option one (3 credits):		
ECON 2180	Survey of International Economics	
Option two (6 credits):		
ECON 2181 & ECON 2182	International Trade Theory and Policy and International Macroeconomic Theory and Policy	
Option three (6 credits):		
ECON 2182 & ECON 3181	International Macroeconomic Theory and Policy and International Trade Theory	
*Students pursuing the international economics concentration must select either option two or option three.		
The following courses are required as prerequisites for ECON 3181: ECON 2101 or ECON 2103; and MATH 1221 or MATH 1231 or MATH 1252.		
Credit cannot be earned for both ECON 2181 and ECON 3181.		

Historical Analysis: U.S. Foreign Policy (3 credits)

One of the following courses pertaining to the history of the U.S. approach to contemporary international affairs:

Code	Title	Credits
HIST 2340	U.S. Diplomatic History	
HIST 3035	The United States and the Wars in Indochina, 1945-1975	
HIST 3332	History of American Foreign Policy Since World War II (I)	
HIST 3333	History of American Foreign Policy Since World War II (II)	
IAFF 3180W	Special Topics in Security Policy (U.S. Grand Strategy)	

International and Comparative Politics (3 credits)

One of the following courses pertaining to international political issues and theories from either an international relations or comparative politics perspective:

Code	Title	Credits
IAFF 2040	Basic Topics in International Affairs (topic: Ethics in International Affairs. Same as PSC 2990: Ethics in International Affairs)	
IAFF 2444	International Law	
or PSC 2444	Public International Law	
IAFF 3180W	Special Topics in Security Policy (International Politics and Security Policy)	
IAFF 3190	Special Topics in International Affairs (Issues in Contemporary Diplomacy and National Security)	
IAFF 3190	Special Topics in International Affairs (Global Governance)	
IAFF 4191W	Research Seminar (International Politics and Security Policy)	
PSC 2334	Global Perspectives on Democracy	
PSC 2336	State-Society Relations in the Developing World	
PSC 2337	Development Politics	
PSC 2338	Nationalism	
PSC 2339	Comparative Political Economy	
PSC 2439	International Political Economy	
PSC 2440	Theories of International Politics	

PSC 2442	International Organizations
PSC 2444	Public International Law
or IAFF 2444	International Law
PSC 2446	U.S. Foreign Policy
PSC 2449	International Security Politics
PSC 2990	Selected Topics (topic: Ethics in International Affairs. Same as IAFF 2040: Ethics in International Affairs)
PSC 2991	Special Topics in Political Thought (Global Justice)
PSC 2994	Special Topics in International Relations (U.S. Foreign Policy)

Anthropology or Geography (3 credits)

One of the following courses in anthropology or geography relevant to international affairs. Many of these courses have lower-level prerequisites as detailed in course descriptions in this Bulletin.

Code	Title	Credits
One course from the following:		
ANTH 2501	The Anthropology of Gender: Cross-Cultural Perspectives	
ANTH 2506	Religion, Myth, and Magic	
ANTH 3501	Anthropology of Development	
or IAFF 3501	International Development Theory, Policy, and Practice	
ANTH 3502	Cultural Ecology	
ANTH 3503	Psychological Anthropology	
ANTH 3504	Illness, Healing, and Culture	
ANTH 3506	Politics, Ethnicity, and Nationalism	
ANTH 3507	Kinship, Family, and Community	
ANTH 3508	Art and Culture	
ANTH 3513	Anthropology of Human Rights	
or IAFF 3513	Human Rights and Ethics	
ANTH 3601	Language, Culture, and Cognition	

ANTH 3691 Special Topics in Linguistic Anthropology (topic: Anthropology of Religion. Same as REL 3990: Anthropology of Religion)

IAFF 3501	International Development Theory, Policy, and Practice
or ANTH 3501	Anthropology of Development
IAFF 3513	Human Rights and Ethics
or ANTH 3513	Anthropology of Human Rights
GEOG 2120	World Regional Geography
GEOG 2125	Transportation Systems and Networks
GEOG 2127	Population Geography
GEOG 2133	People, Land, and Food
GEOG 2134	Energy Resources
GEOG 2136	Water Resources
GEOG 2137	Environmental Hazards
GEOG 2141	Cities in the Developing World
GEOG 2147	Military Geography
GEOG 2148	Economic Geography
GEOG 3132	Environmental Quality and Management
GEOG 3143	Urban Sustainability
GEOG 3145	Cultural Geography
GEOG 3146	Political Geography
GEOG 3810	Planning Cities
REL 3990	Selected Topics in Religion (topic: Anthropology of Religion. Same as ANTH 3691: Anthropology of Religion)

Regional Foundations

Students take two courses from the following to gain an understanding of two regions of the world outside of the United States. These courses must be taken in two different regions.

Code	Title	Credits
Africa		
ANTH 3708	Anthropology of Africa	

ECON 2198	Special Topics in Economics - Regional (Economics of Africa)
GEOG 3164	The Geography of Africa
HIST 3501	Topics: Africa (African History Since 1880)
HIST 3530	Women in Africa
HIST 3540	West Africa to Independence
IAFF 2093	Africa: Problems and Prospects
IAFF 2190W	Special Topics (North Africa and the World) *
IAFF 2190W	Special Topics (Rising Africa and the World)
IAFF 3189	Special Topics in African Studies (Ethnic and Religious Conflict in Africa)
IAFF 3189	Special Topics in African Studies (International Relations in Africa)
IAFF 3189	Special Topics in African Studies (New African Security Frontier)
IAFF 3189	Special Topics in African Studies (Religion in Africa)
IAFF 3189	Special Topics in African Studies (Security Challenges in Africa)
IAFF 3189	Special Topics in African Studies (Transnational Justice in Africa)
IAFF 3189	Special Topics in African Studies (Women and Leadership in Africa)
IAFF 3190	Special Topics in International Affairs (Africa: Declassified)

HIST 3178	The Making of the Modern Balkans
IAFF 2092	Russia and Eastern Europe: An Introduction
IAFF 2094	Europe: International and Domestic Interactions
IAFF 3185	Special Topics in European and Eurasian Studies (Nationalism in Russia and Eurasia)
IAFF 3185	Special Topics in European and Eurasian Studies (The European Union)
IAFF 3185	Special Topics in European and Eurasian Studies (The European Union and Russia)
IAFF 3190	Special Topics in International Affairs (European Economies and Crisis of Integration)
IAFF 4191W	Research Seminar (Europe)
PSC 2330	Comparative Politics of Western Europe
PSC 2331	Comparative Politics of Central and Eastern Europe
PSC 2332	European Integration
PSC 2994	Special Topics in International Relations (International Politics of Central and Eastern Europe)
Latin America (Students in the BA in Latin American and hemispheric studies program must fulfill the Regional Foundations requirement using a course focused in a world region other than Latin America.)	
ANTH 3702	Anthropology of Latin America
ECON 2185	Economic History and Problems of Latin America
GEOG 3161	Geography of Latin America

HIST 3701	Topics in Latin American History (Latin America and the World Since 1820)
HIST 3710	History of Latin America I
HIST 3711	History of Latin America II
IAFF 2090	Latin America: Problems and Promise
IAFF 3177	Political Economy of Latin America
IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Economic and Social Development of Latin America)
IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Latin American Migration)
IAFF 3194W	Latin America's Violent Peace
PSC 2383	Comparative Politics of Latin America
PSC 2484	International Relations of Latin America
Middle East (Students in the BA in Middle East studies program must fulfill the Regional Foundations requirement using a course focused in a world region other than the Middle East.)	
ANTH 3707	Anthropology of the Middle East
GEOG 3154	Geography of the Middle East and North Africa
HIST 3801	Topics in Middle Eastern History (Gender and the Middle East)
HIST 3810	History of the Middle East to 1800
HIST 3811	The Emergence of the Modern Middle East
IAFF 2095	The Middle East in International Affairs
IAFF 2190W	Special Topics (Arab Politics)
IAFF 2190W	Special Topics (Challenges and Change in the Middle East)
IAFF 2190W	Special Topics (North Africa and the World)
IAFF 2190W	Special Topics (Politics and Culture in the Middle East)
IAFF 3188	Special Topics in Middle East Studies (The Middle East Since WWII)
IAFF 3188	Special Topics in Middle East Studies (Military and Politics in the Middle East)

IAFF 3188	Special Topics in Middle East Studies (Political Islam)
IAFF 3188	Special Topics in Middle East Studies (Security Issues in the Greater Middle East)
IAFF 3188	Special Topics in Middle East Studies (U.S. Policy in the Persian Gulf)
IAFF 4191	Research Seminar (Political Islam)
PSC 2377	Comparative Politics of the Middle East
PSC 2478	International Relations of the Middle East

*IAFF 2190W (North Africa and the World) is not approved as a Regional Foundations course for students in the Middle East Studies program due to the degree of overlap between issues in North Africa and the Middle East.

Concentration

All students in the BA in international affairs program must complete either a functional or regional concentration, which are listed below.

To fulfill the concentration requirement, students complete five courses (15 credits) related to their chosen functional or regional theme. These courses must be taken in at least two different academic departments. Students must declare a concentration no later than the end of the second semester of their sophomore year by completing the Concentration Declaration Form (<https://form.jotform.us/ESIA/concentration-declaration/>). With the exception of WID courses, courses may not be double-counted between any international affairs requirements. A minimum grade of C- must be earned in all concentration courses.

Functional concentrations

- Comparative Political, Economic, and Social Systems (p. 871)
- Conflict Resolution (p. 873)
- Contemporary Cultures and Societies (p. 876)
- Global Public Health (p. 879)
- International Development (p. 880)
- International Economics (p. 883)
- International Environmental Studies (p. 885)
- International Politics (p. 886)
- Security Policy (p. 892)

Regional concentrations

- Africa (p. 868)
- Asia (p. 869)
- Europe and Eurasia (p. 878)

- Latin America (p. 890)
- Middle East (p. 891)

Foreign language requirement

Students must demonstrate third-year proficiency in a modern foreign language by examination or coursework. Additional information regarding the Elliott School foreign language examinations is available from the academic advisor. This requirement is waived automatically for students who were required to take the TOEFL or IELTS examination as part of GW's admissions process.

Portuguese

Portuguese courses offerings are dependent on faculty availability.

Option one:

PORT 1001	Basic Portuguese I
PORT 1002	Basic Portuguese II
PORT 1003	Intermediate Portuguese I
PORT 1004	Intermediate Portuguese II
PORT 2005	Composition and Conversation
PORT 2006	Applied Portuguese Grammar

or

Option two:

PORT 1012	Intensive Basic Portuguese
PORT 1003	Intermediate Portuguese I
PORT 1004	Intermediate Portuguese II
PORT 2005	Composition and Conversation
PORT 2006	Applied Portuguese Grammar

Code	Title	Credits
------	-------	---------

Russian

Option one:

SLAV 1001	First-Year Russian I
SLAV 1002	First-Year Russian II
SLAV 1003	Second-Year Russian I
SLAV 1004	Second-Year Russian II

and one of the following sequences:

SLAV 2005 & SLAV 2006	Intermediate Russian I and Intermediate Russian I
SLAV 1013 & SLAV 1014	Russian for Heritage Speakers I and Russian for Heritage Speakers II
SLAV 2015 & SLAV 2016	Readings in the Russian Press I and Readings in the Russian Press II

or

Option two:

SLAV 1012	Intensive Basic Russian I
SLAV 1034	Intensive Basic Russian II

and one of the following sequences:

SLAV 2005 & SLAV 2006	Intermediate Russian I and Intermediate Russian I
SLAV 1013 & SLAV 1014	Russian for Heritage Speakers I and Russian for Heritage Speakers II
SLAV 2015 & SLAV 2016	Readings in the Russian Press I and Readings in the Russian Press II

Spanish

Option one:

SPAN 1011	Intensive Beginning Spanish: the Spanish-speaking world
or SPAN 1012	Intensive Elementary Spanish: the Spanish-speaking world
SPAN 1013	Intermediate Spanish I: the Spanish-speaking world
SPAN 1014	Intermediate Spanish II: the Spanish-speaking world

SPAN 2005	Advanced Spanish I
SPAN 2006	Advanced Spanish II
or	
Option two:	
SPAN 1012	Intensive Elementary Spanish: the Spanish-speaking world
SPAN 1034	Intensive Intermediate Spanish
SPAN 2056	Intensive Advanced Spanish
or	
Option three:	
SPAN 1013	Intermediate Spanish I: the Spanish-speaking world
SPAN 1014	Intermediate Spanish II: the Spanish-speaking world
SPAN 2026	Advanced Spanish for Heritage Learners *
or	
Option four:	
SPAN 1034	Intensive Intermediate Spanish
or SPAN 1134	Intensive Intermediate Spanish for Heritage Learners
SPAN 2026	Advanced Spanish for Heritage Learners *
or	
Option five:	
SPAN 1013	Intermediate Spanish I: the Spanish-speaking world
SPAN 1014	Intermediate Spanish II: the Spanish-speaking world
SPAN 2005	Advanced Spanish I
SPAN 2006	Advanced Spanish II
or SPAN 2026	Advanced Spanish for Heritage Learners
*Spanish language options three and four require an interview prior to enrolling in SPAN 2026. Students should contact the Department of Romance, German, and Slavic Languages and Literatures for additional information about these options.	

CONCENTRATIONS

Concentrations

All students in the BA in international affairs program must complete either a functional or regional concentration, which are listed below. Students in the BS in international affairs program may complete one of these concentrations or they may take 15 credits in courses that count toward a second major in a STEM-related discipline.

To fulfill the concentration requirement, students complete five courses (15 credits) relating to their chosen functional or regional theme. These courses must be taken in at least two different academic departments. Students must declare a concentration no later than the end of the second semester of their sophomore year by completing the Concentration Declaration Form (<https://form.jotform.us/ESIA/concentration-declaration/>). With the exception of WID courses, courses may not be double-counted between any international affairs requirements. A minimum grade of C- must be earned in all concentration courses.

Functional concentrations

- Comparative Political, Economic, and Social Systems (p. 871)
- Conflict Resolution (p. 873)
- Contemporary Cultures and Societies (p. 876)
- Global Public Health (p. 879)
- International Development (p. 880)
- International Economics (p. 883)
- International Environmental Studies (p. 885)
- International Politics (p. 886)
- Security Policy (p. 892)

Regional concentrations

- Africa (p. 868)
- Asia (p. 869)
- Europe and Eurasia (p. 878)
- Latin America (p. 890)
- Middle East (p. 891)

BACHELOR OF ARTS OR BACHELOR OF SCIENCE WITH A MAJOR IN INTERNATIONAL AFFAIRS, AFRICA CONCENTRATION

Requirements for the concentration

In addition to specific topics listed under IAFF 2190W, the IAFF 3100-range, and IAFF 4191, other topics relevant to the concentration may be approved by the academic advisor.

If a student wishes to take any course not listed here, prior approval of the academic advisor is required.

Code	Title	Credits
Required		
Five courses from the following. At least two courses must be from Group A and at least two courses must be from Group B.		
Group A:		
ANTH 3708	Anthropology of Africa	
ANTH 3801	African Roots from Australopithecus to Zimbabwe	
ECON 2151	Economic Development	
ECON 2198	Special Topics in Economics - Regional (Economics of Africa)	
GEOG 3154	Geography of the Middle East and North Africa	
GEOG 3164	The Geography of Africa

		REL 3990	Selected Topics in Religion (topic: Christianity and Islam in East Asia. Same as IAFF 3186: Christianity and Islam in East Asia)
		SOC 2175	Sociology of Sex and Gender
		SOC 2179	Race and Minority Relations
		SPAN 3200	Bilingualism in the Spanish-Speaking World
		WGSS 2120	Introduction to Women's, Gender, and Sexuality Studies

BACHELOR OF ARTS OR BACHELOR OF SCIENCE WITH A MAJOR IN INTERNATIONAL AFFAIRS, EUROPE AND EURASIA CONCENTRATION

Requirements for the concentration

In addition to specific topics listed under IAFF 2190W, the IAFF 3100-range, and IAFF 4191, other topics relevant to the concentration may be approved by the academic advisor.

If a student wishes to take any course not listed, prior approval of the academic advisor is required.

Code	Title	Credits
Required		
Five courses from the following. At least two courses must be from Group A and at least two courses from Group B.		
Group A:		
ECON 2151	Economic Development	
ECON 2199	Special Topics in Economics (Economics of the EU)	
GER 3183	Berlin Before and After the Wall	
GER 3188	The Lives of East Germans	
GER 3189	Dealing with the Communist Past in Germany and Eastern Europe	
IAFF 2092	Russia and Eastern Europe: An Introduction	
IAFF 2094	Europe: International and Domestic Interactions	
IAFF 3180	Special Topics in Security Policy (Nato's Strategic Challenges)	
IAFF 3185	Special Topics in European and Eurasian Studies	
IAFF 3186	Special Topics in Asian Studies (Central Asia Between East and West)	
IAFF 3190	Special Topics in International Affairs (Europe Economies and Crisis of Integration)	
IAFF 3190	Special Topics in International Affairs (History of Paris)	

IAFF 3190	Special Topics in International Affairs (topic: Holocaust Memory. Same as JSTD 2002: Holocaust Memory)
IAFF 4191	Research Seminar (Europe)
JSTD 2002	Topics in Judaic Studies: Modern (topic: Holocaust Memory. Same as IAFF 3190: Holocaust Memory)
PSC 2105	Major Issues of Western Political Thought I
PSC 2106	Major Issues of Western Political Thought II
PSC 2330	Comparative Politics of Western Europe
PSC 2331	Comparative Politics of Central and Eastern Europe
PSC 2332	European Integration
PSC 2337	Development Politics
PSC 2366	Russian Politics
PSC 2461	European-Atlantic Relations
PSC 2468	Post-Soviet Foreign Policy
PSC 2994	Special Topics in International Relations (International Politics of Central and Eastern Europe)
PSC 3192W	Proseminar: Political Science (British Politics)
PSC 3192W	Proseminar: Political Science (Russian Politics: Comparative Perspective)
Group B:	
AH 2145	History of Decorative Arts: European Heritage
AH 3140	European Art of the Eighteenth Century
AH 3141	European Art of the Early Nineteenth Century
AH 3142	
AH 3143	Early Twentieth-Century Art
FREN 3020	Contemporary France
FREN 3220	Modern French Literature
FREN 3400	Studies in Genre
FREN 3560	Topics in Contemporary Francophone Literature and Cinema

FREN 3700	History of French Cinema
GER 2161	German Culture-in English I
GER 2162	German Culture-in English II
HIST 1121	The War of Ideas in European and International History, 1750-Present
HIST 2060	Modern Jewish History
HIST 2113	The Roman World to 337 A.D.
HIST 2124	Nineteenth-Century Europe
HIST 2125	Twentieth-Century Europe
HIST 2160	History of Germany
HIST 3061	The Holocaust
HIST 3101	Topics: Europe
HIST 3103	European Intellectual History I
HIST 3104	European Intellectual History II
HIST 3111	Topics in Ancient History (Ancient Identity: Greeks, Romans, Others)
HIST 3111	Topics in Ancient History (The High Middle Ages)
HIST 3118	The Middle Ages: 500-1500
HIST 3126	European Integration: A History
HIST 3130	History of England I
HIST 3132	Tudor England
HIST 3134	Stuart England
HIST 3135	Victorian Britain
HIST 3137	The British Empire
HIST 3139	Twentieth-Century Britain
HIST 3140	History of France
HIST 3145	The French Revolution
HIST 3150	Spain and Its Empire, 1492-1700
HIST 3168	Divided and United Germany Since 1945
HIST 3173	The Habsburgs in East Central Europe
HIST 3178	The Making of the Modern Balkans
HIST 3180	Russia to 1801

HIST 3181	Russia Since 1801
HIST 3650	Modern South Asia, 1750-Present
HIST 3840	History of Central Asia
IAFF 3190	Special Topics in International Affairs (topic: Holocaust Memory. Same as JSTD 2002: Holocaust Memory)
JSTD 2002	Topics in Judaic Studies: Modern (topic: Holocaust Memory. Same as IAFF 3190: Holocaust Memory)
PHIL 2112	History of Modern Philosophy
PHIL 3113	Nineteenth-Century Philosophy
SLAV 2310	The Russian Media Since Communism
SLAV 2361	Russian Culture
SLAV 2362	Russian Culture
SLAV 2785	Introduction to Russian Cinema I
SLAV 2786	Introduction to Russian Cinema II

Any undergraduate literature or film course numbered 2000 or above with this regional focus.

BACHELOR OF ARTS OR BACHELOR OF SCIENCE WITH A MAJOR IN INTERNATIONAL AFFAIRS, GLOBAL PUBLIC HEALTH CONCENTRATION

Requirements for the concentration

Code	Title	Credits
------	-------	---------

In addition to specific topics listed under IAFF 2190W, the IAFF 3100-range, and IAFF 4191, other topics relevant to the concentration may be approved by the academic advisor.

Approval of the academic advisor is required in order for any course not listed below to count toward program requirements.

Required

PUBH 3133	Global Health and Development
-----------	-------------------------------

Four courses from the following:

ANTH 2501	The Anthropology of Gender: Cross-Cultural Perspectives
-----------	---

ANTH 3501	Anthropology of Development
-----------	-----------------------------

or IAFF 3501	International Development Theory, Policy, and Practice
ANTH 3502	Cultural Ecology
ANTH 3503	Psychological Anthropology
ANTH 3504	Illness, Healing, and Culture
ANTH 3513	Anthropology of Human Rights
or IAFF 3513	Human Rights and Ethics
ANTH 3991	Special Topics (Medical Anthropology)
GEOG 2127	Population Geography
GEOG 2133	People, Land, and Food
GEOG 2136	Water Resources
GEOG 2137	Environmental Hazards
GEOG 2141	Cities in the Developing World
GEOG 3132	Environmental Quality and Management
GEOG 3143	Urban Sustainability
IAFF 2190W	Special Topics (Women in Global Politics)
IAFF 3183	Special Topics in Development Policy (Human Trafficking)
IAFF 3183	Special Topics in Development Policy (Women, Rights, and Gender Equality)
IAFF 3210W	Migration, Gender, and International Development
IAFF 3501	International Development Theory, Policy, and Practice
or ANTH 3501	Anthropology of Development
IAFF 3513	Human Rights and Ethics
or ANTH 3513	Anthropology of Human Rights
PUBH 1101	Introduction to Public Health and Health Services
PUBH 2110	Public Health Biology
PUBH 2113	Impact of Culture upon Health
PUBH 2114	Environment, Health, and Development
PUBH 2115	Health, Human Rights, and Displaced Persons

PUBH 2116	Global Delivery of Health Systems
PUBH 3115	Global Health and Human Rights
PUBH 3131	Epidemiology: Measuring Health and Disease
PUBH 3132	Health and Environment
PUBH 3137	Global Public Health Nutrition
PUBH 3150	Sustainable Energy and Environmental Health
PUBH 3199	Topics in Public Health (Global Governance and Complex Emergencies)
SOC 2175	Sociology of Sex and Gender
SUST 1001	Introduction to Sustainability
WGSS 3170	Special Topics in Women's, Gender, and Sexuality Studies (Sociology of Sex and Gender)

BACHELOR OF ARTS OR BACHELOR OF SCIENCE WITH A MAJOR IN INTERNATIONAL AFFAIRS, INTERNATIONAL DEVELOPMENT CONCENTRATION

Requirements for the concentration

In addition to specific topics listed under IAFF 2190W, the IAFF 3100-range, and IAFF 4191, other topics relevant to the concentration may be approved by the academic advisor.

If a student wishes to take any course not listed below approval of the academic advisor is required.

Code	Title	Credits
Required		
ECON 2151	Economic Development	
IAFF 3501	International Development Theory, Policy, and Practice	
or ANTH 3501	Anthropology of Development	
Three courses from the following. If ANTH 3501 or IAFF 3501 is being used to fulfill the advanced fundamentals major requirement, four courses are required.		
ANTH 3513	Anthropology of Human Rights	

or IAFF 3513	Human Rights and Ethics	IAFF 2190W	Special Topics (Latin American Populism)
ANTH 3701	Native Peoples - North America	IAFF 2190W	Special Topics (North Africa and the World)
ANTH 3702	Anthropology of Latin America	IAFF 2190W	Special Topics (Political Economy of Latin America)
ANTH 3703	Cultures of the Pacific	IAFF 2190W	Special Topics (Politics and Culture in the Middle East)
ANTH 3704	Cultures of Southeast Asia	IAFF 2190W	Special Topics (Turkey and Its Neighbors)
ANTH 3705	Anthropology of East Asia	IAFF 2190W	Special Topics (U.S.-Asia Critical Issues)
ANTH 3707	Anthropology of the Middle East	IAFF 2190W	Special Topics (U.S. Foreign Policy in Africa)

IAFF 2040 Basic Topics in International Affairs (Game Theory and Strategy)

BACHELOR OF ARTS OR BACHELOR OF SCIENCE WITH A MAJOR IN INTERNATIONAL AFFAIRS, INTERNATIONAL ECONOMICS CONCENTRATION

Requirements for the concentration

Code	Title	Credits
------	-------	---------

In addition to specific topics listed under IAFF 2190W, the IAFF 3100-range, IAFF 4191, and IBUS 4900, other topics relevant to the concentration may be approved by the academic advisor.

If a student wishes to take any course not listed, prior approval of the academic advisor is required.

Required

Students completing this concentration must use ECON 2181 and ECON 2182 or ECON 2182 and ECON 3181 to satisfy the advanced fundamentals international economics requirement.

Five courses from the following:

ANTH 3501	Anthropology of Development
or IAFF 3501	International Development Theory, Policy, and Practice

IAFF 2190W	Special Topics (Crowdsourcing and the Future of Work)
IAFF 2190W	Special Topics (Foreign Policy Decision Making)
IAFF 2190W	Special Topics (International Environmental Policy)
IAFF 2190W	Special Topics (Latin American Populism)
IAFF 2190W	Special Topics (Women in Global Politics)
IAFF 3177	Political Economy of Latin America
IAFF 3180	Special Topics in Security Policy (Gender, Conflict, and Security)
IAFF 3180	Special Topics in Security Policy (Global Energy Markets)
IAFF 3180	Special Topics in Security Policy (Global Energy Security)
IAFF 3180	Special Topics in Security Policy (Globalization and National Security)
IAFF 3183	Special Topics in Development Policy (Globalization for Sustainable Development)
IAFF 3183	Special Topics in Development Policy (International Energy and Environmental Regulations)
IAFF 3184	Special Topics in Trade and International Economic Policy
IAFF 3186	Special Topics in Asian Studies (China and the World)
IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Latin American Migration)
IAFF 3190	Special Topics in International Affairs (Business Growth Strategies)
IAFF 3190	Special Topics in International Affairs (Europe Economies/Crisis of Integration)
IAFF 3190	Special Topics in International Affairs (Global Financial Crisis)
IAFF 3190	Special Topics in International Affairs (International Business and Modern Slavery)
IAFF 3190	Special Topics in International Affairs (International Environmental Policy)

IAFF 3190	Special Topics in International Affairs (topic Oil: Industry, Economy, Society. Same as IBUS 4403)
IAFF 3191W	Latin American Populism in Global Context
IAFF 3501	International Development Theory, Policy, and Practice
or ANTH 3501	Anthropology of Development
IAFF 4191W	Research Seminar (Foreign Policy Decision Making)
IBUS 3001	Introduction to International Business
IBUS 3101	Global Financial Environment
IBUS 3201	International Marketing Management
IBUS 3301	International Business Finance
IBUS 4202	Regional Strategy for Multinationals
IBUS 4203	Foreign Market Analysis
IBUS 4302	International Banking
IBUS 4303	International Monetary and Financial Issues
IBUS 4401	Managing the Multinational Enterprise
IBUS 4402	Managing in Developing Countries
IBUS 4403	Oil: Industry, Economy, and Society (same as IAFF 3190 Oil: Industry, Economy, Society)
IBUS 4900	Special Topics (China and the Global Economy)
IBUS 4900	Special Topics (Institutions and Economic Development: The Case of Rwanda)
IBUS 4900	Special Topics (Negotiations)
IBUS 4900W	Special Topics (Negotiations)
PSC 2337	Development Politics
PSC 2339	Comparative Political Economy
PSC 2439	International Political Economy
SMPP 4900W	Special Topics (Negotiations)

SMPP 4900W	Special Topics (Strategy and International Political Economy)
SOC 2168	Economic Sociology

BACHELOR OF ARTS OR BACHELOR OF SCIENCE WITH A MAJOR IN INTERNATIONAL AFFAIRS, INTERNATIONAL ENVIRONMENTAL STUDIES CONCENTRATION

Requirements for the concentration

In addition to specific topics listed under IAFF 2190W, the IAFF 3100-range, and IAFF 4191, other topics relevant to the concentration may be approved by the academic advisor.

If a student wishes to take any course not listed, prior approval of the academic advisor is required.

Code	Title	Credits
Required		
In addition to the courses listed below, IAFF 2190W, IAFF 3100-level courses, and IAFF 4191 courses not listed here may also be relevant to this concentration. Consult your Academic Advisor regarding any course that does not appear below.		
One course from the following:		
GEOG 2120	World Regional Geography	
IAFF 3190	Special Topics in International Affairs (International Environmental Policy)	
SUST 1001	Introduction to Sustainability	
Four courses from the following:		
ANTH 3502	Cultural Ecology	
CHEM 2085	Environmental Chemistry	
ECON 2136	Environmental and Natural Resource Economics	
GEOG 2120	World Regional Geography *	
GEOG 2129	Biogeography	
GEOG 2133	People, Land, and Food	
GEOG 2134	Energy Resources	
GEOG 2136	Water Resources	

GEOG 2137	Environmental Hazards
GEOG 3132	Environmental Quality and Management
GEOG 3143	Urban Sustainability
GEOG 3193	Environmental Law and Policy
GEOG 3198	Special Topics (Global Perspectives on Environmental Conservation)
GEOL 1005	Environmental Geology
GEOL 3131	Global Climate Change
IAFF 2190W	Special Topics (International Environmental Policy)
IAFF 3179	Special Topics in Science and Technology Policy (Energy and the Environment)
IAFF 3180	Special Topics in Security Policy (Global Energy Markets)
IAFF 3180	Special Topics in Security Policy (Global Energy Security)
IAFF 3180	Special Topics in Security Policy (Globalization and National Security)
IAFF 3183	Special Topics in Development Policy (Challenge of Global Sustainable Development)
IAFF 3183	Special Topics in Development Policy (Environmentalism & Development)
IAFF 3183	Special Topics in Development Policy (Globalization for Sustainable Development)
IAFF 3183	Special Topics in Development Policy (International Energy & Environmental Regulations)
IAFF 3190	Special Topics in International Affairs (Arctic Affairs)
IAFF 3190	Special Topics in International Affairs (International Environmental Policy) *
PSC 2224	Issues in Domestic Public Policy (Environmental Policy and Law)
PUBH 2114	Environment, Health, and Development
PUBH 3132	Health and Environment
PUBH 3150	Sustainable Energy and Environmental Health

REL 3920	Man and the Natural Environment
SUST 1001	Introduction to Sustainability *
SUST 3003	World on a Plate

*This course may be taken under the "Four from the following" option only if it was not previously taken under the "One from the following" option.

BACHELOR OF ARTS OR BACHELOR OF SCIENCE WITH A MAJOR IN INTERNATIONAL AFFAIRS, INTERNATIONAL POLITICS CONCENTRATION

Requirements for the concentration

In addition to specific topics listed under IAFF 2190W, the IAFF 3100-range, and IAFF 4191, other topics relevant to the concentration may be approved by the academic advisor. All offerings under IAFF 3182 may be used for this concentration and repeated for credit provided the topic differs.

If a student wishes to take any course not listed, prior approval of the academic advisor is required.

Code	Title	Credits
Required		
One course from the following:		
PSC 2440	Theories of International Politics	
PSC 2446	U.S. Foreign Policy	
If PSC 2440 or PSC 2446 is used to fulfill the advanced fundamentals, international and comparative politics requirement, the other course must be used to fulfill this requirement.		
Four courses from the following, at least one of which must have the PSC course designation:		
ANTH 3506	Politics, Ethnicity, and Nationalism	
ECON 2199	Special Topics in Economics (Economics of the EU)	
GEOG 2120	World Regional Geography	
GEOG 3146	Political Geography	
HIST 2340	U.S. Diplomatic History	
HIST 3033	War and the Military in American Society from the Revolution to the Gulf War	

HIST 3035	The United States and the Wars in Indochina, 1945-1975
HIST 3045	International History of the Cold War
HIST 3046	The Cold War in the Third World
HIST 3047W	Writing Cold War History
HIST 3062	War Crimes Trials
HIST 3126	European Integration: A History
HIST 3137	The British Empire
HIST 3168	Divided and United Germany Since 1945
HIST 3178	The Making of the Modern Balkans
HIST 3301W	Topics: U.S. History (Cold War in Asia)
HIST 3332	History of American Foreign Policy Since World War II
HIST 3333	History of American Foreign Policy Since World War II
HIST 3334	The Nuclear Arms Race
HIST 3650	Modern South Asia, 1750-Present
HIST 3701	Topics in Latin American History (History of Argentina)
HIST 3801	Topics in Middle Eastern History (The Making of Modern Iraq and Syria)
HIST 3820	History of Israel
IAFF 2090	Latin America: Problems and Promise
IAFF 2091	East Asia-Past and Present
IAFF 2092	Russia and Eastern Europe: An Introduction
IAFF 2093	Africa: Problems and Prospects
IAFF 2094	Europe: International and Domestic Interactions
IAFF 2095	The Middle East in International Affairs
IAFF 2190	Special Topics (Civil Wars)
IAFF 2190	Special Topics (Political Risk Analysis)
IAFF 2190	Special Topics (Presidents at War)
IAFF 2190W	Special Topics (Arab Politics)

IAFF 2190W	Special Topics (Congress and Foreign Policy)
IAFF 2190W	Special Topics (Dissent: A Study in Memoirs)
IAFF 2190W	Special Topics (International Environmental Policy)
IAFF 2190W	Special Topics (Foreign Policy Decision Making)
IAFF 2190W	Special Topics (Latin American Populism)
IAFF 2190W	Special Topics (National Security, Foreign and Intelligence Policy)
IAFF 2190W	Special Topics (North Africa and the World)
IAFF 2190W	Special Topics (Politics and Culture in the Middle East)
IAFF 2190W	Special Topics (Rising Africa and the World)
IAFF 2190W	Special Topics (Science, Technology, and Policy)
IAFF 2190W	Special Topics (Security and Subcontractors)
IAFF 2190W	Special Topics (Terrorism and Counterterrorism)
IAFF 2190W	Special Topics (Turkey and Its Neighbors)
IAFF 2190W	Special Topics (U.S. - Asia: Critical Issues)
IAFF 2190W	Special Topics (U.S. Foreign Policy in Africa)
IAFF 2190W	Special Topics (Women in Global Politics)
IAFF 2444 or PSC 2444	International Law Public International Law
IAFF 3171	U.S. Foreign Policy Summer Program
IAFF 3172	Conflict and Conflict Resolution
IAFF 3177	Political Economy of Latin America
IAFF 3179	Special Topics in Science and Technology Policy (Space in International Affairs)

IAFF 3180	Special Topics in Security Policy (Civil War, Insurgency & Terror)
IAFF 3180	Special Topics in Security Policy (Civilians in the Path of War)
IAFF 3180	Special Topics in Security Policy (Cyber and Security)
IAFF 3180	Special Topics in Security Policy (Defense Policy)
IAFF 3180	Special Topics in Security Policy (Global Energy Markets)
IAFF 3180	Special Topics in Security Policy (Global Energy Security)
IAFF 3180	Special Topics in Security Policy (Globalization and National Security)
IAFF 3180	Special Topics in Security Policy (International Politics and Security Policy)
IAFF 3180	Special Topics in Security Policy (National Security, Foreign and Intelligence Policy)
IAFF 3180	Special Topics in Security Policy (NATO's Strategic Challenges)
IAFF 3180	Special Topics in Security Policy (Responding to Terrorism)
IAFF 3180	Special Topics in Security Policy (Theory of War)
IAFF 3180	Special Topics in Security Policy (U.S. Grand Strategy)
IAFF 3180W	Special Topics in Security Policy (topic: International Politics and Security Policy. Same as IAFF 4191W: International Politics and Security Policy)
IAFF 3180W	Special Topics in Security Policy (Nuclear Security)
IAFF 3181	Special Topics in Conflict Resolution (Israeli-Palestinian Peacebuilding)
IAFF 3182	Special Topics in Foreign Policy
IAFF 3183	Special Topics in Development Policy (Environmentalism & Development)
IAFF 3183	Special Topics in Development Policy (Globalization and Sustainable Development)
IAFF 3183	Special Topics in Development Policy (Human Trafficking)

IAFF 3183	Special Topics in Development Policy (International Energy & Environmental Regulations)	IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Conflict and Contestation in Latin America)
IAFF 3183	Special Topics in Development Policy (NGOs Role in Humanitarian Assistance)	IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Contemporary Issues of US-Mexico Relations)
IAFF 3185	Special Topics in European and Eurasian Studies (EU and Russia)	IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Historical Memory & Human Rights in Chile)
IAFF 3185	Special Topics in European and Eurasian Studies (The End of Western Supremacy)	IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Immigration and Weak States)
IAFF 3185	Special Topics in European and Eurasian Studies (Ukraine and Georgia Between Russia and the West)	IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Latin American Migration)
IAFF 3186	Special Topics in Asian Studies (Asian Order & Community-Building)	IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Mexico Since Independence)
IAFF 3186	Special Topics in Asian Studies (Central Asia Between East & West)	IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Security in the Americas)
IAFF 3186	Special Topics in Asian Studies (China and the World)	IAFF 3188	Special Topics in Middle East Studies (Form and Practice: American Politics in the Middle East)
IAFF 3186	Special Topics in Asian Studies (Currents Events in East Asia)	IAFF 3188	Special Topics in Middle East Studies (Iran-U.S. Relations)
IAFF 3186	Special Topics in Asian Studies (East Asian Security)	IAFF 3188	Special Topics in Middle East Studies (Political Islam)
IAFF 3186	Special Topics in Asian Studies (Indo-Pacific Security Challenges)	IAFF 3188	Special Topics in Middle East Studies (The Middle East Since WWII)
IAFF 3186	Special Topics in Asian Studies (International Relations of South Asia)	IAFF 3188	Special Topics in Middle East Studies (U.S. Policy in the Gulf)
IAFF 3186	Special Topics in Asian Studies (Memory and Reconciliation in Asia)	IAFF 3189	Special Topics in African Studies (Africa: Declassified)
IAFF 3186	Special Topics in Asian Studies (Politics and Conflict of South Asia)	IAFF 3189	Special Topics in African Studies (Ethnic and Religious Conflict in Africa)
IAFF 3186	Special Topics in Asian Studies (Politics of the Past in Korea)	IAFF 3189	Special Topics in African Studies (Horn of Africa)

PSC 2994	Special Topics in International Relations (War)
SMPA 3194	Selected Topics in Political Communication (Advocacy and Technology)
SOC 2189	Special Topics in Criminal Justice (Comparative Police Systems)
SOC 2189	Special Topics in Criminal Justice (Sociology of Terrorism)

BACHELOR OF ARTS WITH A MAJOR IN LATIN AMERICAN AND HEMISPHERIC STUDIES

GENERAL REQUIREMENTS

General requirements

Elliott School bachelor's degrees engage students with global issues through multidisciplinary and interdisciplinary approaches. Students begin their studies in the first year with foundational courses in political science, economics, history, and anthropology or geography. They supplement these courses with others in the traditional liberal arts categories of writing, natural or physical science, mathematics or statistics, and the humanities/creative arts, plus two writing in the disciplines courses. Foreign language study also is emphasized early in each program to enable students to satisfy the third-year language proficiency requirement of the bachelor's degree in a timely manner.

Introduction to the major

Code	Title	Credits
------	-------	---------

Prerequisite core (19 credits)

Required

The following courses must be taken in the first year. With the exception of IAFF 1001 (fall), ECON 1011 (fall) and ECON 1012 (spring), courses can be taken in fall or spring. IAFF 1001 is not required for internal or external transfer students.

IAFF 1001	First-Year Experience
IAFF 1005	Introduction to International Affairs
ECON 1011	Principles of Economics I
ECON 1012	Principles of Economics II
HIST 1011	World History, 1500-Present

PSC 1001	Introduction to Comparative Politics
One of the following (not required in the first year):	
ANTH 1002	Sociocultural Anthropology
ANTH 1004	Language in Culture and Society
GEOG 1001	Introduction to Human Geography
With advisor approval, a student may select another introductory social science course if s/he can demonstrate why it is relevant to the student's academic pursuits. An example of a course that might be accepted is GEOG 1003.	

Supporting courses in the liberal arts

Code	Title	Credits
------	-------	---------

Writing (credits vary)

Writing requirements are established by the University Writing Program. Students must complete UW 1020 in their first year before enrolling in a Writing in the Discipline (WID) course for WID credit. The two required WID courses should be taken in the student's major, minor, or a related field, and must be completed in separate semesters to receive WID credit. WID courses are designated in this Bulletin with a "W" appended to the course number, e.g., HIST 2340W.

Required

UW 1020	University Writing
---------	--------------------

Two WID courses

Mathematics or statistics (3 credits)

MATH courses numbered 1051 and above require a placement test. Credit for only one of the following MATH courses may be applied toward a degree: MATH 1221, MATH 1231, or MATH 1252. Credit for only one of the following STAT courses may be applied toward a degree: STAT 1051, STAT 1053, STAT 1111, or STAT 1127. STAT courses may not be double-counted between the Mathematics requirement and the Research Methods requirement (see "Major Requirements.")

One of the following:

MATH 1007	Mathematics and Politics
MATH 1008	History of Mathematics
MATH 1009	Mathematical Ideas I
MATH 1010	Mathematical Ideas II
MATH 1051	Finite Mathematics for the Social and Management Sciences
MATH 1221	Calculus with Precalculus II

MATH 1231	Single-Variable Calculus I
-----------	----------------------------

MATH 1232	Single-Variable Calculus II
-----------	-----------------------------

MATH 1252	Calculus for the Social and Management Sciences
-----------	---

MATH 2233	Multivariable Calculus
-----------	------------------------

STAT 1051	Introduction to Business and Economic Statistics
-----------	--

STAT 1053	Introduction to Statistics in Social Science
-----------	--

STAT 1111	Business and Economic Statistics I
-----------	------------------------------------

STAT 1127	Statistics for the Biological Sciences
-----------	--

Science (3 to 4 credits), lab required

One of the following:

ANTH 1001	Biological Anthropology
ANTH 3412	Hominin Evolution
ASTR 1001	Stars, Planets, and Life in the Universe
ASTR 1002	Origins of the Cosmos
BISC 1005	The Biology of Nutrition and Health
BISC 1006	The Ecology and Evolution of Organisms
BISC 1007	Food, Nutrition, and Service
BISC 1008	Understanding Organisms through Service Learning
BISC 1111	Introductory Biology: Cells and Molecules
BISC 1112	Introductory Biology: The Biology of Organisms
CHEM 1003	Contemporary Science for Nonscience Majors
CHEM 1004	Contemporary Science for Nonscience Majors
CHEM 1111	General Chemistry I
CHEM 1112	General Chemistry II
GEOG 1002	Introduction to Physical Geography
GEOL 1001	Physical Geology
GEOL 1002	Historical Geology

GEOL 1005	Environmental Geology
HONR 1033	Honors Seminar: Scientific Reasoning and Discovery
HONR 1034	Honors Seminar: Scientific Reasoning and Discovery
PHYS 1003	Physics for Future Presidents
PHYS 1007	Music and Physics
PHYS 1011	General Physics I
PHYS 1012	General Physics II
PHYS 1021	University Physics I
PHYS 1022	University Physics II
PHYS 1025	University Physics I with Biological Applications
PHYS 1026	University Physics II with Biological Applications

Humanities/creative arts (9 credits)*

This requirement can be satisfied by completing 9 credits in humanities courses, or 6 credits in humanities courses and 3 credits in creative arts courses.

Humanities—two or three of the following:

Any Art History (AH) course except AH 4199.

AMST 1160	Race, Gender, and Law
AMST 1200	The Sixties in America
AMST 2010	Early American Cultural History
or HIST 2010	Early American Cultural History
AMST 2011	Modern American Cultural History
or HIST 2011	Modern American Cultural History
AMST 2020	Washington, DC: History, Culture, and Politics
or AMST 2020W	Washington, DC: History, Culture, and Politics
or HIST 2020	Washington, DC: History, Culture, and Politics
or HIST 2020W	Washington, DC: History, Culture, and Politics
AMST 2120W	Freedom in American Thought and Popular Culture
or PSC 2120W	Freedom in American Thought and Popular Culture

AMST 2210	The African American Experience
AMST 2320	U.S. Media and Cultural History
or HIST 2320	U.S. Media and Cultural History
AMST 2350	U.S. Religion and Politics
or HIST 2350	U.S. Religion and Politics
AMST 2380	Sexuality in U.S. History
or HIST 2380	Sexuality in U.S. History
or WGSS 2380	Sexuality in U.S. History

or AMST 2380	Sexuality in U.S. History

or HIST 2380	Sexuality in U.S. History
WGSS 2385	Sex and Citizenship
or WGSS 2385W	Sex and Citizenship
or AMST 2385	Sex and Citizenship
or AMST 2385W	Sex and Citizenship
WGSS 3352	U.S. Women's History to 1865
or WGSS 3352W	U.S. Women's History to 1865
or AMST 3352	U.S. Women's History to 1865
or AMST 3352W	U.S. Women's History to 1865
or HIST 3352	U.S. Women's History to 1865
or HIST 3352W	U.S. Women's History to 1865
WGSS 3353	U.S. Women's History II
WGSS 3981	Women in Western Religion
or REL 2981	Women in Western Religion
Literature and film classes in the Departments of Classical and Near Eastern Languages and Civilizations; East Asian Languages and Literatures; English; and Romance, German, Slavic Languages and Literatures also fulfill this requirement.	
Creative Arts—a maximum of 3 credits from the following:	
Any Corcoran Studio Arts (CSA) course.	
ENGL 1210	Introduction to Creative Writing
ENGL 2460	Fiction Writing
ENGL 2470	Poetry Writing
ENGL 2560	Intermediate Fiction Writing
ENGL 3390	Topics in Creative Writing
Non-ensemble performance study (MUS) courses, including:	
MUS 1101	Elements of Music Theory
MUS 1102	Comprehensive Musicianship I
MUS 1106	Introduction to Musical Performance and Experience
MUS 2102	Comprehensive Musicianship II
MUS 2134	Composition
MUS 2173	Comprehensive Musicianship for Jazz
MUS 4184	Advanced Composition

Performance Study Courses (TRDA), including:

TRDA 1035	Theatre Production
TRDA 1151	Beginning/Intermediate Ballet
TRDA 1152	Beginning Modern/Postmodern Dance
TRDA 1153	Beginning/Intermediate Modern/Postmodern Dance
TRDA 1170 & TRDA 1171	Intermediate Modern/Postmodern Dance I and Intermediate Modern/Postmodern Dance II
TRDA 1214	Beginning Acting
TRDA 1330	Basics of Production Design
TRDA 2160	Intermediate Ballet
TRDA 2172	Intermediate/Advanced Modern/Postmodern Dance I
TRDA 2173	Intermediate/Advanced Modern/Postmodern Dance II
TRDA 2179	Contact Improvisation
TRDA 2180	Movement Improvisation/Performance
TRDA 2192	Repertory/Performance
TRDA 2193 & TRDA 2194	Dance Styles I and Dance Styles II
TRDA 2215	Intermediate Acting
TRDA 2250	Dramatic Writing
TRDA 2339	Theatre Practicum
TRDA 3174	Advanced Modern/Postmodern Dance I
TRDA 3175	Advanced Modern/Postmodern Dance II
TRDA 3182 & TRDA 3183	Dance Composition I and Dance Composition II
TRDA 3186	Embodied Kinesis for Dance
TRDA 3222	Topics in Advanced Acting
TRDA 3240	Introduction to Dramaturgy
TRDA 3250	Intermediate Dramatic Writing
TRDA 3331	Introduction to Lighting
TRDA 3332	Theatrical Makeup Design

TRDA 3333	Stage Management
TRDA 3335	Introduction to Scene Design
TRDA 3336	Introduction to Costuming
TRDA 4184	Choreography and Performance
TRDA 4275	Directing for the Theatre
TRDA 4338	Scene Painting

*Some MUS and TRDA courses may be repeated for credit. Consult course descriptions in this Bulletin for additional information. All courses must be taken for a letter grade to fulfill this requirement. Courses taken Pass/No Pass are not accepted.

**Note that MUS 2661 is a prerequisite to MUS 2662.

MAJOR REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs, Undergraduate Degree Requirements. (p. 830)

A minimum grade of C- must be earned in all major requirement courses, to include the last course used to prove third-year proficiency in a modern regional language .

Major Requirements

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs, Undergraduate Degree Requirements (p. 830).

A minimum grade of C- must be earned in all major requirement courses, to include the last course used to prove third-year proficiency in a modern regional language.

If a student wishes to take any course not listed here, prior approval of the Program Director is required.

Code	Title	Credits
Foundation (3 credits)		
Required		
IAFF 2090	Latin America: Problems and Promise	
Foreign Language (credits vary)		

Students must demonstrate third-year proficiency in a modern foreign languages (Spanish or Portuguese) by examination or coursework. Additional information regarding the Elliott School foreign language examinations is available from the academic advisor.

Spanish	
Option one:	
SPAN 1011	Intensive Beginning Spanish: the Spanish-speaking world
or SPAN 1012	Intensive Elementary Spanish: the Spanish-speaking world
SPAN 1013	Intermediate Spanish I: the Spanish-speaking world
SPAN 1014	Intermediate Spanish II: the Spanish-speaking world
SPAN 2005	Advanced Spanish I
SPAN 2006	Advanced Spanish II
Or	
Option two:

IAFF 4191	Research Seminar (Political Islam)
PSC 2377	Comparative Politics of the Middle East
PSC 2478	International Relations of the Middle East

*IAFF 2190W (North Africa and the World) is not approved as a Regional Foundations course for students in the Middle East Studies program due to the degree of overlap between issues in North Africa and the Middle East.

Code	Title	Credits
Research Methods (3 credits)		
One course pertaining to qualitative or quantitative social science research methods from the following:		
ANTH 3531	Methods in Sociocultural Anthropology	
ECON 2123	Introduction to Econometrics	
GEOG 2104	Introduction to Cartography and GIS	
IAFF 2101	International Affairs Research Methods	
IAFF 2190	Special Topics (Political Risk Analysis)	
IAFF 3190	Special Topics in International Affairs (Qualitative Research Methods)	
PSC 2101	Scope and Methods of Political Science	
PSC 2102	Visualizing and Modeling Politics	
PSYC 2101	Research Methods in Psychology	
PUBH 3131	Epidemiology: Measuring Health and Disease	
PUBH 3199	Topics in Public Health (Qualitative Research Methods)	
SOC 2101	Social Research Methods	
SOC 2111	Field Research	
STAT 1051	Introduction to Business and Economic Statistics *	
STAT 1053	Introduction to Statistics in Social Science *	
STAT 1111	Business and Economic Statistics I *	
STAT 1127	Statistics for the Biological Sciences	
STAT 2112	Business and Economic Statistics II	
STAT 2183	Intermediate Statistics Lab/Packages	

or STAT 2183W Intermediate Statistical Laboratory: Statistical Computing Packages

*Credit for only one of the following courses may be applied toward a degree: STAT 1051, STAT 1053, STAT 1111, or STAT 1127.

STAT courses may not be double-counted between the Math requirement and the research methods requirement.

Code	Title	Credits
------	-------	---------

Latin American Literature (3 credits)

One course from the following. Another literature course at the 3000- or 4000-level may be substituted with the approval of the Program Director.

PORT 4800	Independent Study *
SPAN 3100	Texts and Contexts of the Spanish-Speaking World
SPAN 3410	Latin American Short Fiction
SPAN 3420	The Essay in Spain and Latin America
SPAN 3600	Special Topics
or SPAN 4600	Special Topics
SPAN 4800	Independent Study *

Multi-disciplinary Core (21 credits)

History (3 credits)

One course from the following:

HIST 3701	Topics in Latin American History
HIST 3710	History of Latin America I
HIST 3711	History of Latin America II

Political Science (3 credits)

One course from the following:

PSC 2383	Comparative Politics of Latin America
PSC 2484	International Relations of Latin America

Economics (3 credits)

One course from the following:

ECON 2151	Economic Development
or ECON 2151W	Economic Development
ECON 2185	Economic History and Problems of Latin America

Geography (3 credits)

Required:

GEOG 3161 Geography of Latin America

Anthropology (3 credits)

ANTH 3702 Anthropology of Latin America

Students may request to use other 3000-level anthropology courses with Latin American content but this must be approved by the Program Director

International Affairs (6 credits)

Two courses from the following:

IAFF 3177 Political Economy of Latin America

IAFF 3187 Special Topics in Latin American and Hemispheric Studies

IAFF 3191W Latin American Populism in Global Context

Undergraduate students may be able to enroll in Latin American and Hemispheric Studies graduate courses with instructor approval.

Related Coursework (6 credits)

Two courses related to Latin America from any discipline, including International Affairs (IAFF), selected with the approval of the Program Director.

Study Abroad

Students are encouraged to study in Latin America through one of GW's formal partnerships with a regional university or an approved self-designed study abroad program.

*Program Director approval is required for PORT 4800 or SPAN 4800 Independent Study courses.

BACHELOR OF ARTS WITH A MAJOR IN MIDDLE EAST STUDIES

GENERAL REQUIREMENTS

General requirements

Elliott School bachelor's degrees engage students with global issues through multidisciplinary and interdisciplinary approaches. Students begin their studies in the first year with foundational courses in political science, economics, history, and anthropology or geography. They supplement these courses with others in the traditional liberal arts categories of writing, natural or physical science, mathematics or statistics, and the humanities/creative arts, plus two writing in the disciplines courses. Foreign language study also is emphasized

early in each program to enable students to satisfy the third-year language proficiency requirement of the bachelor's degree in a timely manner.

Introduction to the major

Code	Title	Credits
------	-------	---------

Prerequisite core (19 credits)

Required

The following courses must be taken in the first year. With the exception of IAFF 1001 (fall), ECON 1011 (fall) and ECON 1012 (spring), courses can be taken in fall or spring. IAFF 1001 is not required for internal or external transfer students.

IAFF 1001	First-Year Experience
-----------	-----------------------

IAFF 1005	Introduction to International Affairs
-----------	---------------------------------------

ECON 1011	Principles of Economics I
-----------	---------------------------

ECON 1012	Principles of Economics II
-----------	----------------------------

HIST 1011	World History, 1500-Present
-----------	-----------------------------

PSC 1001	Introduction to Comparative Politics
----------	--------------------------------------

One of the following (not required in the first year):

ANTH 1002	Sociocultural Anthropology
-----------	----------------------------

ANTH 1004	Language in Culture and Society
-----------	---------------------------------

GEOG 1001	Introduction to Human Geography
-----------	---------------------------------

With advisor approval, a student may select another introductory social science course if s/he can demonstrate why it is relevant to the student's academic pursuits. An example of a course that might be accepted is GEOG 1003.

Supporting courses in the liberal arts

Code	Title	Credits
------	-------	---------

Writing (credits vary)

Writing requirements are established by the University Writing Program. Students must complete UW 1020 in their first year before enrolling in a Writing in the Discipline (WID) course for WID credit. The two required WID courses should be taken in the student's major, minor, or a related field, and must be completed in separate semesters to receive WID credit. WID courses are designated in this Bulletin with a "W" appended to the course number, e.g., HIST 2340W.

Required

UW 1020	University Writing
---------	--------------------

Two WID courses

Mathematics or statistics (3 credits)

MATH courses numbered 1051 and above require a placement test. Credit for only one of the following MATH courses may be applied toward a degree: MATH 1221, MATH 1231, or MATH 1252. Credit for only one of the following STAT courses may be applied toward a degree: STAT 1051, STAT 1053, STAT 1111, or STAT 1127. STAT courses may not be double-counted between the Mathematics requirement and the Research Methods requirement (see "Major Requirements.")

One of the following:

MATH 1007	Mathematics and Politics
MATH 1008	History of Mathematics
MATH 1009	Mathematical Ideas I
MATH 1010	Mathematical Ideas II
MATH 1051	Finite Mathematics for the Social and Management Sciences
MATH 1221	Calculus with Precalculus II
MATH 1231	Single-Variable Calculus I
MATH 1232	Single-Variable Calculus II
MATH 1252	Calculus for the Social and Management Sciences
MATH 2233	Multivariable Calculus
STAT 1051	Introduction to Business and Economic Statistics
STAT 1053	Introduction to Statistics in Social Science
STAT 1111	Business and Economic Statistics I
STAT 1127	Statistics for the Biological Sciences

Science (3 to 4 credits), lab required

One of the following:

ANTH 1001	Biological Anthropology
ANTH 3412	Hominin Evolution
ASTR 1001	Stars, Planets, and Life in the Universe
ASTR 1002	Origins of the Cosmos
BISC 1005	The Biology of Nutrition and Health
BISC 1006	The Ecology and Evolution of Organisms

BISC 1007 Food, Nutrition, and Service

BISC 1008 Understanding Organisms through Service Learning

BISC 1111 Introductory Biology: Cells and Molecules

BISC 1112 Introductory Biology: The Biology of Organisms

CHEM 1003 Contemporary Science for Nonscience Majors

CHEM 1004 Contemporary Science for Nonscience Majors

CHEM 1111 General Chemistry I

CHEM 1112 General Chemistry II

GEOG 1002 Introduction to Physical Geography

GEOL 1001 Physical Geology

GEOL 1002 Historical Geology

GEOL 1005 Environmental Geology

HONR 1033 Honors Seminar: Scientific Reasoning and Discovery

HONR 1034 Honors Seminar: Scientific Reasoning and Discovery

PHYS 1003 Physics for Future Presidents

PHYS 1007 Music and Physics

PHYS 1011 General Physics I

PHYS 1012 General Physics II

PHYS 1021 University Physics I

PHYS 1022 University Physics II

PHYS 1025 University Physics I with Biological Applications

PHYS 1026 University Physics II with Biological Applications

Humanities/creative arts (9 credits)*

This requirement can be satisfied by completing 9 credits in humanities courses, or 6 credits in humanities courses and 3 credits in creative arts courses.

Humanities—two or three of the following:

Any Art History (AH) course except AH 4199.

AMST 1160	Race, Gender, and Law
AMST 1200	The Sixties in America
AMST 2010	Early American Cultural History
or HIST 2010	Early American Cultural History

or REL 2981	Women in Western Religion
Literature and film classes in the Departments of Classical and Near Eastern Languages and Civilizations; East Asian Languages and Literatures; English; and Romance, German, Slavic Languages and Literatures also fulfill this requirement.	
Creative Arts—a maximum of 3 credits from the following:	
Any Corcoran Studio Arts (CSA) course.	
ENGL 1210	Introduction to Creative Writing
ENGL 2460	Fiction Writing

ENGL 2470	Poetry Writing
ENGL 2560	Intermediate Fiction Writing
ENGL 3390	Topics in Creative Writing
Non-ensemble performance study (MUS) courses, including:	
MUS 1101	Elements of Music Theory
MUS 1102	Comprehensive Musicianship I
MUS 1106	Introduction to Musical Performance and Experience
MUS 2102	Comprehensive Musicianship II
MUS 2134	Composition
MUS 2173	Comprehensive Musicianship for Jazz
MUS 4184	Advanced Composition
Performance Study Courses (TRDA), including:	
TRDA 1035	Theatre Production
TRDA 1151	Beginning/Intermediate Ballet
TRDA 1152	Beginning Modern/Postmodern Dance
TRDA 1153	Beginning/Intermediate Modern/Postmodern Dance
TRDA 1170 & TRDA 1171	Intermediate Modern/Postmodern Dance I and Intermediate Modern/Postmodern Dance II
TRDA 1214	Beginning Acting
TRDA 1330	Basics of Production Design
TRDA 2160	Intermediate Ballet
TRDA 2172	Intermediate/Advanced Modern/Postmodern Dance I
TRDA 2173	Intermediate/Advanced Modern/Postmodern Dance II
TRDA 2179	Contact Improvisation
TRDA 2180	Movement Improvisation/Performance
TRDA 2192	Repertory/Performance
TRDA 2193 & TRDA 2194	Dance Styles I and Dance Styles II
TRDA 2215	Intermediate Acting
TRDA 2250	Dramatic Writing

TRDA 2339	Theatre Practicum
TRDA 3174	Advanced Modern/Postmodern Dance I
TRDA 3175	Advanced Modern/Postmodern Dance II
TRDA 3182 & TRDA 3183	Dance Composition I and Dance Composition II
TRDA 3186	Embodied Kinesis for Dance
TRDA 3222	Topics in Advanced Acting
TRDA 3240	Introduction to Dramaturgy
TRDA 3250	Intermediate Dramatic Writing
TRDA 3331	Introduction to Lighting
TRDA 3332	Theatrical Makeup Design
TRDA 3333	Stage Management
TRDA 3335	Introduction to Scene Design
TRDA 3336	Introduction to Costuming
TRDA 4184	Choreography and Performance
TRDA 4275	Directing for the Theatre
TRDA 4338	Scene Painting
*Some MUS and TRDA courses may be repeated for credit. Consult course descriptions in this Bulletin for additional information. All courses must be taken for a letter grade to fulfill this requirement. Courses taken Pass/No Pass are not accepted.	

**Note that MUS 2661 is a prerequisite to MUS 2662.

MAJOR REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs, Undergraduate Degree Requirements (p. 830).

A minimum grade of C- must be earned in all major requirement courses, to include the last course used to prove third-year proficiency in a modern regional language .

If a student wishes to take any course not listed here, prior approval of the Program Director is required.

Major requirements

Code	Title	Credits
------	-------	---------

Foundation (3 credits)

IAFF 2095	The Middle East in International Affairs
-----------	--

It is strongly recommended that students take IAFF 2095 before more advanced coursework in the major.

Foreign Language (credits vary)

Students must demonstrate third-year proficiency in a modern foreign languages (Arabic, Hebrew or Persian) by examination or coursework. Additional information regarding the Elliott School foreign language examinations is available from the academic advisor.

Arabic

One of the following two options:

Option one:

ARAB 1001	Beginning Arabic I
-----------	--------------------

ARAB 1002	Beginning Arabic II
-----------	---------------------

ARAB 2001	Intermediate Arabic I
-----------	-----------------------

ARAB 2002	Intermediate Arabic II
-----------	------------------------

ARAB 3001	Advanced Arabic
-----------	-----------------

and one of the following courses:

ARAB 3301	Modern Arabic Literature
-----------	--------------------------

ARAB 3302	Media Arabic
-----------	--------------

ARAB 3311	Business Arabic
-----------	-----------------

Or

Option two:

ARAB 1201	Intensive Elementary Arabic I
-----------	-------------------------------

ARAB 1202	Intensive Elementary Arabic II
-----------	--------------------------------

ARAB 2201	Intensive Intermediate Arabic
-----------	-------------------------------

ARAB 3201	Intensive Advanced Arabic: Mass Media
-----------	---------------------------------------

Hebrew

HEBR 1001	Beginning Hebrew I
-----------	--------------------

HEBR 1002	Beginning Hebrew II
-----------	---------------------

HEBR 2001	Intermediate Hebrew I
-----------	-----------------------

HEBR 2002	Intermediate Hebrew II
-----------	------------------------

HEBR 3001	Hebrew Conversation and Writing
and one of the following courses:	
HEBR 3301	Modern Hebrew Fiction
or HEBR 3301W	Modern Hebrew Fiction
HEBR 3302	The Israeli Media
Persian	
PERS 1001	Beginning Persian I
PERS 1002	Beginning Persian II
PERS 2001	Intermediate Persian I
PERS 2002	Intermediate Persian II
PERS 3001	Advanced Persian
PERS 3002	Media Persian
or PERS 3002W	Media Persian

Regional Foundations (3 credits)

One course from the following in any region except the Middle East.

Code	Title	Credits
Africa		
ANTH 3708	Anthropology of Africa	
ECON 2198	Special Topics in Economics - Regional (Economics of Africa)	
GEOG 3164	The Geography of Africa	
HIST 3501	Topics: Africa (African History Since 1880)	
HIST 3530	Women in Africa	
HIST 3540	West Africa to Independence	
IAFF 2093	Africa: Problems and Prospects	
IAFF 2190W	Special Topics (North Africa and the World) *	
IAFF 2190W	Special Topics (Rising Africa and the World)	
IAFF 3189	Special Topics in African Studies (Ethnic and Religious Conflict in Africa)	
IAFF 3189	Special Topics in African Studies (International Relations in Africa)	

IAFF 3189	Special Topics in African Studies (New African Security Frontier)
IAFF 3189	Special Topics in African Studies (Religion in Africa)
IAFF 3189	Special Topics in African Studies (Security Challenges in Africa)
IAFF 3189	Special Topics in African Studies (Transnational Justice in Africa)
IAFF 3189	Special Topics in African Studies (Women and Leadership in Africa)
IAFF 3190	Special Topics in International Affairs (Africa: Declassified)
IAFF 3190	Special Topics in International Affairs (China and Africa)
PSC 2381	Comparative Politics of Sub-Saharan Africa
PSC 2482	African International Politics
PSC 3192W	Proseminar: Political Science (Comparative Politics of Africa)
PSC 3192W	Proseminar: Political Science (Development Challenges in Africa)
PSC 3192W	Proseminar: Political Science (Government and Politics of Africa)
Asia (Students in the BA in Asian studies program must fulfill the Regional Foundations requirement using a course focused in a world region other than Asia.)	
ANTH 3703	Cultures of the Pacific
ANTH 3704	Cultures of Southeast Asia
ANTH 3705	Anthropology of East Asia
ANTH 3791	Topics in Regional Anthropology (Anthropology of South Asia)
ECON 2198	Special Topics in Economics - Regional (East Asian Economies)
GEOG 3165	Geography of South Asia
HIST 3640	History of Southeast Asia
HIST 3650	Modern South Asia, 1750-Present
IAFF 2091	East Asia-Past and Present
IAFF 3186	Special Topics in Asian Studies (Asian Order and Community Building)

IAFF 3186	Special Topics in Asian Studies (Current Events in East Asia)
IAFF 3186	Special Topics in Asian Studies (Development Issues in Southeast Asia)
IAFF 3186	Special Topics in Asian Studies (East Asian Security)
IAFF 3186	Special Topics in Asian Studies (History and Politics of South Asia)
IAFF 3186	Special Topics in Asian Studies (Indo-Pacific Security Challenges)
IAFF 3186	Special Topics in Asian Studies (International Relations of South Asia)
IAFF 3186	Special Topics in Asian Studies (Memory and Reconciliation: Asia)
IAFF 3186	Special Topics in Asian Studies (Politics and Conflict of South Asia)
IAFF 3190	Special Topics in International Affairs (Human Rights and Democracy in Southeast Asia)
PSC 2369	Comparative Politics of South Asia
PSC 2373	Comparative Politics of Southeast Asia
PSC 2475	International Relations of East Asia
PSC 3192W	Proseminar: Political Science (Politics and Protest in East Asia)
PSC 3192W	Proseminar: Political Science (Protest and Participation in East Asia)
Europe and Eurasia	
ECON 2199	Special Topics in Economics (Economics of the EU)
HIST 1121	The War of Ideas in European and International History, 1750-Present
HIST 2125	Twentieth-Century Europe
HIST 3126	European Integration: A History
HIST 3178	The Making of the Modern Balkans
IAFF 2092	Russia and Eastern Europe: An Introduction
IAFF 2094	Europe: International and Domestic Interactions
IAFF 3185	Special Topics in European and Eurasian Studies (Nationalism in Russia and Eurasia)

IAFF 3185	Special Topics in European and Eurasian Studies (The European Union)
IAFF 3185	Special Topics in European and Eurasian Studies (The European Union and Russia)
IAFF 3190	Special Topics in International Affairs (European Economies and Crisis of Integration)
IAFF 4191W	Research Seminar (Europe)
PSC 2330	Comparative Politics of Western Europe
PSC 2331	Comparative Politics of Central and Eastern Europe
PSC 2332	European Integration
PSC 2994	Special Topics in International Relations (International Politics of Central and Eastern Europe)
Latin America (Students in the BA in Latin American and hemispheric studies program must fulfill the Regional Foundations requirement using a course focused in a world region other than Latin America.)	
ANTH 3702	Anthropology of Latin America
ECON 2185	Economic History and Problems of Latin America
GEOG 3161	Geography of Latin America
HIST 3701	Topics in Latin American History (Latin America and the World Since 1820)
HIST 3710	History of Latin America I
HIST 3711	History of Latin America II
IAFF 2090	Latin America: Problems and Promise
IAFF 3177	Political Economy of Latin America
IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Economic and Social Development of Latin America)
IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Latin American Migration)
IAFF 3194W	Latin America's Violent Peace
PSC 2383	Comparative Politics of Latin America
PSC 2484	International Relations of Latin America

Middle East (Students in the BA in Middle East studies program must fulfill the Regional Foundations requirement using a course focused in a world region other than the Middle East.)

ANTH 3707	Anthropology of the Middle East
GEOG 3154	Geography of the Middle East and North Africa
HIST 3801	Topics in Middle Eastern History (Gender and the Middle East)
HIST 3810	History of the Middle East to 1800
HIST 3811	The Emergence of the Modern Middle East
IAFF 2095	The Middle East in International Affairs
IAFF 2190W	Special Topics (Arab Politics)
IAFF 2190W	Special Topics (Challenges and Change in the Middle East)
IAFF 2190W	Special Topics (North Africa and the World)
IAFF 2190W	Special Topics (Politics and Culture in the Middle East)
IAFF 3188	Special Topics in Middle East Studies (The Middle East Since WWII)
IAFF 3188	Special Topics in Middle East Studies (Military and Politics in the Middle East)
IAFF 3188	Special Topics in Middle East Studies (Political Islam)
IAFF 3188	Special Topics in Middle East Studies (Security Issues in the Greater Middle East)
IAFF 3188	Special Topics in Middle East Studies (U.S. Policy in the Persian Gulf)
IAFF 4191	Research Seminar (Political Islam)
PSC 2377	Comparative Politics of the Middle East
PSC 2478	International Relations of the Middle East

*IAFF 2190W (North Africa and the World) is not approved as a Regional Foundations course for students in the Middle East Studies program due to the degree of overlap between issues in North Africa and the Middle East.

Code Title Credits

Research Methods (3 credits)

One course pertaining to qualitative or quantitative social science research methods from the following:

ANTH 3531	Methods in Sociocultural Anthropology
ECON 2123	Introduction to Econometrics
GEOG 2104	Introduction to Cartography and GIS
IAFF 2101	International Affairs Research Methods
IAFF 2190	Special Topics (Political Risk Analysis)
IAFF 3190	Special Topics in International Affairs (Qualitative Research Methods)
PSC 2101	Scope and Methods of Political Science
PSC 2102	Visualizing and Modeling Politics
PSYC 2101	Research Methods in Psychology
PUBH 3131	Epidemiology: Measuring Health and Disease
PUBH 3199	Topics in Public Health (Qualitative Research Methods)
SOC 2101	Social Research Methods
SOC 2111	Field Research
STAT 1051	Introduction to Business and Economic Statistics *
STAT 1053	Introduction to Statistics in Social Science *
STAT 1111	Business and Economic Statistics I *
STAT 1127	Statistics for the Biological Sciences
STAT 2112	Business and Economic Statistics II
STAT 2183	Intermediate Statistics Lab/Packages
or STAT 2183W	Intermediate Statistical Laboratory: Statistical Computing Packages

*Credit for only one of the following courses may be applied toward a degree: STAT 1051, STAT 1053, STAT 1111, or STAT 1127.

STAT courses may not be double-counted between the Math requirement and the research methods requirement.

Code	Title	Credits		
Multi-disciplinary Core (24 credits)				
The following lists are not exhaustive and new courses may be added at any time. Contact the Director of the Middle East Studies program for approval to count a course not listed toward one of these requirements.				
History (6 credits)				
Two courses from the following:				
HIST 2803	The Ancient Near East and Egypt to 322 B.C.		ARAB 3502	Arab Film and Culture in English
HIST 2804	History of Ancient Israel		ARAB 4001	Genres in Modern Arabic Literature
HIST 3801	Topics in Middle Eastern History		ARAB 4002	Arabic Narratives Through the Ages
HIST 3810	History of the Middle East to 1800		HEBR 3101	Modern Hebrew Literary Classics in Translation
HIST 3811	The Emergence of the Modern Middle East		HEBR 3102	Israeli Society and Culture: Literary Perspectives
HIST 3820	History of Israel		HEBR 3103	Israeli Cinema (in English)
or HIST 3820W	The History of Israel		HEBR 3104W	Gender and Sexuality in Israel
HIST 3825	Land and Power in Israel/Palestine		HEBR 3301	Modern Hebrew Fiction
HIST 3830	History of Iraq		or HEBR 3301W	Modern Hebrew Fiction
HIST 3850	Modern Iran		HEBR 4001	Advanced Hebrew Literature I
Economics (3 credits)			HEBR 4002	Advanced Hebrew Literature II
One course from the following:			REL 3432	Persian Sufi Literature East and West
ECON 2136	Environmental and Natural Resource Economics		Political Science (6 credits)	
ECON 2151	Economic Development		Two courses from the following:	
or ECON 2151W	Economic Development		PSC 2377	Comparative Politics of the Middle East
ECON 2180	Survey of International Economics		PSC 2379	Politics and Foreign Policy of Israel
ECON 2181	International Trade Theory and Policy		PSC 2476	The Arab-Israeli Conflict
ECON 2182	International Macroeconomic Theory and Policy		or PSC 2476W	The Arab-Israeli Conflict
Middle East Arts and Literature (3 credits)			PSC 2478	International Relations of the Middle East
One course from the following:			Religion (6 credits)	
AH 3113	Islamic Art and Architecture		Two courses from the following:	
ARAB 3301	Modern Arabic Literature		REL 2401	Islam
ARAB 3501	Arabic and Arab Identity		REL 3405	Shi'ite Islam
			REL 3414	Islamic Philosophy and Theology
			REL 3425	Islamic Political Thought
			REL 3431	Sufism/Islamic Mysticism
			REL 3432	Persian Sufi Literature East and West
			REL 3475	Islamic Religion and Art
			REL 3481	Women in Islam
			REL 3482	Gender and Piety in Islam

REL 3990 Selected Topics in Religion (topic: Law and Diplomacy in the Ancient Near East and the Mediterranean. Same as REL 3990W: Law and Diplomacy in the Ancient Near East and the Mediterranean)

Related Coursework (6 credits)

Two courses related to the Middle East from any discipline, including International Affairs (IAFF), selected with the approval of the Middle East Studies program director.

Study Abroad

Students are encouraged to study in the Middle East through one of GW's formal partnerships with a regional university or an approved self-designed study abroad program.

ECON 1012 Principles of Economics II

HIST 1011 World History, 1500-Present

PSC 1001 Introduction to Comparative Politics

One of the following (not required in the first year):

ANTH 1002 Sociocultural Anthropology

ANTH 1004 Language in Culture and Society

GEOG 1001 Introduction to Human Geography

With advisor approval, a student may select another introductory social science course if s/he can demonstrate why it is relevant to the student's academic pursuits. An example of a course that might be accepted is GEOG 1003.

BACHELOR OF SCIENCE WITH A MAJOR IN INTERNATIONAL AFFAIRS

GENERAL REQUIREMENTS

General requirements

Elliott School bachelor's degrees engage students with global issues through multidisciplinary and interdisciplinary approaches. Students begin their studies in the first year with foundational courses in political science, economics, history, and anthropology or geography. They supplement these courses with others in the traditional liberal arts categories of writing, natural or physical science, mathematics or statistics, and the humanities/creative arts, plus two writing in the disciplines courses. Foreign language study also is emphasized early in each program to enable students to satisfy the third-year language proficiency requirement of the bachelor's degree in a timely manner.

Introduction to the major

Code	Title	Credits
------	-------	---------

Prerequisite core (19 credits)

Required

The following courses must be taken in the first year. With the exception of IAFF 1001 (fall), ECON 1011 (fall) and ECON 1012 (spring), courses can be taken in fall or spring. IAFF 1001 is not required for internal or external transfer students.

IAFF 1001	First-Year Experience
-----------	-----------------------

IAFF 1005	Introduction to International Affairs
-----------	---------------------------------------

ECON 1011	Principles of Economics I
-----------	---------------------------

Supporting courses in the liberal arts

Code	Title	Credits
------	-------	---------

Writing (credits vary)

Writing requirements are established by the University Writing Program. Students must complete UW 1020 in their first year before enrolling in a Writing in the Discipline (WID) course for WID credit. The two required WID courses should be taken in the student's major, minor, or a related field, and must be completed in separate semesters to receive WID credit. WID courses are designated in this Bulletin with a "W" appended to the course number, e.g., HIST 2340W.

Required

UW 1020	University Writing
---------	--------------------

Two WID courses

Mathematics or statistics (3 credits)

MATH courses numbered 1051 and above require a placement test. Credit for only one of the following MATH courses may be applied toward a degree: MATH 1221, MATH 1231, or MATH 1252. Credit for only one of the following STAT courses may be applied toward a degree: STAT 1051, STAT 1053, STAT 1111, or STAT 1127. STAT courses may not be double-counted between the Mathematics requirement and the Research Methods requirement (see "Major Requirements.")

One of the following:

MATH 1007	Mathematics and Politics
-----------	--------------------------

MATH 1008	History of Mathematics
-----------	------------------------

MATH 1009	Mathematical Ideas I
-----------	----------------------

MATH 1010	Mathematical Ideas II
-----------	-----------------------

MATH 1051	Finite Mathematics for the Social and Management Sciences	GEOL 1001	Physical Geology
MATH 1221	Calculus with Precalculus II	GEOL 1002	Historical Geology
MATH 1231	Single-Variable Calculus I	GEOL 1005	Environmental Geology
MATH 1232	Single-Variable Calculus II	HONR 1033	Honors Seminar: Scientific Reasoning and Discovery
MATH 1252	Calculus for the Social and Management Sciences	HONR 1034	Honors Seminar: Scientific Reasoning and Discovery
MATH 2233	Multivariable Calculus	PHYS 1003	Physics for Future Presidents
STAT 1051	Introduction to Business and Economic Statistics	PHYS 1007	Music and Physics
STAT 1053	Introduction to Statistics in Social Science	PHYS 1011	General Physics I
STAT 1111	Business and Economic Statistics I	PHYS 1012	General Physics II
STAT 1127	Statistics for the Biological Sciences	PHYS 1021	University Physics I
Science (3 to 4 credits), lab required		PHYS 1022	University Physics II
One of the following:		PHYS 1025	University Physics I with Biological Applications
ANTH 1001	Biological Anthropology	PHYS 1026	University Physics II with Biological Applications
ANTH 3412	Hominin Evolution	Humanities/creative arts (9 credits)*	
ASTR 1001	Stars, Planets, and Life in the Universe	This requirement can be satisfied by completing 9 credits in humanities courses, or 6 credits in humanities courses and 3 credits in creative arts courses.	
ASTR 1002	Origins of the Cosmos	Humanities—two or three of the following:	
BISC 1005	The Biology of Nutrition and Health	Any Art History (AH) course except AH 4199.	
BISC 1006	The Ecology and Evolution of Organisms	AMST 1160	Race, Gender, and Law

Literature and film classes in the Departments of Classical and Near Eastern Languages and Civilizations; East Asian Languages and Literatures; English; and Romance, German, Slavic Languages and Literatures also fulfill this requirement.

Creative Arts—a maximum of 3 credits from the following:

Any Corcoran Studio Arts (CSA) course.

ENGL 1210	Introduction to Creative Writing
ENGL 2460	Fiction Writing
ENGL 2470	Poetry Writing
ENGL 2560	Intermediate Fiction Writing
ENGL 3390	Topics in Creative Writing
Non-ensemble performance study (MUS) courses, including:	
MUS 1101	Elements of Music Theory
MUS 1102	Comprehensive Musicianship I
MUS 1106	Introduction to Musical Performance and Experience
MUS 2102	Comprehensive Musicianship II

MUS 2134	Composition
MUS 2173	Comprehensive Musicianship for Jazz
MUS 4184	Advanced Composition
Performance Study Courses (TRDA), including:	
TRDA 1035	Theatre Production
TRDA 1151	Beginning/Intermediate Ballet
TRDA 1152	Beginning Modern/Postmodern Dance
TRDA 1153	Beginning/Intermediate Modern/Postmodern Dance
TRDA 1170 & TRDA 1171	Intermediate Modern/Postmodern Dance I and Intermediate Modern/Postmodern Dance II
TRDA 1214	Beginning Acting
TRDA 1330	Basics of Production Design
TRDA 2160	Intermediate Ballet
TRDA 2172	Intermediate/Advanced Modern/Postmodern Dance I
TRDA 2173	Intermediate/Advanced Modern/Postmodern Dance II
TRDA 2179	Contact Improvisation
TRDA 2180	Movement Improvisation/Performance
TRDA 2192	Repertory/Performance
TRDA 2193 & TRDA 2194	Dance Styles I and Dance Styles II
TRDA 2215	Intermediate Acting
TRDA 2250	Dramatic Writing
TRDA 2339	Theatre Practicum
TRDA 3174	Advanced Modern/Postmodern Dance I
TRDA 3175	Advanced Modern/Postmodern Dance II
TRDA 3182 & TRDA 3183	Dance Composition I and Dance Composition II
TRDA 3186	Embodied Kinesis for Dance
TRDA 3222	Topics in Advanced Acting
TRDA 3240	Introduction to Dramaturgy

TRDA 3250	Intermediate Dramatic Writing
TRDA 3331	Introduction to Lighting
TRDA 3332	Theatrical Makeup Design
TRDA 3333	Stage Management
TRDA 3335	Introduction to Scene Design
TRDA 3336	Introduction to Costuming
TRDA 4184	Choreography and Performance
TRDA 4275	Directing for the Theatre
TRDA 4338	Scene Painting

*Some MUS and TRDA courses may be repeated for credit. Consult course descriptions in this Bulletin for additional information. All courses must be taken for a letter grade to fulfill this requirement. Courses taken Pass/No Pass are not accepted.

**Note that MUS 2661 is a prerequisite to MUS 2662.

MAJOR REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs, Undergraduate Programs (<http://bulletin.gwu.edu/international-affairs/#regulationtext>).

A minimum of 120 credits, which includes completion of either a concentration or a second major. The total number of required credits depends on which option the student selects.

Advanced fundamentals (15 to 18 Credits)

Advanced Fundamentals build on the Introduction to the Major (p. 853) and continue the student's education in the basic skills of international affairs. Fundamentals focus on central disciplines such as economics, history, and political science, and other relevant disciplines, such as anthropology and geography. In addition, students gain a broader understanding of at least two regions of the world outside of the United States.

A minimum grade of C- must be earned in all international affairs major courses. This includes advanced fundamentals, regional foundations, advanced STEM requirements, concentrations, and foreign language (the last course used to prove third-year proficiency).

With the exception of WID courses, courses may not be double-counted between any international affairs requirements.

Advanced fundamental courses are divided into the following areas. Course options for each are listed below.

Research methods (3 credits)
International economics (3 or 6 credits)
Historical analysis: U.S. foreign policy (3 credits)
International and comparative politics (3 credits)
Anthropology or geography (3 credits)

Code	Title	Credits
Research Methods (3 credits)		
One course pertaining to qualitative or quantitative social science research methods from the following:		
ANTH 3531	Methods in Sociocultural Anthropology	
ECON 2123	Introduction to Econometrics	
GEOG 2104	Introduction to Cartography and GIS	
IAFF 2101	International Affairs Research Methods	
IAFF 2190	Special Topics (Political Risk Analysis)	
IAFF 3190	Special Topics in International Affairs (Qualitative Research Methods)	
PSC 2101	Scope and Methods of Political Science	
PSC 2102	Visualizing and Modeling Politics	
PSYC 2101	Research Methods in Psychology	
PUBH 3131	Epidemiology: Measuring Health and Disease	
PUBH 3199	Topics in Public Health (Qualitative Research Methods)	
SOC 2101	Social Research Methods	
SOC 2111	Field Research	
STAT 1051	Introduction to Business and Economic Statistics *	
STAT 1053	Introduction to Statistics in Social Science *	
STAT 1111	Business and Economic Statistics I *	
STAT 1127	Statistics for the Biological Sciences	
STAT 2112	Business and Economic Statistics II	
STAT 2183	Intermediate Statistics Lab/Packages	
or STAT 2183W	Intermediate Statistical Laboratory: Statistical Computing Packages	

*Credit for only one of the following courses may be applied toward a degree: STAT 1051, STAT 1053, STAT 1111, or STAT 1127.

STAT courses may not be double-counted between the Math requirement and the research methods requirement.

Code	Title	Credits
------	-------	---------

International Economics (3 or 6 credits)

One or two courses pertaining to the theory of international economics, selected from one of the following three options:

Option one (3 credits):

ECON 2180	Survey of International Economics
-----------	-----------------------------------

Option two (6 credits):

ECON 2181 & ECON 2182	International Trade Theory and Policy and International Macroeconomic Theory and Policy
--------------------------	---

Option three (6 credits):

ECON 2182 & ECON 3181	International Macroeconomic Theory and Policy and International Trade Theory
--------------------------	--

*Students pursuing the international economics concentration must select either option two or option three.

The following courses are required as prerequisites for ECON 3181: ECON 2101 or ECON 2103; and MATH 1221 or MATH 1231 or MATH 1252.

Credit cannot be earned for both ECON 2181 and ECON 3181.

Code	Title	Credits
------	-------	---------

Historical Analysis: U.S. Foreign Policy (3 credits)

One of the following courses pertaining to the history of the U.S. approach to contemporary international affairs:

HIST 2340	U.S. Diplomatic History
-----------	-------------------------

HIST 3035	The United States and the Wars in Indochina, 1945-1975
-----------	--

HIST 3332	History of American Foreign Policy Since World War II (I)
-----------	---

HIST 3333	History of American Foreign Policy Since World War II (II)
-----------	--

IAFF 3180W	Special Topics in Security Policy (U.S. Grand Strategy)
------------	---

Code	Title	Credits
------	-------	---------

International and Comparative Politics (3 credits)

One of the following courses pertaining to international political issues and theories from either an international relations or comparative politics perspective:

IAFF 2040	Basic Topics in International Affairs (topic: Ethics in International Affairs. Same as PSC 2990: Ethics in International Affairs)
-----------	---

IAFF 2444 or PSC 2444	International Law Public International Law
--------------------------	---

IAFF 3180W	Special Topics in Security Policy (International Politics and Security Policy)
------------	--

IAFF 3190	Special Topics in International Affairs (Issues in Contemporary Diplomacy and National Security)
-----------	--

IAFF 3190	Special Topics in International Affairs (Global Governance)
-----------	---

IAFF 4191W	Research Seminar (International Politics and Security Policy)
------------	---

PSC 2334	Global Perspectives on Democracy
----------	----------------------------------

PSC 2336	State-Society Relations in the Developing World
----------	---

PSC 2337	Development Politics
----------	----------------------

PSC 2338	Nationalism
----------	-------------

PSC 2339	Comparative Political Economy
----------	-------------------------------

PSC 2439	International Political Economy
----------	---------------------------------

PSC 2440	Theories of International Politics
----------	------------------------------------

PSC 2442	International Organizations
----------	-----------------------------

PSC 2444	Public International Law
----------	--------------------------

or IAFF 2444	International Law
--------------	-------------------

PSC 2446	U.S. Foreign Policy
----------	---------------------

PSC 2449	International Security Politics
----------	---------------------------------

PSC 2990	Selected Topics (topic: Ethics in International Affairs. Same as IAFF 2040: Ethics in International Affairs)
----------	--

PSC 2991	Special Topics in Political Thought (Global Justice)
----------	--

PSC 2994	Special Topics in International Relations (U.S. Foreign Policy)
----------	---

Code	Title	Credits
------	-------	---------

Anthropology or Geography (3 credits)

One of the following courses in anthropology or geography relevant to international affairs. Many of these courses have lower-level prerequisites as detailed in course descriptions in this Bulletin.

ANTH 2501	The Anthropology of Gender: Cross-Cultural Perspectives
ANTH 2506	Religion, Myth, and Magic
ANTH 3501	Anthropology of Development
or IAFF 3501	International Development Theory, Policy, and Practice
ANTH 3502	Cultural Ecology
ANTH 3503	Psychological Anthropology
ANTH 3504	Illness, Healing, and Culture
ANTH 3506	Politics, Ethnicity, and Nationalism
ANTH 3507	Kinship, Family, and Community
ANTH 3508	Art and Culture
ANTH 3513	Anthropology of Human Rights
or IAFF 3513	Human Rights and Ethics
ANTH 3601	Language, Culture, and Cognition
ANTH 3691	Special Topics in Linguistic Anthropology (topic: Anthropology of Religion. Same as REL 3990: Anthropology of Religion)
IAFF 3501	International Development Theory, Policy, and Practice
or ANTH 3501	Anthropology of Development
IAFF 3513	Human Rights and Ethics
or ANTH 3513	Anthropology of Human Rights
IAFF 3190	Special Topics in International Affairs (Ethnic and Religious Conflict in Africa)
GEOG 2120	World Regional Geography
GEOG 2125	Transportation Systems and Networks
GEOG 2127	Population Geography

GEOG 2133	People, Land, and Food
GEOG 2134	Energy Resources
GEOG 2136	Water Resources
GEOG 2137	Environmental Hazards
GEOG 2141	Cities in the Developing World
GEOG 2147	Military Geography
GEOG 2148	Economic Geography
GEOG 3132	Environmental Quality and Management
GEOG 3143	Urban Sustainability
GEOG 3145	Cultural Geography
GEOG 3146	Political Geography
GEOG 3810	Planning Cities
REL 3990	Selected Topics in Religion (topic: Anthropology of Religion. Same as ANTH 3691: Anthropology of Religion)

Regional foundations (6 Credits)

Students take two courses from the following to gain an understanding of two regions of the world outside of the United States. These courses must be taken in two different regions.

Code	Title	Credits
Africa		
ANTH 3708	Anthropology of Africa	
ECON 2198	Special Topics in Economics - Regional (Economics of Africa)	
GEOG 3164	The Geography of Africa	
HIST 3501	Topics: Africa (African History Since 1880)	
HIST 3530	Women in Africa	
HIST 3540	West Africa to Independence	
IAFF 2093	Africa: Problems and Prospects	
IAFF 2190W	Special Topics (North Africa and the World) *	
IAFF 2190W	Special Topics (Rising Africa and the World)	

IAFF 3189	Special Topics in African Studies (Ethnic and Religious Conflict in Africa)	IAFF 2091	East Asia-Past and Present
IAFF 3189	Special Topics in African Studies (International Relations in Africa)	IAFF 3186	Special Topics in Asian Studies (Asian Order and Community Building)
IAFF 3189	Special Topics in African Studies (New African Security Frontier)	IAFF 3186	Special Topics in Asian Studies (Current Events in East Asia)
IAFF 3189	Special Topics in African Studies (Religion in Africa)	IAFF 3186	Special Topics in Asian Studies (Development Issues in Southeast Asia)
IAFF 3189	Special Topics in African Studies (Security Challenges in Africa)	IAFF 3186	Special Topics in Asian Studies (East Asian Security)
IAFF 3189	Special Topics in African Studies (Transnational Justice in Africa)	IAFF 3186	Special Topics in Asian Studies (History and Politics of South Asia)
IAFF 3189	Special Topics in African Studies (Women and Leadership in Africa)	IAFF 3186	Special Topics in Asian Studies (Indo-Pacific Security Challenges)
IAFF 3190	Special Topics in International Affairs (Africa: Declassified)	IAFF 3186	Special Topics in Asian Studies (International Relations of South Asia)
IAFF 3190	Special Topics in International Affairs (China and Africa)	IAFF 3186	Special Topics in Asian Studies (Memory and Reconciliation: Asia)
PSC 2381	Comparative Politics of Sub-Saharan Africa	IAFF 3186	Special Topics in Asian Studies (Politics and Conflict of South Asia)
PSC 2482	African International Politics	IAFF 3190	Special Topics in International Affairs (Human Rights and Democracy in Southeast Asia)
PSC 3192W	Proseminar: Political Science (Comparative Politics of Africa)	PSC 2369	Comparative Politics of South Asia
PSC 3192W	Proseminar: Political Science (Development Challenges in Africa)	PSC 2373	Comparative Politics of Southeast Asia
PSC 3192W	Proseminar: Political Science (Government and Politics of Africa)	PSC 2475	International Relations of East Asia
Asia (Students in the BA in Asian studies program must fulfill the Regional Foundations requirement using a course focused in a world region other than Asia.)		PSC 3192W	Proseminar: Political Science (Politics and Protest in East Asia)
ANTH 3703	Cultures of the Pacific	PSC 3192W	Proseminar: Political Science (Protest and Participation in East Asia)
ANTH 3704	Cultures of Southeast Asia	Europe and Eurasia	
ANTH 3705	Anthropology of East Asia	ECON 2199	Special Topics in Economics (Economics of the EU)
ANTH 3791	Topics in Regional Anthropology (Anthropology of South Asia)	HIST 1121	The War of Ideas in European and International History, 1750-Present
ECON 2198	Special Topics in Economics - Regional (East Asian Economies)	HIST 2125	Twentieth-Century Europe
GEOG 3165	Geography of South Asia	HIST 3126	European Integration: A History
HIST 3640	History of Southeast Asia	HIST 3178	The Making of the Modern Balkans
HIST 3650	Modern South Asia, 1750-Present	IAFF 2092	Russia and Eastern Europe: An Introduction

IAFF 2094	Europe: International and Domestic Interactions
IAFF 3185	Special Topics in European and Eurasian Studies (Nationalism in Russia and Eurasia)
IAFF 3185	Special Topics in European and Eurasian Studies (The European Union)
IAFF 3185	Special Topics in European and Eurasian Studies (The European Union and Russia)
IAFF 3190	Special Topics in International Affairs (European Economies and Crisis of Integration)
IAFF 4191W	Research Seminar (Europe)
PSC 2330	Comparative Politics of Western Europe
PSC 2331	Comparative Politics of Central and Eastern Europe
PSC 2332	European Integration
PSC 2994	Special Topics in International Relations (International Politics of Central and Eastern Europe)
Latin America (Students in the BA in Latin American and hemispheric studies program must fulfill the Regional Foundations requirement using a course focused in a world region other than Latin America.)	
ANTH 3702	Anthropology of Latin America
ECON 2185	Economic History and Problems of Latin America
GEOG 3161	Geography of Latin America
HIST 3701	Topics in Latin American History (Latin America and the World Since 1820)
HIST 3710	History of Latin America I
HIST 3711	History of Latin America II
IAFF 2090	Latin America: Problems and Promise
IAFF 3177	Political Economy of Latin America
IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Economic and Social Development of Latin America)
IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Latin American Migration)
IAFF 3194W	Latin America's Violent Peace

PSC 2383	Comparative Politics of Latin America
PSC 2484	International Relations of Latin America
Middle East (Students in the BA in Middle East studies program must fulfill the Regional Foundations requirement using a course focused in a world region other than the Middle East.)	
ANTH 3707	Anthropology of the Middle East
GEOG 3154	Geography of the Middle East and North Africa
HIST 3801	Topics in Middle Eastern History (Gender and the Middle East)
HIST 3810	History of the Middle East to 1800
HIST 3811	The Emergence of the Modern Middle East
IAFF 2095	The Middle East in International Affairs
IAFF 2190W	Special Topics (Arab Politics)
IAFF 2190W	Special Topics (Challenges and Change in the Middle East)
IAFF 2190W	Special Topics (North Africa and the World)
IAFF 2190W	Special Topics (Politics and Culture in the Middle East)
IAFF 3188	Special Topics in Middle East Studies (The Middle East Since WWII)
IAFF 3188	Special Topics in Middle East Studies (Militaries and Politics in the Middle East)
IAFF 3188	Special Topics in Middle East Studies (Political Islam)
IAFF 3188	Special Topics in Middle East Studies (Security Issues in the Greater Middle East)
IAFF 3188	Special Topics in Middle East Studies (U.S. Policy in the Persian Gulf)
IAFF 4191	Research Seminar (Political Islam)
PSC 2377	Comparative Politics of the Middle East
PSC 2478	International Relations of the Middle East

*IAFF 2190W (North Africa and the World) is not approved as a Regional Foundations course for students in the Middle East Studies program due to the degree of overlap between issues in North Africa and the Middle East.

Advanced requirements (18 or more credits)

Students take six courses in STEM disciplines at the 2000-level or above. These courses must include scientific or quantitative reasoning or analysis, and must be approved by the Elliott School academic advisor. MATH 1232, CSCI 1112, and CSCI 1311 may count toward this requirement.

The below courses are currently approved for the BSIA Advanced STEM requirement. A list of courses that have already been reviewed but are not approved is available on the BSIA webpage. If you are interested in taking a course for the STEM requirement that is not on this list, please submit a Course Substitution Request (<https://form.jotform.us/ESIA/course-substitution-request/>) to have the course reviewed.

Code	Title	Credits
BSIA Advanced STEM Requirement		
ACCY 2001	Introduction to Financial Accounting	
ACCY 3106	Financial Statement Analysis	
ANAT 2160	Human Functional Neuroanatomy	
APSC 2057	Analytical Mechanics I	
APSC 2058	Analytical Mechanics II	
BADM 3501	Financial Management and Markets	
BADM 3601	Operations Management	
BISC 2207	Genetics	
BISC 2214	Developmental Biology	
BISC 2220	Developmental Neurobiology	
BISC 2320	Neural Circuits and Behavior	
BISC 2450	Organic Evolution	
BISC 2452 & BISC 2453	Animal Behavior and Animal Behavior Lab	
BISC 3209	Molecular Biology	
BISC 3458 & BISC 3453	Plant Comparative Structure and Function and Plant Comparative Structure and Function Lab	
CE 2220	Introduction to the Mechanics of Solids	

CHEM 2085	Environmental Chemistry
CHEM 2122	Introductory Quantitative Analysis
CHEM 2123	Introductory Quantitative Analysis Laboratory
or CHEM 2123W	Introductory Quantitative Analysis Laboratory

Concentration or second major option (15 or more credits)

A concentration represents an academic and professional specialization within the field of international affairs. Students in the BS in international affairs program may complete one of the functional or regional concentrations listed below or they may take 15 credits in courses that count toward a second major.

- Concentrations consist of five courses (15 credits) relating to the functional or regional themes below.
- Concentrations must consist of courses from at least two different academic departments.
- Concentrations and second majors must be declared no later than the end of the second semester of the student's sophomore year. Concentrations must be declared by completing the online Concentration Declaration Form (<https://form.jotform.us/ESIA/concentration-declaration/>).

- With the exception of WID courses, courses may not be double-counted between any international affairs requirements.
- A minimum grade of C- must be earned in all concentration courses.

Functional Concentrations

- Comparative Political, Economic, and Social Systems (p. 871)
- Conflict Resolution (p. 873)
- Contemporary Cultures and Societies (p. 876)
- Global Public Health (p. 879)
- International Development (p. 880)
- International Economics (p. 883)
- International Environmental Studies (p. 885)
- International Politics (p. 886)
- Security Policy (p. 892)

Regional Concentrations

- Africa (p. 868)
- Asia (p. 869)
- Europe and Eurasia (p. 878)
- Latin America (p. 890)
- Middle East (p. 891)

Electives

In consultation with an academic advisor, students complement their required coursework with elective courses to complete their second major or fulfill remaining credit hour requirements.

Foreign language requirement

Students must demonstrate third-year proficiency in a modern foreign language by examination or coursework. Additional information regarding the Elliott School foreign language examinations is available from the academic advisor. This requirement is waived automatically for students who were required to take the TOEFL or IELTS examination as part of GW's admissions process.

SPAN 1034 Intensive Intermediate Spanish

SPAN 2056 Intensive Advanced Spanish

Or

Option three:

SPAN 1013 Intermediate Spanish I: the Spanish-
speaking world

SPAN 1014 Intermediate Spanish II: the Spanish-
speaking world

SPAN 2026 Advanced Spanish for Heritage
Learners *

Or

Option four:

SPAN 1034 Intensive Intermediate Spanish

or SPAN 1134 Intensive Intermediate Spanish for Heritage
Learners

SPAN 2026 Advanced Spanish for Heritage
Learners *

Or

Option five:

SPAN 1013 Intermediate Spanish I: the Spanish-
speaking world

SPAN 1014 Intermediate Spanish II: the Spanish-
speaking world

SPAN 2005 Advanced Spanish I

SPAN 2006 Advanced Spanish II

or SPAN 2026 Advanced Spanish for Heritage Learners

*Spanish language options three and four require an interview prior to enrolling in SPAN 2026. Please contact the Department of Romance, German, and Slavic Languages and Literatures for additional information about these options.

CONCENTRATIONS

All students in the BA in international affairs program must complete either a functional or regional concentration, which are listed below. Students in the BS in international affairs program may complete one of these concentrations or they may take 15 credits in courses that count toward a second major in a STEM-related discipline.

To fulfill the concentration requirement, students complete five courses (15 credits) relating to their chosen functional or regional theme. These courses must be taken in at least two different academic departments. Students must declare a concentration no later than the end of the second semester of their sophomore year by completing the Concentration Declaration Form (<https://form.jotform.us/ESIA/concentration-declaration/>). With the exception of WID courses, courses may not be double-counted between any international affairs requirements. A minimum grade of C- must be earned in all concentration courses.

Concentrations

Functional concentrations

- Comparative Political, Economic, and Social Systems (p. 871)
- Conflict Resolution (p. 873)
- Contemporary Cultures and Societies (p. 876)
- Global Public Health (p. 879)
- International Development (p. 880)
- International Economics (p. 883)
- International Environmental Studies (p. 885)

- International Politics (p. 886)
- Security Policy (p. 892)

Regional concentrations

- Africa (p. 868)
- Asia (p. 869)
- Europe and Eurasia (p. 878)
- Latin America (p. 890)
- Middle East (p. 891)

DUAL BS IN INTERNATIONAL AFFAIRS AND MS IN INFORMATION SYSTEMS TECHNOLOGY

The Elliott School for International Affairs (ESIA) and GW School of Business (GWSB) offer a dual bachelor of science in international affairs (p. 919) and master of science in information systems (p. 581) degree program. The combined program allows students to take 9 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Visit the ESIA (<https://elliott.gwu.edu/>) and GWSB (<https://business.gwu.edu/academics/programs/undergraduate/bs-information-systems/>) websites for additional information.

DUAL BS IN INTERNATIONAL AFFAIRS AND MASTER IN MANAGEMENT

The Elliott School for International Affairs and GW School of Business offer a dual bachelor of science in international affairs (p. 919) and master in management (p. 572) degree program. The combined program allows students to take 9 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Visit the ESIA (<https://elliott.gwu.edu/>) and GWSB (<https://business.gwu.edu/>) websites for additional information.

DUAL BS IN INTERNATIONAL AFFAIRS AND MS IN BUSINESS ANALYTICS

The Elliott School for International Affairs and GW School of Business offer a dual bachelor of science in international affairs (p. 919) and master of science in the field of business analytics (p. 581) degree program. The combined program allows students to take 9 graduate credits as part of their undergraduate program, thereby decreasing the number

of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Visit the ESIA (<https://elliott.gwu.edu/undergraduate-academics/>) and GWSB (<https://gsehd.gwu.edu/academics/>) websites for additional information.

MINOR IN INTERNATIONAL AFFAIRS

The following requirements must be fulfilled: 18 to 21 credits in coursework for the minor and 0 to 8 credits of foreign language, as outlined below.

A minimum grade of C- is required in all courses taken to satisfy the minor.

Foreign language (0 to 8 credits)

Students must demonstrate first-year proficiency in a modern foreign language by examination or coursework. Additional information regarding the Elliott School foreign language examinations is available from the academic advisor.

Advanced fundamentals

Anthropology or geography (3 credits)

One of the following courses in anthropology or geography relevant to international affairs. Many of these courses have lower-level prerequisites as detailed in course descriptions in this Bulletin.

Code	Title	Credits
ANTH 2501	The Anthropology of Gender: Cross-Cultural Perspectives	
ANTH 2506	Religion, Myth, and Magic	
ANTH 3501	Anthropology of Development	
or IAFF 3501	International Development Theory, Policy, and Practice	
ANTH 3502	Cultural Ecology	
ANTH 3503	Psychological Anthropology	

ANTH 3504	Illness, Healing, and Culture
ANTH 3506	Politics, Ethnicity, and Nationalism
ANTH 3507	Kinship, Family, and Community
ANTH 3508	Art and Culture
ANTH 3513	Anthropology of Human Rights
or IAFF 3513	Human Rights and Ethics
ANTH 3601	Language, Culture, and Cognition
ANTH 3691	Special Topics in Linguistic Anthropology (Language and Religion)
IAFF 3501	International Development Theory, Policy, and Practice
or ANTH 3501	Anthropology of Development
IAFF 3513	Human Rights and Ethics
or ANTH 3513	Anthropology of Human Rights
GEOG 2120	World Regional Geography
GEOG 2125	Transportation Systems and Networks
GEOG 2127	Population Geography
GEOG 2133	People, Land, and Food
GEOG 2134	Energy Resources
GEOG 2136	Water Resources
GEOG 2137	Environmental Hazards
GEOG 2141	Cities in the Developing World
GEOG 2147	Military Geography
GEOG 2148	Economic Geography
GEOG 3132	Environmental Quality and Management
GEOG 3143	Urban Sustainability
GEOG 3145	Cultural Geography
GEOG 3146	Political Geography
GEOG 3810	Planning Cities

Historical analysis: U.S. foreign policy (3 credits)

One of the following courses pertaining to the history of the U.S. approach to contemporary international affairs.

Code	Title	Credits
HIST 2340	U.S. Diplomatic History	
HIST 3035	The United States and the Wars in Indochina, 1945-1975	
HIST 3332	History of American Foreign Policy Since World War II (I)	
HIST 3333	History of American Foreign Policy Since World War II (II)	
IAFF 3180W	Special Topics in Security Policy (U.S. Grand Strategy)	

International and comparative politics (3 credits)

One of the following courses pertaining to international political issues and theories from either an international relations or comparative politics perspective:

Code	Title	Credits
IAFF 2040	Basic Topics in International Affairs (topic: Ethics in International Affairs. Same as PSC 2990: Ethics in International Affairs)	
IAFF 2444 or PSC 2444	International Law Public International Law	
IAFF 3180W	Special Topics in Security Policy (International Politics and Security Policy)	
IAFF 3190	Special Topics in International Affairs (Global Governance)	
IAFF 3190 or PSC 2444	Special Topics in International Affairs (International Law) Public International Law	
IAFF 3190	Special Topics in International Affairs (Issues in Contemporary Diplomacy and National Security)	
IAFF 4191W	Research Seminar (International Politics and Security Policy)	
PSC 2334	Global Perspectives on Democracy	
PSC 2336	State-Society Relations in the Developing World	
PSC 2337	Development Politics	
PSC 2338	Nationalism	
PSC 2339	Comparative Political Economy	

PSC 2439	International Political Economy
PSC 2440	Theories of International Politics
PSC 2442	International Organizations
PSC 2444 or IAFF 2444	Public International Law International Law
PSC 2446	U.S. Foreign Policy
PSC 2449	International Security Politics
PSC 2990	Selected Topics (topic: Ethics in International Affairs. Same as IAFF 2040: Ethics in International Affairs)
PSC 2991	Special Topics in Political Thought (Global Justice)
PSC 2994	Special Topics in International Relations (U.S. Foreign Policy)

International economics (3 or 6 credits)

One or two courses pertaining to the theory of international economics, selected from one of the following three options:

Code	Title	Credits
Option One (3 credits):		
ECON 2180	Survey of International Economics	
Option Two (6 credits):		
ECON 2181 & ECON 2182	International Trade Theory and Policy and International Macroeconomic Theory and Policy	
Option Three (6 credits):		
ECON 2182 & ECON 3181	International Macroeconomic Theory and Policy and International Trade Theory	

The following courses are required as prerequisites for ECON 3181: ECON 2101 or ECON 2103; and MATH 1221 or MATH 1231 or MATH 1252.

Credit cannot be earned for both ECON 2181 and ECON 3181.

Regional foundations

Students take two courses (at least 6 credits) from the following to gain an understanding of two regions of the world outside of the United States. These courses must be taken in two different regions.

Code	Title	Credits	
Africa			PSC 3192W Proseminar: Political Science (Government and Politics of Africa)
ANTH 3708	Anthropology of Africa		Asia (Students in the BA in Asian studies program must fulfill the Regional Foundations requirement using a course focused in a world region other than Asia.)
ECON 2198	Special Topics in Economics - Regional (Economics of Africa)		ANTH 3703 Cultures of the Pacific
GEOG 3164	The Geography of Africa		ANTH 3704 Cultures of Southeast Asia
HIST 3501	Topics: Africa (African History Since 1880)		ANTH 3705 Anthropology of East Asia
HIST 3530	Women in Africa		ANTH 3791 Topics in Regional Anthropology (Anthropology of South Asia)
HIST 3540	West Africa to Independence		ECON 2198 Special Topics in Economics - Regional (East Asian Economies)
IAFF 2093	Africa: Problems and Prospects		GEOG 3165 Geography of South Asia
IAFF 2190W	Special Topics (North Africa and the World) *		HIST 3640 History of Southeast Asia
IAFF 2190W	Special Topics (Rising Africa and the World)		HIST 3650 Modern South Asia, 1750-Present
IAFF 3189	Special Topics in African Studies (Ethnic and Religious Conflict in Africa)		IAFF 2091 East Asia-Past and Present
IAFF 3189	Special Topics in African Studies (International Relations in Africa)		IAFF 3186 Special Topics in Asian Studies (Asian Order and Community Building)
IAFF 3189	Special Topics in African Studies (New African Security Frontier)		IAFF 3186 Special Topics in Asian Studies (Current Events in East Asia)
IAFF 3189	Special Topics in African Studies (Religion in Africa)		IAFF 3186 Special Topics in Asian Studies (Development Issues in Southeast Asia)
IAFF 3189	Special Topics in African Studies (Security Challenges in Africa)		IAFF 3186 Special Topics in Asian Studies (East Asian Security)
IAFF 3189	Special Topics in African Studies (Transnational Justice in Africa)		IAFF 3186 Special Topics in Asian Studies (History and Politics of South Asia)
IAFF 3189	Special Topics in African Studies (Women and Leadership in Africa)		IAFF 3186 Special Topics in Asian Studies (Indo- Pacific Security Challenges)
IAFF 3190	Special Topics in International Affairs (Africa: Declassified)		IAFF 3186 Special Topics in Asian Studies (International Relations of South Asia)
IAFF 3190	Special Topics in International Affairs (China and Africa)		IAFF 3186 Special Topics in Asian Studies (Memory and Reconciliation: Asia)
PSC 2381	Comparative Politics of Sub-Saharan Africa		IAFF 3186 Special Topics in Asian Studies (Politics and Conflict of South Asia)

IAFF 4191	Research Seminar (Political Islam)
PSC 2377	Comparative Politics of the Middle East
PSC 2478	International Relations of the Middle East
*IAFF 2190W (North Africa and the World) is not approved as a Regional Foundations course for students in the Middle East Studies program due to the degree of overlap between issues in North Africa and the Middle East.	

GRADUATE PROGRAMS

Master's programs

- Master of Arts in the field of Asian studies (p. 943)
- Master of Arts in the field of European and Eurasian studies (p. 952)
- Master of Arts in the field of global communication (p. 960)
- Master of Arts in the field of international affairs (p. 970)
- Master of Arts in the field of international development studies (p. 986)
- Master of Arts in the field of international economic policy (p. 999)
- Master of Arts in the field of international economic policy, STEM Track (p. 1000)
- Master of Arts in the field of international science and technology policy (p. 1001)
- Master of Arts in the field of international trade and investment policy (p. 1004)
- Master of Arts in the field of Latin American and hemispheric studies (p. 1006)
- Master of Arts in the field of Middle East studies (p. 1012)
- Master of Arts in the field of security policy studies (p. 1027)
- Master of International Policy and Practice (p. 1032)
- Master of International Policy and Practice - Online (p. 1033)
- Master of International Studies (p. 1034)

Combined programs

- Dual Master of Arts in any Elliott School graduate program and Master of Public Health (p. 1036)
- Joint Master of Arts and Juris Doctor (p. 1036)
- Joint Master of Arts in Elliott School programs and Master of Business Administration (p. 1037)

MASTER OF ARTS IN THE FIELD OF ASIAN STUDIES

The Sigur Center for Asian Studies at the Elliott School administers the MA program in Asian studies and offers students many valuable resources and opportunities. The program is directed by a large, renowned faculty whose expertise includes foreign affairs, security and policy, language and culture, economics, and history of East, Southeast, and South Asia. The highly diverse and experienced faculty prepares students for careers in the public, private, and non-profit sectors through rigorous coursework in political science, history, and international affairs. To supplement studies in Washington, D.C., the Sigur Center also provides funding for summer language study and research projects in Asia.

Visit the program website (<https://elliott.gwu.edu/academics/graduate/asian-studies/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including 9 credits in core field courses, a 4-credit capstone sequence, 9 credits in a thematic specialization courses, 6 credits in a professional specialization, a 3-credit research methods course, and 9 credits in elective courses. In addition, all students must fulfill a foreign language proficiency requirement (see below).

See notes regarding special topics and skills courses, the capstone sequence, and the thesis option*.

Code	Title	Credits
Required		
Core courses (9 credits)		
HIST 6602	Asia: History, Memory, and Violence	
PSC 6475	International Politics of East Asia	
PSC 6373	Political Economy of Industrializing Asia	
Capstone sequence (4 credits)		

Students complete a two-course capstone sequence that most closely matches the thematic area of their project. The capstone sequence includes a 2-credit capstone workshop taken before the 2-credit capstone seminar. Students must have completed at least 18 credits of coursework prior to starting the capstone sequence. The two 2-credit capstone courses must be taken consecutively.

IAFF 6898	Capstone Workshop
-----------	-------------------

IAFF 6899	Capstone Course
-----------	-----------------

Thematic specialization (9 credits)

Three courses in a thematic specialization. Students may design their own field with the approval of the Program Director, or select one of the specializations listed below.

Professional specialization (6 credits)

Two courses in a professional specialization. Students may design their own field with the approval of the Program Director, or select one of the specializations listed below.

Research methods course (3 credits)

Research methods courses are listed below under professional specializations. The course selected to fulfill this requirement cannot also count toward the 2-course requirement for the professional specialization.

Electives (9 credits)

9 credits in elective courses. Students may use elective credits for foreign language, background coursework, or 1-credit skills courses.

Skills courses

Skills courses are designed to supplement substantive graduate coursework with practical skills and knowledge that students need to perform effectively in the workplace. A maximum of three one-credit skills courses may be taken as electives.

IAFF 6502	Professional Skills I
-----------	-----------------------

IAFF 6503	Professional Skills II
-----------	------------------------

IAFF 6504	Intermediate Conversation
-----------	---------------------------

Additional thesis option

Students who wish to complete a thesis do so in addition to the capstone requirement. Students pursuing a thesis must have a minimum GPA of 3.5 and approval from the faculty member who will serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credits are counted as elective or specialization credits with Program Director approval. The two 3-credit thesis courses must be taken consecutively.

IAFF 6998	Thesis
-----------	--------

IAFF 6999	Thesis
-----------	--------

Thematic specialization courses (9 credits)

Code	Title	Credits
------	-------	---------

Three courses from one of the following areas. Courses taken for the thematic specialization cannot also be counted toward the professional specializations or vice versa.

History of Modern Asia

HIST 6001	Special Topics (China-Japan Relations in History)
-----------	---

HIST 6001	Special Topics (Gender, Power, and Sexuality in East Asia)
-----------	--

HIST 6301	Topics: U.S. History (U.S.-Asia Relations)
-----------	--

HIST 6601	Topics: Asian History (China-Japan Relations in History)
-----------	--

HIST 6601	Topics: Asian History (Geography and Politics of Afghanistan and South and Central Asia)
-----------	--

HIST 6610	Readings Seminar: Late Imperial China
-----------	---------------------------------------

HIST 6611	Readings Seminar: Twentieth-Century China
-----------	---

HIST 6625	Japan's Empire and Its Legacies
-----------	---------------------------------

HIST 6630	Special Topics in Korean History (Modern Korea)
-----------	---

HIST 6641	Modern Southeast Asia
-----------	-----------------------

HIST 6801	Topics in Middle Eastern History (Central Asia: Crossroads of Empire)
-----------	---

PSC 6388	Topics in Comparative Politics (Vietnam Post War)
----------	---

Politics and Policy in Asia

HIST 6601	Topics: Asian History (Geography and Politics of Afghanistan and South and Central Asia)
-----------	--

IAFF 6186	Special Topics in Security Policy Studies (The Chinese Military)
-----------	--

IAFF 6302	Taiwan: Internal Development and Foreign Policy
-----------	---

PSC 6388	Topics in Comparative Politics (Politics and Policy in Asia)
PSC 6388	Topics in Comparative Politics (State and Society in East Asia)

International Relations of Asia

HIST 6301	Topics: U.S. History (U.S.-Asia Relations)
HIST 6625	Japan's Empire and Its Legacies
IAFF 6186	Special Topics in Security Policy Studies (The Chinese Military)
IAFF 6302	Taiwan: Internal Development and Foreign Policy
IAFF 6305	U.S.-South Asia Relations
IAFF 6308	International Relations of South Asia
PSC 6372	Foreign Policy of China
PSC 6467	Asian Security
PSC 6489	Topics in International Relations (U.S.-China Relations)

Asian Business and Development

ECON 6269	Economy of China I
ECON 6270	Economy of China II
IAFF 6318	Special Topics in Asian Studies (Chinese Business Law)
MBAD 6290	Special Topics (Chinese Economy and the Business Environment)
PSC 6336	The Political Economy of China, India, and Beyond
PSC 6388	Topics in Comparative Politics (The Political Economy of India)

Culture, Art, and Relations of Asia

AH 6262	Seminar in South Asian Art
AH 6265	Seminar in Islamic Art and Architecture
CHIN 3163	Taiwanese Literature and Film
or CHIN 6163	Taiwanese Literature and Film
CHIN 6109	Introduction to Classical Chinese I
CHIN 6110	Introduction to Classical Chinese II
CHIN 6111	Chinese Literature in Translation
CHIN 6112	Chinese Literature in Translation II
ENGL 6260	Seminar in Medieval and Early Modern Studies (Screening Race, Gender and Shakespeare)
ENGL 6510	Writing, Race, and Nation (Asian North American Literature)
ENGL 6560	Postcolonialism (Representing Displacement: Gender, Religion and Migration in Postcolonial South Asia and Beyond)
REL 3990	Selected Topics in Religion (India's Great Epics)
or REL 6557	India's Great Epics

China/Taiwan

CHIN 3163	Taiwanese Literature and Film
or CHIN 6163	Taiwanese Literature and Film
CHIN 3173	Chinese Drama and Theatre
or CHIN 6173	Traditional Chinese Theatre and Drama
CHIN 6111	Chinese Literature in Translation
CHIN 6112	Chinese Literature in Translation II
CHIN 6123	Structure of Chinese
CHIN 6125	History of the Chinese Language
CHIN 6126	Chinese Phonology
CHIN 6128	Chinese Semantics
CHIN 6173	Traditional Chinese Theatre and Drama
CHIN 6180	Twentieth-Century Chinese Literature II
CHIN 6201	Second Language Acquisition of Mandarin Chinese

CHIN 6841	Religion and Politics in China
EALL 3881	Women, Gender, and Religion in China
or EALL 6881	Women, Gender, and Religion in China
ECON 6269	Economy of China I
ECON 6270	Economy of China II
HIST 6001	Special Topics (China-Japan Relations in History)
HIST 6601	Topics: Asian History (China-Japan Relations in History)
HIST 6610	Readings Seminar: Late Imperial China
HIST 6611	Readings Seminar: Twentieth-Century China
IAFF 6186	Special Topics in Security Policy Studies (The Chinese Military)
IAFF 6302	Taiwan: Internal Development and Foreign Policy
IAFF 6318	Special Topics in Asian Studies (Chinese Business Law)
IAFF 6318	Special Topics in Asian Studies (Chinese Law and Legal Institutions)
IAFF 6318	Special Topics in Asian Studies (Law of the People's Republic of China)
MBAD 6290	Special Topics (Chinese Economy and Business Environment)
PSC 6336	The Political Economy of China, India, and Beyond
PSC 6370	Politics of China I
PSC 6371	Politics of China II
PSC 6372	Foreign Policy of China
PSC 6489	Topics in International Relations (U.S.-China Relations)

Korea

HIST 6001	Special Topics (topic: History of North Korea. Same as HIST 3001: History of North Korea)
HIST 6625	Japan's Empire and Its Legacies
HIST 6630	Special Topics in Korean History *

IAFF 6318 Special Topics in Asian Studies (topic: Politics of the Past in Korea. Same as IAFF 3186: Politics of the Past in Korea)

KOR 3111	Korean Literature in Translation
KOR 3162	Korean Culture through Film
PSC 6374	Korean Politics

Japan

HIST 3621	History of Modern Japan
HIST 6601	Topics: Asian History (China-Japan Relations in History)
HIST 6625	Japan's Empire and Its Legacies
JAPN 3111	Japanese Literature in Translation I
JAPN 3112	Japanese Literature in Translation II
JAPN 3162	Japanese Culture Through Film
PSC 6368	Japanese Politics and Foreign Policy
PSC 6388	Topics in Comparative Politics (State and Society in East Asia)

Professional specialization courses (6 credits)

Code	Title	Credits
------	-------	---------

Two courses from one of the following professional specialization fields. Courses taken for the professional specialization cannot also be counted toward the thematic specializations or vice versa.

Conflict and Conflict Resolution

GEOG 6224	Seminar: Political Geography
IAFF 6171	Introduction to Conflict Resolution
IAFF 6186	Special Topics in Security Policy Studies (Conflict Early Warning and Prevention)
IAFF 6186	Special Topics in Security Policy Studies (Countering Violent Extremism)

SOC 6230	Sociological Research Methods
SOC 6231	Data Analysis
SOC 6232	Qualitative Methodology: Doing Field Research

*Only specific topics that are determined by the Program Director to be relevant to the student's program of study may be used to fulfill this requirement. Any topic intended to be used for this requirement must be approved by the Program Director prior to enrollment. Consult the Schedule of Classes (<http://my.gwu.edu/mod/pws/>) for each semester's offerings. Topics courses not listed here may, with permission of the Program Director, be used to fulfill program requirements.

Additional information regarding skills courses, the capstone, and the thesis is available on the Elliott School website.

Additional information regarding skills courses (<https://elliott.gwu.edu/professional-skills-courses/>), the capstone (<https://elliott.gwu.edu/global-capstone/>), and the thesis

(<https://elliott.gwu.edu/thesis/>) is available on the Elliott School website.

Foreign language proficiency requirement

Students in the Asian studies program are required to demonstrate proficiency in a modern language other than English by passing the Elliott School-administered foreign language proficiency reading and speaking examination at the currently-required level of proficiency (<https://elliott.gwu.edu/foreign-language-proficiency-requirement/>). The Elliott School administers foreign language proficiency examinations once in the fall and once in the spring semesters. Students should plan to take the language proficiency examination as soon as possible following their matriculation in the program. Students have three opportunities to pass the examination. Failure to pass the examination for a third time results in dismissal from the program.

MASTER OF ARTS IN THE FIELD OF EUROPEAN AND EURASIAN STUDIES

Across Europe and Eurasia, powerful forces are pushing for political, social, and economic change. EU member states and their neighbors confront a host of domestic challenges ranging from economic reform and social diversity to terrorism and separatism. Russia and other members of the Commonwealth of Independent States stand at different points along the path of transition from communism to new political institutions. At the same time, a web of political, economic, security, and societal connections increasingly links the various parts of Europe and Eurasia with one another and other parts of the global community. In view of these dynamic interactions, it is essential to study Europe and Eurasia together.

The European and Eurasian studies graduate program at the Elliott School provides an interdisciplinary curriculum combining several required courses with a wide variety of additional courses and optional fields that can be selected to suit an individual student's professional goals and intellectual interests.

The European and Eurasian Studies program is supported by the Institute for European, Russian, and Eurasian Studies (IERES) and benefits from the expertise of its faculty members, who are prominent practitioners and scholars in disciplines including political science, economics, and history, with important representation from languages and literature, film studies, anthropology, sociology, and public policy.

Visit the program website (<https://elliott.gwu.edu/european-and-eurasian-studies/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including 15 credits in core courses, a 3-credit cornerstone course, a 4-credit capstone sequence, a 3-credit course in

research methods or international economics, 9 credits in a professional specialization, and 6 credits in elective courses. In addition, all students must fulfill a language requirement (see below)

See note regarding special topics, professional skills, and LAW courses.¹

Code	Title	Credits
Required		
Cornerstone (3 credits)		
IAFF 6321	European and Eurasian Studies Cornerstone	
Capstone sequence (4 credits)		
Students complete a two-course capstone sequence that most closely matches the thematic area of their project. The capstone sequence includes a 2-credit capstone workshop taken before the 2-credit capstone seminar. Students must have completed at least 18 credits of coursework prior to starting the capstone sequence. The two 2-credit capstone courses must be taken consecutively.		
IAFF 6898	Capstone Workshop	
IAFF 6899	Capstone Course	
Core courses (15 credits)		
Five courses in at least three disciplines, including at least two courses from section A and two from section B.		
Section A: Western, Central, Southeastern and Eastern Europe		
EDUC 6100	Experimental Courses	
HIST 6042	Seminar: World War II	
HIST 6050	Modernization, Imperialism, Globalization	
HIST 6121	Reading and Research Seminar: Modern European History	
HIST 6135	British Imperialism	
HIST 6170	Eastern European History I	
HIST 6171	Eastern European History II	
IAFF 6338	Special Topics in European and Eurasian Studies (EU Foreign Relations)	
IAFF 6338	Special Topics in European and Eurasian Studies (The European Union)	

IAFF 6338	Special Topics in European and Eurasian Studies (Transatlantic Relations in the 21st Century)
LAW 6534	Law of the European Union
PSC 6364	Comparative Governments and Politics of Central And Eastern Europe
Section B: Post-Soviet/post-communist countries	
GEOG 6265	Geography of Russia and Its Neighbors
HIST 6030	History and Its Uses in International Affairs (only section reserved for EES)
HIST 6051	Re-thinking Cold War History
HIST 6188	The Soviet Union and the World, 1917 to 1991
IAFF 6338	Special Topics in European and Eurasian Studies (Central Asia: Security Politics, Society)
IAFF 6338	Special Topics in European and Eurasian Studies (History and Politics of the Caucasus)
IAFF 6338	Special Topics in European and Eurasian Studies (Nationalism in Russia and Eurasia)

IAFF 6338	Special Topics in European and Eurasian Studies (Security in Russia and Eurasia)
IAFF 6338	Special Topics in European and Eurasian Studies (Ukraine and Georgia: Between Russia and the West)
PSC 6366	Government and Politics of Russia
Methods or economics (3 credits)	
One of the following courses:	
ANTH 6331	Research Methods in Development Anthropology
ECON 6217	Survey of Economics I
ECON 6250	Survey of Economic Development
ECON 6280	Survey of International Economics
ECON 6283	Survey of International Trade Theory and Policy

ECON 6284	Survey of International Macroeconomics and Finance Theory and Policy
EDUC 6114	Introduction to Quantitative Research
EDUC 8122	Qualitative Research Methods
EDUC 8130	Survey Research Methods
EDUC 8131	Case Study Research Methods
GEOG 6201	Geographic Thought
GEOG 6293	Special Topics (Qualitative Methods)
GEOG 6304	Geographical Information Systems I
GEOG 6305	Geospatial Statistics
IAFF 6118	Special Topics in International Affairs (Qualitative Methods)
IAFF 6501	Quantitative Analysis for International Affairs Practitioners
PPPA 6002	Research Methods and Applied Statistics
PPPA 6013	Econometrics for Policy Research I
PPPA 6014	Microeconomics for Public Policy II
PSC 8101	Introduction to Empirical Political Analysis
PUBH 6247	Design of Health Studies
PUBH 6260	Advanced Data Analysis for Public Health
PUBH 6264	Quantitative Methods
PUBH 6266	Biostatistical Methods
PUBH 6410	Global Health Study Design
PUBH 6411	Global Health Qualitative Research Methods
PUBH 6412	Global Health Quantitative Research Methods
PUBH 6533	Design and Conduct of Community Health Surveys
SOC 6230	Sociological Research Methods
SOC 6231	Data Analysis
SOC 6232	Qualitative Methodology: Doing Field Research
Professional specialization (9 credits)	

At least three courses in a professional specialization. Students may design their own field with the approval of the Program Director, or select one of the specializations listed below.

Electives (6 credits)

6 credits of elective courses, which may include advanced, content-based courses in a foreign language with the approval of the Program Director. These courses must involve more than basic language acquisition. Up to 3 credits of professional skills courses (IAFF 6502, IAFF 6503, and/or IAFF 6504) may be counted toward elective credits.

Additional thesis option

Students who wish to complete a thesis do so in addition to the capstone requirement. Students pursuing a thesis must have a minimum GPA of 3.5 and approval from the faculty member who will serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credits are counted as elective or specialization credits with Program Director approval. The two 3-credit thesis courses must be taken consecutively.

¹ Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes (<http://my.gwu.edu/mod/pws/>) for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

Additional information regarding skills courses (<https://elliott.gwu.edu/professional-skills-courses/>) and the capstone (<https://elliott.gwu.edu/global-capstone/>) is available on the Elliott School website.

Law School courses—Students may, with permission of their advisor, include courses in the Law School (<http://>

www.law.gwu.edu/) in their major field. Enrolling in a LAW course also requires permission of the Law School dean of students. Students should consult the Elliott School Office of Academic Advising and Student Services (<http://elliott.gwu.edu/graduate-advising/>) office before enrolling in LAW courses.

² Consult the Graduate School of Education and Human Development (<https://gsehd.gwu.edu/>) for course availability and additional courses.

³ Consult the Milken Institute School of Public Health (<https://publichealth.gwu.edu/>) for course availability and additional courses.

Foreign language proficiency requirement

Students in the European and Eurasian studies program are required to demonstrate proficiency in a modern language other than English by passing the Elliott School-administered foreign language proficiency reading and speaking examination at the currently-required level of proficiency (<https://elliott.gwu.edu/foreign-language-proficiency-requirement/>). The Elliott School administers foreign language proficiency examinations once in the fall and once in the spring semesters. Students should plan to take the language proficiency examination as soon as possible following their matriculation in the program. Students have three opportunities to pass the examination. Failure to pass the examination for a third time results in dismissal from the program.

MASTER OF ARTS IN THE FIELD OF GLOBAL COMMUNICATION

Offered jointly by GW's Elliott School of International Affairs and Columbian College of Arts and Sciences' School of Media and Public Affairs (SMPA), the MA in global communication combines the Elliott School's globally recognized academic excellence in international affairs with SMPA's strengths as a leading school of communication and journalism.

Students in the global communication program learn about the fascinating and rapidly evolving global information environment. As future or advancing professionals in the field, they learn how to work in this environment and communicate effectively with audiences worldwide.

Students take a rigorous academic program that prepares them both intellectually and professionally for exciting careers in the public, private, and non-profit sectors. A core curriculum focuses on communication, international politics, international economics, and research methods. Required skills courses on topics such as developing communication strategies, cross-cultural communication, public speaking, and editing prepare students for careers in global communication. Students also choose one of twelve specializations to build expertise on a major world region or global issue. In the final year, a capstone course tests students' ability to address a real-world problem

using the skills and knowledge acquired during their course of study.

Visit the program website (<https://elliott.gwu.edu/global-communication/>)for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including 15 credits in core field courses, a 4-credit capstone course sequence, 3 credits in skills courses, 9 credits in a specialization, and 9 credits in elective courses. In addition, all students must fulfill a foreign language proficiency requirement (see below).

See note regarding special topics and skills courses, the capstone, the additional thesis option, and LAW courses.*

Code	Title	Credits
Required		
Core field courses (15 credits)		
ECON 6280	Survey of International Economics	
or ECON 6250	Survey of Economic Development	
IAFF 6101	International Affairs Cornerstone	
SMPA 6210	Media and Foreign Policy	
SMPA 6241	Research Design	
And one course from the following:		
HIST 6030	History and Its Uses in International Affairs	
SMPA 6202	Media Effects, Public Opinion, and Persuasion	
SMPA 6204	Strategic Political Communication	
Capstone (4 credits)		
Students complete a two-course capstone sequence that most closely matches the thematic area of their project. The capstone sequence includes a 2-credit capstone workshop taken before the 2-credit capstone seminar. Students must have completed at least 18 credits of coursework prior to starting the capstone sequence. The two 2-credit capstone courses must be taken consecutively.		
IAFF 6898	Capstone Workshop	
IAFF 6899	Capstone Course	
Skills courses (3 credits)		
Three skills courses in any combination from the following:		

IAFF 6502	Professional Skills I	LAW 6414	Development in Telecommunications Law
IAFF 6503	Professional Skills II	PPPA 6018	Public Policy, Governance, and the Global Market
IAFF 6504	Intermediate Conversation	PSPR 6201	Strategic Public Relations: Principles and Practice
Students in the global communication program may choose to take skills courses in the School of Media and Public Affairs:		PSPR 6204	Media Relations in a Digital World
SMPA 6201	Strategic Communications Skills (Crisis Communication)	PSPR 6208	Integrated Marketing Communications
SMPA 6201	Strategic Communications Skills (Developing Digital PR Skills)	SMPA 6250	Topics in Media Processes and Institutions (Changing Media Technology)
SMPA 6201	Strategic Communications Skills (Public Speaking)	SMPA 6250	Topics in Media Processes and Institutions (Electronic Media Policy)
SMPA 6201	Strategic Communications Skills (Social Media)	SMPA 6250	Topics in Media Processes and Institutions (Information, Media and National Security)
SMPA 6201	Strategic Communications Skills (Speechwriting)	SMPA 6250	Topics in Media Processes and Institutions (International Communication)
SMPA 6201	Strategic Communications Skills (Web Essentials)	SMPA 6250	Topics in Media Processes and Institutions (Public Affairs and Government Information)
*SMPA skills courses are offered only in the spring semester and for 1.5 credits.		*Only specific topics that are determined by the director to be relevant to the student's program of study may be used to fulfill this requirement. Any topic intended to be used for this requirement must be approved by the director prior to enrollment.	
Specialization (9 credits)		B. Conflict and conflict resolution	
Students must complete a specialization in either global issues or a regional focus in consultation with the Program Director.		ANTH 6507	
Global issues specializations		GEOG 6224	
A. Communication and information technology in international affairs		HIST 6822	
ECON 6255	Economics of Technological Change	IAFF 6118	
IAFF 6142	Technology Creation/Diffusion	IAFF 6118	
IAFF 6151	Environmental Policy	IAFF 6118	
IAFF 6153	Science, Technology, and National Security	IAFF 6118	
IAFF 6158	Special Topics in International Science and Technology Policy *	IAFF 6118	
IAFF 6186	Special Topics in Security Policy Studies (Cybersecurity)	IAFF 6118	
IAFF 6501	Quantitative Analysis for International Affairs Practitioners	IAFF 6118	
LAW 6412	Communications Law	IAFF 6118	

IAFF 6186	Special Topics in Security Policy Studies (Food, Globalization, and Conflict)
IAFF 6186	Special Topics in Security Policy Studies (Military and Post-Conflict Intervention)
IAFF 6186	Special Topics in Security Policy Studies (Responses to Terrorism)
IAFF 6186	Special Topics in Security Policy Studies (War to Peace Transition)
MGT 6215	Conflict Management and Negotiations
PPSY 6103	Political Violence and Terrorism
PSC 6442	Politics and Practice of International Institutions
PSC 6444	Politics of International Law
PSC 6351	Civil-Military Relations
PSC 6476	The Arab-Israeli Conflict
PSC 8388	Selected Topics in Comparative Politics (Nationalism in Former Soviet Republics)
SMPA 6250	Topics in Media Processes and Institutions (Race, Media and Politics)
C. Global gender policy	
Students may take IAFF 2190W or IAFF 3183 for graduate credit as a supporting course with permission from the Program Director, academic advisor, and instructor, who must agree to assign additional work:	
ANTH 6501	Gender and Sexuality
IAFF 2190W	Special Topics (Women in Global Politics)
IAFF 3183	Special Topics in Development Policy *
IAFF 6102	Global Gender Policy
IAFF 6108	International Development Policy
IAFF 6136	Gender and Development
PHIL 6238	Feminist Ethics and Policy Implications
PSYC 8275	Women and Health
SMPA 6205	Media, Development, and Globalization
SOC 6265	Women, Welfare, and Poverty
SOC 6268	Race, Gender, and Class
SOC 6271	Gender and Society

SOC 6273	The Sex Industry
WGSS 6225	Contemporary Feminist Theory
WGSS 6230	Global Feminisms
WGSS 6240	Gender and Public Policy
WGSS 6257	Gender and Sexuality
WGSS 6265	Women, Welfare, and Poverty
WGSS 6266	Gender and Criminal Justice
WGSS 6268	Race, Gender, and Class
WGSS 8275	Women and Health
*Only specific topics that are determined by the director to be relevant to the student's program of study may be used to fulfill this requirement. Any topic intended to be used for this requirement must be approved by the director prior to enrollment.	
D. Global health	
ANTH 6302	Issues in Development *
ANTH 6505	Medical Anthropology
ANTH 6591	Topics in Sociocultural Anthropology (Refugees and Displaced Persons)

*Only specific topics that are determined by the director to be relevant to the student's program of study may be used to fulfill this requirement. Any topic intended to be used for this requirement must be approved by the director prior to enrollment.

Electives (9 credits)

9 credits in elective courses relating to international affairs or communication selected with approval of the Program Director. With Program Director approval, graduate students can apply a maximum of 6 credits of language courses toward the electives.

Additional thesis option

Students who wish to complete a thesis do so in addition to the capstone requirement. Students pursuing a thesis must have a minimum GPA of 3.5 and approval from the faculty member who will serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credit is counted as elective or specialization credits with Program Director approval. The two 3-credit thesis courses must be taken consecutively.

IAFF 6998	Thesis
-----------	--------

IAFF 6999	Thesis
-----------	--------

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes (<http://my.gwu.edu/mod/pws/>) for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

Additional information regarding skills courses (<https://elliott.gwu.edu/professional-skills-courses/>), the capstone (<https://elliott.gwu.edu/global-capstone/>), and the thesis (<https://elliott.gwu.edu/thesis/>) is available on the Elliott School website.

Law School courses—Students may, with permission of their advisor, include courses in the Law School (<http://www.law.gwu.edu/>) in their major field. Enrolling in a LAW course also requires permission of the Law School dean of students. Students should consult the Elliott School Office of Academic Advising and Student Services (<http://elliott.gwu.edu/graduate-advising/>) office before enrolling in LAW courses.

Foreign language proficiency requirement

Students in the master of arts in the field of global communication program are required to demonstrate proficiency in a modern language other than English. Students may fulfill this requirement in one of the following ways:

- Having earned a minimum grade of B in a sixth-semester university-level advanced language course completed no more than three years prior to matriculation in the Elliott School's master's degree program.
- Having earned a minimum grade of B in a sixth-semester university-level advanced language course at GW, or in an approved course taken at another institution of higher learning, including Elliott School exchange partner institutions, while enrolled in the Elliott School master's program.
- Passing the Elliott School-administered foreign language proficiency reading and speaking examination at the currently-required level of proficiency (<https://elliott.gwu.edu/foreign-language-proficiency-requirement/>). The Elliott School administers foreign language proficiency examinations once in the fall and once in the spring semesters. Students should plan to take the language proficiency examination as soon as possible following their matriculation in the program. Students have three opportunities to pass the examination. Failure to pass the examination for a third time results in dismissal from the program.
- Achieving the required proficiency level in a reading and speaking examination administered by an Elliott School-approved foreign language assessment institution, at the student's expense, while enrolled in the Elliott School's Master's Degree Program.
- Demonstrating the required foreign language proficiency level in a foreign language professional skills course offered through the Elliott School. The instructor tests the student during the course (<https://elliott.gwu.edu/foreign-language-proficiency-requirement/>) to determine if the required proficiency level has been achieved.

As of fall 2018, the above policy applies to new and current students in the Elliott School's non-regional studies master's programs with a foreign language requirement. Consult the Program Director for more information.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS

The field of international affairs addresses the key challenges and opportunities that affect the lives of billions of our fellow human beings. Globalization of economic, political, social, and cultural activity has created new opportunities and challenges for tomorrow's leaders in international affairs. Rarely have we lived in such an uncertain world, one in which the need for increased international understanding and cooperation has become essential, not simply necessary.

Course offerings in the program draw heavily on the various academic departments of the university. Students in the MA in international affairs program begin with a core field of three to five courses in political science, economics, and history and move on to major fields focusing on global issues or regional areas. Skills courses and a capstone course on a contemporary policy issue connect academic coursework directly to practical applications.

The MA program in international affairs makes the most of the Elliott School's location within a few blocks of the White House, the U.S. Department of State, the World Bank, and the International Monetary Fund.

Visit the program website (<https://elliott.gwu.edu/international-affairs-masters/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including 9 to 12 credits in core field courses, 3 credits in skills courses, 12 credits in a thematic or regional concentration, a 4-credit capstone course sequence, and 9 to 12 credits in elective courses. In addition, students must fulfill a foreign language proficiency requirement (see below).

See note regarding skills courses, the capstone, and the additional thesis option.*

Code	Title	Credits
Required		
Core field courses (9 to 12 credits)		
Three or four courses from the following:		
HIST 6030	History and Its Uses in International Affairs	
IAFF 6101	International Affairs Cornerstone	
ECON 6280	Survey of International Economics	
or		
ECON 6283 & ECON 6284	Survey of International Trade Theory and Policy and Survey of International Macroeconomics and Finance Theory and Policy	
ECON 6280 is designed for students who have little background in economics. Those with a stronger prior background in economics may wish to substitute ECON 6280 with the ECON 6283 and ECON 6284 sequence for 6 credits. The ECON 6283 and ECON 6284 sequence is required for the international economic affairs concentration.		
Skills courses (3 credits)		

Three 1-credit professional skills courses in any combination from the following:

IAFF 6502	Professional Skills I
IAFF 6503	Professional Skills II
IAFF 6504	Intermediate Conversation

Concentration (12 credits)

Students must complete a thematic or regional concentration in consultation with the Program Director.

Capstone (4 credits)

Students complete a two-course capstone sequence that most closely matches the thematic area of their course work. The capstone sequence includes a 2-credit capstone workshop taken before the 2-credit capstone seminar. Students must have completed at least 18 credits of coursework prior to starting the capstone sequence. The two 2-credit capstone courses must be taken consecutively.

IAFF 6898	Capstone Workshop
IAFF 6899	Capstone Course

Additional thesis option

Students who wish to complete a thesis do so in addition to the capstone requirement. Students pursuing a thesis must have a minimum GPA of 3.5 and approval from the faculty member who will serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credits are counted as elective or concentration credits with Program Director approval. The two 3-credit thesis courses must be taken consecutively.

IAFF 6998	Thesis
IAFF 6999	Thesis

Electives (9 to 12 credits)

Three to four elective courses, which may include up to 6 credits of foreign language study, a second field of expertise, or other relevant coursework. Students are strongly encouraged to take a research methods course.

*Additional information regarding skills courses (<https://elliott.gwu.edu/professional-skills-courses/>), the capstone (<https://elliott.gwu.edu/global-capstone/>), and the thesis (<https://elliott.gwu.edu/thesis/>) is available on the Elliott School website.

Concentrations

Students in the master of arts in the field of international affairs program must complete a concentration by taking at least four courses (12 credits) selected from one of thematic or regional concentrations listed below. Specific requirements are listed

under the "Concentrations" tab. Students are encouraged to discuss their course selections with their faculty adviser.

Thematic concentrations:

- Conflict and Conflict Resolution (<http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/conflict-and-conflict-resolution/>)
- Global Energy and Environmental Policy (GEEP) (<http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/global-energy-and-environmental-policy/>)
- Global Gender Policy (<http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/global-gender-policy/>)
- Global Health (<http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/global-health/>)
- International Affairs and Development (<http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/international-affairs-and-development/>)
- International Economic Affairs (<http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/international-economic-affairs/>)
- International Law and Organizations (<http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/international-law-and-organizations/>)
- International Security Studies (<http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/international-security-studies/>)
- Nuclear Policy (<http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/nuclear-policy/>)
- Technology and International Affairs (<http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/technology-and-international-affairs/>)
- U.S. Foreign Policy (<http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/us-foreign-policy/>)

Regional concentrations:

- Africa (<http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/africa/>)
- Asia (<http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/asia/>)
- Europe, Eurasia, and Russia (<http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/europe-eurasia-russia/>)
- Latin America (<http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/latin-america/>)
- Middle East (<http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/middle-east/>)

Foreign language proficiency requirement

Students in the master of arts in the field of international affairs program are required to demonstrate proficiency in a modern language other than English. Students may fulfill this requirement in one of the following ways:

- Having earned a minimum grade of *B* in a sixth-semester university-level advanced language course completed no more than three years prior to matriculation in the Elliott School's master's degree program.
- Having earned a minimum grade of *B* in a sixth-semester university-level advanced language course at GW, or in an approved course taken at another institution of higher learning, including Elliott School exchange partner institutions, while enrolled in the Elliott School master's program.
- Passing the Elliott School-administered foreign language proficiency reading and speaking examination at the currently-required level of proficiency. (<https://elliott.gwu.edu/foreign-language-proficiency-requirement/>) The Elliott School administers foreign language proficiency examinations once in the fall and once in the spring semesters. Students should plan to take the language proficiency examination as soon as possible following their matriculation in the program. Students have three opportunities to pass the examination. Failure to pass the examination for a third time results in dismissal from the program.
- Achieving the required proficiency level in a reading and speaking examination administered by an Elliott School-approved foreign language assessment institution, at the student's expense, while enrolled in the Elliott School's Master's Degree Program.
- Demonstrating the required foreign language proficiency level in a foreign language professional skills course offered through the Elliott School. The instructor tests the student during the course (<https://elliott.gwu.edu/foreign-language-proficiency-requirement/>) to determine if the required proficiency level has been achieved.

As of fall 2018, the above policy applies to new and current students in the Elliott School's non-regional studies master's programs with a foreign language requirement. Consult the Program Director for more information.

CONCENTRATIONS

Concentrations

Thematic concentrations

- Conflict and Conflict Resolution (p. 974)
- Global Energy and Environmental Policy (p. 975)
- Global Gender Policy (p. 975)
- Global Health (p. 976)
- International Affairs and Development (p. 977)
- International Economic Affairs (p. 979)

- International Law and Organizations (p. 980)
- International Security Studies (p. 981)
- Nuclear Policy (p. 984)
- Technology and International Affairs (p. 984)
- U.S. Foreign Policy (p. 985)

Regional concentrations

- Africa (p. 972)
- Asia (p. 973)
- Europe, Eurasia, and Russia (p. 974)
- Latin America (p. 983)
- Middle East (p. 984)

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS, AFRICA CONCENTRATION

See note regarding special topics courses*.

Code	Title	Credits
Required courses (6 credits)		
At least two courses from the following. Any courses not taken to fulfill this requirement can be used as supporting coursework.		
IAFF 6138	Special Topics in International Development Studies (those regionally relevant)	
IAFF 6186	Special Topics in Security Policy Studies (Peace and Conflict in Africa)	
IAFF 6186	Special Topics in Security Policy Studies (Security Challenges in Africa)	
IAFF 6385	Special Topics in African Studies (Power, Politics, and Development in Africa)	
IAFF 6385	Special Topics in African Studies (Rising China in Africa)	
Supporting courses (6 credits)		
Two courses from the following:		
ANTH 6301	The Anthropology of Development	
ANTH 6591	Topics in Sociocultural Anthropology (Displacement and Diaspora)	
ECON 6237	Economics of the Environment and Natural Resources	
ECON 6250	Survey of Economic Development	

IAFF 6138	Special Topics in International Development Studies (Climate Change and Sustainable Development)
IAFF 6138	Special Topics in International Development Studies (Democracy and Governance Development)
IAFF 6138	Special Topics in International Development Studies (Foundations of Humanitarian Assistance)
IAFF 6138	Special Topics in International Development Studies (Gender and Development)
IAFF 6171	Introduction to Conflict Resolution
IAFF 6173	Security and Development
IAFF 6186	Special Topics in Security Policy Studies (International Peacekeeping)
IBUS 6402	Managing in Developing Countries
PUBH 6480	Public Health in Humanitarian Settings

Students are encouraged to explore relevant courses offered by other member schools of the Consortium of Universities of the Washington Metropolitan Area, such as Howard, Georgetown and American Universities. Students should consult with the faculty advisor regarding such opportunities.

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS, ASIA CONCENTRATION

See note regarding special topics* and LAW** courses.

Code	Title	Credits
12 credits selected from at least three of the following groupings:		
Group A: History of modern Asia		
HIST 6601	Topics: Asian History (Geography and Politics of Afghanistan and South & Central Asia)	
HIST 6602	Asia: History, Memory, and Violence	

HIST 6611 Readings Seminar: Twentieth-Century China

HIST 6630 Special Topics in Korean History (Modern Korea)

HIST 6641 Modern Southeast Asia

Group B: Politics and Policy in Asia

1. Domestic politics, foreign policy, and law

ENGL 6560 Postcolonialism

IAFF 6302 Taiwan: Internal Development and Foreign Policy

LAW 6543 Chinese Law and Legal Institutions *

PSC 6336 The Political Economy of China, India, and Beyond

PSC 6368 Japanese Politics and Foreign Policy

PSC 6370 Politics of China I

PSC 6374 Korean Politics

2. Security and military policy

IAFF 6186 Special Topics in Security Policy Studies (The Chinese Military)

Group C: International relations of Asia

HIST 6301 Topics: U.S. History (U.S.-Asia Relations)

IAFF 6302 Taiwan: Internal Development and Foreign Policy

IAFF 6308 International Relations of South Asia

PSC 6372 Foreign Policy of China

PSC 6475 International Politics of East Asia

Group D: Asian business and development

ECON 6269 Economy of China I

PSC 6336 The Political Economy of China, India, and Beyond

PSC 6373 Political Economy of Industrializing Asia

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

**Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS, CONFLICT AND CONFLICT RESOLUTION CONCENTRATION

See note regarding special topics and LAW courses*.

Code	Title	Credits
Required course (3 credits)		
IAFF 6171	Introduction to Conflict Resolution	
Supporting courses (9 credits)		
IAFF 6118	Special Topics in International Affairs (International Law and the Use of Force)	
IAFF 6118	Special Topics in International Affairs (Reinventing the United Nations)	
IAFF 6138	Special Topics in International Development Studies (Gender, Disaster, and Development)	
IAFF 6138	Special Topics in International Development Studies (Rule of Law and Anti-Corruption)	
IAFF 6186	Special Topics in Security Policy Studies (Early Warning and Conflict Prevention)	
IAFF 6186	Special Topics in Security Policy Studies (Security Challenges in Africa)	
IAFF 6186	Special Topics in Security Policy Studies (Stabilization and Peacebuilding)	

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS, EUROPE, EURASIA, AND RUSSIA CONCENTRATION

See note regarding special topics and LAW courses*.

Code Title Credits

12 credits from the following

At least one course must be from Group A and one from Group B. The remaining two courses may be taken from either group.

Group A. Western, Central and Eastern Europe

HIST 6051	Re-thinking Cold War History
HIST 6101	Topics: Europe (Europe, Readings and Research: Modern European History)
HIST 6121	Reading and Research Seminar: Modern European History
HIST 6170	Eastern European History I
HIST 6171	Eastern European History II
IAFF 6338	Special Topics in European and Eurasian Studies (The European Union)
PSC 6364	Comparative Governments and Politics of Central And Eastern Europe
PSC 6465	The International Politics of Central and Eastern Europe
PSC 8388	Selected Topics in Comparative Politics (Authoritarianism and Democratization)
PSC 8388	Selected Topics in Comparative Politics (Nationalism and Nation Building)

Group B. Russia and Eurasia

HIST 6188	The Soviet Union and the World, 1917 to 1991
IAFF 6138	Special Topics in International Development Studies (Post-Soviet Democracy Development)
IAFF 6338	Special Topics in European and Eurasian Studies (Central Asia Between East and West)
IAFF 6338	Special Topics in European and Eurasian Studies (History and Politics of the Caucasus)
IAFF 6338	Special Topics in European and Eurasian Studies (Politics of Russia)
IAFF 6338	Special Topics in European and Eurasian Studies (U.S.-Russia Relations in the 21st Century)

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes

for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS, GLOBAL ENERGY AND ENVIRONMENTAL POLICY CONCENTRATION

See notes regarding special topics* and LAW** courses.

Code	Title	Credits
Required—two from the following (6 credits)		
ECON 6295	Special Topics (Applied Environmental Economics)	
IAFF 6151	Environmental Policy	
IAFF 6158	Special Topics in International Science and Technology Policy (Energy Policy)	
PPPA 6066	U.S. Environmental Policy	
Supporting courses (6 credits)		
EMSE 6260	Energy Management	
EMSE 6290	Climate Change: Policy, Impacts, and Response	
IAFF 6118	Special Topics in International Affairs (Managing the World's Water)	
IAFF 6141	International Science and Technology Policy Cornerstone	
IAFF 6164	Environmental Security	
IAFF 6186	Special Topics in Security Policy Studies (Energy Security)	
IAFF 6378	Special Topics in Middle East Studies (Oil: Industry, Economy, Society)	
IAFF 6501	Quantitative Analysis for International Affairs Practitioners	
IBUS 4404	Global Energy	
IBUS 6400	Oil: Industry, Economy, and Society	
LAW 6454	International Environmental Law **	
LAW 6455	International Climate Change Law **	

LAW 6460	Environment and Energy Policy Practicum **
PUBH 6122	Protecting Public Health and the Environment: Policies, Politics, and Programs
PUBH 6130	Sustainable Energy and the Environment

*Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

Suggested skills courses (credits count toward the skills course requirement for the master's program)	
IAFF 6503	Professional Skills II (1 credit)
PUBH 6262	Introduction to Geographic Information Systems (1 credit)
PUBH 6263	Advanced GIS (1 credit)

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

**Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS, GLOBAL GENDER POLICY CONCENTRATION

See note regarding special topics and LAW courses*

Code	Title	Credits
Required course (3 credits)		
IAFF 6102	Global Gender Policy	
Supporting courses (9 credits)		
IAFF 6118	Special Topics in International Affairs (Gender and Security)	
IAFF 6118	Special Topics in International Affairs (Gender, War, and Peace)	
IAFF 6118	Special Topics in International Affairs (Research Methods in Global Gender Issues)	

IAFF 6136	Gender and Development
IAFF 6138	Special Topics in International Development Studies (Gender and Development)
IAFF 6138	Special Topics in International Development Studies (Gender, Disaster, and Development)
IAFF 6138	Special Topics in International Development Studies (Human Trafficking)
IAFF 6138	Special Topics in International Development Studies (Violence, Gender, and Humanitarian Assistance)
One course from the following may be used as a supporting course:	
ANTH 6501	Gender and Sexuality
ANTH 6505	Medical Anthropology
EDUC 6640	Selected Topics in International Education (Gender in International Education and Development)
IAFF 6138	Special Topics in International Development Studies (Care of Women and Children in Complex Emergencies)
MGT 6290	Special Topics (Research - Women's Entrepreneurial Leadership)
PHIL 6238	Feminist Ethics and Policy Implications
PUBH 6099	Topics in Public Health (Sexual and Reproductive Health)
SOC 6265	Women, Welfare, and Poverty
SOC 6268	Race, Gender, and Class
WGSS 6220	Fundamentals of Feminist Theory
WGSS 6221	Research Issues in Women's, Gender, and Sexuality Studies
WGSS 6230	Global Feminisms
WGSS 6240	Gender and Public Policy
WGSS 6241	Gender, Law, and Politics
WGSS 6268	Race, Gender, and Class
WGSS 6270	Seminar: Selected Topics (Black Feminist Theory)
WGSS 6270	Seminar: Selected Topics (Global Islamic Feminisms)

WGSS 6270	Seminar: Selected Topics (Gender, Power, and Sexuality in East Asia)
-----------	--

Students may take IAFF 2190W or IAFF 3183 for graduate credit as a supporting course with permission from the Program Director, academic advisor, and instructor, who must agree to assign additional work.

IAFF 2190W	Special Topics (Women in Global Politics)
------------	---

IAFF 3183	Special Topics in Development Policy (Human Trafficking)
-----------	--

Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS, GLOBAL HEALTH CONCENTRATION

See notes regarding special topics* and PUBH** courses.

Code	Title	Credits
Required course (2 credits)		
PUBH 6400	Global Health Frameworks (fall semester only)	
Supporting courses (10 credits)		
ANTH 6505	Medical Anthropology (3 credits)	
Research methods in global health:		
PUBH 6410	Global Health Study Design (2 credits)	
PUBH 6411	Global Health Qualitative Research Methods (2 credits)	
PUBH 6412	Global Health Quantitative Research Methods (3 credits)	
PUBH 6416	Ethical and Cultural Issues in Global Health Research and Programs (1 credit)	
Theory and methods courses in global health:		
PUBH 6435	Global Health Program Development and Implementation (2 credits)	

PUBH 6436	Global Health Program Management and Leadership (2 credits)
Global health content courses:	
PUBH 6132	Water, Sanitation, and Hygiene (WASH) in Low-Income Countries (1 credit)
PUBH 6440	Global Health Economics and Finance (2 credits)
PUBH 6441	Global Health Organizations and Regulations (2 credits)
PUBH 6442	Comparative Global Health Systems (2 credits)
PUBH 6480	Public Health in Humanitarian Settings (Public Health in Complex Emergencies (2 credits)
PUBH 6481	Global Mental Health (2 credits)
PUBH 6482	International Food and Nutrition Policy (2 credits)
PUBH 6499	Topics in Global Health (Public Health Systems)

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

** Most Public Health (PUBH) courses are offered for 2 instead of 3 credits. Students pursuing the global health concentration should consult their academic advisor with questions regarding course selection.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS, INTERNATIONAL AFFAIRS AND DEVELOPMENT CONCENTRATION

See notes regarding special topics* and LAW** courses.

Code	Title	Credits
Required course (3 credits)		
One of the following. Any course not taken to fulfill this requirement may be used as supporting courses.		
ECON 6250	Survey of Economic Development	

IAFF 6108	International Development Policy
IAFF 6138	Special Topics in International Development Studies (Civil Society and Development)
IAFF 6138	Special Topics in International Development Studies (Democracy and Governance Development)
IAFF 6138	Special Topics in International Development Studies (Poverty Alleviation and Bottom Up Development)

Supporting courses (9 credits)

The following courses are grouped into subcategories to help guide students in choosing appropriate coursework. Students should use this guidance to develop a coherent and logical narrative for their program of study. Students may choose courses from different subcategories to construct a concentration around their area of focus.

9 credits from among the groupings listed below:

Group A: Culture, society and development

ANTH 6301	The Anthropology of Development
ANTH 6391	Anthropology and Contemporary Problems (Capitalism/Neoliberalism)
ANTH 6501	Gender and Sexuality
ANTH 6505	Medical Anthropology
ANTH 6508	Ethics and Cultural Property
ANTH 6591	Topics in Sociocultural Anthropology (Displacement and Diaspora)
IAFF 6138	Special Topics in International Development Studies (Gender and Development)
IAFF 6138	Special Topics in International Development Studies (Indigenous People and Development)

Group B: Economic development policy

ECON 6237	Economics of the Environment and Natural Resources
ECON 6250	Survey of Economic Development
ECON 6269	Economy of China I
ECON 6283	Survey of International Trade Theory and Policy

ECON 6284	Survey of International Macroeconomics and Finance Theory and Policy	EMSE 6325	Medical and Public Health Emergency Management
ECON 8358	Urban Economics	IAFF 6138	Special Topics in International Development Studies (Human Trafficking)
IAFF 6198	Special Topics in International Economic Policy (Development and Trade Policy in LDCs)	IAFF 6138	Special Topics in International Development Studies (Violence, Gender, Humanitarian Assistance)
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Economic and Social Development of Latin America)	LAW 6540	Refugee and Asylum Law **
PSC 6373	Political Economy of Industrializing Asia	Group F: Institutions and politics	
Group C: Gender and development		IAFF 6138	Special Topics in International Development Studies (Democracy and Governance Development)
ANTH 6501	Gender and Sexuality	PSC 6336	The Political Economy of China, India, and Beyond
IAFF 6136	Gender and Development	PSC 6373	Political Economy of Industrializing Asia
IAFF 6138	Special Topics in International Development Studies (Gender and Development)	PSC 6383	Comparative Politics of Latin America
IAFF 6138	Special Topics in International Development Studies (Gender, Disaster, and Development)	PSC 6439	International Political Economy
WGSS 6230	Global Feminisms	PSC 8337	Theories of Political Development
WGSS 6270	Seminar: Selected Topics (Gender, Power, and Sexuality in East Asia)	PSC 8388	Selected Topics in Comparative Politics (Authoritarianism and Democratization)
Group D: Global health		Group G: International business	
ANTH 6505	Medical Anthropology	IBUS 6301	International Business Finance
ANTH 6591	Topics in Sociocultural Anthropology (Illness and Stigma)	IBUS 6400	Oil: Industry, Economy, and Society
PUBH 6400	Global Health Frameworks (strongly recommended)	IBUS 6401	International Business Strategy
PUBH 6411	Global Health Qualitative Research Methods	IBUS 6402	Managing in Developing Countries
PUBH 6440	Global Health Economics and Finance	MBAD 6241	Global Perspectives
PUBH 6442	Comparative Global Health Systems	Group H: International development management	
PUBH 6480	Public Health in Humanitarian Settings	PPPA 6016	Public and Nonprofit Program Evaluation
PUBH 6482	International Food and Nutrition Policy	PPPA 6057	International Development Administration
Group E: Humanitarian assistance		PPPA 6058	International Development NGO Management
ANTH 6505	Medical Anthropology	PPPA 6059	International Development Management Processes and Tools
EMSE 6305	Crisis and Emergency Management	Group I: International education	
EMSE 6320	International Disaster Management	EDUC 6601	International and Comparative Education

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS, INTERNATIONAL ECONOMIC AFFAIRS CONCENTRATION

See notes regarding special topics* and MBAD courses**.

Code	Title	Credits
Students pursuing this concentration must take ECON 6283 and ECON 6284 as part of the core field requirement for the master's degree program. These courses do not count toward the concentration.		
Students also must demonstrate proficiency in introductory statistics. Means of demonstrating proficiency include, but are not limited to, prior satisfactory completion of undergraduate statistics coursework, or STAT 1051, 1053, 1111 or IAFF 6501 at GW. Students should consult the Program Director as soon as possible following matriculation into the program regarding additional ways in which this requirement may be fulfilled.		
Required—at least 6 credits from the following:		
ECON 6237	Economics of the Environment and Natural Resources	
ECON 6250	Survey of Economic Development	
ECON 6255	Economics of Technological Change	
ECON 6269	Economy of China I	
ECON 6293	Topics in International Finance *	
ECON 6295	Special Topics (Applied Behavioral Economics)	
ECON 6295	Special Topics (Economic Analysis of International Trade Law)	
ECON 6335	Applied Financial Derivatives	
ECON 6340	Applied Labor Economics and Public Policy	
ECON 6344	Applied Industrial Organization	
PPPA 6014	Microeconomics for Public Policy II	
PPPA 6015	Benefit-Cost Analysis	
Supporting courses (6 credits)		
IAFF 6142	Technology Creation/Diffusion	
IAFF 6198	Special Topics in International Economic Policy (21st Century Trade Policies: Issues and Strategy)	

EDUC 6602	Regional Studies in International Education
EDUC 6610	Programs and Policies in International Education
EDUC 6620	Strategies and Analysis in International Education
EDUC 6640	Selected Topics in International Education (Education in Emergencies)
EDUC 6640	Selected Topics in International Education (Evaluation in International Education)
EDUC 6640	Selected Topics in International Education (International Higher Education for Development)
EDUC 6650	Education and National Development
Group J: Natural resources and the environment	
ECON 6237	Economics of the Environment and Natural Resources
EMSE 6220	Environmental Management
GEOG 6244	Urban Sustainability
GEOG 6293	Special Topics (Geography of Latin America)
IAFF 6118	Special Topics in International Affairs (Managing the World's Water)
IAFF 6138	Special Topics in International Development Studies (Climate Change and Sustainable Development)
IAFF 6151	Environmental Policy
IAFF 6164	Environmental Security
LAW 6454	International Environmental Law **
PPPA 6066	U.S. Environmental Policy
SMPP 6210	Strategic Environmental Management

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

**Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS, INTERNATIONAL LAW AND ORGANIZATIONS CONCENTRATION

See notes regarding special topics* and LAW** courses.

Code	Title	Credits
12 credits from the following:		
IAFF 6118	Special Topics in International Affairs (Global Justice)	
IAFF 6118	Special Topics in International Affairs (International Law)	
IAFF 6118	Special Topics in International Affairs (International Law and the Use of Force)	
IAFF 6118	Special Topics in International Affairs (Leadership in International Affairs)	
IAFF 6118	Special Topics in International Affairs (Reinventing the United Nations)	
IAFF 6138	Special Topics in International Development Studies (Care of Children in Complex Emergencies)	
IAFF 6138	Special Topics in International Development Studies (Civil Society and Development)	
IAFF 6138	Special Topics in International Development Studies (Democracy and Governance Development)	
IAFF 6138	Special Topics in International Development Studies (Global Food Security)	
IAFF 6138	Special Topics in International Development Studies (Human Trafficking)	
IAFF 6138	Special Topics in International Development Studies (Monitoring and Evaluation for Foreign Assistance Programs)	
IAFF 6146	Space Law	
IAFF 6186	Special Topics in Security Policy Studies (Countering Violent Extremism)

IAFF 6198	Special Topics in International Economic Policy (Advanced Quantitative Analysis)
IAFF 6198	Special Topics in International Economic Policy (Development and Trade Policy in LDCs)
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Economic and Social Development of Latin America)
IAFF 6378	Special Topics in Middle East Studies (Oil: Industry, Economy, and Society)
IAFF 6378	Special Topics in Middle East Studies (Political Economy of the Middle East)
IBUS 6202	Regional Strategy for Multinationals
IBUS 6297	International Management Experience
IBUS 6301	International Business Finance
PSC 6439	International Political Economy
Recommended skills courses	
IAFF 6502	Professional Skills I (Analyzing International Economic Data)
IAFF 6502	Professional Skills I (Financial Statement Analysis)
IAFF 6503	Professional Skills II (Analyzing International Economic Data)
IAFF 6503	Professional Skills II (Intro to Gaming and Simulations)
IAFF 6503	Professional Skills II (Negotiating Skills)
MBAD 6211	Financial Accounting **
MBAD 6234	Financial Management **

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Only specific topics that are determined by the Program Director to be relevant to the student's program of study may be used to fulfill this requirement. Any topic intended to be used for this requirement must be approved by the Program Director prior to enrollment. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

**Only one MBAD skills course can be used within the International Affairs degree.

IAFF 6186	Special Topics in Security Policy Studies (Illicit Finance and Security)
IAFF 6186	Special Topics in Security Policy Studies (Insurgency and Counterinsurgency)
IAFF 6186	Special Topics in Security Policy Studies (International Organized Crime)
IAFF 6186	Special Topics in Security Policy Studies (Terrorism Today)
IAFF 6338	Special Topics in European and Eurasian Studies (European Union Foreign Relations)
IAFF 6338	Special Topics in European and Eurasian Studies (The European Union)
IAFF 6338	Special Topics in European and Eurasian Studies (Transatlantic Relations in the 21st Century)
LAW 6520	International Law **
LAW 6534	Law of the European Union **
LAW 6870	National Security Law **
PSC 6439	International Political Economy

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

**Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS, INTERNATIONAL SECURITY STUDIES CONCENTRATION

See notes regarding special topics* and LAW** courses.

Code	Title	Credits
------	-------	---------

12 credits from the following:

Courses in international security studies concentration are grouped into issues subcategories to help guide students in choosing appropriate coursework. Students do not necessarily need to select one subcategory; however, what is important is that there is a logic and believable narrative to their course choices. Students should consult their faculty advisor to help with this determination.

Group A: Transnational security issues

IAFF 6148	Space and National Security
IAFF 6163	Transnational Security
IAFF 6164	Environmental Security
IAFF 6165	Fundamentals of Intelligence
IAFF 6169	Homeland Security
IAFF 6186	Special Topics in Security Policy Studies (Cybersecurity)
IAFF 6186	Special Topics in Security Policy Studies (International Organized Crime)
IAFF 6186	Special Topics in Security Policy Studies (Nuclear Proliferation and Non-Proliferation)
IAFF 6186	Special Topics in Security Policy Studies (Political Risk Analysis)
IAFF 6186	Special Topics in Security Policy Studies (Terrorism Today)
LAW 6552	Law of War **

Group B: Intelligence

IAFF 6138	Special Topics in International Development Studies (Human Trafficking)
IAFF 6163	Transnational Security
IAFF 6164	Environmental Security
IAFF 6165	Fundamentals of Intelligence
IAFF 6186	Special Topics in Security Policy Studies (International Organized Crime)
IAFF 6186	Special Topics in Security Policy Studies (Terrorism Today)

Group C: U.S. national security policy and process

HIST 6330	Modern U.S. Foreign Policy
IAFF 6106	Nuclear Weapons
IAFF 6118	Special Topics in International Affairs (Nuclear Security Policy)
IAFF 6165	Fundamentals of Intelligence
IAFF 6186	Special Topics in Security Policy Studies (Political Risk Analysis)

IAFF 6186	Special Topics in Security Policy Studies (Strategic Planning for the 21st Century)
IAFF 6521	U.S. Foreign Policy Summer Program
PSC 6346	The Politics of U.S. Foreign Policy
PSC 6349	International Security Politics
Group D: Conflict and conflict resolution	
IAFF 6118	Special Topics in International Affairs (International Law and the Use of Force)
IAFF 6118	Special Topics in International Affairs (Reinventing the United Nations)
IAFF 6164	Environmental Security
IAFF 6171	Introduction to Conflict Resolution
IAFF 6173	Security and Development
IAFF 6186	Special Topics in Security Policy Studies (Early Warning and Conflict Prevention)
IAFF 6186	Special Topics in Security Policy Studies (Insurgency and Counterinsurgency)
IAFF 6186	Special Topics in Security Policy Studies (International Peacekeeping)
IAFF 6186	Special Topics in Security Policy Studies (Security Challenges in Africa)
IAFF 6186	Special Topics in Security Policy Studies (Peace and Conflict in Africa)
Group E: Homeland security	
IAFF 6163	Transnational Security
IAFF 6165	Fundamentals of Intelligence
IAFF 6169	Homeland Security
IAFF 6186	Special Topics in Security Policy Studies (Cybersecurity)
IAFF 6186	Special Topics in Security Policy Studies (International Organized Crime)
IAFF 6186	Special Topics in Security Policy Studies (Political Risk Analysis)
IAFF 6186	Special Topics in Security Policy Studies (Terrorism Today)
Group F: Strategic concepts and military history	
HIST 6051	Re-thinking Cold War History
HIST 6330	Modern U.S. Foreign Policy

IAFF 6186	Special Topics in Security Policy Studies (Insurgency and Counterinsurgency)
IAFF 6186	Special Topics in Security Policy Studies (Strategic Planning for the 21st Century)
PSC 6478	International Relations of the Middle East
PSC 8489	Selected Topics in International Politics (Civil Wars)
Group G: Science, technology, and national security policy	
IAFF 6106	Nuclear Weapons
IAFF 6141	International Science and Technology Policy Cornerstone
IAFF 6145	U.S. Space Policy
IAFF 6151	Environmental Policy
IAFF 6158	Special Topics in International Science and Technology Policy (Space and National Security)
IAFF 6186	Special Topics in Security Policy Studies (Cybersecurity)
IAFF 6186	Special Topics in Security Policy Studies (Nuclear Proliferation and Nonproliferation)
Group H: Security and development	
IAFF 6118	Special Topics in International Affairs (Gender and Security)
IAFF 6138	Special Topics in International Development Studies (Care of Children in Complex Emergencies)
IAFF 6138	Special Topics in International Development Studies (Global Food Security)
IAFF 6138	Special Topics in International Development Studies (Human Trafficking)
IAFF 6138	Special Topics in International Development Studies (Violence, Gender, and Humanitarian Assistance)
IAFF 6171	Introduction to Conflict Resolution
IAFF 6173	Security and Development
IAFF 6186	Special Topics in Security Policy Studies (Early Warning and Conflict Prevention)

IAFF 6186	Special Topics in Security Policy Studies (Insurgency and Counterinsurgency)
IAFF 6186	Special Topics in Security Policy Studies (Peace and Conflict in Africa)
Group I: Weapons of mass destruction	
IAFF 6106	Nuclear Weapons
IAFF 6107	The Science of Nuclear Materials
IAFF 6118	Special Topics in International Affairs (Nuclear Security Policy)
IAFF 6186	Special Topics in Security Policy Studies (Nuclear Proliferation and Nonproliferation)
IAFF 6186	Special Topics in Security Policy Studies (Nuclear Strategy)
IAFF 6186	Special Topics in Security Policy Studies (Space and National Security)
IAFF 6186	Special Topics in Security Policy Studies (Weapons of Mass Destruction and Arms Control)
Group J: Regional Security	
Four courses that focus on the security issues within a region; general policy courses are not applicable. Please consult with the program director/advisor to develop a regional security field.	

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

**Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS, LATIN AMERICA CONCENTRATION

See notes regarding special topics and LAW courses* and enrollment requirements**.

Code	Title	Credits
Required—at least two of the following (6 credits)		
ANTH – Any 6000-level Anthropology course approved by the Program Director		
IAFF 6341	Latin American and Hemispheric Studies Cornerstone **	
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Economic and Social Development of Latin America)	
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Governments and Politics of Latin America)	
PSC 6383	Comparative Politics of Latin America	
PSC 6484	International Relations of Latin America	
Supporting courses (6 credits)		
Students may take IAFF 3187 for graduate credit as a supporting course with permission from the Program Director, academic advisor, and instructor, who must agree to assign additional work:		
IAFF 3187	Special Topics in Latin American and Hemispheric Studies	
IAFF 6341	Latin American and Hemispheric Studies Cornerstone **	
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Conflict and Contestation in Latin America)	
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Economic and Social Development of Latin America)	
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Governments and Politics of Latin America)	
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Immigration and Weak States)	
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (OAS & Democracy in the Americas)	

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be

taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

**Permission of the instructor required prior to enrollment.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS, MIDDLE EAST CONCENTRATION

See note regarding special topics and LAW courses*.

Code	Title	Credits
Required course (3 credits)		
At least one from the following:		
IAFF 6378	Special Topics in Middle East Studies (Political Economy of the Middle East)	
PSC 6377	Comparative Politics of the Middle East	
PSC 6478	International Relations of the Middle East	
Supporting courses (9 credits)		
ANTH 6707	Issues in Middle East Anthropology (Citizenship and Displacement in the Middle East)	
IAFF 6364	Religion and Society in the Modern Middle East	
IAFF 6378	Special Topics in Middle East Studies (Lebanon and Syria)	
IAFF 6378	Special Topics in Middle East Studies (Neighbors and Rivals: Iran and the Arab World)	
IAFF 6378	Special Topics in Middle East Studies (U.S. Policy in the Gulf)	
A full listing of Middle East courses is posted in advance of each semester on the Institute for Middle East Studies website.		

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS, NUCLEAR POLICY CONCENTRATION

See note regarding special topics and LAW courses*.

Code	Title	Credits
12 credits from the following:		
IAFF 6106	Nuclear Weapons	
IAFF 6107	The Science of Nuclear Materials	
IAFF 6118	Special Topics in International Affairs (Nuclear Proliferation and Nonproliferation)	
IAFF 6118	Special Topics in International Affairs (Nuclear Security Policy)	
IAFF 6158	Special Topics in International Science and Technology Policy (Energy Policy)	
IAFF 6186	Special Topics in Security Policy Studies (Nuclear Strategy)	
IAFF 6186	Special Topics in Security Policy Studies (Weapons of Mass Destruction and Arms Control)	

Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS, TECHNOLOGY AND INTERNATIONAL AFFAIRS CONCENTRATION

See note regarding special topics and LAW courses*.

Code	Title	Credits
Required course (3 credits):		
IAFF 6141	International Science and Technology Policy Cornerstone	
Supporting courses (9 credits):		

ECON 6255	Economics of Technological Change
IAFF 6142	Technology Creation/Diffusion
IAFF 6143	Science and Technology Policy Analysis
IAFF 6145	U.S. Space Policy
IAFF 6151	Environmental Policy
IAFF 6158	Special Topics in International Science and Technology Policy (Economics of Space)
IAFF 6186	Special Topics in Security Policy Studies (Cybersecurity)
IAFF 6501	Quantitative Analysis for International Affairs Practitioners

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS, U.S. FOREIGN POLICY CONCENTRATION

See note regarding special topics and LAW courses*.

Code	Title	Credits
Required course (3 credits):		
At least one course from the following. Courses not taken as the required course can be used as supporting courses.		
HIST 6330	Modern U.S. Foreign Policy	
IAFF 6521	U.S. Foreign Policy Summer Program	
PSC 6346	The Politics of U.S. Foreign Policy	
Supporting courses (9 credits):		
HIST 6032	Reading and Research Seminar: Strategy and Policy

IAFF 6378	Special Topics in Middle East Studies (U.S. Foreign Policy in the Gulf)
IAFF 6378	Special Topics in Middle East Studies (U.S. Security Policy in the Middle East)
PSC 6439	International Political Economy

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be

taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL DEVELOPMENT STUDIES

Steps from the World Bank and the International Monetary Fund, the Elliott School engages the Washington and global policy communities in meaningful discussions of development policy. The international development studies (IDS) graduate program is the fastest-growing program in the Elliott School of International Affairs. The program trains the next generation of development practitioners, exposing them to the latest research, best practices from the field, and experiential learning opportunities.

The MA in international development studies provides a broad understanding and appreciation of current development theories and issues, as well as the processes involved in formulating policies and implementing development projects. Students prepare for professional careers in the field of international development through interdisciplinary coursework that includes the study of economics, research methods, policy analysis, and management. In their final year, IDS students complete capstone projects, working with Elliott School faculty mentors in partnership with aid organizations around the world.

Visit the program website (<http://elliott.gwu.edu/international-development-studies/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including 6 credits in core field courses, a 4-credit capstone course sequence, 12 credits in analytical courses, 18 credits in an area of specialization. In addition, all students must fulfill a foreign language proficiency requirement (see below).

See notes regarding special topics and professional skills courses, the capstone, and the thesis option.*

Code	Title	Credits
Required		
Core courses (6 credits)		
Taken in the following sequence:		
IAFF 6121	International Development Studies Cornerstone (3 credits, taken in the first semester)	
IAFF 6122	Development Policy and Practice (3 credits, taken in the second semester)	

Analytical courses (12 credits—see below for course areas and options)

Area of specialization (18 credits—see below for potential areas of specialization and associated courses)

Capstone (4 credits)

Students are required to complete a two-semester capstone sequence that involves securing a sponsoring client outside the University and fulfilling a project with that client of mutual interest and research in international development. The capstone sequence includes a 1-credit pre-capstone course that must be taken in the fall of the student's second or third year and a 3-credit capstone course that must be taken in the spring of the student's second or third year. Both courses in the capstone sequence must be taken consecutively.

IAFF 6137	Development Studies Pre-Capstone Workshop
-----------	---

IAFF 6139	International Development Studies Capstone
-----------	--

Professional skills courses

The Elliott School offers a series of one-credit workshops on a variety of topics. Students are encouraged to consider taking up to three of these skills courses. Up to 3 credits of professional skills courses can be applied to one's specialization in the IDS program.

Additional thesis option

Students who wish to complete a thesis do so in addition to the capstone requirement. Students pursuing a thesis must have a minimum GPA of 3.5 and approval from the faculty member who will serve as their thesis director. Thesis students also need to complete at least one research methods course prior to enrolling in thesis courses. Thesis credits are counted as specialization credits with Program Director approval. The two 3-credit thesis courses must be taken consecutively.

IAFF 6998	Thesis
-----------	--------

IAFF 6999	Thesis
-----------	--------

Analytical courses (12 credits)

Code	Title	Credits
Students must take one course in each of the four following areas to fulfill this requirement. All courses for this requirement must be completed by the end of the third semester to fully prepare students for the capstone project in their final semester. In addition to the courses listed under each requirement, other appropriate courses may count towards requirements with the approval of the Program Director.		

Economics (taken during the first semester)

Management	
Research methods	
A choice between policy analysis or a second course in research methods	
Economics (3 credits)	
Required:	
ECON 6250	Survey of Economic Development *
*Students with a strong economics background may substitute a more advanced development economics course with Program Director approval.	
Management (3 credits)	
One of the following:	
EDUC 6381	Program Evaluation: Theory and Practice
EDUC 6620	Strategies and Analysis in International Education (Managing Study Abroad and International Students)
EDUC 6620	Strategies and Analysis in International Education (Planning for Education Reform)
EMSE 6001	The Management of Technical Organizations
EMSE 6260	Energy Management
EMSE 6285	Analytical Tools for Energy Management
EMSE 6305	Crisis and Emergency Management
EMSE 6310	Information Technology in Crisis and Emergency Management
EMSE 6320	International Disaster Management
EMSE 6325	Medical and Public Health Emergency Management
EMSE 6330	Management of Terrorism Preparedness and Response
EMSE 6350	Hazard Mitigation in Disaster Management
EMSE 6820	Program and Project Management
IBUS 6402	Managing in Developing Countries
MGT 6281	Small Business Management

PPPA 6016	Public and Nonprofit Program Evaluation
PPPA 6031	Governing and Managing Nonprofit Organizations
PPPA 6032	Managing Fund Raising and Philanthropy
PPPA 6057	International Development Administration
PPPA 6058	International Development NGO Management
PPPA 6059	International Development Management Processes and Tools
PPPA 6062	Community Development Policy and Management
PUBH 6006	
PUBH 6435	Global Health Program Development and Implementation
PUBH 6436	Global Health Program Management and Leadership
PUBH 6513	Community Health Management
SMPP 6210	Strategic Environmental Management
Research Methods (3 credits)	
At least one of the following courses:	
ANTH 6331	Research Methods in Development Anthropology
ANTH 6531	Methods in Sociocultural Anthropology
EDUC 6114	Introduction to Quantitative Research
EDUC 6116	Introduction to Educational Statistics
EDUC 8122	Qualitative Research Methods
GEOG 6201	Geographic Thought
GEOG 6293	Special Topics (Qualitative Methods)
GEOG 6305	Geospatial Statistics
IAFF 6118	Special Topics in International Affairs (Applied Qualitative Methods)
IAFF 6118	Special Topics in International Affairs (Research Methods in Global Gender Issues)

IAFF 6138	Special Topics in International Development Studies (Monitoring and Evaluation for Foreign Assistance) **
IAFF 6501	Quantitative Analysis for International Affairs Practitioners
PPPA 6002	Research Methods and Applied Statistics
PPPA 6013	Econometrics for Policy Research I
PPPA 6016	Public and Nonprofit Program Evaluation
PPPA 8022	Econometrics for Policy Research II
PUBH 6247	Design of Health Studies
PUBH 6260	Advanced Data Analysis for Public Health
PUBH 6264	Quantitative Methods
PUBH 6266	Biostatistical Methods
PUBH 6410	Global Health Study Design
PUBH 6411	Global Health Qualitative Research Methods
PUBH 6412	Global Health Quantitative Research Methods
PUBH 6502	Practical Data Analysis for Prevention and Community Health
PUBH 6853	Use of Statistical Packages for Data Management and Data Analysis
Students who wish to take a public health course not listed above to fulfill their research methods requirement should consult their advisor before enrolling in the course.	
SOC 6230	Sociological Research Methods
SOC 6232	Qualitative Methodology: Doing Field Research
Policy Analysis (3 credits)	
One of the following courses. In lieu of a policy analysis course, students may opt to take a second research methods course.	
EDUC 6371	Education Policy (Policy Making in Education)
EDUC 6388	Analysis of Education Policy Issues

EDUC 6610	Programs and Policies in International Education (Political Issues and International Education in Developing Countries)
IAFF 6102	Global Gender Policy
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Brazil Development Policy 21st Century)
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Brazil in the Global Arena)
IAFF 6378	Special Topics in Middle East Studies (U.S. Policy in the Gulf)
PPPA 6006	Policy Analysis
PPPA 6013	Econometrics for Policy Research I
PPPA 6014	Microeconomics for Public Policy II
PPPA 6049	Urban and Regional Policy Analysis
PPPA 6066	U.S. Environmental Policy
PPPA 6077	Case Studies in Public Policy
PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6310	Statistical Analysis in Health Policy
PUBH 6315	Introduction to Health Policy Analysis
PUBH 6320	Advanced Health Policy Analysis
PUBH 6325	Federal Policymaking and Policy Advocacy
WGSS 6221	Research Issues in Women's, Gender, and Sexuality Studies
WGSS 6240	Gender and Public Policy

Areas of specialization (18 credits)

In consultation with the program director, students design their own area of specialization based on their interests and career goals. The list of specializations below is illustrative, and students' field of specialization may include a combination of more than one of these popular thematic areas in international development or may involve other issues not covered below. Courses listed, likewise, should be treated as illustrative examples, not requirements. Up to 3 credits of professional skills courses can be applied to the specialization. Students are strongly encouraged to select courses offered by schools throughout the University as well as approved courses offered

by other institutions through the Consortium of Universities of the Washington Metropolitan Area.”

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes (<http://my.gwu.edu/mod/pws/>) for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

Additional information regarding skills courses (<https://elliott.gwu.edu/professional-skills-courses/>), the capstone (<https://elliott.gwu.edu/global-capstone/>), and the thesis (<https://elliott.gwu.edu/thesis/>) is available on the Elliott School website.

**IAFF 6138 (Monitoring and Evaluation for Foreign Assistance) may be used as the second research methods course only in cases where a student has opted to take two research methods courses instead of one research methods and one policy analysis course.

Foreign language proficiency requirement

Students in the master of arts in the field of international development studies program are required to demonstrate proficiency in a modern language other than English. Students may fulfill this requirement in one of the following ways:

- Having earned a minimum grade of B in a sixth-semester university-level advanced language course completed no more than three years prior to matriculation in the Elliott School's master's degree program.
- Having earned a minimum grade of B in a sixth-semester university-level advanced language course at GW, or in an approved course taken at another institution of higher learning, including Elliott School exchange partner institutions, while enrolled in the Elliott School master's program.
- Passing the Elliott School-administered foreign language proficiency reading and speaking examination at the currently-required level of proficiency (<https://elliott.gwu.edu/foreign-language-proficiency-requirement/>). The Elliott School administers foreign language proficiency examinations once in the fall and once in the spring semesters. Students should plan to take the language proficiency examination as soon as possible following their matriculation in the program. Students have three opportunities to pass the examination. Failure to pass the examination for a third time results in dismissal from the program.
- Achieving the required proficiency level in a reading and speaking examination administered by an Elliott School-approved foreign-language assessment institution, at the student's expense, while enrolled in the Elliott School's Master's Degree Program.
- Demonstrating the required foreign language proficiency level in a foreign language professional skills course (<https://elliott.gwu.edu/foreign-language-proficiency-requirement/>) offered through the Elliott School. The instructor tests the student during the course to determine if the required proficiency level has been achieved.

As of fall 2018, the above policy applies to new and current students in the Elliott School's non-regional studies master's programs with a foreign language requirement. Consult the Program Director for more information

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL ECONOMIC POLICY

The Elliott School's master of arts in international economic policy (MIEP) is an interdisciplinary program that provides a strong foundation for understanding new challenges in the global economic system. The program provides analytical rigor and tailored professional specializations to help students pursue challenging careers in the private sector, public sector and non-profit organizations.

Evening classes accommodate the busy schedules of working professionals and open pathways through which full-time students can explore internships in international organizations, consulting firms and government agencies in Washington DC. The MIEP alumni network provides professional internship and job opportunities for students from all over the world.

Visit the program (<https://elliott.gwu.edu/international-economic-policy/>) website for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including 15 credits in core courses, a 3-credit quantitative analysis course, a 4-credit capstone sequence, and 18 credits in a self-designed professional specialization.

Students admitted to the MA in international economic policy (MIEP) program must demonstrate proficiency in intermediate microeconomics and macroeconomics before taking any Economics (ECON) course, including required economics coursework. Admitted students without this demonstrated proficiency may take courses in other departments, including those with an IAFF designation. For more details, visit the intermediate theory requirement page (<https://elliott.gwu.edu/miep-intermediate-theory-requirement/>) or contact miep@gwu.edu.

Code	Title	Credits
Required (22 credits)		
Core courses (15 credits)		
ECON 6250	Survey of Economic Development	
ECON 6283	Survey of International Trade Theory and Policy	
ECON 6284	Survey of International Macroeconomics and Finance Theory and Policy	
IAFF 6191	Financial Accounting **	
IAFF 6193	Finance **	
Quantitative analysis course (3 credits)		

IAFF 6501	Quantitative Analysis for International Affairs Practitioners
or ECON 6374	Probability and Statistics for Economics
or PPPA 6002	Research Methods and Applied Statistics

Capstone sequence (4 credits)

Students complete a two-course capstone sequence that most closely matches the thematic area of their course work. The capstone sequence includes a 2-credit capstone workshop taken before the 2-credit capstone seminar. Students must have completed at least 18 credits of coursework prior to starting the capstone sequence. The two 2-credit capstone courses must be taken consecutively.

IAFF 6898	Capstone Workshop
-----------	-------------------

IAFF 6899	Capstone Course
-----------	-----------------

Self-designed professional specialization (18 Credits)

In addition to the required curriculum, students work with the program director to develop a self-designed professional specialization that includes at least six additional courses (18 credits). Up to 3 of these credits may be taken in professional skills courses (IAFF 6502, IAFF 6503, and/or IAFF 6504).

*Students may demonstrate proficiency in one of the following ways:

1. Completion within two years prior to matriculation of an intermediate microeconomics and intermediate macroeconomics course with a minimum grade of B- at an accredited university or college.
2. Successful completion of the Elliott School (non-credit) online intermediate economics program. This program is offered during the summer by the Institute for International Economic Policy. Each program lasts about eight weeks. See the MIEP Intermediate Theory Programs (<https://iiep.gwu.edu/intermediate-theory-programs/>) page for additional information, including fees.
3. Passing a proficiency exam administered by the MIEP program, normally scheduled in the week prior to the beginning of the fall and spring semesters.

For additional information, visit the intermediate theory requirement (<https://elliott.gwu.edu/miep-intermediate-theory-requirement/>) page or contact miep@gwu.edu.

**Students who desire more rigorous quantitative methods coursework may substitute more advanced econometrics or mathematical economics courses for IAFF 6191 and IAFF 6193 with program director approval.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL ECONOMIC POLICY, STEM TRACK

The master of arts in international economic policy (MIEP) STEM Track program provides students with a firm understanding of international trade, international finance, and development economics. Students pursuing the STEM track complete a more quantitatively oriented program of study, culminating in a two-semester capstone sequence utilizing econometric and mathematical economic models under the direction of the MIEP program director.

Once admitted to the MIEP program, students may petition the program director to pursue the STEM track, which focuses on econometrics and quantitative methods. Students pursuing this track must have completed at least one semester of calculus, intermediate microeconomics, and intermediate macroeconomics within two academic years before beginning the STEM track.

Visit the Elliott School website (<https://elliott.gwu.edu/master-arts-programs/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including 21 credits in core courses, a 4-credit capstone course sequence, and 15 credits in elective courses.

Students in the MA in international economic policy (MIEP) and the MIEP STEM Track programs must demonstrate proficiency in intermediate microeconomics and macroeconomics before taking any Economics (ECON) course, including required economics coursework*. Students admitted without this proficiency may take courses in other departments, including those with an IAFF designation.

Code	Title	Credits
Required (25 credits)		
Core courses (21 credits)		
ECON 6250	Survey of Economic Development	
ECON 6283	Survey of International Trade Theory and Policy	
ECON 6284	Survey of International Macroeconomics and Finance Theory and Policy	
ECON 6300	Mathematical Methods for Economics	
ECON 6374	Probability and Statistics for Economics	
ECON 6375	Applied Econometrics	
ECON 6376	Time Series Analysis	

Capstone sequence (4 credits)

Students complete a two-course capstone project using econometric or mathematical economic models under the direction of the MIEP program director. The capstone sequence includes a 2-credit capstone workshop taken before the 2-credit capstone seminar. Students must have completed at least 18 credits of coursework prior to starting the capstone sequence. The two 2-credit capstone courses must be taken consecutively.

IAFF 6898	Capstone Workshop
-----------	-------------------

IAFF 6899	Capstone Course
-----------	-----------------

Electives (15 Credits)

In addition to the required curriculum, students work with the program director to select 15 credits of further course work. Up to 3 of these credits may be taken in professional skills courses (IAFF 6502 and/or IAFF 6503).

*Students may demonstrate proficiency in one of the following ways:

1. Completion within two years prior to matriculation of an intermediate microeconomics and intermediate macroeconomics course with a minimum grade of B- at an accredited university or college.
2. Successful completion of the Elliott School (non-credit) online intermediate economics program. This program is offered during the summer by the Institute for International Economic Policy. Each program lasts about eight weeks. See the MIEP Intermediate Theory Programs (<https://iiep.gwu.edu/intermediate-theory-programs/>) page for additional information, including fees.
3. Passing a proficiency exam administered by the MIEP program, normally scheduled in the week prior to the beginning of the fall and spring semesters.

For additional information, visit the intermediate theory requirement (<https://elliott.gwu.edu/miep-intermediate-theory-requirement/>) page or contact miep@gwu.edu.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL SCIENCE AND TECHNOLOGY POLICY

Scientific and technological advances provide the basis of international competitiveness and account for the bulk of national growth and the improvement of the quality of life around the world. The ability to create, adapt, and adopt new technologies defines modern societies. In today's global environment, the need for innovation is essential for solving societal problems and staying ahead of competition. Developments in information technology, space exploration, genetic modification, and advances in material science are governed and shaped by institutions that set science and

technology policy. The Master of Arts in international science and technology policy prepares students to understand and respond to these important dynamics.

The multidisciplinary 40-credit M.A. program includes a core field in science technology and international affairs, which allows students to concentrate on areas of particular interest; an analytical competency requirement, which provides career-enhancing, marketable skills in policy analysis, economic theory, or statistics; and an elective field which reflects individual interests and career goals.

Recent graduates often work in research, analysis, or management positions with titles such as research analyst, program or policy analyst, legislative analyst, or more specialized areas. Analysts are often employed with government agencies, advocacy groups, think tanks, science and technology-oriented publications, and other organizations.

Visit the program website (<https://elliott.gwu.edu/international-science-and-technology-policy/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including 6 credits in core field courses, a 4-credit capstone course sequence, 15 credits in a concentration, 6 credits in analytical competency courses, and 9 credits in elective courses.

See note regarding special topics and skills courses, the capstone, and LAW courses.*

Code	Title	Credits
------	-------	---------

Required

Core field courses (6 credits)

IAFF 6141	International Science and Technology Policy Cornerstone
-----------	---

IAFF 6143	Science and Technology Policy Analysis
-----------	--

Capstone (4 credits)

Students complete a two-course capstone sequence that most closely matches the thematic area of their project. The capstone sequence includes a 2-credit capstone workshop taken before the 2-credit capstone seminar. Students must have completed at least 18 credits of coursework prior to starting the capstone sequence. The two 2-credit capstone courses must be taken consecutively.

IAFF 6898	Capstone Workshop
-----------	-------------------

IAFF 6899	Capstone Course
-----------	-----------------

Concentration (15 credits)

At least five courses in one concentration. Students may choose from the following concentrations or they may design a personalized concentration in consultation with the Program Director.

A. Space Policy

EHS 6227 Introduction to Human Health in Space

IAFF 6145 U.S. Space Policy

IAFF 6146 Space Law

IAFF 6148 Space and National Security

IAFF 6153 Science, Technology, and National Security

IAFF 6158 Special Topics in International Science and Technology Policy (Issues in Space Policy)

B. Energy Policy

EMSE 6260 Energy Management

EMSE 6290 Climate Change: Policy, Impacts, and Response

IAFF 6151 Environmental Policy

IAFF 6158 Special Topics in International Science and Technology Policy (Energy Policy)

IAFF 6158 Special Topics in International Science and Technology Policy (Renewable Energy in a Decarbonizing World)

IAFF 6186 Special Topics in Security Policy Studies (Energy Security)

IAFF 6198 Special Topics in International Economic Policy (International Climate Change Policy)

IBUS 4900 Special Topics (Global Energy)

IBUS 6400 Oil: Industry, Economy, and Society

LAW 6460 Environment and Energy Policy Practicum

PUBH 6130 Sustainable Energy and the Environment

C. National Security

IAFF 6106 Nuclear Weapons

IAFF 6107 The Science of Nuclear Materials

IAFF 6118 Special Topics in International Affairs (U.S. Foreign Policy and International Organizations)

IAFF 6153 Science, Technology, and National Security

IAFF 6186 Special Topics in Security Policy Studies (Cybersecurity)

IAFF 6186 Special Topics in Security Policy Studies (Cyber Threats, Policy, and Strategy)

IAFF 6186 Special Topics in Security Policy Studies (Methods for Defense Analysis)

IAFF 6186 Special Topics in Security Policy Studies (Military Technology Assessment)

IAFF 6186 Special Topics in Security Policy Studies (Nuclear Security)

PSC 6348 Politics of U.S. National Security Policy (U.S. National Security Policy Making)

D. Environmental Policy

EMSE 6200 Policy Factors in Environmental and Energy Management

EMSE 6220 Environmental Management

EMSE 6240 Environmental Hazard Management

EMSE 6290 Climate Change: Policy, Impacts, and Response

GEOG 6219 Seminar: Climatology

GEOG 6220 Seminar: Climatic Change

GEOG 6222 Seminar: Resources and the Environment

GEOG 6230 Seminar: Environmental Issues in Development

IAFF 6118 Special Topics in International Affairs (Managing the World's Water)

IAFF 6151 Environmental Policy

IAFF 6164 Environmental Security

IAFF 6198 Special Topics in International Economic Policy (International Climate Change Policy)

LAW 6454 International Environmental Law

LAW 6460 Environment and Energy Policy Practicum

PUBH 6130	Sustainable Energy and the Environment
E. Nuclear Policy	
IAFF 6106	Nuclear Weapons
IAFF 6107	The Science of Nuclear Materials
IAFF 6118	Special Topics in International Affairs (Nuclear Security Policy)
IAFF 6158	Special Topics in International Science and Technology Policy (Energy Policy)
IAFF 6186	Special Topics in Security Policy Studies (Nuclear Security)
F. Technology Innovation Management and Policy	
ECON 6255	Economics of Technological Change
IAFF 6142	Technology Creation/Diffusion
IAFF 6186	Special Topics in Security Policy Studies (Military Technology Assessment)
IAFF 6198	Special Topics in International Economic Policy (Digital Trade and Global Governance)
IAFF 6198	Special Topics in International Economic Policy (International Entrepreneurship)
IBUS 4900	Special Topics (Emerging Technologies)
Analytical competency (6 credits)	
Two courses from the following:	
ECON 6237	Economics of the Environment and Natural Resources
ECON 6250	Survey of Economic Development
ECON 6255	Economics of Technological Change
ECON 6280	Survey of International Economics
ECON 6295	Special Topics (Energy Economics)
ECON 6301	Applied Microeconomic Theory
ECON 6305	Applied Macroeconomic Theory
IAFF 6118	Special Topics in International Affairs (Applied Qualitative Methods)
IAFF 6118	Special Topics in International Affairs (Data Analytics for International Affairs)

IAFF 6198	Special Topics in International Economic Policy (Advanced Quantitative Analysis)
-----------	--

IAFF 6501	Quantitative Analysis for International Affairs Practitioners
-----------	---

PPPA 6002	Research Methods and Applied Statistics
-----------	---

PPPA 6003	Economics for Public Decision-Making
-----------	--------------------------------------

PPPA 6005	Public Budgeting, Revenue, and Expenditure Analysis
-----------	---

PPPA 6007	Microeconomics for Public Policy I
-----------	------------------------------------

PPPA 6015	Benefit-Cost Analysis
-----------	-----------------------

PPPA 6020	Decision Modeling for Public Policy
-----------	-------------------------------------

PPPA 6085	Special Topics in Public Policy (Quantitative Modeling for Public Policy Analysis)
-----------	--

Other relevant courses not listed above may be substituted with the approval of the Program Director.

Electives (9 credits)

9 credits in elective courses. Elective courses may include graduate-level courses offered through other Elliott School programs, departments in other GW schools, or a combination of the two. Up to 3 credits may be taken as professional skills courses (IAFF 6502 or IAFF 6503).

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes (<http://my.gwu.edu/mod/pws/>) for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

Additional information regarding skills courses (<https://elliott.gwu.edu/professional-skills-courses/>) and the capstone (<https://elliott.gwu.edu/global-capstone/>) (<https://elliott.gwu.edu/thesis/>) is available on the Elliott School website.

Law School courses—Students may, with permission of their advisor, include courses in the Law School (<http://www.law.gwu.edu/>) in their major field. Enrolling in a LAW course also requires permission of the Law School dean of students. Students should consult the Elliott School Office of Academic Advising and Student Services (<http://elliott.gwu.edu/graduate-advising/>) office before enrolling in LAW courses.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL TRADE AND INVESTMENT POLICY

The master of arts (MA) in international trade and investment policy (ITIP) degree program trains students in critical areas of the economics, politics, and history of international trade as well as econometrics. The program provides additional specialized training in international economics or international business. Course work in these fields focuses on U.S. trade policy, the effects of international trade on developing countries, emerging market financial crises, and managing firms in developing countries. The program culminates in a one-semester capstone project in which students work in small teams on a contemporary policy problem.

Visit the program website (<https://elliott.gwu.edu/international-trade-and-investment-policy/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including 12 credits in core field courses, a 1-credit capstone course, 15 credits in elective courses, and 12 credits in a concentration. In addition, students must satisfy the program's intermediate economics theory requirement.

Intermediate economic theory requirement

Students in the international trade and investment policy program must complete a course in both intermediate micro- and macroeconomics theory with a minimum grade of *B*. This requirement may be fulfilled in one of the following ways:

- Using a course completed at the undergraduate intermediate level with a minimum grade of *B* within 5 years of matriculation in the program. Such courses typically have titles that include microeconomics, price theory, or macroeconomics. Course titles with "principles of" or "introduction to" will not be at the required level of instruction.
- Completing ECON 6217 (<https://www.gwu.edu/~bulletin/grad/econ.html#6217>) or PPPA 6014 (<http://bulletin.gwu.edu/arts-sciences/public-policy-administration/#coursestext>), and ECON 6218 (<http://bulletin.gwu.edu/arts-sciences/economics/#coursestext>) at GW.
- Passing the intermediate proficiency examinations offered during the Elliott School's fall orientation.

Ideally, students complete intermediate microeconomics before taking ECON 6283 (<https://www.gwu.edu/~bulletin/grad/econ.html#6283>) and intermediate macroeconomics before taking ECON 6284 (<https://www.gwu.edu/~bulletin/grad/econ.html#6284>).

See notes regarding special topics courses and the capstone.*

Code	Title	Credits
------	-------	---------

Required

Core field (12 credits)

Students must take the following courses in their first year with their cohort:

ECON 6283	Survey of International Trade Theory and Policy
ECON 6284	Survey of International Macroeconomics and Finance Theory and Policy
PSC 6439	International Political Economy

And one quantitative methods course from the following options:

DNSC 6209	Forecasting for Analytics
DNSC 6274	Statistical Modeling and Analysis
ECON 2123	Introduction to Econometrics
IAFF 6198	Special Topics in International Economic Policy (Advanced Quantitative Methods)

PPPA 6013	Econometrics for Policy Research I
-----------	------------------------------------

Capstone (1 credit)

IAFF 6199	International Trade and Investment Policy Capstone
-----------	--

Electives (15 credits)

15 credits in elective coursework in areas such as accounting and finance, economic analysis, regionally-focused history and political science courses, foreign language study (up to 6 credits), or 1-credit skills courses (up to 3 credits).

Concentration (12 credits)

At least four courses from one of the following concentrations:

A. Development Economics

ECON 6237	Economics of the Environment and Natural Resources
ECON 6250	Survey of Economic Development
ECON 6269	Economy of China I
ECON 6285	Economic Development of Latin America

ECON 6292	Topics in International Trade
ECON 6293	Topics in International Finance
ECON 6295	Special Topics (Economic Conditions Analysis and Forecasting)
ECON 6295	Special Topics (Economic Analysis of International Trade Law)
ECON 6295	Special Topics (Energy Economics)
ECON 6295	Special Topics (Economics of Middle East and North Africa)
IAFF 6138	Special Topics in International Development Studies (Global Food Security)
IAFF 6138	Special Topics in International Development Studies (Private Sector Development)
IAFF 6138	Special Topics in International Development Studies (Poverty in all its Dimensions)
IAFF 6142	Technology Creation/Diffusion
IAFF 6198	Special Topics in International Economic Policy (21st Century Trade Policies: Issues and Strategy)
IAFF 6198	Special Topics in International Economic Policy (Corruption, Development and Governance)
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Migration, Remittances, and Development)
IAFF 6378	Special Topics in Middle East Studies (Oil: Industry, Economy, and Society)
PPPA 6057	International Development Administration
PPPA 6058	International Development NGO Management
PPPA 6085	Special Topics in Public Policy (Poverty and Social Poverty)
PUBH 6340	Health Economics and Finance
PUBH 6443	Global Health Agreements and Conventions
B. Finance	
ECON 6293	Topics in International Finance (Emerging Markets Capital Flows and Crises)

FINA 6221	Financial Decision Making
FINA 6222	Capital Formation
FINA 6223	Investment Analysis and Portfolio Management
FINA 6224	Financial Management
FINA 6239	Applied Portfolio Management
IBUS 6301	International Business Finance
IBUS 6304	Financial Crises and the Global Economy
MBAD 6211	Financial Accounting
MBAD 6235	Finance
C. International Business	
ECON 6237	Economics of the Environment and Natural Resources
ECON 6293	Topics in International Finance (Emerging Markets Capital Flows and Crises)
ECON 6295	Special Topics (Economic Conditions Analysis and Forecasting)
FINA 6221	Financial Decision Making
FINA 6223	Investment Analysis and Portfolio Management
IAFF 6186	Special Topics in Security Policy Studies (Political Risk Analysis)
IAFF 6198	Special Topics in International Economic Policy (Strategies and International Political Economy)
IBUS 6201	International Marketing
IBUS 6202	Regional Strategy for Multinationals
IBUS 6297	International Management Experience
IBUS 6301	International Business Finance
IBUS 6304	Financial Crises and the Global Economy
IBUS 6400	Oil: Industry, Economy, and Society
IBUS 6401	International Business Strategy
IBUS 6402	Managing in Developing Countries
D. International Economic Policy Analysis	

ECON 6237	Economics of the Environment and Natural Resources	IBUS 6304	Financial Crises and the Global Economy
ECON 6250	Survey of Economic Development	PPPA 6006	Policy Analysis
ECON 6255	Economics of Technological Change	PPPA 6014	Microeconomics for Public Policy II
ECON 6269	Economy of China I	PPPA 6015	Benefit-Cost Analysis
ECON 6271	Economy of Japan	PPPA 6052	Tax Policy Analysis
ECON 6285	Economic Development of Latin America	PPPA 6085	Special Topics in Public Policy
ECON 6292	Topics in International Trade (Economics of U.S. Trade Policy)	PUBH 6340	Health Economics and Finance
ECON 6292	Topics in International Trade (International Migration and Labor Markets)	PUBH 6443	Global Health Agreements and Conventions
ECON 6293	Topics in International Finance (Emerging Markets Capital Flows and Crises)		
ECON 6295	Special Topics (Economic Conditions Analysis and Forecasting)		
ECON 6295	Special Topics (Economic Analysis of International Trade Law)		
ECON 6295	Special Topics (Energy Economics)		
ECON 6295	Special Topics (Economics of Middle East and North Africa)		
IAFF 6142	Technology Creation/Diffusion		
IAFF 6198	Special Topics in International Economic Policy (21st Century Trade Policies: Issues and Strategy)		
IAFF 6198	Special Topics in International Economic Policy (Digital Trade and Global Governance)		
IAFF 6198	Special Topics in International Economic Policy (Corruption, Development and Governance)		
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Migration, Remittances, and Development)		
IAFF 6378	Special Topics in Middle East Studies (Oil: Industry, Economy, and Society)		
IAFF 6378	Special Topics in Middle East Studies (Political Economy of the Middle East)		
IBUS 6301	International Business Finance		

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes (<http://my.gwu.edu/mod/pws/>) for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

Additional information regarding the capstone (<https://elliott.gwu.edu/global-capstone/>) is available on the Elliott School website.

MASTER OF ARTS IN THE FIELD OF LATIN AMERICAN AND HEMISPHERIC STUDIES

Latin America's proximity, shared history, and increasingly intertwined demography make it a key region for the United States. Yet, despite impressive democratization in the region in recent decades, serious problems – poverty, inequality, ethnic cleavage, crime, political violence, and illicit drug flows – persist. Future hemispheric leaders will grapple with an often contradictory blend of political and economic successes and failures. To develop innovative approaches to the enduring problems of the hemisphere, tomorrow's leaders need a broad and deep knowledge of the region.

The master of arts in Latin American and hemispheric studies program prepares students for careers throughout the Western Hemisphere. The program's faculty members are internationally recognized authorities. Outstanding part-time professors are drawn primarily from the Washington policy community and provide insiders' perspectives on key institutions and policies. The program coordinates a dynamic series of special events that brings leading policymakers from Washington and all over the world to engage with students and faculty on issues facing the hemisphere.

The program's location in the heart of Washington, D.C., facilitates employment at a broad spectrum of organizations. Students and alumni are employed at leading organizations that are only a few blocks from the GW campus, including

multilateral organizations like the Organization of American States and the World Bank, policy institutes like the Inter-American Dialogue and the Washington Office on Latin America, government agencies like the Departments of State and Commerce, and many more.

Visit the program website (<https://elliott.gwu.edu/latin-american-studies/>)for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including a 3-credit cornerstone course, 9 credits in core field courses, a 3-credit research methods course, a 4-credit capstone sequence, 12 credits in specialized field courses, and 9 credits in electives. In addition, all students must fulfill a foreign language proficiency requirement (see below).

See note regarding special topics courses, the capstone sequence, and the additional thesis option*.

Code	Title	Credits
Required		
See notes regarding special topics courses, the capstone sequence, and the additional thesis option*.		
Cornerstone (3 credits)		
IAFF 6341	Latin American and Hemispheric Studies Cornerstone (taken in the fall semester of the first year)	
Core field (9 credits)		
Three courses, each in a different field, selected from the following groups:		
A. Anthropology		
ANTH 6702	Issues in Latin American Anthropology **	
B. Economics and Political Economy		
ECON 6285	Economic Development of Latin America	
IAFF 3177	Political Economy of Latin America	
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Economic and Social Development of Latin America)	
ECON 1011 and ECON 1012 or equivalent courses are prerequisites for ECON 6285.		
If the Economic and Social Development section of IAFF 6358 is chosen as the required course, it cannot also count as supporting coursework. Students may take IAFF 6358 courses with other titles as supporting coursework.		

C. Geography	
GEOG 6261	Geographical Perspectives on Latin America
GEOG 6232	Migration and Development
D. History	
Any HIST course numbered in the 3700 or above approved by the Program Director.	
E. International Affairs	
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (International Relations of Latin America)
or PSC 6484	International Relations of Latin America
F. Political Science	
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Government and Politics of Latin America)
or PSC 6383	Comparative Politics of Latin America
G. Spanish Literature	
Any SPAN course numbered in the 3400s, 3500s, 4400s, or 4500s that focuses on the literature of Latin America.	
Research methods (3 credits)	
ANTH 6331	Research Methods in Development Anthropology
EDUC 6114	Introduction to Quantitative Research
EDUC 8122	Qualitative Research Methods
EDUC 8130	Survey Research Methods
EDUC 8131	Case Study Research Methods
EDUC 8140	Ethnographic Research Methods
IAFF 6118	Special Topics in International Affairs (Qualitative Methods)
IAFF 6198	Special Topics in International Economic Policy **
IAFF 6501	Quantitative Analysis for International Affairs Practitioners
PPPA 6002	Research Methods and Applied Statistics
PPPA 6013	Econometrics for Policy Research I

PSC 8101	Introduction to Empirical Political Analysis
PUBH 6260	Advanced Data Analysis for Public Health
PUBH 6264	Quantitative Methods
PUBH 6410	Global Health Study Design
PUBH 6411	Global Health Qualitative Research Methods
PUBH 6412	Global Health Quantitative Research Methods
SOC 6230	Sociological Research Methods
SOC 6231	Data Analysis
SOC 6232	Qualitative Methodology: Doing Field Research

Capstone (4 credits)

Students are required to complete a two-course capstone sequence that involves collaboration on a project of mutual interest and research in Latin America or the United States with sponsoring institutions outside the University. The capstone sequence includes a 2-credit pre-capstone course that must be taken in the fall of the student's second or third year and a 2-credit capstone course that must be taken in the spring of the student's second or third year.

IAFF 6357	Latin American and Hemispheric Studies Pre-Capstone Workshop
-----------	--

IAFF 6359	Latin American and Hemispheric Studies Capstone
-----------	---

Specialized fields (12 credits)

Students select two specialized fields from the following and take at least two courses in each, for a total of 12 credits.

Anthropology

Required course

One ANTH course at the 6000-level approved by the advisor.

Supporting courses

ANTH 2750W	Latinos in the United States
------------	------------------------------

ANTH 3814	Ancient Mexican Civilizations
-----------	-------------------------------

IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Indigenous Social Movements)
-----------	--

Art History, Literature, and Culture

SPAN 3410	Latin American Short Fiction
-----------	------------------------------

SPAN 3420	The Essay in Spain and Latin America
-----------	--------------------------------------

SPAN 3430	Afro-Latin America in the Diaspora
-----------	------------------------------------

SPAN 3570	Women Writers of Spain and Latin America
-----------	--

SPAN 3600	Special Topics (Spanish and Spanish-American Literature)
-----------	--

SPAN 3700	Cinema of Spain and Latin America (Film as Text)
-----------	--

SPAN 4410	Contemporary Narrative in Latin America (Film as Text)
-----------	--

SPAN 4460	Southern Cone Literature and Culture
-----------	--------------------------------------

SPAN 4560	Modern Poetry of Spain and Latin America
-----------	--

Economic Development

Required

One from the following:

ECON 6285	Economic Development of Latin America
-----------	---------------------------------------

IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Economic and Social Development of Latin America)
-----------	---

Supporting courses

ECON 6280	Survey of International Economics
-----------	-----------------------------------

ECON 6283	Survey of International Trade Theory and Policy
-----------	---

ECON 6284	Survey of International Macroeconomics and Finance Theory and Policy
-----------	--

ECON 6295	Special Topics (Applied Industrial Organization)
-----------	--

ECON 6295	Special Topics (Economic Analysis of International Trade Law)
-----------	---

ECON 6295	Special Topics (Labor Economics and Public Policy)
-----------	--

IAFF 3183	Special Topics in Development Policy (Post-Disaster Development: Haiti in Comparative Perspective)
-----------	--

IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Political Economy of Latin America)
-----------	---

IAFF 6138	Special Topics in International Development Studies (Climate Change and Sustainable Development)
IAFF 6138	Special Topics in International Development Studies (Monitoring and Evaluation of Foreign Assistance Programs)
IAFF 6138	Special Topics in International Development Studies (Poverty Alleviation and Bottom-up Development)
IAFF 6138	Special Topics in International Development Studies (Poverty in all its Dimensions)
IAFF 6138	Special Topics in International Development Studies (Private Sector Development)
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Brazil Development Policy in the 21st Century)
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Economic and Social Development of Latin America)
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (History and Praxis of U.S.-Mexico Relations)
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Immigration and Weak States: Central America)
Geography	
Required course:	
GEOG 6232	Migration and Development
Supporting courses:	
GEOG 6224	Seminar: Political Geography
IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Latin American Migration)
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Brazil Development Policy in the 21st Century)
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Immigration and Weak States: The Case of Central America)
Global Public Health	

Courses:	
PUBH 6400	Global Health Frameworks
PUBH 6441	Global Health Organizations and Regulations
PUBH 6442	Comparative Global Health Systems
PUBH 6563	Global Child Health
History	
IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Cuba in the Global Arena)
IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Mexico Since Independence)
HIST 3710	History of Latin America I
HIST 3711	History of Latin America II
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Argentina in Global Context)
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Brazil in the Global Arena)
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (History and Praxis of U.S.-Mexico Relations)
HIST 6701	Topics in Latin American History (Law and Society in Latin America)
International Business	
Courses:	
IBUS 4900	Special Topics (Global Energy)
IBUS 6201	International Marketing
IBUS 6202	Regional Strategy for Multinationals
IBUS 6290	Special Topics (Microfinance: Developing Markets)
IBUS 6301	International Business Finance
IBUS 6401	International Business Strategy
IBUS 6402	Managing in Developing Countries
Migration	
Required course (one from the following):	

ECON 6290	Principles of Demography
or GEOG 6290	Principles of Demography
or SOC 6290	Principles of Demography
ECON 6291	Methods of Demographic Analysis
or GEOG 6291	Methods of Demographic Analysis
or STAT 6291	Methods of Demographic Analysis
GEOG 6232	Migration and Development
Supporting courses:	
ECON 6295	Special Topics (International Migration and Labor Markets)
GEOG 6261	Geographical Perspectives on Latin America
GEOG 6293	Special Topics (Migration and Development)
IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Latin American Migration)
IAFF 6138	Special Topics in International Development Studies (Human Trafficking)
IAFF 6138	Special Topics in International Development Studies (Internal Displacement)
IAFF 6138	Special Topics in International Development Studies (International Migration)
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Immigration and Weak States: The Central American Case)
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Mexico in the Global Arena)

IAFF 6186 Special Topics in Security Policy Studies (International Organized Crime)

IAFF 6186 Special Topics in Security Policy Studies (International Peacekeeping)

IAFF 6186 Special Topics in Security Policy Studies (Military Power and Effectiveness)

IAFF 6186 Special Topics in Security Policy Studies (Political Risk Analysis)

IAFF 6186 Special Topics in Security Policy Studies (Strategic Planning for the 21st Century)

IAFF 6358 Special Topics in Latin American and Hemispheric Studies (The UN and Regional Human Rights Systems: The Americas and Europe)

IAFF 6358 Special Topics in Latin American and Hemispheric Studies (History and Praxis of U.S.-Mexico Relations)

IAFF 6358 Special Topics in Latin American and Hemispheric Studies (Immigration and Weak States: The Central American Case)

Electives (9 credits)

9 credits in elective courses, which may include up to 6 credits of Spanish language coursework (other foreign languages spoken in Latin America will be considered on a case-by-case basis) and up to 4 credits of 1-credit skills courses (IAFF 6502, IAFF 6503, and/or IAFF 6504). Additional electives may be selected from any of the specialized fields or in other relevant areas or disciplines. Elective courses must be approved in advance by the Program Director.

Additional thesis option

Students who wish to complete a thesis do so in addition to the capstone requirement. Students pursuing a thesis must have a minimum GPA of 3.5 and approval from the faculty member who will serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credits are counted as elective or specialization credits with Program Director approval. The two 3-credit thesis courses must be taken consecutively.

IAFF 6998 Thesis

IAFF 6999 Thesis

*Additional information regarding skills courses (<https://elliott.gwu.edu/professional-skills-courses/>), the capstone (<https://elliott.gwu.edu/global-capstone/>), and the thesis (<https://elliott.gwu.edu/thesis/>) is available on the Elliott School website.

**Only specific topics that are determined by the Program Director to be relevant to the student's program of study may be used to fulfill this requirement. Any topic intended to be used for this requirement must be approved by the Program Director prior to enrollment. Consult the Schedule of Classes (<http://my.gwu.edu/mod/pws/>) for each semester's offerings. Topics courses not listed here may, with permission of the Program Director, be used to fulfill program requirements.

Additional information regarding skills courses (<https://elliott.gwu.edu/professional-skills-courses/>), the capstone (<https://elliott.gwu.edu/global-capstone/>), and the thesis (<https://elliott.gwu.edu/thesis/>) is available on the Elliott School website.

Foreign language proficiency requirement

Students in the Latin American and hemispheric studies program are required to demonstrate proficiency in Spanish or Portuguese by passing the Elliott School-administered foreign language proficiency reading and speaking examination at the currently-required level of proficiency (<https://elliott.gwu.edu/foreign-language-proficiency-requirement/>). The Elliott School administers foreign language proficiency examinations once

in the fall and once in the spring semesters. Students should plan to take the language proficiency examination as soon as possible following their matriculation in the program. Students have three opportunities to pass the examination. Failure to pass the examination for a third time results in dismissal from the program.

MASTER OF ARTS IN THE FIELD OF MIDDLE EAST STUDIES

The Middle East is one of the world's most important and challenging regions, where conflict seems chronic but peace elusive, resources are abundant but sustainable development difficult, and where the roots of major religions and global terrorism can be found. There are few issues in international affairs that do not involve the Middle East. The master of arts curriculum includes a range of courses covering the history, politics, economics, international relations, and cultures of the societies and nations of the Middle East.

In consultation with the program director, each student will develop a program of study that combines a broad overview of the region through a set of core courses, along with a more specialized field based on the student's specific academic and career interests. In addition, completion of the MA in Middle East studies requires demonstrated oral and reading proficiency in a language of the Middle East region.

The MA program in Middle East studies is supported by the Elliott School's Institute for Middle East Studies. Its Director is Professor Marc Lynch, a prominent scholar whose blog is featured on ForeignPolicy.com, and its core faculty includes both established leaders in their fields such as Nathan Brown (Political Science) and Dina Khoury (History), and outstanding junior faculty spanning a wide range of academic disciplines. The Institute's programming is enhanced by a million dollar gift from the Amir of Kuwait and by a partnership with the Middle East Policy Forum, run by former Ambassador Edward "Skip" Gnehm.

Visit the program website (<https://elliott.gwu.edu/middle-east-studies/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including a 3-credit cornerstone course, 9 credits in core field courses, 3 credits in skills courses, a 4-credit capstone sequence, 12 credits in one professional specialization, and 9 credits in elective courses. In addition, students must fulfill a foreign language proficiency requirement (see below).

See note regarding special topics and skills courses, the capstone sequence, and LAW courses*.

Code	Title	Credits
Required		
Cornerstone (3 credits)		
IAFF 6361	Middle East Studies Cornerstone	
Core field courses (9 credits)		
One course in each of the following disciplines for a total of three courses: ANTH/GEOG, HIST, and PSC.		
ANTH 6707	Issues in Middle East Anthropology	
GEOG 6262	Geographical Perspectives on the Middle East	
HIST 6801	Topics in Middle Eastern History (History of the Modern Middle East)	
HIST 6801	Topics in Middle Eastern History (Middle East in the World)	
PSC 6377	Comparative Politics of the Middle East	
PSC 6478	International Relations of the Middle East	
Professional skills courses (3 credits)		
Three 1-credit professional skills courses in any combination from the following:		
IAFF 6502	Professional Skills I	
IAFF 6503	Professional Skills II	
IAFF 6504	Intermediate Conversation	
Capstone sequence (4 credits)		
Students are required to complete a two-semester capstone sequence that involves collaboration on a project of mutual interest and research related to the Middle East. The capstone sequence includes a 1-credit course that must be taken in the fall of the student's final year and a 3-credit course that must be taken in the spring of the student's final year. Both courses in the capstone sequence must be taken consecutively.		
IAFF 6377	Middle East Studies Program Capstone Workshop	
IAFF 6379	Middle East Studies Capstone	

Code	Title	Credits
Professional specialization (12 credits)		
12 credits in one of the professional specializations listed below. At least one 3-credit course must cover content on the Middle East. Students may construct an individualized professional specialization in consultation with, and with the approval of, the Program Director.		

Specializations

Thematic specializations

- Conflict and Conflict Resolution (p. 1015)
- Global Energy and Environmental Policy (p. 1016)
- Global Gender Policy (p. 1017)
- Global Health (p. 1018)
- International Affairs and Development (p. 1019)
- International Economic Affairs (p. 1021)
- International Law and Organizations (p. 1022)
- International Security Studies (p. 1022)
- Nuclear Policy (p. 1026)
- Technology and International Affairs (p. 1026)
- U.S. Foreign Policy (p. 1026)

Regional specializations

- Africa (p. 1014)
- Asia (p. 1015)
- Europe, Eurasia, and Russia (p. 1016)
- Latin America (p. 1025)
- Middle East (p. 1025)

Code	Title	Credits
Middle East electives (9 credits)		
Three elective courses (9 credits) related to the Middle East, selected in consultation with the Program Director. Students may include up to 6 credits of content-based language study (i.e. not basic language acquisition) toward this requirement. All offerings under ANTH 6707, IAFF 6378, HIST 6801, and REL 6460 may be used for elective requirements and repeated for credit provided the topic differs.		
ANTH 6707	Issues in Middle East Anthropology	
ECON 6295	Special Topics *	
IAFF 6364	Religion and Society in the Modern Middle East	
IAFF 6378	Special Topics in Middle East Studies	
GEOG 6262	Geographical Perspectives on the Middle East	

HIST 6801	Topics in Middle Eastern History
PSC 6377	Comparative Politics of the Middle East **
PSC 6478	International Relations of the Middle East **
REL 6401	Islamic Historiographies
REL 6402	Qur'an and Hadith
REL 6441	Islamic Law
REL 6460	Topics in the Study of Islam

*Only specific topics that are determined by the Program Director to be relevant to the student's program of study may be used to fulfill this requirement. Any topic intended to be used for this requirement must be approved by the Program Director prior to enrollment.

**If not taken as core course.

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

Additional information regarding skills courses (<https://elliott.gwu.edu/professional-skills-courses/>) and the capstone (<https://elliott.gwu.edu/global-capstone/>) is available on the Elliott School website.

Law School courses—Students may, with permission of their advisor, include courses in the Law School (<http://www.law.gwu.edu/>) in their major field. Enrolling in a LAW course also requires permission of the Law School dean of students. Students should consult the Elliott School Office of Academic Advising and Student Services (<http://elliott.gwu.edu/graduate-advising/>) office before enrolling in LAW courses.

Specializations

Thematic specializations

- Conflict and Conflict Resolution (p. 1015)
- Global Energy and Environmental Policy (p. 1016)
- Global Gender Policy (p. 1017)
- Global Health (p. 1018)
- International Affairs and Development (p. 1019)
- International Economic Affairs (p. 1021)
- International Law and Organizations (p. 1022)
- International Security Studies (p. 1022)
- Nuclear Policy (p. 1026)

- Technology and International Affairs (p. 1026)
- U.S. Foreign Policy (p. 1026)

Regional specializations

- Africa (p. 1014)
- Asia (p. 1015)
- Europe, Eurasia, and Russia (p. 1016)
- Latin America (p. 1025)
- Middle East (p. 1025)

Foreign language proficiency requirement

Students in the Middle East studies program are required to demonstrate the currently-required level of proficiency in one of the following languages by passing a reading and speaking proficiency examination administered by the Elliott School: Modern Standard Arabic (taught at GW); Persian; Hebrew (taught at GW); Kurdish; or Turkish. The Elliott School administers foreign language proficiency examinations (<https://elliott.gwu.edu/foreign-language-proficiency-requirement/>) once in the fall and once in the spring semesters. Students may take the examination at any point during their academic program. Students have three opportunities to pass the examination. Consult the Program Director for more information

AFRICA SPECIALIZATION

See note regarding special topics courses*.

Code	Title	Credits
------	-------	---------

Required courses (6 credits)

At least two courses from the following. Any courses not taken to fulfill this requirement can be used as supporting coursework.

IAFF 6138	Special Topics in International Development Studies (those regionally relevant)
-----------	---

IAFF 6186	Special Topics in Security Policy Studies (Peace and Conflict in Africa)
-----------	--

IAFF 6186	Special Topics in Security Policy Studies (Security Challenges in Africa)
-----------	---

IAFF 6385	Special Topics in African Studies (Power, Politics, and Development in Africa)
-----------	--

IAFF 6385	Special Topics in African Studies (Rising China in Africa)
-----------	--

Supporting courses (6 credits)

Two courses from the following:

ANTH 6301	The Anthropology of Development
-----------	---------------------------------

ANTH 6591	Topics in Sociocultural Anthropology (Displacement and Diaspora)
-----------	--

ECON 6237	Economics of the Environment and Natural Resources
-----------	--

ECON 6250	Survey of Economic Development
-----------	--------------------------------

IAFF 6138	Special Topics in International Development Studies (Climate Change and Sustainable Development)
-----------	--

IAFF 6138	Special Topics in International Development Studies (Democracy and Governance Development)
-----------	--

IAFF 6138	Special Topics in International Development Studies (Foundations of Humanitarian Assistance)
-----------	--

IAFF 6138	Special Topics in International Development Studies (Gender and Development)
-----------	--

IAFF 6171	Introduction to Conflict Resolution
-----------	-------------------------------------

IAFF 6173	Security and Development
-----------	--------------------------

IAFF 6186	Special Topics in Security Policy Studies (International Peacekeeping)
-----------	--

IBUS 6402	Managing in Developing Countries
-----------	----------------------------------

PUBH 6480	Public Health in Humanitarian Settings
-----------	--

Students are encouraged to explore relevant courses offered by other member schools of the Consortium of Universities of the Washington Metropolitan Area, such as Howard, Georgetown and American Universities. Students should consult with the faculty advisor regarding such opportunities.

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

ASIA SPECIALIZATION

See note regarding special topics* and LAW** courses.

Code	Title	Credits
------	-------	---------

12 credits selected from at least three of the following groupings:

Group A: History of modern Asia

HIST 6601	Topics: Asian History (Geography and Politics of Afghanistan and South & Central Asia)
-----------	--

HIST 6602	Asia: History, Memory, and Violence
-----------	-------------------------------------

HIST 6611	Readings Seminar: Twentieth-Century China
-----------	---

HIST 6630	Special Topics in Korean History (Modern Korea)
-----------	---

HIST 6641	Modern Southeast Asia
-----------	-----------------------

Group B: Politics and Policy in Asia

1. Domestic politics, foreign policy, and law

ENGL 6560	Postcolonialism
-----------	-----------------

IAFF 6302	Taiwan: Internal Development and Foreign Policy
-----------	---

LAW 6543	Chinese Law and Legal Institutions *
----------	--------------------------------------

PSC 6336	The Political Economy of China, India, and Beyond
----------	---

PSC 6368	Japanese Politics and Foreign Policy
----------	--------------------------------------

PSC 6370	Politics of China I
----------	---------------------

PSC 6374	Korean Politics
----------	-----------------

2. Security and military policy

IAFF 6186	Special Topics in Security Policy Studies (The Chinese Military)
-----------	--

Group C: International relations of Asia

HIST 6301	Topics: U.S. History (U.S.-Asia Relations)
-----------	--

IAFF 6302	Taiwan: Internal Development and Foreign Policy
-----------	---

IAFF 6308	International Relations of South Asia
-----------	---------------------------------------

PSC 6372	Foreign Policy of China
----------	-------------------------

PSC 6475	International Politics of East Asia
----------	-------------------------------------

Group D: Asian business and development

ECON 6269	Economy of China I
-----------	--------------------

PSC 6336	The Political Economy of China, India, and Beyond
----------	---

PSC 6373	Political Economy of Industrializing Asia
----------	---

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

**Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

CONFLICT AND CONFLICT RESOLUTION SPECIALIZATION

See note regarding special topics and LAW courses*.

Code	Title	Credits
------	-------	---------

Required course (3 credits)

IAFF 6171	Introduction to Conflict Resolution
-----------	-------------------------------------

Supporting courses (9 credits)

IAFF 6118	Special Topics in International Affairs (International Law and the Use of Force)
-----------	--

IAFF 6118	Special Topics in International Affairs (Reinventing the United Nations)
-----------	--

IAFF 6138	Special Topics in International Development Studies (Gender, Disaster, and Development)
-----------	---

IAFF 6138	Special Topics in International Development Studies (Rule of Law and Anti-Corruption)
-----------	---

IAFF 6186	Special Topics in Security Policy Studies (Early Warning and Conflict Prevention)
-----------	---

IAFF 6186	Special Topics in Security Policy Studies (Security Challenges in Africa)
-----------	---

IAFF 6186	Special Topics in Security Policy Studies (Stabilization and Peacebuilding)
-----------	---

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

EUROPE, EURASIA, AND RUSSIA SPECIALIZATION

See note regarding special topics and LAW courses*.

Code	Title	Credits
12 credits from the following		
At least one course must be from Group A and one from Group B. The remaining two courses may be taken from either group.		
Group A. Western, Central and Eastern Europe		
HIST 6051	Re-thinking Cold War History	
HIST 6101	Topics: Europe (Europe, Readings and Research: Modern European History)	
HIST 6121	Reading and Research Seminar: Modern European History	
HIST 6170	Eastern European History I	
HIST 6171	Eastern European History II	
IAFF 6338	Special Topics in European and Eurasian Studies (The European Union)	
PSC 6364	Comparative Governments and Politics of Central And Eastern Europe	
PSC 6465	The International Politics of Central and Eastern Europe	
PSC 8388	Selected Topics in Comparative Politics (Authoritarianism and Democratization)	

PSC 8388	Selected Topics in Comparative Politics (Nationalism and Nation Building)
----------	---

Group B. Russia and Eurasia	
-----------------------------	--

HIST 6188	The Soviet Union and the World, 1917 to 1991
-----------	--

IAFF 6138	Special Topics in International Development Studies (Post-Soviet Democracy Development)
-----------	---

IAFF 6338	Special Topics in European and Eurasian Studies (Central Asia Between East and West)
-----------	--

IAFF 6338	Special Topics in European and Eurasian Studies (History and Politics of the Caucasus)
-----------	--

IAFF 6338	Special Topics in European and Eurasian Studies (Politics of Russia)
-----------	--

IAFF 6338	Special Topics in European and Eurasian Studies (U.S.-Russia Relations in the 21st Century)
-----------	---

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

GLOBAL ENERGY AND ENVIRONMENTAL POLICY SPECIALIZATION

See notes regarding special topics* and LAW** courses.

Code	Title	Credits
Required—two from the following (6 credits)		
ECON 6295	Special Topics (Applied Environmental Economics)	
IAFF 6151	Environmental Policy	
IAFF 6158	Special Topics in International Science and Technology Policy (Energy Policy)	
PPPA 6066	U.S. Environmental Policy	
Supporting courses (6 credits)		
EMSE 6260	Energy Management	

GLOBAL GENDER POLICY SPECIALIZATION

See note regarding special topics and LAW courses*

Code	Title	Credits
------	-------	---------

Required course (3 credits)

IAFF 6102	Global Gender Policy	
-----------	----------------------	--

Supporting courses (9 credits)

IAFF 6118	Special Topics in International Affairs (Gender and Security)	
-----------	---	--

IAFF 6118	Special Topics in International Affairs (Gender, War, and Peace)	
-----------	--	--

IAFF 6118	Special Topics in International Affairs (Research Methods in Global Gender Issues)	
-----------	--	--

IAFF 6136	Gender and Development	
-----------	------------------------	--

IAFF 6138	Special Topics in International Development Studies (Gender and Development)	
-----------	--	--

IAFF 6138	Special Topics in International Development Studies (Gender, Disaster, and Development)	
-----------	---	--

IAFF 6138	Special Topics in International Development Studies (Human Trafficking)	
-----------	---	--

IAFF 6138	Special Topics in International Development Studies (Violence, Gender, and Humanitarian Assistance)	
-----------	---	--

One course from the following may be used as a supporting course:

ANTH 6501	Gender and Sexuality	
-----------	----------------------	--

ANTH 6505	Medical Anthropology	
-----------	----------------------	--

EDUC 6640	Selected Topics in International Education (Gender in International Education and Development)	
-----------	--	--

IAFF 6138	Special Topics in International Development Studies (Care of Women and Children in Complex Emergencies)	
-----------	---	--

MGT 6290	Special Topics (Research - Women's Entrepreneurial Leadership)	
----------	--	--

PHIL 6238	Feminist Ethics and Policy Implications	
-----------	---	--

EMSE 6290	Climate Change: Policy, Impacts, and Response	
-----------	---	--

IAFF 6118	Special Topics in International Affairs (Managing the World's Water)	
-----------	--	--

IAFF 6141	International Science and Technology Policy Cornerstone	
-----------	---	--

IAFF 6164	Environmental Security	
-----------	------------------------	--

IAFF 6186	Special Topics in Security Policy Studies (Energy Security)	
-----------	---	--

IAFF 6378	Special Topics in Middle East Studies (Oil: Industry, Economy, Society)	
-----------	---	--

IAFF 6501	Quantitative Analysis for International Affairs Practitioners	
-----------	---	--

IBUS 4404	Global Energy	
-----------	---------------	--

IBUS 6400	Oil: Industry, Economy, and Society	
-----------	-------------------------------------	--

LAW 6454	International Environmental Law **	
----------	------------------------------------	--

LAW 6455	International Climate Change Law **	
----------	-------------------------------------	--

LAW 6460	Environment and Energy Policy Practicum **	
----------	--	--

PUBH 6122	Protecting Public Health and the Environment: Policies, Politics, and Programs	
-----------	--	--

PUBH 6130	Sustainable Energy and the Environment	
-----------	--	--

*Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

Suggested skills courses (credits count toward the skills course requirement for the master's program)

IAFF 6503	Professional Skills II (1 credit)	
-----------	-----------------------------------	--

PUBH 6262	Introduction to Geographic Information Systems (1 credit)	
-----------	---	--

PUBH 6263	Advanced GIS (1 credit)	
-----------	-------------------------	--

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

**Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

PUBH 6099	Topics in Public Health (Sexual and Reproductive Health)
SOC 6265	Women, Welfare, and Poverty
SOC 6268	Race, Gender, and Class
WGSS 6220	Fundamentals of Feminist Theory
WGSS 6221	Research Issues in Women's, Gender, and Sexuality Studies
WGSS 6230	Global Feminisms
WGSS 6240	Gender and Public Policy
WGSS 6241	Gender, Law, and Politics
WGSS 6268	Race, Gender, and Class
WGSS 6270	Seminar: Selected Topics (Black Feminist Theory)
WGSS 6270	Seminar: Selected Topics (Global Islamic Feminisms)
WGSS 6270	Seminar: Selected Topics (Gender, Power, and Sexuality in East Asia)

Students may take IAFF 2190W or IAFF 3183 for graduate credit as a supporting course with permission from the Program Director, academic advisor, and instructor, who must agree to assign additional work.

IAFF 2190W	Special Topics (Women in Global Politics)
IAFF 3183	Special Topics in Development Policy (Human Trafficking)

Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

GLOBAL HEALTH SPECIALIZATION

See notes regarding special topics* and PUBH** courses.

Code	Title	Credits
Required course (2 credits)		
PUBH 6400	Global Health Frameworks (fall semester only)	
Supporting courses (10 credits)		

ANTH 6505	Medical Anthropology (3 credits)
Research methods in global health:	
PUBH 6410	Global Health Study Design (2 credits)
PUBH 6411	Global Health Qualitative Research Methods (2 credits)
PUBH 6412	Global Health Quantitative Research Methods (3 credits)
PUBH 6416	Ethical and Cultural Issues in Global Health Research and Programs (1 credit)
Theory and methods courses in global health:	
PUBH 6435	Global Health Program Development and Implementation (2 credits)
PUBH 6436	Global Health Program Management and Leadership (2 credits)
Global health content courses:	
PUBH 6132	Water, Sanitation, and Hygiene (WASH) in Low-Income Countries (1 credit)
PUBH 6440	Global Health Economics and Finance (2 credits)
PUBH 6441	Global Health Organizations and Regulations (2 credits)
PUBH 6442	Comparative Global Health Systems (2 credits)
PUBH 6480	Public Health in Humanitarian Settings (Public Health in Complex Emergencies (2 credits)
PUBH 6481	Global Mental Health (2 credits)
PUBH 6482	International Food and Nutrition Policy (2 credits)
PUBH 6499	Topics in Global Health (Public Health Systems)

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

** Most Public Health (PUBH) courses are offered for 2 instead of 3 credits. Students pursuing the global health concentration

should consult their academic advisor with questions regarding course selection.

INTERNATIONAL AFFAIRS AND DEVELOPMENT SPECIALIZATION

See notes regarding special topics* and LAW** courses.

Code	Title	Credits
Required course (3 credits)		
One of the following. Any course not taken to fulfill this requirement may be used as supporting courses.		
ECON 6250	Survey of Economic Development	
IAFF 6108	International Development Policy	
IAFF 6138	Special Topics in International Development Studies (Civil Society and Development)	
IAFF 6138	Special Topics in International Development Studies (Democracy and Governance Development)	
IAFF 6138	Special Topics in International Development Studies (Poverty Alleviation and Bottom Up Development)	
Supporting courses (9 credits)		
The following courses are grouped into subcategories to help guide students in choosing appropriate coursework. Students should use this guidance to develop a coherent and logical narrative for their program of study. Students may choose courses from different subcategories to construct a concentration around their area of focus.		
9 credits from among the groupings listed below:		
Group A: Culture, society and development		
ANTH 6301	The Anthropology of Development	
ANTH 6391	Anthropology and Contemporary Problems (Capitalism/Neoliberalism)	
ANTH 6501	Gender and Sexuality	
ANTH 6505	Medical Anthropology	
ANTH 6508	Ethics and Cultural Property	
ANTH 6591	Topics in Sociocultural Anthropology (Displacement and Diaspora)	
IAFF 6138	Special Topics in International Development Studies (Gender and Development)	

IAFF 6138 Special Topics in International Development Studies (Indigenous People and Development)

Group B: Economic development policy

ECON 6237 Economics of the Environment and Natural Resources

ECON 6250 Survey of Economic Development

ECON 6269 Economy of China I

ECON 6283 Survey of International Trade Theory and Policy

ECON 6284 Survey of International Macroeconomics and Finance Theory and Policy

ECON 8358 Urban Economics

IAFF 6198 Special Topics in International Economic Policy (Development and Trade Policy in LDCs)

IAFF 6358 Special Topics in Latin American and Hemispheric Studies (Economic and Social Development of Latin America)

PSC 6373 Political Economy of Industrializing Asia

Group C: Gender and development

ANTH 6501 Gender and Sexuality

IAFF 6136 Gender and Development

IAFF 6138 Special Topics in International Development Studies (Gender and Development)

IAFF 6138 Special Topics in International Development Studies (Gender, Disaster, and Development)

WGSS 6230 Global Feminisms

WGSS 6270 Seminar: Selected Topics (Gender, Power, and Sexuality in East Asia)

Group D: Global health

ANTH 6505 Medical Anthropology

ANTH 6591 Topics in Sociocultural Anthropology (Illness and Stigma)

PUBH 6400 Global Health Frameworks (strongly recommended)

PUBH 6411 Global Health Qualitative Research Methods

PUBH 6440	Global Health Economics and Finance
PUBH 6442	Comparative Global Health Systems
PUBH 6480	Public Health in Humanitarian Settings
PUBH 6482	International Food and Nutrition Policy
Group E: Humanitarian assistance	
ANTH 6505	Medical Anthropology
EMSE 6305	Crisis and Emergency Management
EMSE 6320	International Disaster Management
EMSE 6325	Medical and Public Health Emergency Management
IAFF 6138	Special Topics in International Development Studies (Human Trafficking)
IAFF 6138	Special Topics in International Development Studies (Violence, Gender, Humanitarian Assistance)
LAW 6540	Refugee and Asylum Law **
Group F: Institutions and politics	
IAFF 6138	Special Topics in International Development Studies (Democracy and Governance Development)
PSC 6336	The Political Economy of China, India, and Beyond
PSC 6373	Political Economy of Industrializing Asia
PSC 6383	Comparative Politics of Latin America
PSC 6439	International Political Economy
PSC 8337	Theories of Political Development
PSC 8388	Selected Topics in Comparative Politics (Authoritarianism and Democratization)
Group G: International business	
IBUS 6301	International Business Finance
IBUS 6400	Oil: Industry, Economy, and Society
IBUS 6401	International Business Strategy
IBUS 6402	Managing in Developing Countries
MBAD 6241	Global Perspectives
Group H: International development management	

PPPA 6016	Public and Nonprofit Program Evaluation
PPPA 6057	International Development Administration
PPPA 6058	International Development NGO Management
PPPA 6059	International Development Management Processes and Tools
Group I: International education	
EDUC 6601	International and Comparative Education
EDUC 6602	Regional Studies in International Education
EDUC 6610	Programs and Policies in International Education
EDUC 6620	Strategies and Analysis in International Education
EDUC 6640	Selected Topics in International Education (Education in Emergencies)
EDUC 6640	Selected Topics in International Education (Evaluation in International Education)
EDUC 6640	Selected Topics in International Education (International Higher Education for Development)
EDUC 6650	Education and National Development
Group J: Natural resources and the environment	
ECON 6237	Economics of the Environment and Natural Resources
EMSE 6220	Environmental Management
GEOG 6244	Urban Sustainability
GEOG 6293	Special Topics (Geography of Latin America)
IAFF 6118	Special Topics in International Affairs (Managing the World's Water)
IAFF 6138	Special Topics in International Development Studies (Climate Change and Sustainable Development)
IAFF 6151	Environmental Policy
IAFF 6164	Environmental Security
LAW 6454	International Environmental Law **

PPPA 6066	U.S. Environmental Policy
SMPP 6210	Strategic Environmental Management

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

**Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

INTERNATIONAL ECONOMIC AFFAIRS SPECIALIZATION

See notes regarding special topics* and MBAD courses**.

Code	Title	Credits
------	-------	---------

Students pursuing this concentration must take ECON 6283 and ECON 6284 as part of the core field requirement for the master's degree program. These courses do not count toward the concentration.

Students also must demonstrate proficiency in introductory statistics. Means of demonstrating proficiency include, but are not limited to, prior satisfactory completion of undergraduate statistics coursework, or STAT 1051, 1053, 1111 or IAFF 6501 at GW. Students should consult the Program Director as soon as possible following matriculation into the program regarding additional ways in which this requirement may be fulfilled.

Required—at least 6 credits from the following:

ECON 6237	Economics of the Environment and Natural Resources
ECON 6250	Survey of Economic Development
ECON 6255	Economics of Technological Change
ECON 6269	Economy of China I
ECON 6293	Topics in International Finance *
ECON 6295	Special Topics (Applied Behavioral Economics)
ECON 6295	Special Topics (Economic Analysis of International Trade Law)
ECON 6335	Applied Financial Derivatives
ECON 6340	Applied Labor Economics and Public Policy
ECON 6344	Applied Industrial Organization

PPPA 6014	Microeconomics for Public Policy II
PPPA 6015	Benefit-Cost Analysis

Supporting courses (6 credits)

IAFF 6142	Technology Creation/Diffusion
IAFF 6198	Special Topics in International Economic Policy (21st Century Trade Policies: Issues and Strategy)
IAFF 6198	Special Topics in International Economic Policy (Advanced Quantitative Analysis)
IAFF 6198	Special Topics in International Economic Policy (Development and Trade Policy in LDCs)
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Economic and Social Development of Latin America)
IAFF 6378	Special Topics in Middle East Studies (Oil: Industry, Economy, and Society)
IAFF 6378	Special Topics in Middle East Studies (Political Economy of the Middle East)
IBUS 6202	Regional Strategy for Multinationals
IBUS 6297	International Management Experience
IBUS 6301	International Business Finance
PSC 6439	International Political Economy
Recommended skills courses	
IAFF 6502	Professional Skills I (Analyzing International Economic Data)
IAFF 6502	Professional Skills I (Financial Statement Analysis)
IAFF 6503	Professional Skills II (Analyzing International Economic Data)
IAFF 6503	Professional Skills II (Intro to Gaming and Simulations)
IAFF 6503	Professional Skills II (Negotiating Skills)
MBAD 6211	Financial Accounting **
MBAD 6234	Financial Management **

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Only specific topics that are determined by the Program Director to be relevant to the student's program of study may be used to fulfill

this requirement. Any topic intended to be used for this requirement must be approved by the Program Director prior to enrollment. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

****Only one MBAD skills course can be used within the International Affairs degree.**

INTERNATIONAL LAW AND ORGANIZATIONS SPECIALIZATION

See notes regarding special topics* and LAW** courses.

Code	Title	Credits
12 credits from the following:		
IAFF 6118	Special Topics in International Affairs (Global Justice)	
IAFF 6118	Special Topics in International Affairs (International Law)	
IAFF 6118	Special Topics in International Affairs (International Law and the Use of Force)	
IAFF 6118	Special Topics in International Affairs (Leadership in International Affairs)	
IAFF 6118	Special Topics in International Affairs (Reinventing the United Nations)	
IAFF 6138	Special Topics in International Development Studies (Care of Children in Complex Emergencies)	
IAFF 6138	Special Topics in International Development Studies (Civil Society and Development)	
IAFF 6138	Special Topics in International Development Studies (Democracy and Governance Development)	
IAFF 6138	Special Topics in International Development Studies (Global Food Security)	
IAFF 6138	Special Topics in International Development Studies (Human Trafficking)	
IAFF 6138	Special Topics in International Development Studies (Monitoring and Evaluation for Foreign Assistance Programs)	
IAFF 6146	Space Law	

IAFF 6186	Special Topics in Security Policy Studies (Countering Violent Extremism)
IAFF 6186	Special Topics in Security Policy Studies (Cybersecurity)
IAFF 6186	Special Topics in Security Policy Studies (Illicit Finance and Security)
IAFF 6186	Special Topics in Security Policy Studies (Insurgency and Counterinsurgency)
IAFF 6186	Special Topics in Security Policy Studies (International Organized Crime)
IAFF 6186	Special Topics in Security Policy Studies (Terrorism Today)
IAFF 6338	Special Topics in European and Eurasian Studies (European Union Foreign Relations)
IAFF 6338	Special Topics in European and Eurasian Studies (The European Union)
IAFF 6338	Special Topics in European and Eurasian Studies (Transatlantic Relations in the 21st Century)
LAW 6520	International Law **
LAW 6534	Law of the European Union **
LAW 6870	National Security Law **
PSC 6439	International Political Economy

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

****Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.**

INTERNATIONAL SECURITY STUDIES SPECIALIZATION

See notes regarding special topics* and LAW** courses.

Code	Title	Credits		
12 credits from the following:			IAFF 6106	Nuclear Weapons
<p>Courses in international security studies concentration are grouped into issues subcategories to help guide students in choosing appropriate coursework. Students do not necessarily need to select one subcategory; however, what is important is that there is a logic and believable narrative to their course choices. Students should consult their faculty advisor to help with this determination.</p> <p>Group A: Transnational security issues</p>			IAFF 6118	Special Topics in International Affairs (Nuclear Security Policy)

IAFF 6186	Special Topics in Security Policy Studies (Space and National Security)
IAFF 6186	Special Topics in Security Policy Studies (Weapons of Mass Destruction and Arms Control)
Group J: Regional Security	
Four courses that focus on the security issues within a region; general policy courses are not applicable. Please consult with the program director/advisor to develop a regional security field.	

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

**Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

LATIN AMERICA SPECIALIZATION

See notes regarding special topics and LAW courses* and enrollment requirements**.

Code	Title	Credits
Required—at least two of the following (6 credits)		
ANTH – Any 6000-level Anthropology course approved by the Program Director		
IAFF 6341	Latin American and Hemispheric Studies Cornerstone **	
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Economic and Social Development of Latin America)	
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Governments and Politics of Latin America)	
PSC 6383	Comparative Politics of Latin America	
PSC 6484	International Relations of Latin America	
Supporting courses (6 credits)		
Students may take IAFF 3187 for graduate credit as a supporting course with permission from the Program Director, academic advisor, and instructor, who must agree to assign additional work:		
IAFF 3187	Special Topics in Latin American and Hemispheric Studies	
IAFF 6341	Latin American and Hemispheric Studies Cornerstone **	
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Conflict and Contestation in Latin America)	
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Economic and Social Development of Latin America)	
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Governments and Politics of Latin America)	
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Immigration and Weak States)	
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (OAS & Democracy in the Americas)	

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes

for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

**Permission of the instructor required prior to enrollment.

MIDDLE EAST SPECIALIZATION

See note regarding special topics and LAW courses*.

Code	Title	Credits
Required course (3 credits)		
At least one from the following:		
IAFF 6378	Special Topics in Middle East Studies (Political Economy of the Middle East)	
PSC 6377	Comparative Politics of the Middle East	
PSC 6478	International Relations of the Middle East	
Supporting courses (9 credits)		
ANTH 6707	Issues in Middle East Anthropology (Citizenship and Displacement in the Middle East)	
IAFF 6364	Religion and Society in the Modern Middle East	
IAFF 6378	Special Topics in Middle East Studies (Lebanon and Syria)	
IAFF 6378	Special Topics in Middle East Studies (Neighbors and Rivals: Iran and the Arab World)	
IAFF 6378	Special Topics in Middle East Studies (U.S. Policy in the Gulf)	
A full listing of Middle East courses is posted in advance of each semester on the Institute for Middle East Studies website.		

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

NUCLEAR POLICY SPECIALIZATION

See note regarding special topics and LAW courses*.

Code	Title	Credits
12 credits from the following:		
IAFF 6106	Nuclear Weapons	
IAFF 6107	The Science of Nuclear Materials	
IAFF 6118	Special Topics in International Affairs (Nuclear Proliferation and Nonproliferation)	
IAFF 6118	Special Topics in International Affairs (Nuclear Security Policy)	
IAFF 6158	Special Topics in International Science and Technology Policy (Energy Policy)	
IAFF 6186	Special Topics in Security Policy Studies (Nuclear Strategy)	
IAFF 6186	Special Topics in Security Policy Studies (Weapons of Mass Destruction and Arms Control)	

Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

TECHNOLOGY AND INTERNATIONAL AFFAIRS SPECIALIZATION

See note regarding special topics and LAW courses*.

Code	Title	Credits
Required course (3 credits):		
IAFF 6141	International Science and Technology Policy Cornerstone	
Supporting courses (9 credits):		
ECON 6255	Economics of Technological Change	
IAFF 6142	Technology Creation/Diffusion	
IAFF 6143	Science and Technology Policy Analysis	

IAFF 6145	U.S. Space Policy
IAFF 6151	Environmental Policy
IAFF 6158	Special Topics in International Science and Technology Policy (Economics of Space)
IAFF 6186	Special Topics in Security Policy Studies (Cybersecurity)
IAFF 6501	Quantitative Analysis for International Affairs Practitioners

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

U.S. FOREIGN POLICY SPECIALIZATION

See note regarding special topics and LAW courses*.

Code	Title	Credits
Required course (3 credits):		
At least one course from the following. Courses not taken as the required course can be used as supporting courses.		
HIST 6330	Modern U.S. Foreign Policy	
IAFF 6521	U.S. Foreign Policy Summer Program	
PSC 6346	The Politics of U.S. Foreign Policy	
Supporting courses (9 credits):		
HIST 6032	Reading and Research Seminar: Strategy and Policy	
HIST 6320	Readings/Research Seminar: Recent U.S. History	
IAFF 6145	U.S. Space Policy	
IAFF 6148	Space and National Security	
IAFF 6163	Transnational Security	
IAFF 6165	Fundamentals of Intelligence	
IAFF 6186	Special Topics in Security Policy Studies (Coercion and Deterrence in Peace & War)	

IAFF 6186	Special Topics in Security Policy Studies (Countering Violent Extremism)
IAFF 6186	Special Topics in Security Policy Studies (Homeland Security)
IAFF 6186	Special Topics in Security Policy Studies (Insurgency & Counterinsurgency)
IAFF 6186	Special Topics in Security Policy Studies (Military Power and Effectiveness)
IAFF 6186	Special Topics in Security Policy Studies (Military Technology Assessment)
IAFF 6186	Special Topics in Security Policy Studies (National Security Resources)
IAFF 6186	Special Topics in Security Policy Studies (Nuclear Security Policy)
IAFF 6186	Special Topics in Security Policy Studies (Strategic Planning for the 21st Century)
IAFF 6186	Special Topics in Security Policy Studies (Terrorism Today)
IAFF 6186	Special Topics in Security Policy Studies (U.S. Grand Strategy)
IAFF 6186	Special Topics in Security Policy Studies (U.S. National Security)
IAFF 6198	Special Topics in International Economic Policy
IAFF 6208	Special Topics in Global Communication (Public Diplomacy)
IAFF 6378	Special Topics in Middle East Studies (U.S. Foreign Policy in the Gulf)
IAFF 6378	Special Topics in Middle East Studies (U.S. Security Policy in the Middle East)
PSC 6439	International Political Economy

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Up to two relevant LAW courses may be taken with the permission of the Law School Dean of Students and the Elliott School academic advisor.

MASTER OF ARTS IN THE FIELD OF SECURITY POLICY STUDIES

A master's degree in security policy studies can open doors to future employment in the security policy institutions of the federal government, in the private sector, in international

organizations such as NATO, and in the many non-profit institutions engaged in security policy work. Security policy studies is a policy-oriented program focusing on international security issues and the policy responses to those issues, with particular emphasis on emerging transnational threats. These threats include but are not limited to weapons of mass destruction, terrorism, regional and ethnic conflicts, international crime, and the security implications of a globalized economy.

It also examines the national and international policy responses to these problems, including the operations of the intelligence community, the military, diplomats, and international economic policymakers. The curriculum provides strong grounding in the national security and defense policymaking process. Students choose two specific concentrations – which can range from transnational security issues to conflict resolution to U.S. national security policymaking.

Students also have the option of emphasizing a particular geographic region – such as East Asia, the Middle East, or Latin America – by selecting a regional field as one of their two concentrations. The program's faculty includes internationally recognized authorities in defense policy and resources, foreign policy, the national security policy process, and regional and transnational security issues. The faculty includes leading scholars at GW as well as an outstanding array of adjunct faculty drawn from the many research institutions and policy organizations in the nation's capital.

Visit the program website (<https://elliott.gwu.edu/academics/graduate/sps/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including 6 credits in core field courses, a 4-credit capstone sequence, 0 to 3 credits in research tool courses, 15 credits in a specialization, 3 credits in professional skills courses, and 9 to 12 credits in elective courses. Students may choose to fulfill requirements that demonstrate proficiency in a foreign language (see below).

See notes regarding special topics and skills courses, the capstone sequence, and the thesis option*.

Code	Title	Credits
Required		
Core field courses (6 credits)		
IAFF 6161	International Security	
IAFF 6162	Security Policy Analysis	
Capstone (4 credits)		

Students complete a two-course capstone sequence that most closely matches the thematic area of their project. The capstone sequence includes a 2-credit capstone workshop taken before the 2-credit capstone seminar. Students must have completed at least 18 credits of coursework prior to starting the capstone sequence. The two 2-credit capstone courses must be taken consecutively.

IAFF 6898 Capstone Workshop

IAFF 6899 Capstone Course

Research tool courses (0 to 3 credits)

Students may choose either a language or a statistical skills option to fulfill the tool requirement.

Language option—This option may be fulfilled by any of ESIA's non-regional programs language proficiency requirements**. Students should contact their academic advisors for more information about the language proficiency requirements. Students who test out of a language have three extra credits to apply to their electives.

Statistics option—This option may be fulfilled by demonstrating proficiency with a minimum grade of B in a graduate-level statistics course. It may be met by taking one of the following:

IAFF 6501 Quantitative Analysis for International Affairs Practitioners

IAFF 6198 Special Topics in International Economic Policy (Advanced Quantitative Analysis)

Specialization (15 credits)

Five courses in one of the following specializations:

U.S. national security

Required

IAFF 6186 Special Topics in Security Policy Studies (U.S. National Security)

Specialization courses

HIST 6032 Reading and Research Seminar: Strategy and Policy

HIST 6042 Seminar: World War II

HIST 6051 Re-thinking Cold War History

HIST 6330 Modern U.S. Foreign Policy

IAFF 6106 Nuclear Weapons

IAFF 6118 Special Topics in International Affairs (Gender and Security)

IAFF 6118 Special Topics in International Affairs (International Law and the Use of Force)

IAFF 6118 Special Topics in International Affairs (Nuclear Security Policy)

IAFF 6145 U.S. Space Policy

IAFF 6148 Space and National Security

IAFF 6160 Defense Policy and Program Analysis

IAFF 6163 Transnational Security

IAFF 6165 Fundamentals of Intelligence

IAFF 6169 Homeland Security

IAFF 6186 Special Topics in Security Policy Studies (Civil-Military Relations)

IAFF 6186 Special Topics in Security Policy Studies (Civil Wars in World Politics)

IAFF 6186 Special Topics in Security Policy Studies (Coercion and Deterrence in Peace and War)

IAFF 6186 Special Topics in Security Policy Studies (Counter-Terrorism)

IAFF 6186 Special Topics in Security Policy Studies (Countering Violent Extremism)

IAFF 6186 Special Topics in Security Policy Studies (Cyber and Security)

IAFF 6186 Special Topics in Security Policy Studies (Cyber Threats and Policy)

IAFF 6186 Special Topics in Security Policy Studies (Defense Contracting in Practice)

IAFF 6186 Special Topics in Security Policy Studies (Heroes and Villains in the Global Arena: Intelligence and Assessment of World Leaders)

IAFF 6186 Special Topics in Security Policy Studies (Identity and CVE)

IAFF 6186 Special Topics in Security Policy Studies (Insurgency and Counter-Insurgency)

IAFF 6186 Special Topics in Security Policy Studies (Maritime Security and Threats)

IAFF 6186 Special Topics in Security Policy Studies (Military Power and Effectiveness)

IAFF 6186 Special Topics in Security Policy Studies (NATO's Strategic Challenges)

IAFF 6186	Special Topics in Security Policy Studies (Nuclear Proliferation and Nonproliferation)
IAFF 6186	Special Topics in Security Policy Studies (Nuclear Strategy)
IAFF 6186	Special Topics in Security Policy Studies (Piracy and Irregular Threats)
IAFF 6186	Special Topics in Security Policy Studies (Political Risk Analysis)
IAFF 6186	Special Topics in Security Policy Studies (Political Violence and Terrorism)

IAFF 6358 Special Topics in Latin American and Hemispheric Studies (Security in the Americas)

LAW 6534 Law of the European Union (3 credit course only)

LAW 6552 Law of War *

*3 credit course only. Course has prerequisites which may not count for credit toward SPS program requirements.

Other courses may count toward specialization requirements with approval of the Program Director.

Professional skills courses (3 credits)

Three 1-credit skills courses from the following:

IAFF 6502 Professional Skills I

IAFF 6503 Professional Skills II

IAFF 6504 Intermediate Conversation

Electives (9 to 12 credits)

At least three substantive 3-credit courses. Students that have tested out of the tools requirement through fulfilling the language proficiency requirement will have to take a fourth 3-credit elective course.

Additional thesis option

Students wishing to continue to a PhD program or pursue a research-oriented job may consider writing a thesis, which is an independent, in-depth research project that takes a year or more to complete. Those students who wish to complete a thesis must do so in addition to the capstone requirement. Thesis credits will be counted as elective or specialization credits with Program Director approval. Students pursuing a thesis need a minimum 3.5 GPA and approval from the faculty member they wish to serve as their thesis director. Thesis students also need to complete at least one research methods course.

IAFF 6998 Thesis

IAFF 6999 Thesis

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes (<http://my.gwu.edu/mod/pws/>) for each semester's offerings.

Topics courses not listed here may, with permission of the Program Director, be used to fulfill program requirements.

Additional information regarding skills courses (<https://elliott.gwu.edu/professional-skills-courses/>), the capstone (<https://elliott.gwu.edu/global-capstone/>), and the thesis (<https://elliott.gwu.edu/thesis/>) is available on the Elliott School website.

**** Foreign language proficiency requirement**

Students may fulfill this requirement in one of the following ways:

- Having earned a minimum grade of *B* in a sixth-semester university-level advanced language course completed no more than three years prior to matriculation in the Elliott School's master's degree program.
- Having earned a minimum grade of *B* in a sixth-semester university-level advanced language course at GW, or in an approved course taken at another institution of higher learning, including Elliott School exchange partner institutions, while enrolled in the Elliott School master's program.
- Passing the Elliott School-administered foreign language proficiency reading and speaking examination at the currently-required level of proficiency (<https://elliott.gwu.edu/foreign-language-proficiency-requirement/>). The Elliott School administers foreign language proficiency examinations once in the fall and once in the spring semesters. Students should plan to take the language proficiency examination as soon as possible following their matriculation in the program. Students have three opportunities to pass the examination. Failure to pass the examination for a third time results in dismissal from the program.
- Achieving the required proficiency level in a reading and speaking examination administered by an Elliott School-approved foreign language assessment institution, at the student's expense, while enrolled in the Elliott School's Master's Degree Program.
